THIS PAGE LEFT INTENTIONALLY BLANK

OEB Appendix 2-L
Recoverable OM&A Cost per Customer and per FTE

	Last Rebasing Year (2011 Actuals)	2012 Actuals	2013 Actuals	2014 Bridge Year	2014 Bridge Year	2015 Test Year	
Reporting Basis	CGAAP	USGAAP	USGAAP	USGAAP	MIFRS	MIFRS	/C
Number of Customers (mid-year)	705,756.00	713,093.00	724,144.00	736,974.00	736,974.00	749,679.00	
Total Recoverable OM&A from Appendix 2-JB	\$238.6	\$215.8	\$246.4	\$246.6	\$245.3	\$269.5	/C
OM&A cost per customer	\$ 338.08	\$ 302.63	\$ 340.26	\$ 334.68	\$ 332.91	\$ 359.51	/C
Number of FTEs	1,737	1,601	1,527	1,537	1,537	1,564	/C
Customers/FTEs	406.30	445.46	474.10	479.62	479.62	479.49	/C
OM&A Cost per FTE	137,360.81	134,806.50	161,319.54	160,517.12	159,671.09	172,378.66	/C

Notes:

- 1 If it has been more than three years since the applicant last filed a cost of service application, additional years of historical actuals should be incorporated into the table, as necessary, to go back to the last cost of service application. If the applicant last filed a cost of service application less than three years ago, a minimum of three years of actual information is required.
- 2 The method of calculating the number of customers must be identified.
- 3 The method of calculating the number of FTEs must be identified. See also Appendix 2-K
- 4 The number of customers and the number of FTEs should correspond to mid-year or average of January 1 and December 31 figures.
- 5 Toronto Hydro notes that its OM&A per customer metrics do not account for an estimated 300,000 behind-the-bulk-meter multi-unit dwelling customers.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 33:**

2 **Reference(s):** Exhibit 4A, Tab 1, Schedule 5

3
4
5 Please explain why Toronto Hydro's OM&A cost per customer and OM&A cost per FTE
6 have increased significantly since 2011.

7
8
9 **RESPONSE:**

10 Toronto Hydro notes that a significant portion of its average OM&A increase over the
11 2011-2015 timeframe is driven by the 2015 Test Year amount, which includes a number
12 of incremental expenditures associated with new or evolving operational needs and
13 functional requirements. From 2011 to 2014, OM&A increased by an average of 1.1%
14 per year. Accordingly, a significant portion of the average 2011-2015 increase in OM&A
15 per customer and per FTE is associated with the incremental Test Year expenditures.

16
17 In addition, the OM&A per customer and per FTE calculations as provided in the
18 Appendices 2JA to 2L (Exhibit 4A, Tab 1, Schedule 2) exclude the significant OM&A
19 restructuring costs that the utility incurred in 2012. Toronto Hydro believes that the
20 restructuring costs should be included in the calculation in the year they were incurred,
21 but has presented the costs in the Appendices 2JA to 2L in the manner consistent with the
22 OEB direction. When adjusted for restructuring costs, Toronto Hydro's OM&A per
23 customer over the historical and bridge period (that is the years when the utility's base
24 rates were adjusted in accordance with an IRM formula) has declined on average by 0.3%
25 per year. OM&A per FTE increased due to the significant reduction in total FTEs

**RESPONSES TO CONSUMERS COUNCIL OF CANADA
INTERROGATORIES**

- 1 (approximately 256 FTE) relative to 2011. Please refer to the pre-filed evidence at
- 2 Exhibit 4A, Tab 4, Schedule 3 for more information.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 34:**

2 **Reference(s):** Exhibit 4A, Tab 2, Schedule 13, page 3

3

4

5 Has Toronto Hydro done a business case analysis regarding monthly billing? If so,
6 please provide that business case analysis. If the Board mandates monthly billing by
7 January 1, 2016, what will be the costs and benefits for Toronto Hydro? How would
8 Toronto Hydro propose that mandated monthly billing be implemented in the context of
9 its five-year plan?

