# VIA COURIER, EMAIL AND RESS

Ms. Kirsten Walli Board Secretary Ontario Energy Board 2300 Yonge Street, 27<sup>th</sup> Floor Toronto, ON M4P 1E4

Dear Ms. Walli:

Re:

Niagara Peninsula Energy Inc. 2015 Cost of Service Rate Application

Board File No. EB-2014-0096

We are counsel to the Applicant, Niagara Peninsula Energy Inc. ("NPEI") in the above noted matter.

Pursuant to Procedural Order No. 1 dated November 18, 2014, please find attached the Partial Settlement Agreement in this matter.

If there are any questions, please contact the undersigned.

Yours very truly,

AIRD & BERLIS LLP

Scott Stoll

#### NIAGARA PENINSULA ENERGY INC.

#### EB-2014-0096

#### SETTLEMENT PROPOSAL

#### INTRODUCTION

Niagara Peninsula Energy Inc. ("**NPEI**") filed an application with the Ontario Energy board (the "**Board**") on September 23, 2014 for the 2015 Cost of Service ("**COS**") rate application (the "**Application**") with rates to be implemented effective May 1, 2015. The Board assigned the Application file number EB-2014-0096. On October 22, 2014 the Board issued a Letter of Direction directing NPEI to serve and publish the Notice of Application and Hearing.

On November 18, 2014 the Board issued Procedural Order No. 1 granting intervenor status and cost eligibility to Energy Probe Research Foundation ("**Energy Probe**"), the Vulnerable Energy Consumers Coalition ("**VECC**") and School Energy Coalition ("**SEC**"). Procedural Order No. 1 provided dates for written interrogatories, a technical conference and a settlement conference.

The settlement conference was duly convened on February 3, 2015 and continued on February 4, 2015 in accordance with the Board's *Rules of Practice and Procedure* (the "**Rules**") and the Board's *Settlement Conference Guidelines* (the "**Settlement Guidelines**") with partial settlement as detailed and explained herein. Mr. Chris Haussmann acted as facilitator for the settlement conference.

Energy Probe, VECC and SEC (collectively herein the "Intervenors") participated in the settlement conference. The Intervenors along with NPEI are called the "Parties".

In addition to the Parties, Ontario Energy Board staff ("Board Staff") participated in the settlement conference. The role adopted by Board Staff is set out on page 5 of the Settlement Guidelines. Board Staff is not a Party to the Settlement Proposal, however, Board Staff that participated in the settlement conference are bound by the same requirements with respect to confidentiality and privilege as apply to the Parties to the proceeding.

This document is called a "Settlement Proposal" because it is proposed by the Parties to the Board to settle certain issues in this proceeding. It is termed a proposal as between the Parties and the Board. However, as between the Parties, and subject only to the Board's approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual rights and obligations, and be binding and enforceable in accordance with its terms. As set forth later in the Preamble, this agreement is subject to a condition subsequent, that if this Settlement Proposal is not accepted by the Board in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering this agreement, the Parties understand and agree that, pursuant to the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B) (the "**Act**") the Board has the exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

Niagara Peninsula Energy Inc. EB-2014-0096 Proposed Partial Settlement Agreement February 25, 2015 Page 5 of 37

For the purpose of this Settlement Proposal, the following terms have the meaning ascribed hereto:

"Complete Settlement" means an issue for which complete settlement was reached by all Parties, and if this Settlement Proposal is accepted, the Parties will not adduce any evidence or argument during the oral hearing in respect of these issues.

"Partial Settlement" means an issue for which there is partial settlement, as NPEI and the Intervenors who take any position on the issue were able to agree on some, but not all, aspects of the particular issue. If this Settlement Proposal is accepted by the Board, Parties who take any position on the issue will only adduce evidence and argument during the oral hearing on those portions of the issues not addressed in this Settlement Proposal.

"No Settlement" means an issue for which no settlement was reached. NPEI and the Intervenors who take a position on the issue will adduce evidence and/or argument at the oral hearing on such issue.

If applicable, a Party who is noted as taking no position on an issue may or may not have participated in the discussion of that particular issue, but in either case, such Party shall take no position (a) on the settlement reached; and (b) on the sufficiency of evidence filed to date.

The settlement proceeding are subject to the rules relating to confidentiality and privilege contained in the Settlement Guidelines. The Parties understand this to mean that the documents and other information provided, the discussion of each issue, the offers and counter-offers, and the negotiations leading to settlement – or not – of each issue during the settlement conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with the following exception – the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal.

The Settlement Proposal provides a brief description of each of the settled and partially settled issues, as applicable, together with references to the evidence. The Parties agree that references to the evidence in this Settlement Proposal shall, unless the context requires otherwise include: (a) the Application and pre-filed evidence; (b) responses to interrogatories; (c) responses to undertakings; (d) the additional information included in this Settlement Proposal and (e) the Appendices to this Settlement Proposal. The Parties agree that, for each settled and partially settled issue, as applicable, the evidence in respect of such settled or partially settled issue, as applicable, is sufficient in the context of this overall settlement to support the Settlement Proposal and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance of this Settlement Proposal by the Board.

The Appendices to this Settlement Agreement provide further support for the Settlement Proposal. The Parties acknowledge that the Appendices were prepared by NPEI. While the Intervenors have reviewed the Appendices, the Intervenors are relying upon their accurate preparation by NPEI, and the accuracy of the underlying evidence, in entering into this Settlement Proposal.

Niagara Peninsula Energy Inc. EB-2014-0096 Proposed Partial Settlement Agreement February 25, 2015 Page 6 of 37

In certain situations, an appendix reflects the methodology agreed to by the Parties, and the Parties recognize that the Board's decision on a disputed issue may have an impact on such appendix. Pursuant to the Settlement Guidelines (p.3) the Parties must consider whether a settlement proposal should include an appropriate adjustment for any settled issue that may be affected by external factors. Because this is a partial settlement, to the extent that issues are inter-related, a number of the other issues may require further adjustment after the Board has rendered its decision in this proceeding. Wherever possible, these adjustments have been set out in the text of this Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the Board does not accept this Settlement Proposal in its entirety, then there is no settlement unless the Parties agree that this settlement proposal may continue as a valid settlement without the inclusion of those parts that the Board does not accept.

In the event the Board directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no party will be obligated to accept any proposed revision. The Parties agree that all of the Parties who took on a position on a particular issue must agree with any revised Settlement Proposal as it relates to that issue prior to its re-submission to the Board.

