1	EXI	HIBIT 7 - COST ALLOCATION
2		
3	Res	sponse to Ontario Energy Board Interrogatory 7-Staff-84
4		
5	Ref	: Exhibit 7, Tab 1, Schedule 1, p. 1 – Cost Allocation Model
6		
7	Inte	errogatory:
8		
9	On	June 12, 2015, the OEB issued its letter outline the new policy regarding cost
10	allo	cation for the street lighting class. The letter approved recommendations provided
11	in th	ne referenced report, prepared by Navigant Consulting Ltd. The report
12	reco	ommended the use of a "street lighting adjustment factor" instead of the number of
13	con	nections for the allocation of primary and line transformer assets.
14		
15	On	page 1 of exhibit 7, Kingston Hydro stated that it used the OEB version 3.2 Cost
16	Allo	cation Model for each of the 5 test years during the custom IR term.
17		
18	a)	Please provide an updated cost allocation study using the OEB version 3.3 Cost
19		Allocation Model reflecting the changes adopted by the OEB's new cost
20		allocation policy for the street lighting class, as well as any other updates to the
21		application (i.e. working capital allowance).
22		
23	Res	sponse:
24		
25	a)	Kingston Hydro has filed as part of this response live Excel versions of OEB 3.3
26		Cost Allocation Model for each of the 5 test years 2016-2020. The models being
27		filed reflect the updated load forecast, as well as any other updates to the
28		application.

File Number: EB-2015-0083 Date Filed: September 11, 2015

> 7-Staff-84 Page **2** of **2**

29	By test year, for each of the test years 2016 through 2020, Input sheets I-6, I-8,
30	Output O-1 and O-2 from the updated OEB version 3.3 Cost Allocation Model
31	are provided as Attachment 1 to this response.

Response to the Ontario Energy Board Staff Interrogatory 7-Staff-84

4

5 Ref: Exhibit 7, Tab 1, Schedule 1, pp. 2-3 – Weighting Factors

6 7

Interrogatory:

8

9 Kingston Hydro provided the following weighting factors, which remain constant over the custom IR period.

	1	2	3	6	7	9
	Residential	GS <50	GS>50-Regular	Large Use >5MW	Street Light	Unmetered Scattered Load
Insert Weighting Factor for Services Account 1855	1.0	2.5	7.8	11.5	0.0	0.2
Insert Weighting Factor for Billing and	1.0	1.0	10.7	10.4	0.7	0.7

11 12

12

1314

Kingston Hydro notes that these factors were developed based on Kingston Hydro's evaluation of the costs of providing services to customer classes.

15 16

a) Please provide specific details as to how these weighting factors were developed.

17 18

Response:

19 20

21

22

 Kingston Hydro developed the weighting factors for Services Account 1855 and for Billing and Collecting using the weighting factor calculation examples provided in OEB version 3.2 Cost Allocation Model, tab 'Instructions'.

23

24

25

For Services Account 1855, the cost of the service drop (the amount that would be recorded in 1855) to an average customer in each class, (taking into account

7-Staff-85 Page **2** of **2**

Conditions of Service) was calculated for each customer class using current cost data. The Residential average service drop cost was then established as a 1.0 weighting factor and other class weighting factors were calculated using their class average cost of a service drop relative to the Residential class cost. Detail of the Street Lighting class zero weighting factor is provided in 7-VECC-36 interrogatory response.

For the Billing and Collecting, the 2014 actual cost of providing these services and the 2016 forecast customer counts were used in establishing the factors. 2014 actual cost by vendor was detailed and then each vendor cost was evaluated based on Kingston Hydro's knowledge of customer class cost causality and a weighting for each class determined. Then 2016 forecast class customer counts were applied to the weightings to allocate each vendor cost across the classes. Total costs allocated to each customer class were tallied. Residential total allocated cost was established as a 1.0 weighting factor and other classes final weighting factors were calculated using their class total cost relative to the Residential class cost.