10

11

12 **RESPONSE:**

13 Toronto Hydro has conducted a business case analysis regarding the conversion to
14 monthly billing. This analysis is outlined in Toronto Hydro's recent submission in
15 response to the EB-2014-0198, Draft Report of the Board: Electricity and Natural Gas
16 Distributor's Residential Customer Billing Practices and Performance, attached as
17 Appendix A to this response.

18

19 In terms of the implementation strategy, Toronto Hydro would propose, if mandated, that
20 the lowest cost transition strategy would be to combine this effort with the next planned
21 software version upgrade of Toronto Hydro's Customer Information System, which is
22 tentatively projected to be undertaken in the latter years of the this CIR filing period.
23 Toronto Hydro would nevertheless anticipate that, were the OEB to proceed with
24 mandatory monthly billing, utilities would be allowed to recover any incremental costs in
25 a timely manner.

NOTICE OF PROPOSAL

PROPOSED AMENDMENTS TO THE DISTRIBUTION SYSTEM CODE

BOARD FILE NO.: EB-2014-0198

**To: All Electricity and Natural Gas Distributors
All Participants in Consultation Process EB-2014-0198
All Other Interested Parties**

The Ontario Energy Board (the "Board") is giving notice under section 70.2 of the *Ontario Energy Board Act, 1998* of proposed amendments to the Distribution System Code (the "DSC") in relation to billing frequency, the use of estimated billing, and billing accuracy.

I. Background

A. Billing Frequency and Estimated Billing

On June 27, 2014, the Board issued a letter announcing the commencement of a policy review of electricity and natural gas distributors' residential customer billing practices and performance with a focus on ensuring that consumers have timely and accurate billing to assist them in better understanding their energy use and controlling their costs.

On September 18, 2014 the Board issued a [Draft Report of the Board on Electricity and Natural Gas Distributors' Residential Customer Billing Practices and Performance](#) (the "draft Report") with analysis of the survey results. The draft Report also posed a number of questions related to monthly billing and estimated billing for stakeholder comment. The draft Report provided an analysis of the billing practices, including billing frequency and the use of estimated billing, by natural gas and electricity distributors. In the draft

II. Proposed Amendments to the DSC

A. Introduction

The Board is proposing to amend the DSC to codify rules relating to frequency of billing, estimated billing, and billing accuracy. A summary of the proposed amendments to the DSC is set out below. The full text of the proposed amendments is set out in Attachment A to this Notice.

B. Billing Frequency

In the draft Report, the Board indicated that all non-seasonal residential electricity customers in Ontario should be billed on a monthly basis by January 1, 2016.

Based on the comments received, the Board has decided to extend the timeline for the transition to mandatory monthly billing for all electricity distributors for non-seasonal residential customers to December 31, 2016.

The Board has also decided to extend this rule to the general service less than 50 kW rate class. The deadline for issuing monthly bills to this rate class will also be December 31, 2016.

Section 2.6.1A will be added to the DSC to require all distributors to issue monthly bills to non-seasonal residential customers and general service under 50 kW customers. Distributors will not be required to provide monthly billing to seasonal customers.

The Board believes that this is the most effective way to ensure that customers have timely information to gain a better understanding of their electricity consumption so that they can better manage their electricity usage and control their costs.

C. Estimated Billing

To ensure there is transparency on billing estimate practices, the Board is proposing amendments to section 2.4.6 of the DSC to make distributors add descriptions of their estimated billing practices to their Conditions of Service.

**RESPONSES TO VULNERABLE ENERGY CONSUMERS
COALITION INTERROGATORIES**

INTERROGATORY 44:

Reference(s): Exhibit 4A, Tab 2, Schedule 13, page 3

- a) Please provide an estimate of the increase/decrease in billing, collection and customer care costs if THESL were to move all customers to monthly billing.
- b) Please explain what offset in working capital might be expected.
- c) If THESL has not previously undertaken any study of this issue please provide the best estimate and a general or directional explanation.

RESPONSE:

- a) Costs are projected to increase incrementally over the current operating budget by a total amount of approximately \$6.1 million. This can be further categorized as an increase in the costs of Billing of \$4.3 million, costs of Collections of \$0.9 million and costs of Customer Care of \$0.9 million. In addition, one-time costs to facilitate the transition are forecasted to be \$3.0 million in capital costs and \$2.2 million in operating expenditures.
- b) Toronto Hydro estimates the offset in working capital in the amount of approximately \$1.9 million.
- c) Please see the response to Interrogatory 4A-CCC-34.

Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
PO Box 2319
2300 Yonge Street, 27th floor
Toronto, ON M4P 1E4

Dear Ms. Walli:

**Re: Toronto Hydro-Electric System Limited (“THESL”)
Draft Report of the Board: Electricity and Natural Gas Distributors’ Residential
Customer Billing Practices and Performance
OEB File No. EB-2014-0198**

THESL writes to the Ontario Energy Board (“OEB”) in respect of the above-noted matter.

On September 18, 2014 the Ontario Energy Board (“OEB”) released a Draft Report of the Board entitled *Electricity and Natural Gas Distributors’ Residential Customer Billing Practices and Performance* (“The Draft Report”). In the Draft Report, among other issues, the OEB conveys its intent to mandate the issuance of monthly electricity bills for all residential customers in Ontario starting January 1, 2016. The key considerations cited as driving the contemplated transition are enabling customers to better manage their consumption, control costs and budget for the expenditures associated with their electricity bills. While the Draft Report acknowledges that a mandatory transition to monthly billing would likely result in incremental costs, it expresses its expectation that such costs should be largely offset by the benefits of monthly billing and related activities, including improved cash flow / working capital reductions, reduced arrears and bad debt expenditures and enhanced customer communications. Further cost efficiencies are also expected from the assumed increases in the uptake of e-billing services that provide opportunities for cost reductions in the areas of printing and delivery.

In the Report, the OEB poses two specific questions to the utilities, namely to:

- (1) List the potential barriers and anticipated benefits of the mandatory monthly billing transition as contemplated and;
- (2) Discuss the merits of a similar transition for seasonal customers.

1. Rectifying known billing system challenges
2. Update configuration, schedules and move customers to monthly cycles
3. Volume test to identify bottlenecks in system performance and operational processes
4. Rectify issues found through volume testing
5. Validate that bill accuracy and timeliness remained unaffected past the transition.

Each step plays a distinct role in facilitating the transition by undertaking the necessary modifications and/or testing of software, hardware and business processes that support monthly billing. Of critical importance are the volume testing activities (Steps 4-5), the associated rectification and subsequent re-testing to ensure that the amended processes and infrastructure do not result in errors that can have a major impact on the utility's service quality, customer satisfaction performance and costs of rectifying any unanticipated issues post-transition.

The one-time costs incurred during the project consist of capital (Capitalized IT Labour, IT Hardware) and OM&A expenditures (general labour). The table below provides a summary of the range of potential costs, based on a "Favourable" and a "Conservative" scenario:

Estimated One-Time Costs

Scenario	Business Labour	IT Labour	Hardware	Total (\$M)*
Favourable	\$2.2	\$1.6	\$1.4	\$5.2
Conservative	\$4.0	\$3.0	\$1.4	\$8.3

** numbers may not add up due to rounding*

THESL has also evaluated three alternative implementation approaches to the Base Case that vary according to their respective scopes, underlying drivers and associated risks:

Alternative 1:

Merge implementation with suitable major customer care projects planned for in the medium-term.

Pro: Lower costs (40%-50% of the Base Case) and work effort due to shared analysis and testing effort.

Con: Project timing/scheduling significantly outside of the OEB timeline (CC&B upgrade planned for 2018).

Alternative 2:

Full redesign of THESL's customer care business processes related to billing accuracy to optimize the system performance, enhance accuracy and efficiency, and manage the recurring costs.

Estimated Recurring Cost of Monthly Billing (\$M)

Cost Category	Incremental Cost
Postage	\$2.6
Paper	\$0.1
Envelope	\$0.2
Printing	\$0.2
Incremental Billing Enquiries (Call Centre)	\$0.7
Meter Data Management, manual reads and Verification/Edits	\$0.9
Clerical Billing tasks	\$0.5
Payment Processing	\$0.5
Collections Activities	\$0.2
Corporate Communications	\$0.2
TOTAL	\$6.1

** numbers may not add up due to rounding*

The estimates presented above reflect reasonable assumptions, including incremental staffing using partially outsourced labour, and lower incremental call volumes per bill issued than what is currently the case, among others. As noted above, THESL prepared these estimates on the basis of its experience with implementing customer care initiatives of large magnitude, the state of its current processes associated with data collection, bill issuance and payment processing, customer contact behaviour, current cost structures and contractual arrangements, and other similar information. Given the information available to support certain assumptions, the forecasted costs, once realized, could vary by up to 20%.