Unless otherwise stated, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of the Parties to raise the same issue and/or take any position thereon in any other proceeding, whether or not NPEI is a party to such proceeding.

In this Settlement Proposal, wherever there is a reference to any item the Parties accept or agree, there shall be deemed to be included the caveat "for the purpose of settlement or partial settlement of the issues in this proceeding", and each such reference shall be read as if that phrase were included.

For ease of reference, the Settlement Proposal follows the approved Issues List dated January 29, 2015 with additional sub-issues included to capture the agreement of the Parties.

# **SUMMARY OF PROPOSAL**

The Parties are pleased to advise the Board that they have been able to completely settle all issues in this proceeding except two: a) the percentage to be applied to compute the working capital component of Rate Base, and b) the fixed/variable rate design split for the Residential rate class.

In reaching this Settlement Proposal, the Parties have been guided by the Filing Requirements for 2015, the approved Issues List and the Report of the Board titled *Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach* dated October 18, 2012 ("**RRFE**").

Niagara Peninsula Energy Inc. EB-2014-0096 Proposed Partial Settlement Agreement February 25, 2015 Page 7 of 37

The Parties recognize that this Application is a transition from Canadian Generally Accepted Accounting Principles ("CGAAP") to Modified International Financial Reporting Standards ("MIFRS"). The Parties have taken these facts into consideration in developing this Settlement Proposal.

The Settlement Proposal presents a partial settlement of issues in this proceeding. The Parties, believe that, if accepted by the Board as requested, and subject to the Board's determination with respect to the matters not settled, this Settlement Proposal will result in revenues for NPEI sufficient to allow NPEI to provide safe and reliable service to its customers, and to meet the expectations of its customers, and the Board, as outlined in the RRFE.

The Parties also believe that the agreement will narrow the issues to be heard in an oral hearing and determined by the Board. The following are the two areas of disagreement among the Parties that are proposed to go to oral hearing if this Settlement Proposal is accepted by the Board.

- 1. Rate Base & Revenue Requirement (Issues: 1.1 and 2): The Parties are not able to agree that NPEI's use of the default 13% working capital allowance is appropriate. This has an impact on the following components of this Settlement Proposal, including Rate Base, Cost of Capital, PILs, and Revenue Requirement. The calculations throughout this Settlement Proposal have been based upon a 13% WCA. The use of 13% is not intended by the Parties to be presumptive of the Board's decision, nor indicative of the appropriate WCA percentage. It is used as a neutral placeholder. The Parties have agreed that the final percentage and the calculations derived therefrom should be determined by the Board after an oral hearing.
- 2. Rate Design (Issues: 3.4 Fixed/Variable Split Residential): The Parties are unable to agree that the Applicant's proposed fixed-variable split for the Residential rate class is appropriate. The Applicant has proposed an increase in the fixed charge. The calculations of rates and rate impacts throughout this Settlement Proposal have been based on the Applicant's proposal. The use of the Applicant's proposed fixed charge is not presumptive of the Board's decision, nor indicative of the appropriate fixed charge. It is used as a neutral placeholder. The Parties have agreed that the residential fixed/variable split and calculations derived therefrom should be determined by the Board after an oral hearing.

## 1. **PLANNING**

# 1.1 Capital

Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to:

- (a) customer feedback and preferences;
- (b) productivity;
- (c) benchmarking of costs;
- (d) reliability and service quality;
- (e) impact on distribution rates;
- (f) trade-offs with OM&A spending;
- (g) government-mandated obligations; and
- (h) the objectives of the Applicant and its customers.

# **Complete Settlement – Capital expenditures included in Rate Base**

The Parties acknowledge that NPEI has updated the 2014 projected gross capital additions as at January 29, 2015 in the amount of \$14,290,332 with disposals of \$633,627 for net capital additions in the amount of \$13,656,705 for 2014. In addition, NPEI has updated 2014 projected depreciation to \$5,584,900. The Parties accept the resulting updated 2014 ending Net Fixed Assets in the amount of \$120,214,731, and as the appropriate opening balances for 2015. See Appendix 1.1-A which details the 2014 Appendix 2-BA Fixed Asset Continuity Schedule.

The Parties accept NPEI's 2015 Test Year gross capital additions in the amount of \$10,871,580 and disposals in the amount of \$313,581. NPEI has removed from the 2015 Test Year the capital project related to the purchase of the Niagara Parks Commission ("NPC") Primary Network in the amount of \$818,905, and also removed \$28,000 of capital expenditures related to the Other Post-Employment Benefits ("OPEB") allocated to capital. NPEI has also included \$42,640 in the 2015 Test Year Rate Base related to paving work which was delayed from the end of 2014 to 2015 due to weather. NPEI has therefore updated depreciation expense for the 2015 Test Year for the 2014 updated projected capital additions, the removal of the NPC capital project and OPEB's allocated to capital and the inclusion of the paving work. The 2015 Test Year depreciation totals \$5,034,074 after these adjustments. The Parties accept the resulting 2015 Test Year ending Net Fixed Assets in the amount of \$126,052,242. See Appendix 1.1-A which details the 2015 Appendix 2-BA Fixed Asset Continuity Schedule.

The Parties therefore accept the Average Gross Fixed Assets in the amount of \$246,244,429, the Average Accumulated Depreciation in the amount of \$123,110,940, and the Average Net Fixed Assets in the amount of \$123,133,484 to be included in the 2015 Test Year Rate Base. Please see Appendix 1.1-B-RRWF model.

# **Complete Settlement – Working Capital Allowance Base**

The Parties were able to settle the appropriate components of the calculation of the Working Capital Allowance Base which incorporates the settlement of Operations, Maintenance and Administration expenses in the amount of \$16,424,995 for the 2015 Test Year and the 2015 Test Year Cost of Power which incorporates the settlement of the load forecast and totals \$144,149,668. All components of the Cost of Power are agreed upon. This figure includes the update to commodity pricing based on the Board's RPP Price Report November 1, 2014 to October 31, 2015 and the update to Retail Transmission Service Rates to reflect the 2015 Uniform Transmission Rates from the EB-2014-0357 Rate Order dated January 8, 2015 for Hydro One. The Parties therefore agree to the resulting Working Capital Allowance Base in the amount of \$160,574,663 for the 2015 Test Year. See Appendix 1.1-C – Cost of Power for the details related to the Cost of Power calculation.

