re: File # B2014-0370

I am a Sr. Citizen (widowed) and live ~~hand to mouth~~ on last day of sale groceries & clothes from Salvation Army. I use candles after dark and cook during off peak hours & warm up my food in the micro wave. I do my washing at night and burn a wood stove. I do not have a computer etc. but do watch TV.

My hydro has gone in one year - up ^{\$}1000 which scares me as I am not getting enough \$ to pay - hydro, phone, food, gas & ins. I own my own car & house and ~~still~~ which are paid for - but I still am going down and all my friends are the same.

Please consider placing wind turbines up north where no one can complain about them and try to find a way to help us older people carry on. We can only do our best with what we have which is an average of \$1,400/mo.

We have to do something, and now, as soon the people will all be on welfare and that well is running dry.

Thanks for your consideration on our behalf.

Sincerely
Carol V. Degrove
(Sr. Citizen)