7-Staff-86 Page **1** of **3**

EXHIBIT 7 – COST ALLOCATION

Response to Ontario Energy Board Staff Interrogatory 7-Staff-86

5 Ref: Exhibit 7, Tab 3, Schedule 2 – Appendix 2-P (C)

Interrogatory:

Kingston Hydro has proposed the following revenue to cost ratios from 2016 – 2020,

10 as shown below:

Class	Proposed Revenue-to-Cost Ratios						
	2016	2017	2018	2019	2020	Policy Range	
	%	%	%	%	%	%	
Residential	97.66	97.81	98.36	99.37	100.40	85 - 115	
GS < 50 kW	120.00	118.63	116.90	115.30	114.37	80 - 120	
GS 50 to 4,999 kW	97.74	97.82	97.48	96.42	95.12	80 - 120	
Large User	98.42	100.00	98.78	94.30	89.68	85 - 115	
Street Lighting	54.00	58.00	62.00	66.00	70.00	70 - 120	
Unmetered Scattered Load (USL)	120.00	118.45	117.32	116.30	115.97	80 - 120	
Standby Approved on an Interim Basis						0	
						0	
0							

a) Please explain why Kingston Hydro is moving away from parity for the Large use and the GS>50 customer classes after 2017, rather than lowering the revenue to cost ratio for the GS<50 customer class.

b) In a letter, issued June 12, 2015, the OEB determined that the revenue to cost ratio policy range for street lighting should be narrowed from the current 70%-120% to 80%-120%. The OEB further noted that this change in policy is effective immediately. Please update Kingston Hydro's revenue to cost ratios to comply with this policy or in the alternative, please explain why Kingston Hydro chooses not to apply the policy.

7-Staff-86 Page **2** of **3**

Response:

a) Per the OEB's cost allocation policy, the revenue-to-cost ratio target range for GS < 50, GS 50 to 4,999 kW and Large User is 80%-120%, 80%-120%, and 85%-115% respectively. Kingston Hydro's understanding of the OEB's cost allocation policy is that where a class is within its target range, status quo rate increases are preferred and that the distributor is not supposed to manage cost allocation within the target range. Since for 2018-2020 the GS 50 to 4,999kW and Large User classes were within their respective target ranges, Kingston Hydro proposed status quo rate increases for these classes.

b) Kingston Hydro filed its 2016 Custom IR application June 1, 2015 based upon the cost allocation policy in effect at that time. It was subsequent to this filing that the OEB issued an update to cost allocation policy for the Street Lighting class. In Kingston Hydro's 2016 Custom IR application the Street Lighting revenue-to-cost ratio was below the bottom of the target range of 70% and Kingston Hydro proposed a phase-in of the movement to the bottom of the range so that by 2020, the Street Lighting class proposed revenue-to-cost ratio was 70%.

Kingston Hydro has populated the updated the Cost Allocation (CA) model version 3.3 issued July 16, 2015 and has filed the live Excel version for each year 2016-2020. CA model version 3.3 takes into account the street lighting adjustment factor addressed in the OEB's letter issued June 12, 2015. Interrogatory response to 7-Staff-84 provides updated Input sheets I-6, I-8, Output O-1 and O-2 from the updated CA model version 3.3.

51

52

53

54

File Number: EB-2015-0083 Date Filed: September 11, 2015

> 7-Staff-86 Page **3** of **3**

Kingston Hydro's proposed revenue to cost ratio phase-in to the bottom of the
target range by 2020 has been updated to reflect the new policy range lower
bound. More specifically, the Street Lighting class proposed revenue to cost
ratio for 2020 is 80% rather than the 70% proposed in the initial application.

1	EXH	IBIT 7 – COST ALLOCATION
2		
3	Res	ponse to Energy Probe Interrogatory 7-Energy Probe-41
4		
5	Ref:	Exhibit 7, Tab 1, Schedule 1, Attachment 1
6		
7	Inte	rogatory:
8		
9	a)	Has the cost allocation model been prepared based on the new cost allocation
10		policy for the street lighting rate class that was issued by the Board on June 12,
11		2015? If not, please update the response to the previous interrogatory to also
12		reflect the new cost allocation policy for the street lighting rate class.
13		
14	b)	Based on the response to part (a) above, please provide a revised Appendix 2-P
15		summary table that shows by year the status quo and proposed revenue to cost
16		ratios for all rate classes.
17		
18	Res	ponse:
19		
20	a)	The OEB issued its update to cost allocation policy for the Street Lighting class
21		after Kingston Hydro filed its 2016 Custom IR application on June 1, 2015. The
22		cost allocation model filed as part of Kingston Hydro's 2016 Custom IR application
23		was prepared based on the cost allocation policy in effect at that time and not the
24		new cost allocation policy issued by the Board on June 12, 2015.
25		
26		The response to interrogatory 7-Energy Probe-40 reflects the new cost allocation
27		policy for street lighting policy with the revenue to cost ratio phase-in proposed in
28		the application and also reflects the original load forecast filed in the application.