## **No Settlement - Working Capital Allowance Percentage**

The Parties were unable to agree on the appropriate percentage for the working capital allowance and therefore are unable to agree on the calculated allowance for working capital. NPEI applied for a 13% working capital allowance provided for in the Filing Requirements. The Application originally requested recovery of \$20,018,027 in Allowance for Working Capital. The use of 13% is not intended by the Parties to be presumptive of the Board's decision, nor indicative of the appropriate WCA percentage. It is used as a neutral placeholder. The Parties have agreed that the final percentage and the calculations derived therefrom should be determined by the Board after an oral hearing. This figure, has been updated to incorporate the agreed upon components of the Working Capital Allowance Base as a result of interrogatories, undertakings and settlement in the amount of \$20,874,706.

The Parties have agreed to ask the Board to hear this issue of the appropriate percentage by way of an oral hearing.

NPEI has agreed that, regardless of the Board's decision on the appropriate percentage, NPEI will undertake a lead/lag study prior to its next Cost of Service rate application, unless the Ontario Energy Board completes a generic hearing that is determinative of this issue prior to that time.

The Parties acknowledge that, if the Board determines that a percentage other than 13% is appropriate, mathematical adjustments to Allowance for Working Capital, Rate Base, Cost of Capital, PILs, and other aspect of this Settlement Proposal will be required.

| Opposing Parties:                   | None  |  |

#### Partial Settlement – Rate Base

NPEI originally applied for a Rate Base of \$143,761,898 using the 13% Working Capital Allowance as per the Filing guidelines, and has updated its Rate Base amount as a result of interrogatories, undertakings and settlement proceedings in the amount of \$144,008,190. See Appendix 1.1-B — Revenue Requirement Work Form ("RRWF") and the RRWF tracking form. Subject to the Board's determination on Working Capital Allowance Percentage, the Parties have accepted the revised proposed Rate Base for the 2015 Test Year.

The Parties acknowledge NPEI may need to recalculate the Rate Base to reflect the Board's decision on Working Capital Allowance Percentage.

# **Partial Settlement - Capital Structure and Cost of Capital**

The Parties have agreed that a capital structure comprised of 4% short term debt at 2.16%; 56% long-term debt updated as a result of settlement at 3.92% and 40% equity at 9.30% return on equity is appropriate. See Appendix 1.1-D-Capital Structure and Cost of Capital for updated Appendix 2-OA and Appendix 2-OB.

The short-term debt rate, long-term debt rate used for affiliate debt and return on equity are set out in the Board's letter of November 20, 2014. The long-term debt is a weighted average of the affiliate debt held by NPEI's shareholder, Niagara Falls Hydro Holding Corporation and the City of Niagara Falls, at the Board's deemed rate for affiliate debt, third party debt at the incurred rate and unfunded debt at the weighted average cost of debt. The latter is a change from the Application, which calculated the unfunded debt at the deemed rate. This change has been made to be consistent with the Board's decisions in EB-2008-0272 and EB-2008-0235. The weighted average cost of capital is reduced from 6.23% to 6.00%.

NPEI will update the dollar amount of its Cost of Capital to reflect any changes resulting from the Board's decision pertaining to Working Capital Allowance.

#### 1.2 **OM&A**

Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:

- (a) customer feedback and preferences;
- (b) productivity;
- (c) benchmarking of costs;
- (d) reliability and service quality;
- (e) impact on distribution rates;
- (f) trade-offs with capital spending;
- (g) government-mandated obligations; and
- (h) the objectives of the Applicant and its customers.

## Complete Settlement - OM&A

The Parties have been able to agree on the planned OM&A expenditures for the 2015 Test Year. NPEI is requesting \$16,424,995 for OM&A be included in rates, as set out in more detail in the summary table below. This includes \$287,232 in property taxes, as detailed in Section 1.2.1 below. This amount was updated from the original application to reflect the responses to interrogatories and undertakings, and then adjusted as part of the settlement. NPEI originally applied for planned OM&A expenditures in the amount of \$17,041,580. The Parties have agreed to a reduction of \$223,000 related to water labour billing activities, a reduction of \$74,000 related to OPEB's recorded in OM&A, \$19,663 related to regulatory expenses and a general reduction in the amount of \$299,922 to the planned OM&A expenditures for the 2015 Test Year.

A summary table of the revised OM&A Budget is as follows:

|                            |                | Interrogatory |             |                |

|                            | Original       | Adjustment    |             |                |
|                            | Submission COS | Regulatory    | Settlement  | Settled - 2015 |
|                            | 2015 Test Year | Expenses      | Adjustments | Test Year OM&A |
|                            | \$             | \$            | \$          | \$             |
|                            |                |               |             |                |
| Operations                 | 4,291,150      |               | (110,000)   | 4,181,150      |
| Maintenance                | 2,554,924      |               | (115,923)   | 2,439,001      |
| Billing & Collection       | 5,609,882      |               | (361,000)   | 5,248,882      |
| Community Relations        | 69,600         |               | -           | 69,600         |
| Administration and General | 4,516,024      | (19,662)      | (10,000)    | 4,486,362      |
| Total OM&A                 | 17,041,580     | (19,662)      | (596,923)   | 16,424,995     |

The Parties agree that the Board should establish a Deferral and Variance account to record the incremental meter reading costs that may be incurred as a result of the amendment to section 5.1.3 of the DSC including the following:

"For the purposes of measuring energy delivered to the customer, a distributor shall:

- a) install a MIST meter on any new installation that is forecast by the distributor to have a monthly average peak demand during a calendar year of over 50 kW; and
- b) Have until August 21, 2020 to install a MIST meter on any existing installation that has a monthly average peak demand during a calendar year of over 50 kW." (Distribution System Code, Section 5.1.3)

The amendments to section 5.1.3 came into force on August 21, 2014.

As part of its' capital spending NPEI is planning to complete the installation of 183 MIST meters per year between 2015 and 2019 to comply with section 5.1.3 of the DSC. As such, NPEI originally included in its application, \$131,760 which was the average annual incremental increase in metering reading costs related to installing MIST meters for the period from 2015 to 2019. This amount has been reduced by \$88,000 as part of the general OM&A reduction to \$43,760 which represents only the incremental meter reading costs associated with the 2015 Test Year.

