LETTER OF COMMENT

Comments:

In April the 1st, 2014 Enbridge just got an approval from OEB for a 40% natural gas rates increase.
http://www.thestar.com/business/personal_finance/2014/04/13/as_natural_gas_prices_soar_is_relief_in_sight.html

In overall, the natural gas prices on the North American market are going down
<http://www.infomine.com/investment/metal-prices/natural-gas/1-year/>

The customers have all the rights to benefit from the competitive market low natural gas prices while using the flexible rate option. <http://www.ontarioenergyboard.ca/OEB/Consumers/OEB+and+You/Videos>

What we can see so far, despite of that the market natural gas prices went down since the last 40% rate increase, the Enbridge natural gas rates are going up again for whatever reason. Also, the time frame that is selected for the public hearing registration (Dec. 18, 2014 to Dec 30, 2014) is totally inappropriate as that is a busy holiday season when people less likely would pay attention to such publications placed in the end of the local newspaper.
