

To The Ontario Energy Board:

My name is Peter Hoefelmayr and I am Director of 1829261 Ont. Ltd. who owns approx. 311 acres of land legally described as Lot 12-13 Concession 6, Manvers Township, City of Kawartha Lakes. Our property will be adversely affected by application EB-2013-0442 for a transmission line along Gray Road as part of the Sumac Ridge wind energy project. Our property abuts the proposed construction zone and transmission line route.

The only information I received about this application was a notice of a hearing back in January 2014 which I received too late to respond to. To date, I have NOT received any additional information although I understand WPD Canada was instructed by the Ontario Energy Board to ensure that all landowners are contacted. I understand the new deadline for comments is April 27th, 2014, but to date, I have not received any information about this application.

I oppose the Gray Road transmission line and the Sumac Ridge project because it will not produce a significant amount of energy. The alteration of Gray Road will invite unwanted traffic, trespassers and garbage that will negatively impact our property. The Sumac Ridge project will destroy a beautiful area on the Oak Ridges Moraine.

It is requested that application EB-2013-0442 be set aside since it is not in the public interest or serves the best interest of the consumer.

Yours truly,

Peter Hoefelmayr