# 1.2.1 Complete Settlement - Property Tax and LEAP

The Parties agree that the inclusions in operating costs of \$287,232 for Property Tax and \$37,166 for LEAP Program funding are appropriate. NPEI calculated LEAP in accordance with the Chapter 2 Filing Requirements for Electricity Distribution Rate Applications-Cost of Service dated July 17, 2013.

## 2. REVENUE REQUIREMENT

# 2.1 Are all elements of the Base Revenue Requirement reasonable?

# Partial Settlement - Base Revenue Requirement

After adjustments for interrogatories, undertakings and settlement on issues achieved to reach this partial settlement, and subject to the Board's determination with respect to Working Capital Allowance Percentage, the Parties agreed to the amount of \$28,665,192 as the Base Revenue Requirement. Each of the elements of the Base Revenue Requirement is dealt with separately in this Settlement Proposal.

# **Complete Settlement - Other Revenue**

NPEI charges for certain activities whose costs are recovered through Specific Service Charges and Retailer Charges as detailed in Appendix 2.1-A-Specific Service Charges. The Parties have agreed that Other Operating Revenue in the amount of \$1,602,522 is the appropriate revenue offset for the purpose of calculating Service Revenue Requirement for the 2015 Test Year The Board's Appendix 2-H Other Operating Revenue can be found in Appendix 2.1-B-Other Operating Revenue.

- 3. LOAD FORECAST, COST ALLOCATION AND RATE DESIGN
- 3.1 Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate? Are they an appropriate reflection of the energy and demand requirements of the applicant's customers?

# Complete Settlement - Customer Forecast, load forecast, CDM and billing determinants

The Parties agree that the customer forecast, load forecast, CDM adjustment and resultant billing determinants set forth below are appropriate. For the 2015 test year, the Parties have agreed that a billed energy forecast of 1,208.063 GWh is appropriate. The Board's Appendix 2-IA, which can be found in Appendix 3.1-A, provides the agreed allocation across the various rate classes.

The Table below provides the customer / connection forecast for the 2015 Test Year.

#### **Customer/Connection Counts**

In response to Interrogatories, NPEI revised the CDM adjustments for 2013 and 2015, made a correction for the double counting of 2014 and 2015 CDM results, and updated the regression equation used to forecast the 2015 Test Year purchased energy. The table below provides the resulting 2015 weather normalized billed energy forecast by rate class.

## 2015 Weather Normalized Billed kWh Forecast

The billed kW demand forecast for the 2015 Test Year is based on a three year average ratio of kW to kWh for the classes that are billed distribution revenue on a demand basis. The table below shows the 2015 Test Year kW forecast.

2015 Billed kW Forecast

| Class           | 2015 Test Year<br>Originally<br>Filed | 2015 Test Year<br>Filed with<br>Interrogatories<br>and Technical<br>Conference |           |
|-----------------|---------------------------------------|--|-----------|

During the Interrogatory process, NPEI updated the CDM results that were incorporated into the weather normalized load forecasting model. The Parties agree that for the purposes of LRAMVA, the amount of CDM savings that are included in the 2015 Test Year Load Forecast is 15,433,325 kWh (on a net basis). The corresponding demand reduction for the GS>50 kW class that has been included in the 2015 Test Year Demand Forecast is 25,326 kW. The table below provides a summary of the CDM results that have been included in the 2015 Test Year forecasts.

# 2015 Expected CDM Savings for LRAM Variance Accounts

|                  | Residential | General<br>Service < 50<br>kW | General<br>Service > 50<br>kW | Streetlights | Sentinel<br>Lights | Unmetered<br>Scattered<br>Load | Total      |
|------------------|-------------|-------------------------------|-------------------------------|--------------|--------------------|--------------------------------|------------|
| 2015 CDM net kWh | 3,006,321   | 3,468,020                     | 8,958,983                     | -            | -                  | -                              | 15,433,325 |

# 3.2 Is the proposed cost allocation methodology, allocations, and revenue-to-cost ratios appropriate?

# **Complete Settlement - Cost Allocation & Revenue to Cost Ratios**

The Parties agree that the cost allocation and adjustments to the revenue-to-cost ratios are appropriate.

The Cost Allocation Model, which is included in Excel format as Appendix 3.2-A, has been updated as per the agreed upon settlement items. Appendix 3.2-A includes an updated OEB Appendix 2-P. It may need to be modified based on the Board's decision on Working Capital Allowance Percentage.

The following table provides the agreed upon revenue-to-cost ratios, which includes moving the GS>50 kW class to 120% in the 2015 Test Year, and bringing all of the classes that are below 100% up to the same percentage, 91.65%.

# **Revenue-to-Cost Ratios**

3.3 Are the applicant's proposals for rate design appropriate?

# **Partial Settlement - Rate Design**

Subject to Section 3.4 below, the Parties agree that with the exception of the Applicant's proposed fixed-variable split for the Residential class, the rate design is appropriate.

# 3.3.1 Are the applicant's proposals regarding its fixed/variable ratios appropriate?

## Partial Settlement - Fixed/Variable ratios

The Parties are unable to agree on the fixed/variable split for the Residential class. NPEI has proposed a fixed/variable split of 65%/35% for the Residential rate class. The Parties have agreed that this should be determined by the Board after an oral hearing.

The table below provides the revised fixed/variable splits, which for all rate classes except the Residential class are based on the outcomes agreed to by all Parties. For the GS>50 kW class, all Parties have agreed that the fixed rate should be set at the Minimum System with PLCC rate from the Cost Allocation Model. For the GS<50 kW, Sentinel Lights, Streetlighting and Unmetered Scattered Load classes, the current fixed/variable split has been maintained.

| FIXED / VARIABLE REVENU                     | E SPLITS        |                                  |                         |                     |         |               |                 |                      |

As indicated in the table above, for Residential customers with an average monthly consumption greater than 500 kWh, the proposed 65% fixed / 35% variable split results in a lower total bill increase than maintaining the existing fixed / variable split.

# 3.4 Are the proposed Retail Transmission Service Rates appropriate?

## **Complete Settlement - Retail Transmission Service Rates**

For the purpose of achieving partial settlement of the issues herein, the Parties agree the proposed Retail Transmission Service Rates are appropriate. NPEI updated the Uniform Transmission Rates as per the 2015 Uniform Transmission Rates from the EB-2014-0357 Rate Order dated January 8, 2015 for Hydro One. See Appendix 3.5-A-RTSR updated model, NPEI filed this model in excel.