In calculating the incremental costs, THESL took a conservative approach and assumed certain tasks would not simply double in volume. Should the OEB elect to conduct further stakeholdering on this issue, as suggested by THESL in this submission, the utility would welcome the opportunities to work with other distributors that have completed transitions to monthly billing in recent years to confirm these assumptions based on these distributors' experience.

THESL further notes that the above calculations include only the direct costs, specifically attributable to the transition project as proposed in the Draft Report. To obtain the full estimate of costs, further assumptions need to be made for other costs, including lost staff productivity throughout and for at least 6 months following the transition project, the impact (financial, operational and reputational), associated with postponement of other planned projects to divert resources to billing transition, incremental

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 35:**

2 **Reference(s):** **Exhibit 4A, Tab 2, Schedule 13, page 2**

3

4

5 Please provide detailed budgets for each of the Customer Care “segments” for each year
6 2011-2015. Please provide the Board approved amounts for 2011.

7

8

9 **RESPONSE:**

10 Since OM&A was settled on an envelope basis in the last rebasing application (EB-2010-
11 0142), the OEB did not approve detailed budgets for the 2011 test year. Therefore,
12 Toronto Hydro cannot provide the requested OEB-Approved numbers for each Customer
13 Care segment. Toronto Hydro notes that on a total basis, the OEB-Approved and the
14 2011 actual expenditures only differed by \$0.6 million (*\$238 million OEB-Approved vs.*
15 *\$238.6 million actual expenditures*), so actual 2011 expenditures can be used as a proxy
16 for OEB Approved amounts for that particular year.

17

18 The table below provides the 2011-2013 actuals, 2014 year end forecast, and 2015 year
19 forecast for each Customer Care segment.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

Customer Care Program (\$millions)	2011	2012	2013	2014	2015
Billing, Remittance & Meter Data Management (Segment)					
Internal Labour	6.8	5.9	7.5	8.1	8.4
External Services	3.9	3.4	3.5	3.9	4.9
Materials	0.0	0.0	(0.0)	0.1	0.1
Other	3.7	4.4	3.6	4.3	5.3
Total Billing, Remittance & Meter Data Management (Segment)	14.5	13.7	14.6	16.4	18.7
Collections (Segment)					
Internal Labour	1.9	1.1	1.2	2.8	3.1
External Services	1.5	1.8	2.7	2.5	2.5
Materials	0.0	0.0	0.0	0.0	0.0
Other	8.9	6.0	7.1	6.9	7.4
Total Total Billing, Remittance & Meter Data Management (Segment)	12.3	8.9	11.1	12.2	13.1
Communications & Public Affairs (Segment)					
Internal Labour	1.9	2.2	3.0	1.9	1.7
External Services	0.8	0.9	0.8	0.9	0.9
Materials	0.0	0.0	0.1	0.2	0.2
Other	0.3	0.1	0.1	0.1	0.1
Total Communications & Public Affairs (Segment)	3.0	3.3	4.0	3.1	3.0
Customer Relationship Management (Segment)					
Internal Labour	7.7	5.9	5.3	5.3	5.5
External Services	4.2	5.3	4.6	4.9	5.6
Materials	0.0	0.0	0.0	0.0	0.0
Other	0.2	0.3	0.1	0.2	0.2
Total Customer Relationship Management (Segment)	12.1	11.5	10.1	10.4	11.3
Total Customer Care Program	41.9	37.5	39.7	42.2	46.1

1 The “Other” category within the Billing, Remittance & Meter Data Management segment
2 is made up of postage and printing costs for customer invoices and the bad debt expense
3 related to non-electricity billings.

4

5 The “Other” category within the Collections segment contains bad debt expenses related
6 to electricity customer billings.

1 (4) to clarify the process that applied to employees progressing along wage scales in
2 the Collective Agreement.

