

Northern Catskill Audubon Society

Re: EBR Registry Number: 012 - 0774

*I oppose the Windlectric Renewable Energy Application on Amherst Island!
Unless
stringent environmental reviews are conducted, that are extensive and
unbiased, I
don't think that a wind farm can be safely sited on the island.
The island is too important an area for the suite of birds that call the
island home.*

*Wind turbines on Amherst Island will cause irreversible harm to the community
and
its natural and cultural heritage. Please do the right thing and reject this
application.*

Sincerely,

*Larry Federman