## 4. **ACCOUNTING**

4.1 Have all impacts of any changes in accounting standards, policies, estimates and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

# **Complete Settlement - Accounting**

The Parties accept the evidence of NPEI that all impacts of changes to accounting standards, policies, estimates and adjustments, including those arising out of the IFRS transition, have been properly identified and recorded in accordance with the Board's policies, and properly reflected in rates.

| Evidence: Accounting |  |  |

4.2 Are the applicant's proposal for deferral and variance accounts, including the balances in the existing accounts and their disposition, the continuation of existing accounts, and the two proposed new accounts, appropriate?

# **Complete Settlement - Deferral and Variance Accounts**

The Parties have agreed with the disposition of the deferral and variance accounts as summarized in the Table below. Balances of all accounts in Group 1 and Group 2 including accounts 1589 and 1592 are to be disposed of over a 12 month period. The Parties agreed upon the allocators to be used to dispose of the balance in the Group 1, Group 2, Account 1592 and Account 1576. The Parties also agreed upon the Billing determinants to be used as per the updated EDDVAR model included in Appendix 4.2-A.

This Settlement proposal includes an agreement by NPEI to set up an OPEB IFRS transition Deferral and Variance account to record a payable to customers related to OPEBs on transition to IFRS in the amount of \$1,570,621. A draft accounting order with respect to that account is attached as Appendix 4.2-B..

The Parties have agreed that the 1508 IFRS transition account should be closed effective January 1, 2015.

The Parties have further agreed that Account 1576 will be repaid to customers over a 24 month period. In addition, the weighted average cost of capital updated to 6.00% has been changed as a result of interrogatories, undertakings and settlement from 6.23% in the Original application. The Parties therefore agree that the balance in Account 1576 is the amount of \$6,910,688. See Appendix 4.2-A-Appendix 2-EC.

The Parties agree to a Deferral Account for incremental MIST costs as set out under Issue 1.2 above. A draft accounting order with respect to that account is attached as Appendix 4.2-C.

The Parties agree that the Board should not make a determination on the clearance of the LRAMVA in this proceeding. NPEI agrees to file a separate application to clear the LRAMVA, covering the period from 2011 to 2014, in 2015 once the 2014 OPA Final Verified results are received.

Stranded meters' expenses in the amount of \$1,283,704 are to be recovered over a two year period as agreed to by the Parties.

## 5. **OTHER**

# 5.1 Is the applicant's proposal with respect to the purchase of the Niagara Parks Commission Assets appropriate from a capital-planning, service and rate-making perspective?

# **Complete Settlement - NPC Assets**

The Parties have agreed that NPEI should remove from the 2015 Test Year the capital project related to the purchase of the Niagara Parks Commission ("NPC") Primary Network in the amount of \$818,905and \$11,699 of depreciation expense in the 2015 Test Year that was related to the purchase of the NPC assets. The NPC assets were removed because the Parties were not sufficiently certain that the transaction would be completed in the 2015 Test Year. NPEI agrees that it will not apply for an ICM, or a Z-factor, during its IRM term that seeks to recover from ratepayers, directly or indirectly, any costs of, or related to, the acquisition, enhancement, refurbishment, replacement, maintenance, or operation of the NPC assets.

## 5.2 Is the termination of water billing appropriately reflected in the application and the proposed revenue requirement?

### **Complete Settlement – Water Billing Activities**

The Parties were able to reach a complete settlement with respect to whether the termination of water billing is appropriately reflected in the Application and the Revenue Requirement. NPEI has agreed to reduce OM&A billing expenses by \$223,000 as a result of interrogatories, undertakings and settlement.

5.3 Are all aspects of the merger, including savings (between the former Niagara Falls Hydro Inc. and the former Peninsula West Utilities Ltd.) appropriately accounted for in the application and the proposed revenue requirement?

### **Partial Settlement – Merger Savings**

The Parties agree that, with one exception, all aspects of the merger including savings (between the former Niagara Falls Hydro Inc. and the former Peninsula West Utilities Ltd.) are appropriately accounted for in the Application and the Revenue Requirement. The Parties have not agreed that the impact of the merger on Working Capital Allowance has been appropriately reflected in the Revenue Requirement. The Parties agree that this issue is part of Issue 1.1, and should be determined by the Board after an oral hearing.

### Notes:

Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). General Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%) Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc.,
- use colimn M and Adjustments in column I
- (3) (4) (5) Net of addbacks and deductions to arrive at taxable income.
- Average of Gross Fixed Assets at beginning and end of the Test Year
  Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- (7) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- 4.0% unless an Applicant has proposed or been approved for another amount.
- Starting with 2013, default Working Capital Allowance factor is 13% (of Cost of Power plus controllable expenses). Alternatively, WCA factor based on lead-lag study or approved WCA factor for another distributor, with supporting rationale

Appendix 2.1-A—Specific Service Charges

### SPECIFIC SERVICE CHARGES

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

### **Customer Administration**

| Returned cheque (plus bank charges)   | \$ | 20.00 |

| Specific Charge for Access to the Power Poles - \$/pole/year          | \$ | 22.35    |

### **RETAIL SERVICE CHARGES (if applicable)**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

| One-time charge, per retailer, to establish the service agreement between the distributor and the retailer | \$       | 100.00    |
|--|----------|-----------|
| Monthly Fixed Charge, per retailer   | \$       | 20.00     |
| Monthly Variable Charge, per customer, per retailer  | \$/cust. | 0.50      |
| Distributor-consolidated billing monthly charge, per customer, per retailer                                | \$/cust. | 0.30      |
| Retailer-consolidated billing monthly credit, per customer, per retailer                                   | \$/cust. | (0.30)    |
| Service Transaction Requests (STR)   |          |           |
| Request fee, per request, applied to the requesting party  | \$       | 0.25      |
| Processing fee, per request, applied to the requesting party   | \$       | 0.50      |
| Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail                |          |           |
| Settlement Code directly to retailers and customers, if not delivered electronically through the           |          |           |
| Electronic Business Transaction (EBT) system, applied to the requesting party                              |          |           |
| Up to twice a year   | \$       | no charge |
| More than twice a year, per request (plus incremental delivery costs)                                      | \$       | 2.00      |

### Appendix 2-I Load Forecast CDM Adjustment Work Form (2015)

The 2014 bridge year is the last year of the current four year (2011-2014) CDM program, and 2015 is the first year of a new six year (2015-2020) CDM program, per the Ministirial directives of March 31, 2014. Thus, with 2015, there is a need to recognize the final year of the current 2011-2014 CDM program, as well as to estimate reasonable impacts each year for the new 2015-2020 CDM program. These are combined to estimate the adjustment for CDM program impacts on the 2015 load forecast.