3 All of these objectives were achieved during the 2012 negotiations.
4

5 For the purpose of these negotiations, Toronto Hydro considered comparable market
6 data, which was collected through a review of external surveys and external
7 compensation data. Toronto Hydro compared base salary and variable performance pay
8 against information from companies within the utility sector (such as Hydro One). As a
9 result of these analyses, Toronto Hydro's compensation position was that year-over-year
10 increases had to stay relatively close to inflation in order to maintain alignment with the
11 market.
12

13 Employees who are part of the Society are also eligible for variable performance pay
14 based on their achievement of the deliverables outlined in their annual performance
15 contract, as well as the achievement of the utility's performance objectives.
16
17

18 **5. BENEFITS AND PENSIONS**

19 Toronto Hydro's employee benefit programs provide coverage for full-time employees in
20 the following areas:

- 21 • Medical, including vision care, prescription drugs, and paramedical services;
- 22 • Dental, including major dental and orthodontic services;
- 23 • Short term and long term disability income protection;
- 24 • Life Insurance and accidental death and dismemberment (AD&D) insurance;
- 25 • Leaves of absence, including maternity, adoption and parental leaves; and
- 26 • Refundable expenses, such as the fitness reimbursement program.
27

1
2 Over the 2015 to 2019 period, Toronto Hydro expects to encounter additional constraints
3 on the eligible talent pool and its retention capabilities as a result of a number of factors,
4 including: the aging Canadian population, a declining unemployment rate in the Ontario,
5 and economic growth and ongoing construction activity in the City of Toronto. For more
6 information about these factors, refer to the Conference Board of Canada Report on
7 Labour market and Human Resources Trends for the Canadian Utility Sector (Exhibit
8 4A, Tab 4, Schedule 4).

9
10 The utility periodically reviews the external competitiveness of its compensation
11 programs, to help ensure that the level, form and mix of compensation offered by Toronto
12 Hydro is competitive with those provided for comparable jobs in the markets where the
13 utility competes for talent. For example, in December 2013, Toronto Hydro engaged an
14 independent human resources consulting firm, Towers Watson, to undertake a detailed
15 compensation and benefits benchmarking study. The results of the study indicate that the
16 utility is generally aligned with the markets in which it competes, in relation to both
17 compensation (base salary and performance pay) and benefits (Exhibit 4A, Tab 4,
18 Schedule 6).

19
20 Toronto Hydro reviews the market-competitiveness of its compensation packages for
21 non-union employees as part of its annual business planning and budgeting process. This
22 review begins with participating in total compensation salary surveys offered through
23 independent consulting firms, such as Mercer and Towers Watson, which specialize in
24 the compilation of aggregate compensation data. Following receipt of the compiled
25 external compensation survey data, Toronto Hydro compares the available compensation
26 data (i.e., base salary, target performance pay, and target total cash compensation) against
27 aggregate information from companies of similar size, industry, and/or geographic
28 location.

Toronto Hydro Electric Systems Limited

**Toronto Hydro
Compensation and
Benefits Review**

Completed: January 2014

Appendix 1: Peer Group Details

Named energy peer group

Organizations within the Towers Watson 2013 Energy Compensation Survey were selected based on the following criteria:

- Electricity or gas organizations
- Vertically integrated electricity company
- Energy company operating solely in Ontario
- The OPA and IESO

Below is Toronto Hydro's named peer group from Towers Watson 2013 Energy Compensation Survey:

ATCO Electric	Ontario Power Generation
AltaLink	Saskpower
British Columbia Hydro and Power Authority	Spectra Energy Transmission
Bruce Power	TransCanada
City of Medicine Hat (Hydro Division)	Independent Electricity System Operator
Enbridge Inc.	New Brunswick Power Corporation
Enmax Corporation	Newfoundland & Labrador Hydro Electric Corporation
EPCOR Utilities	Nova Scotia Power
Fortis Alberta	Ontario Power Authority
Hydro-Quebec	

Where we observed insufficient data availability from the above peer group, a whole sample energy survey peer group was used (see below).