File Number: EB-2015-0083 Date Filed: September 11, 2015

> 7-Energy Probe-41 Page **2** of **2**

b) The following revised Appendix 2-P summary tables show by year the status quo and proposed revenue to cost ratios for all rate classes using load profiles prepared by Hydro One for the 2006 CAIF, including Large Use class:

3	Res	ponse to Vulnerable Energy Consumers Coalition Interrogatory 7-VECC-36
4		
5	Ref	erence: E7/T1/S1, pg. 1-3
6		
7	<u>Inte</u>	rrogatory:
8		
9	a)	Please explain the basis for the zero weighting factor for the Street Light class in
10		regard to Services. Does the City perform all the work and provide all the
11		materials for Services at the time of installation?
12		
13	b)	Who maintains the Service connection for the Street Light class and, if it is
14		Kingston Hydro, how are the costs recorded and recovered?
15		
16	Res	<u>ponse</u> :
17		
18	a)	The basis for the zero weighting factor for the Street Lighting class in regard to
19		Services is that the customer is responsible for paying for the service drop and all
20		maintenance and replacement associated with it going forward.
21		
22	b)	Utilities Kingston co-ordinates the maintenance of the Service connection.

7-VECC-37 Page **1** of **2**

1	EXH	HIBIT 7 – COST ALLOCATION
2		
3	Res	sponse to Vulnerable Energy Consumers Coalition Interrogatory 7-VECC-37
4		
5	Ref	erence: E7/T1/S1, Attachment 1, pg. 5-7
6		Kingston Hydro's Cost Allocation models
7		
8	<u>Inte</u>	errogatory:
9		
10	a)	What is the impact on the resulting revenue to cost ratios of using the updated
11		load profiles for the Large Use class as opposed to the hourly profile prepared for
12		the 2006 CAIF?
13		
14	b)	Please explain why the revenues at current rates shown in the Cost Allocation
15		models (Tabs I6.1 and O1) don't match the revenues at current rates as shown in
16		E3/T2/S1, Attachment 1. For example, for 2016, the cost allocation model shows
17		\$11,365,359 while Exhibit 3 shows \$11,840,603.
18		
19	Res	sponse:
20		
21	a)	The resulting status quo revenue to cost ratios using the hourly profile prepared
22		the 2006 CAIF including Large Use is provided in response to 7-Energy Probe-41
23		interrogatory. The status quo revenue to cost ratios for Large Use using the 2006
24		CAIF are year over year about one percent higher in comparison to the Large Use
25		status quo revenue to cost ratios in the application that make use of the updated
26		load profiles for Large Use.
27		

7-VECC-37 Page **2** of **2**

28	b)	2016 Cost Allocation Model, Sheet I6.2 Customer Data, the number of customers
29		for the GS 50 to 4,999 kW should be 337.
30		E3/T2/S1, Attachment 1 revenue at current rates, the transformer discount
31		allowance rate should be a credit (\$0.60) throughout the tables.
32		
33		Making the above two changes reconciles for example 2016 in the Cost Allocation
34		Model (Tabs I6.1 and O1) to Exhibit 3; revenues at current rates will then both
35		show \$11,385,527.

7-VECC-38 Page 1 of 1

4		
5	Ref	erence: E7/T1/S1, Attachment 1, pg. 8-9
6		Kingston Hydro's Cost Allocation models
7		
8	Inte	rrogatory:
9		
10	a)	Sheet I8 of the Cost Allocation model has no NCP values for the Large Use
11		class for either Line Transformers (LTNCP) or Secondary (SNCP). However,
12		Sheet I6.1 and Exhibit 8, Tab 1, Schedule 1 (pages 8-10) both report that only
13		slightly more than 1/3 of the Large Use load is eligible for the Transformer
14		Ownership Allowance suggesting the majority of the load uses Kingston Hydro-
15		owned transformers. Please reconcile.
16		
17	Res	ponse:
18		
19	a)	Kingston Hydro has one Large Use customer eligible for the Transformer
20		Ownership Allowance. Sheet I8 of the OEB version 3.3 Cost Allocation Model
21		being filed as part of response to 7-Staff-84 interrogatory has been updated to
22		reflect this.

6		OEB – New Cost Allocation Policy for Street Lighting – Cost
7		Allocation Model Update, July 2015
8		
9	<u>Inte</u>	errogatory:
10		
11	a)	Please provide updated cost allocation model runs for 2016-2020 using the
12		Board's July 2015 Cost Allocation model.
13		
14	b)	Based on the results of part (a), please provide an updated version of Appendix
15		2-P for 2016-2020.
16		
17	Res	sponse:
18		
19	a)	Please see 7-Staff-84 interrogatory response.
20		
21	b)	An updated version of Appendix 2-P for 2016-2020 reflecting updated cost
22		allocation model runs for 2016-2020 per 7-Staff-84 is provided in the following
23		Attachment 1 and an updated Excel version of Appendix 2-P has been filed.