Appendix 2-I was developed to help determine what would be the amount of CDM savings needed in each year to cumulatively achieve the four year 2011-2014 CDM target. This then determined the amount of kWh (and with translation, kW of demand) savings that were converted in dollars balances for the LRAMVA, and also to determine the related adjustment to the load forecast to account for OPA-reported savings. Beginning for the 2015 year, it has been adjusted because of the persistence of 2011-2014 CDM programs will be an adjustment to the load forecast in addition to the estimated savings for the first year (2015) for the new 2015-2020 CDM plan.

It is assumed that the new six year (2015-2020) CDM program will work similar to the existing 2011-2014 CDM program, meaning that distributors will offer programs each year that, cumulatively over the six years (from January 1, 2015 to December 31, 2020) will cumulatively achieve the new six year CDM target. This is the approach contemplated in the Ministerial directive letters of March 31, 2014 to the Board and to the OPA. Thus, distributors will be able to offer programs on a basis so that cumulatively over the period, the impacts, including persistence, of the CDM programs will accumulate towards achieving each distributor's 2015-2020 CDM target.

With this approach, it is necessary to account for estimated savings for the last year of the current program, particularly the estimated savings for new CDM programs offered in 2014, as well as the estimated savings for new CDM programs that the distributor will offer in 2015 towards achievement of the new six year (2015-2020) CDM program. This necessitates expansion of this Appendix 2-I to deal with both the 2011-2014 and 2015-2020 CDM plans. It is expected that this approach will be updated each year.

#### 2011-2014 CDM Program - 2014, last year of the current CDM plan

Input the 2011-2014 CDM target in Cell B21.

Input the measured results for 2011 CDM programs for each of the years 2011 and persistence into 2012, 2013 and 2014 into cells B31 to E31. These results are taken from the final 2011 CDM Report issued by the OPA for that distributor in the fall of 2012.

Measured results for 2012 CDM programs for each of the years 2012 and persistence into 2013 and 2014 are input into cells C32 to E32. These results are taken from the final 2012 CDM Report issued by the OPA for that distributor in the fall of 2013.

Measured results for 2013 CDM programs for each of the years 2013 and persistence into 2014 are input into cells C33 to E33. These results are taken from the final 2013 CDM Report issued by the OPA for that distributor in the fall of 2014. Until that report is issued, the distributor should use the results from the preliminary 2013 CDM Report issued in the spring of 2014.

Based on these inputs, the residual kWh to achieve the 4 year CDM target icalculated for 2014 CDM under the assumption that the distributor will at least achieve the 2011-2014 CDM target that is currently a condition of the utility's Distribution Licence. If the distributor has met its cumulative kWh savings target by the end of 2013, the incremental savings for 2014 are assumed to be zero. Any further savings for 2014 CDM savings and any further compensation for meeting or exceeding the four-year (2011-2014) targets will be dealt with through the disposition of the 2011-2014 LRAMVA balance, which will occur in the next cost of service application filed after the final 2014 CDM Reports issued by the OPA in the fall of 2015.

#### 2015-2020 CDM Program - 2015, first year of the current CDM plan

For the first year of the new 2015-2020 CDM plan, it is assumed that each year's program will achieve an equal amount of new CDM savings. The new targets for 2015-2020 do not take into account persistence beyond the first year, but the OPA will encourage distributors to promote and implement CDM plans that will have longer term persistence of savings. This results in each year's program being about 1/6 (18.67%) of the cumulative 2015-2020 CDM target for kWh savings. A distributor may propose an alternative approach but would be expected to document in its application why it believes that its proposal is more reasonable. In its proposal, the distributor should ensure that the sum of the results for each year's CDM program from 2015 to 2020 add up to its 2015-2020 CDM target as

|                   |               | 6 Ye          | ar (2015-2020) kW | h Target:     |               |               |               |

#### **Determination of 2015 Load Forecast Adjustment**

The Board has determined that the "net" number should be used in its Decision and Order with respect to Centre Wellington Hydro Ltd.'s 2013 Cost of Service rates (EB-2012-0113). This approach has also been used in Settlement Agreements accepted by the Board in other 2013 and 2-14 applications. The distributor should select whether the adjustment is done on a "net" or "gross" basis, but must support a proposal for the adjustment being done on a "gross" basis. Sheet 2-I defaults to the adjustment being done on a "net" basis consistent with Board policy and practice.

From each of the 2006-2010 CDM Final Report, and the 2011, 2012 and 2013 CDM Final Reports, issued by the OPA for the distributor, the distributor should input the "gross" and "net" results of the cumulative CDM savings for 2014 into cells D31 to E33. The model will calculate the cumulative savings for all programs from 2006 to 2012 and determine the "net" to "gross" factor "g".

| r  | Net-to-Gross C | onver | sion         |   |                   |   |                               |

The default values represent the factor that each year's CDM program is factored into the manual CDM adjustment. Distributors can choose alternative weights of "0", "0.5" or "1" from the drop-down menu for each cell, but must support its alternatives.

These factors do not mean that CDM programs are excluded, but also reflect the assumption that impacts of 2011 and 2012 programs are already implicitly reflected in the actual data for those years that are the basis for the load forecast prior to any manual CDM adjustment.

Weight Factor for Inclusion in CDM Adjustment to 2014 Load Forecast

|  | 2011                            | 2012                                 | 2013                   | 2014              | 2015              |   |

#### 2011-2014 and 2015-2020 LRAMVA and 2015 CDM adjustment to Load Forecast

One manual adjustment for CDM impacts to the 2015 load forecast is made. However, the distributor will have two associated annualized CDM impacts, one for the 2011-2014 CDM program and the second for the 2015-2020 CDM plan. In addition, the distributor needs to reflect the CDM adjustment that was explicitly factored into its 2011 load forecast in its 2011 cost of service application (assuming that it rebased in that year). this amount, and equal persistence for 2012, 2013 and 2014 is used as an offset to determine what the net balance of the 2011-2014 LRAMVA balance should be for disposition.

The Amount used for the CDM threshold of the LRAMVA is the kWh that will be used to determine the base amount for the LRAMVA balance for 2014, for assessing performance against the four-year target. The base amount for 2011-2013 is 0 (zero) for 2014 Cost of Service applications, as the utility rebased prior to the 2011-2014 CDM programs, and there was no adjustment to reflect the impacts of the 2011-2014 programs on the load forecast used to determine their last cost of service-based rates.

