Subject: regarding hydro rates

Dear Sir/Madam,

I cannot afford any more increases in hydro rates. I am a senior and I spent the last two winters freezing in my home. I have done all the cuts I can but my bills keep going up. I will eventually run out of money. I challenge you to live for one week under the conditions many of us do. We stay in our homes with our parkas on both during the day and at night. PLEASE try to understand this.

There are thousands and thousands of people across Ontario living absolutely miserable lives due to this. What have you done? What has the government done?

Sincerely,

M. Hovi