Whole sample energy peer group

Agrium	Columbia Power	Ontario Power Generation
Alberta Energy Regulator	ConocoPhillips	Pembina Pipeline Corporation
Alliance Pipeline Ltd.	Devon Canada Corporation	Penn West Energy Trust
AltaLink Management	Dow Chemical	Powerex Corp.
Apache Canada Ltd.	Enbridge	Precision Drilling Trust
ARC Resources	Encana Corporation	Saskpower
ATCO Electric	Enmax Corporation	Shell Canada Limited
ATCO Energy Solutions	EPCOR Utilities	Siemens Canada
ATCO Gas	ExxonMobil	Spectra Energy
ATCO Group	ExxonMobil Business Support Centre Canada	Statoil Canada
ATCO Pipelines	FortisAlberta	Suncor Energy
ATCO Power	Gaz Metro	Synchrude Canada Ltd.
Aux Sable Canada	GDF SUEZ Energy North America	Talisman Energy
BP Canada Energy Company	Husky Energy	Tenaris Canada
British Columbia Hydro and Power Authority	Hydro-Québec	Toronto Hydro Electric Systems
Bruce Power	Imperial Oil Limited	TransAlta Corporation
Canadian Natural Resources Limited	INEOS Canada Partnership	TransCanada
Canadian Oil Sands	Irving Oil Commercial G.P	Valero Energy
Canexus Corporation	Kinder Morgan Canada (Pipelines)	Weatherford International
Capital Power Corporation	MEG Energy	Williams Companies
Cenovus Energy	Nexen	Ontario Power Generation
Chevron Canada Limited (Downstream)	NextEra Energy, Inc.	
Chevron Canada Resources (Upstream)	Niko Resources	
City of Medicine Hat (Hydro Division)	NOVA Chemicals Corporation	

Named general industry peer group

Organizations within the Towers Watson 2013 General Industry MMPS Survey were chosen based upon the following criteria:

- Located within the GTA
- Organizations of comparable size ((e.g. revenues between \$1B and \$5B) to THESL; and
- A headcount between of 1000 to 2000 employees

Below is Toronto Hydro's named peer group from Towers Watson's 2013 General Industry MMPS Survey:

Allstate	Fortis Alberta	Ontario Power Generation
AstraZeneca	General Electric Canada	Owens Corning Canada
ATCO Electric	Graham Group Ltd.	PCL Constructors
AlttaLink	Homes by Avi Canada Inc.	Saskpower
British Columbia Hydro and Power Authority	Huskey Injection Molding Systems Ltd.	Siemens Canada Lts.
Bruce Power	Hydro-Quebec	SNC Lavalin Group Inc.
Cadillac Fairview Corporation Limited	Ledcor Group of Companies	Spectra Energy Transmission
Cisco Systems	Lehigh Hanson Canada	State Farm Insurance
City of Medicine Hat (Hydro Division)	Mattamy Homes Limited	The Shaw Group Ltd
Enbridge Inc.	Microsoft	TransCanada
Enmax Corporation	Northbridge	Unilever
EPCOR Utilities	Omicron Canada Inc.	

Where we observed insufficient data availability from the above peer group, a whole sample General Industry survey peer group was used (a full listing of over 300 organizations can be provided separately if required).

Named Hay Group peer group

Organizations within the Hay Group 2013 Energy Industry Compensation Survey were selected based on the following criteria:

- Utility Sector Organizations with revenue above 205 million

Below is Toronto Hydro's peer group from the Hay Group Survey:

Bruce Power L.P.	Hydro One Brampton
Capital Power Corporation	Hydro One Inc.
Enersource Hydro Mississauga Inc	Hydro Ottawa Limited
Fortis Inc.	NB Power Holding Corporation
FortisAlberta Inc.	Newfoundland Power Inc.
FortisBC Energy Inc.	Ontario Power Generation Inc.
FortisBC Inc.	SaskEnergy Incorporated
GDF SUEZ Energy North America, Inc.	SaskPower

Benefits peer group criteria

Organizations within the Towers Watson 2013 Benefits Data Source were selected based on the following criteria:

- Electricity or gas organizations
- Vertically integrated electricity company
- Energy company operating solely in Ontario

Below is Toronto Hydro's named peer group from Towers Watson's 2013 Benefits Data Source:

Alberta Electric System Operator	Fortis Alberta
AltaLink Management Ltd.	Hydro One
ATCO Group	Hydro-Quebec
British Columbia Hydro and Power Authority	Independent Electricity System Operator
Bruce Power	Manitoba Hydro
Capital Power Generation	Newfoundland Power Inc.
City of Medicine Hat	Ontario Power Generation Inc.
Emera Inc.	Saskpower
Enbridge Pipelines Inc.	TransAlta Corporation
ENMAX Corporation	TransCanada Pipelines Limited
EPCOR Utilities Inc.