The proposed loss factor should correspond with the loss factor calculated in Appendix 2-R

The Manual Adjustment for the 2015 Load Forecast is the amount manually subtracted from the load forecast derived from the base forecast from historical data, and is intended to reflect the further CDM savings that the distributor needs to achieve assuming that they meet 100% of the 2011-2014 CDM target that is a condition of their target.

If the distributor has developed their load forecast on a system purchased basis, then the manual adjustment should be on system purchased basis, including the adjustment for losses. If the load forecast has been developed on a billed basis, either on a system basis or on a class-specific basis, the manual adjustment should be on a billed basis, excluding losses.

The distributor should determine the allocation of the savings to all customer classes in a reasonable manner (e.g. taking into account what programs and what OPA-measured impacts were directed at specific customer classes), for both the LRAMVA and for the load forecast adjustment.

|   | 2011         | 2012          | 2013         | 2014<br>kWh  | 2015          | Total for 2014 | Total for 2015 |
|---|--------------|---------------|--------------|--------------|---------------|----------------|----------------|
| Amount used for CDM<br>threshold for LRAMVA (2015)  | 4,942,830.00 | 5,615,949.00  | 3,682,087.00 | 3,026,658.00 |               | 17,267,524.00  |                |
| 2011 CDM adjustment (per<br>Board Decision in 2011 Cost of<br>Service Application)                    | 5,800,000.00 | 5,800,000.00  | 5,800,000.00 | 5,800,000.00 |               | 23,200,000.00  |                |
| Amount used for CDM<br>threshold for LRAMVA (2015)  |              |               |              |              | 12,406,666.67 |                | 12,406,666.67  |
| Manual Adjustment for 2015<br>Load Forecast (billed basis)  | -            | -             | -            | 3,026,658.00 | 6,203,333.33  |                | 9,229,991.33   |
| Proposed Loss Factor (TLF)<br>Manual Adjustment for 2015<br>Load Forecast (system<br>purchased basis) | 4.79%        | Format: X.XX% |              | 3,171,634.92 | 6,500,473.00  |                | 9,672,107.92   |

Manual adjustment uses "gross" versus "net" (i.e. numbers multiplied by (1 + g). The Weight factor is also used calculate the impact of each year's program on the CDM adjustment to the 2014 load forecast.

### Appendix 2-IA Summary and Variances of Actual and Forecast Data

Replace "Rate Class #" with the appropriate rate classification.

### Appendix 2-P Cost Allocation

Please complete the following four tables.

#### A) Allocated Costs

| Classes                        | <br>sts Allocated<br>om Previous<br>Study | %       | i  | sts Allocated<br>n Test Year<br>Study<br>Column 7A) | %       |
|--------------------------------|---|---------|----|---|---------|
| Residential                    | \$<br>21,014,764                          | 66.12%  | \$ | 20,940,354  | 69.18%  |
| GS < 50 kW                     | \$<br>3,602,085                           | 11.33%  | \$ | 3,203,396   | 10.58%  |
| GS > 50 kW                     | \$<br>6,500,897                           | 20.46%  | \$ | 5,604,282   | 18.52%  |
| Street Lighting                | \$<br>376,122                             | 1.18%   | \$ | 320,851   | 1.06%   |
| Sentinel Lighting              | \$<br>145,569                             | 0.46%   | \$ | 89,264  | 0.29%   |
| Unmetered Scattered Load (USL) | \$<br>141,174                             | 0.44%   | \$ | 109,566   | 0.36%   |
| Total                          | \$<br>31,780,610                          | 100.00% | \$ | 30,267,713  | 100.00% |

#### Notes

- 1 Customer Classification If proposed rate classes differ from those in place in the previous Cost Allocation study, modify the rate classes to match the current application as closely as possible.
- 2 Host Distributors Provide information on embedded distributor(s) as a separate class, if applicable. If embedded distributor(s) are billed as customers in a General Service class, include the allocated cost and revenue of the embedded distributor(s) in the applicable class. Also complete Appendix 2-Q.
- 3 Class Revenue Requirements If using the Board-issued model, in column 7A enter the results from Worksheet O-1, Revenue Requirement (row 40 in the 2013 model). This excludes costs in deferral and variance accounts. Note to Embedded Distributor(s), it also does not include Account 4750 Low Voltage (LV) Costs.

#### B) Calculated Class Revenues

|                                  | (  | Column 7B   | -  | Column 7C                                     |    | Column 7D           |    | Column 7E                |     |   |  |
|----------------------------------|----|---|----|---|----|---------------------|----|--------------------------|-----|---|--|
| Classes (same as previous table) | (L | Load Forecast<br>(LF) X current<br>approved rates |    | L.F. X current<br>approved rates X<br>(1 + d) |    | LF X proposed rates |    | Miscellaneous<br>Revenue |     | Difference in<br>Base Dx<br>Revenue 7(D)-<br>7(B) |  |
| Residential                      | \$ | 15,624,862  | \$ | 15,624,862                                    | \$ | 17,928,848          | \$ | 1,262,498                | \$  | 2,303,986   |  |
| GS < 50 kW                       | \$ | 3,659,015   | \$ | 3,659,015                                     | \$ | 3,655,627           | \$ | 188,449                  | -\$ | 3,388   |  |
| GS > 50 kW                       | \$ | 8,920,210   | \$ | 8,920,210                                     | \$ | 6,587,012           | \$ | 138,127                  | -\$ | 2,333,198   |  |
| Street Lighting                  | \$ | 273,855   | \$ | 273,855                                       | \$ | 288,013             | \$ | 6,039                    | \$  | 14,158  |  |
| Sentinel Lighting                | \$ | 58,115  | \$ | 58,115  | \$ | 76,552              | \$ | 5,257                    | \$  | 18,437  |  |
| Unmetered Scattered Load (USL)   | \$ | 129,135   | \$ | 129,135                                       | \$ | 129,140             | \$ | 2,153                    | \$  | 5   |  |
| Total                            | \$ | 28,665,192  | \$ | 28,665,192                                    | \$ | 28,665,191          | \$ | 1,602,522                | -\$ | 1   |  |

#### Notes:

- 1 Columns 7B to 7D LF means Load Forecast of Annual Billing Quantities (i.e. customers or connections X 12, (kWh or kW, as applicable). Revenue Quantities should be net of Transfomrer Ownership Allowance. Exclude revenue from rate adders and rate
- 2 Columns 7C and 7D Column total in each column should equal the Base Revenue Requirement
- 3 Columns 7C The Board cost allocation model calculates "1+d" in worksheet O-1, cell C21. "d" is defined as Revenue Deficiency/Revenue at Current Rates.
- 4 Columns 7E If using the Board-issued Cost Allocation model, enter Miscellaneous Revenue as it appears in Worksheet O-1, row 19.

