Dear Ms. Walli:

**Re: EB-2015-0073
Grimsby Power Incorporated
Electricity Distribution Rate Application for 2016 Rates**

On January 29, 2015 the Board provided formal notice to identify all distributors who were due to file a cost of service application in 2015 for 2016 rates. Grimsby Power Inc. (GPI) is one of those named distributors. GPI rates are effective January 1 and thus the deadline for submitting an application is set for April 24, 2015.

Grimsby Power is advising the Board that it fully intends to file a cost of service application under the Price Cap IR rate setting method for 2016 rates and has been working towards fulfilling the filing requirements since January 1, 2014. However, due to a number of changes in resources within our corporation GPI will not meet the April 24, 2015 deadline for cost of service application submission.

Grimsby Power is diligently working towards the completion of its application submission and anticipates that the application will be delayed by up to three months.

If additional information is required by the Board please contact myself via e-mail (dougcurt@grimsbypower.com) or by phone at 905-945-5437 Ext. 221.

Regards,

Doug Curtiss, P.Eng.
Chief Executive Officer
Grimsby Power Inc.