3 **Compensation Table”**

- 4
- 5
- 6 a) Please breakdown all numbers for “Non-Management (union and non-union)” into
7 non-union, CUPE represented, and Society represented.
- 8 b) Please provide the annual Total Compensation per FTE for the categories provided in
9 a) above as well as Management.
- 10 c) For Total Compensation, please provide the subcategories for costs expensed and
11 costs capitalized.
- 12 d) Does this table include and “Temporary” staff? These would be staff who are hired
13 on a short term basis to fill in for staff on leave of absence or to deal with temporary
14 peaks in work etc.
- 15 i) If it does include temporary staff, please separate them out in the table as per a),
16 b) and c) above.
- 17 ii) If it does NOT include temporary staff, please include a temporary staff category
18 in the table as per a), b) and c) above.
- 19
- 20

21 **RESPONSE:**

22 a), b) and c) Please see Appendix A to this response.

23

24 d) Yes, the table includes employees hired on contract for a defined term (i.e.,
25 “temporary staff”). Please see Appendix A to this response.

¹ Contract for a Defined Term refers to "Temporary staff"

RESPONSES TO SOCIETY OF ENERGY PROFESSIONALS INTERROGATORIES

1 **INTERROGATORY 6:**

2 **Reference(s):** Exhibit 4A, Tab 4, “Workforce Staffing and Compensation”

3

4

5 With regards [sic] to temporary staff:

6 a) Please provide the basis/criteria for hiring temporary staff.

7 b) Further to a), if the criteria is viewed to be cost efficiency [sic], please provide the
8 total annual cost savings for 2007 to 2019 and the annual savings per temporary FTE.

9 c) What is the average and longest duration that a temporary staffer is employed by
10 Toronto Hydro?

11 d) What is the retention strategy for temporary staff?

12 e) For 2007 to 2019, please provide the number of temporary staff who are then hired as
13 permanent staff on the Toronto Hydro payroll.

14 f) Please provide the estimated annual negative impact on productivity of employing
15 temporary staff for 2007 to 2019. This would include time required to train
16 temporary staff (both temporary staff time and internal staff time required to train
17 them), the “burn in” time as new temps become more skilled in their assigned work,
18 the loss of corporate memory when they leave, etc.

19

20

21 **RESPONSE:**

22 a) Hiring employees on contract for a defined term (i.e., “temporary staff”) allows the
23 utility to cost-effectively resource peak demands and maintain flexibility to support
24 operations. The hiring criteria are specific to each role, and consider both the
25 technical and behavioral competencies that are required to perform the job.

26

RESPONSES TO SOCIETY OF ENERGY PROFESSIONALS INTERROGATORIES

- 1 b) The estimated annual savings per year and per average FTE, from 2011 to 2013, are
 2 outlined in the table below. Toronto Hydro objects, on the basis of relevance, to
 3 estimating pre-2011 cost savings, as this information predates the utility's last
 4 rebasing application (EB-2010-0142), and has no probative value to deciding the
 5 issues in this Application.

	Estimated Annual Cost Savings	Average Per FTE on a Defined Term
2011	\$ 827,733.07	\$ 22,023.94
2012	\$ 805,673.17	\$ 22,536.31
2013	\$ 971,997.14	\$ 23,096.96

- 6 c) The average duration is approximately one year and the longest duration is
 7 approximately eight years.
 8
- 9 d) There is no explicit retention strategy. However, these employees are encouraged to
 10 apply for full-time vacancies when they become available.
 11
- 12 e) The table below provides the number of temporary employees that have been hired
 13 into a full-time positions from 2011 to 2014. Toronto Hydro objects, on the basis of
 14 relevance, to providing pre-2011 information as it predates the utility's last rebasing
 15 application (EB-2010-0142) and has no probative value to deciding the issues in this
 16 Application.