#### C) Rebalancing Revenue-to-Cost (R/C) Ratios

| Class                          | Previously<br>Approved Ratios | Status Quo<br>Ratios | Proposed Ratios  | Policy Range |  |
|--------------------------------|-------------------------------|----------------------|------------------|--------------|--|
| Ciass                          | Most Recent<br>Year:<br>2014  | (7C + 7E) / (7A)     | (7D + 7E) / (7A) | Folicy Kange |  |
|                                | %                             | %                    | %                | %            |  |
| Residential                    | 85.00%                        | 80.65                | 91.65            | 85 - 115     |  |
| GS < 50 kW                     | 109.09%                       | 120.11               | 120.00           | 80 - 120     |  |
| GS > 50 kW                     |                               |                      |                  |              |  |
|                                | 145.83%                       | 161.63               | 120.00           | 80 - 120     |  |
| Street Lighting                | 70.00%                        | 87.23                | 91.65            | 70 - 120     |  |
| Sentinel Lighting              | 70.00%                        | 70.99                | 91.65            | 80 - 120     |  |
| Unmetered Scattered Load (USL) | 101.51%                       | 119.83               | 119.83           | 80 - 120     |  |

#### Notes

- 1 Previously Approved Revenue-to-Cost Ratios For most applicants, Most Recent Year would be the third year of the IRM 3 period, e.g. if the applicant rebased in 2009 with further adjustments over 2 years, the Most recent year is 2011. For applicants whose most recent rebasing year is 2006, the applicant should enter the ratios from their Informational Filing.
- 2 Status Quo Ratios The Board's updated Cost Allocation Model yields the Status Quo Ratios in Worksheet O-1. Status Quo means "Before Rebalancing".

#### D) Proposed Revenue-to-Cost Ratios

| Class                          | Propose | d Revenue-to-Cost | Ratios | Delieu Benge |
|--------------------------------|---------|-------------------|--------|--------------|
|                                | 2015    | 2016              | 2017   | Policy Range |
|                                | %       | %                 | %      | %            |
| Residential                    | 91.65   | 91.65             | 91.65  | 85 - 115     |
| GS < 50 kW                     | 120.00  | 120.00            | 120.00 | 80 - 120     |
| GS > 50 kW                     | 120.00  | 120.00            | 120.00 | 80 - 120     |
| Street Lighting                | 91.65   | 91.65             | 91.65  | 70 - 120     |
| Sentinel Lighting              | 91.65   | 91.65             | 91.65  | 80 - 120     |
| Unmetered Scattered Load (USL) | 119.83  | 119.83            | 119.83 | 80 - 120     |

#### Note

1 The applicant should complete Table D if it is applying for approval of a revenue to cost ratio in 2015 that is outside the Board's policy range for any customer class. Table (d) will show the information that the distributor would likely enter in the IRM model) in 2016. In 2015 Table (d), enter the planned ratios for the classes that will be 'Change' and 'No Change' in 2015 (in the current Revenue Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision – Cost Revenue Adjustment', column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

**Appendix 4.2-B—Draft Accounting Order-OPEB's** 

## Draft Accounting Order OPEB Deferral Account

NPEI shall establish the following deferral account effective January 1, 2015:

 Account 1508 Other Regulatory Assets, Subaccount – Other Post-Employment Benefits Deferral Account

NPEI shall establish the Other Post-Employment Benefits ("OPEB") Deferral Account to record the cumulative actuarial gains or losses with respect to NPEI's post-retirement benefits in Account 1508, Other Regulatory Assets, Sub-account OPEB Deferral Account.

Upon rebasing on a MIFRS basis, effective from 2015 to the next time NPEI's rates are rebased, the deferral account shall be adjusted as required to record changes in the cumulative actuarial gains or losses in NPEI's post-employment benefits as supported by updated actuarial valuations prepared for NPEI.

The adjustments that will be recorded in this account shall be supported by actuarial valuations when disposition of the deferral account is sought by NPEI.

No carrying charges shall be recorded in this account.

#### **Sample Journal Entry**

The following is an example of the journal entry that will be made by NPEI.

To record the unrecognized actuarial gain relating to Other Post-Employment Benefits upon transition to IFRS, the following entry will be made. (Assuming unamortized accumulated OPEB actuarial gain of \$1,570,621 as of January 1, 2015)

|                                       | \$         |            |
|---------------------------------------|------------|------------|
|                                       | <u>Dr.</u> | <u>Cr.</u> |
| OPEB liability (balance sheet)        | 1,570,621  |            |
| Other Regulatory Assets account 1508: |            |            |
| Subaccount OPEB Deferral Account      |            | 1,570,621  |

Appendix 4.2-C—Draft Accounting Order-MIST meter Deferral Account

#### **Draft Accounting Order – MIST Meters Variance Account**

NPEI shall establish the following variance account effective January 1, 2015:

- Account 1508 Other Regulatory Assets
  - Subaccount MIST Meters Variance Account

This account shall be used to record the variance in costs above or below \$43,760 which is the amount included in the 2015 Test Year meter reading expense, relating to the implementation of MIST meters between 2015 and 2019, that may be incurred as a result of the amendment to section 5.1.3 of the Distribution System Code.

Disposition of the account is proposed to occur in NPEI's next cost of service rate application and will be subject to the Board's prudence review.

No carrying charges will be recorded on this account.

#### **Sample Journal Entry**

The following is an example of the journal entry that will be made by NPEI.

The example assumes that incremental MIST meter reading costs are higher than the amount included in the 2015 Test Year by \$50,000. This amount is assumed for illustration purposes only.

|   | \$         |            |
|---|------------|------------|
|   | <u>Dr.</u> | <u>Cr.</u> |
| Other Regulatory Assets account 1508:   |            |            |
| Subaccount MIST Meters Variance Account | 50,000     |            |
| Accounts Payable                        |            | 50,000     |