Response to Vulnerable Energy Consumers Coalition Interrogatory 7-VECC-39

Attachment 1

Appendix 2-P Cost Allocation - 2016

Please complete the following four tables.

A) Allocated Costs

2016 Row 40 CA Costs Allocated **Costs Allocated** in Test Year Classes from Previous % % Study Study (Column 7A) 7,166,577 Residential 60.86% 7,662,892 59.72% GS < 50 kW 1.700.371 14.44% 1.638.046 12.77% GS 50 to 4,999 kW 2,282,143 19.38% 2,789,657 21.74% 465,454 111,797 3.95% 0.95% 520,754 197,356 _arge Use 4.06% 1.54% Street Lighting 21,964 Unmetered Scattered Load (USL) 49,290 0.42% 0.17% Standby Approved on an Interim 0.00% 0.00% Basis 0.00% 0.00% 0.00% 0.00% Total 11,775,632 100.00% 12,830,668

Notes

- 1 Customer Classification If proposed rate classes differ from those in place in the previous Cost Allocation study, modify the rate classes to match the current application as closely as possible.
- 2 Host Distributors Provide information on embedded distributor(s) as a separate class, if applicable. If embedded distributor(s) are billed as customers in a General Service class, include the allocated cost and revenue of the embedded distributor(s) in the applicable class. Also complete Appendix 2-Q.
- 3 Class Revenue Requirements If using the Board-issued model, in column 7A enter the results from Worksheet O-1, Revenue Requirement (row 40 in the 2013 model). This excludes costs in deferral and variance accounts. Note to Embedded Distributor(s), it also does not include Account 4750 Low Voltage (LV) Costs.

B) Calculated Class Revenues

2016	Row	/ 18 CA	Ro	w 23 CA	F	RateMaker Col K	Rov	v 19 CA	
Classes (same as previous table)		Column 7B Load Forecast		Column 7C L.F. X current		Column 7D LF X proposed		Column 7E iscellaneous	
` ' '	(L	(LF) X current		approved rates X		rates		Revenue	
Residential	\$	6,536,804	\$	7,052,138	\$	7,120,429	\$	373,907	
GS < 50 kW	\$	1,834,449	\$	1,979,070	\$	1,892,223	\$	73,432	
GS 50 to 4,999 kW	\$	2,439,094	\$	2,631,381	\$	2,631,388	\$	96,897	
Large Use	\$	422,418	\$	455,720	\$	478,625	\$	18,564	
Street Lighting	\$	89,061	\$	96,082	\$	105,950	\$	12,897	
Unmetered Scattered Load (USL)	\$	36,408	\$	39,279	\$	25,056	\$	1,301	
Standby Approved on an Interim Basis									
0									
Total	\$	11,358,235	\$	12,253,670	\$	12,253,671	\$	576,998	
		existing		(1 + d)				-	

Notes:

- 1 Columns 7B to 7D LF means Load Forecast of Annual Billing Quantities (i.e. customers or connections X 12, (kWh or kW, as applicable). Revenue Quantities should be net of Transformer Ownership Allowance. Exclude revenue from rate adders and rate
- 2 Columns 7C and 7D Column total in each column should equal the Base Revenue Requirement
- 3 Columns 7C The Board cost allocation model calculates "1+d" in worksheet O-1, cell C21. "d" is defined as Revenue Deficiency/Revenue at Current Rates.
- 4 Columns 7E If using the Board-issued Cost Allocation model, enter Miscellaneous Revenue as it appears in Worksheet O-1, row 19.

C) Rebalancing Revenue-to-Cost (R/C) Ratios

Class	Previously Approved Ratios Most Recent Year: 2011	Status Quo Ratios (7C + 7E) / (7A)	Proposed Ratios (7D + 7E) / (7A)	· Policy Range
	%	%	%	%
Residential	93.28	96.91		85 - 115
GS < 50 kW	120.00	125.30	120.00	80 - 120
GS 50 to 4,999 kW	107.00	97.80	97.80	80 - 120
Large Use	93.00	91.08	95.47	85 - 115
Street Lighting	104.00	55.22	60.22	80 - 120
Unmetered Scattered Load (USL)	120.00	184.76	120.00	80 - 120

Standby Approved on an Interim Basis	0.00		
0			

Notes

- 1 Previously Approved Revenue-to-Cost Ratios For most applicants, Most Recent Year would be the third year of the IRM 3 period, e.g. if the applicant rebased in 2009 with further adjustments over 2 years, the Most recent year is 2011. For applicants whose most recent rebasing year is 2006, the applicant should enter the ratios from their Informational Filing.
- 2 Status Quo Ratios The Board's updated Cost Allocation Model yields the Status Quo Ratios in Worksheet O-1. Status Quo means "Before Rebalancing".

