Subject: Windlectric and File EB2014-0300 Request for oral hearing and monitor status

Without prejudice to all our rights

Ministry of the Environment and Climate Change

Dear Sir or Madam,

Please be advised of my desire that an open, oral hearing be held in regard to Windlectric's application to construct a high voltage line and submarine cable, install a substation, and erect steel poles up to 80 feet high on Amherst Island. Also I ask to be given monitor status.

There are too many problems connected with this wind turbine project including the unprofitable cost of wind power to the provincial consumer, the environmental problems for Island residents, dangers to wildlife, the impact on the Little's home next to the substation, the cost ineffectiveness of the turbines and associated costs ( see Dr. John Harrison's research) etc.

David M. Flint [REDACTED]

P.S. My wife and I have been owners of lakefront property on Amherst Island for over 30 years.
