LETTER OF COMMENT

Comments:

800 kWh is a very, very low estimate for a family in this city. Despite my best efforts to conserve energy my family regularly 1400 kWh or more per month. This is with very tight thermostat and lighting controls, and minimal use of lighting. I feel the average usage and average increases shown by Hydro Ottawa are only half of what the average 4-5 person family in Ottawa will experience for rate increases. Notably much of our time is spent out of the house in school, at hockey games or out at work. This is too much, too fast and the request needs to be denied.
