RE: Enbridge Gas Distribution's Savings by Design DSM Program for 2016 to 2020

Dear Ms. Walli,

I am writing to you to express our support for Enbridge's Savings by Design Program.

As a builder who participated in the program at the Earth Rangers Centre on March 31st, we found it to be extremely helpful and educational. It provided an opportunity to look at different design and technology alternatives in order to improve the overall energy and environmental performance of our houses within the project. We had access to experts qualified in many diverse areas which would normally not be easily available on our own. The real-time energy modelling was extremely helpful in determining where we stood as far as energy performance and possible improvements.

We, at Greenpark, feel that the Enbridge Savings by Design Program is contributing to the Building Industries transformation to higher levels of energy and environmental performance.

Therefore, we strongly support the continuation/extension of this program to 2020.

Yours truly,

Frank Principe
Director
Design & Project Management
