P.O. Box 2319
Toronto, ON M4P 1E4

Dear Ms. Walli:

EB-2014-0365 Wireless Attachment Consultation -- Hydro One Networks Inc.'s Submission

The Board, in its December 11, 2014 Memorandum sought comments on whether all distributors should be able to charge market rates for wireless attachments under the conditions included in THESL's licence (as a result of their application on this matter and the subsequent Board Decision EB-2014-0234).

Hydro One supports this initiative, however, Hydro One would like the flexibility to choose between implementing market rates for these attachments and continuing with Board-approved rates. In areas with few, if any "competitors" to the local utilities for pole attachments, the most efficient and fair solution would be the continuation of cost-based, regulated rates. Hydro One requests that distributors be given the opportunity to make the change according to their assessment of the situation.

Hydro One appreciates the opportunity to submit these comments.

An electronic copy of this submission has been filed using the Board's Regulatory Electronic Submission System.

Sincerely,
