

ENBRIDGE GAS DISTRIBUTION INC.
INTERROGATORIES FOR ONTARIO SUSTAINABLE ENERGY ASSOCIATION

1. Reference: L.OSEA.1.page 4

Preamble:

The OSEA noted that “the 2014 Ministerial Directive directs the Board to take action to promote electricity conservation and demand management (“CDM”) and natural gas DSM. The 2014 Ministerial Directive requires the Board to create a policy framework that includes the cooperation and coordination between electricity distributors and gas distributors when planning and implementing the CDM and DSM plans, respectively.”

Request:

Does Mr. Young believe that properly managed sharing of customer information between electric and gas utilities in a confidential setting for the purpose of DSM and CDM collaboration is appropriate and within the spirit of the Minister’s Directive?
Does the Board, in its Framework, enable such activity?
