**Subject:** RE EB 2014-0300 Windlectric Application - Request for Oral Hearing and Monitor Status

As a landowner on Amherst Island, I would like to request that the board hold an oral hearing on Windelectric's application for leave to construct a high voltage transmission line, including a submarine cable, a substation and poles up to 80 feet tall on the Island, just west of the school. This project, as part of the wind turbine development, threatens to negatively affect the nature, environment and culture of Amherst Island, so it is important that residents and land-owners have a chance to express their opinion.

Please register me as a monitor and give me notice of the proceedings.

Roger Smith
