Dear Board Secretary,

As a resident of Amherst Island I am writing to request an oral hearing on Amherst Island in respect to the Windlectric Inc. application to not only construct up to 37 wind turbines here but also construct transmission lines and 80 foot towers and substations close to our village and near our public school. The Board and the applicant need to understand the reality of living on this relatively small island and the high risks presented by the Windlectric Inc. application.

I would like to be given monitor status so that I will receive all documents for this application.

It seems to me that I have written to countless boards, committees, government officials et al. over the last few years re the risk of industrial accidents, spills, groundwater impact in many parts of the island and especially the risk to school children with a turbine very close to the school. Now we are hearing of transmission lines, 80 foot towers and substations not far from the school. I am very concerned about health, welfare and multiple dangers with which this whole project is fraught. Please give it your utmost serious consideration and keep us all informed.

Nancy Dunn
