LH Reply Submission

London Hydro Inc. ("London Hydro") filed an application on September 11, 2014 with the Ontario Energy Board (the "OEB") under section 74 of the Ontario Energy Board Act, 1998, (the "Act") to amend its electricity distributor licence. The amendment sought reflects a temporary exemption until December 31, 2015, from section 5.1.3 a) of the Distribution System Code (the "DSC"). Section 5.1.3 a) requires distributors, starting August 21, 2014, to install a MIST (interval) meter on any new installation that is forecast by the distributor to have a monthly average peak demand during a calendar year of over 50 kW.

London Hydro applied for a temporary exemption until December 31, 2015, which will allow London Hydro time to implement a smart meter interface configuration for the MV90 data management system, currently under development by the manufacturer. London Hydro states that this approach will be the most efficient and cost effective conversion of this customer class to interval metering.

Board Staff filed interrogatories in respect to this application on November 4th, 2014. London Hydro filed its response to the interrogatories on November 19th, 2014. On December 4, 2014 Board Staff filed their submission with respect to London Hydro's request.

London Hydro concurs with Board staff's comments. London Hydro wishes to thank Board staff for their attention to this application.

All of which is respectfully submitted.