D) Proposed Revenue-to-Cost Ratios

Class		Policy Range				
	2016	2017	2018	2019	2020	Folicy Kallye
	%	%	%	%	%	%
Residential	97.80					85 - 115
GS < 50 kW	120.00					80 - 120
GS 50 to 4,999 kW	97.80					80 - 120
Large Use	95.47					85 - 115
Street Lighting	60.22					80 - 120
Unmetered Scattered Load (USL)	120.00					80 - 120
Standby Approved on an Interim Basis						0
						0
0						111111

Note

1 The applicant should complete Table D if it is applying for approval of a revenue to cost ratio in 2014 that is outside the Board's policy range for any customer class. Table (d) will show the information that the distributor would likely enter in the IRM model) in 2014. In 2015 Table (d), enter the planned ratios for the classes that will be 'Change' and 'No Change' in 2014 (in the current Revenue Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision – Cost Revenue Adjustment', column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Appendix 2-P Cost Allocation - 2017

Please complete the following four tables.

A) Allocated Costs

2017 Row 40 CA Costs Allocated **Costs Allocated** in Test Year Classes from Previous % % Study Study (Column 7A) 7,166,577 Residential 60.86% 7,958,385 59.89% GS < 50 kW 1.700.371 14.44% 1.669.149 12.56% GS 50 to 4,999 kW 2,282,143 19.38% 2.913.387 21.93% 465,454 111,797 3.95% 0.95% 517,806 206,838 3.90% 1.56% Large User Street Lighting Unmetered Scattered Load (USL) 49,290 0.42% 22,388 0.17% Standby Approved on an Interim 0.00% 0.00% Basis 0.00% 0.00% 0.00% 0.00% Total 11,775,632 100.00%

Notes

- 1 Customer Classification If proposed rate classes differ from those in place in the previous Cost Allocation study, modify the rate classes to match the current application as closely as possible.
- 2 Host Distributors Provide information on embedded distributor(s) as a separate class, if applicable. If embedded distributor(s) are billed as customers in a General Service class, include the allocated cost and revenue of the embedded distributor(s) in the applicable class. Also complete Appendix 2-Q.
- 3 Class Revenue Requirements If using the Board-issued model, in column 7A enter the results from Worksheet O-1, Revenue Requirement (row 40 in the 2013 model). This excludes costs in deferral and variance accounts. Note to Embedded Distributor(s), it also does not include Account 4750 Low Voltage (LV) Costs.

In 2015 Table (d), enter the planned ratios for the classes that will be 'Change' and 'No Change' in 2014 (in the current Revenue Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision – Cost Revenue Adjustment', column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Appendix 2-P Cost Allocation - 2019

Please complete the following four tables.

A) Allocated Costs

2019 Row 40 CA Costs Allocated **Costs Allocated** in Test Year Classes from Previous % % Study Study (Column 7A) 7,166,577 Residential 60.86% 8,468,239 59.74% GS < 50 kW 1.700.371 14.44% 1.696.117 11 97% GS 50 to 4,999 kW 2,282,143 19.38% 3,186,835 22.48% 465,454 111,797 3.95% \$ 0.95% \$ 580,949 219,397 Large User 4.10% 1.55% Street Lighting Unmetered Scattered Load (USL) 49,290 0.42% 22,789 0.16% \$ Standby Approved on an Interim 0.00% 0.00% Basis 0.00% 0.00% 0.00% 0.00% Total 11,775,632 100.00%

Notes

- 1 Customer Classification If proposed rate classes differ from those in place in the previous Cost Allocation study, modify the rate classes to match the current application as closely as possible.
- 2 Host Distributors Provide information on embedded distributor(s) as a separate class, if applicable. If embedded distributor(s) are billed as customers in a General Service class, include the allocated cost and revenue of the embedded distributor(s) in the applicable class. Also complete Appendix 2-Q.
- 3 Class Revenue Requirements If using the Board-issued model, in column 7A enter the results from Worksheet O-1, Revenue Requirement (row 40 in the 2013 model). This excludes costs in deferral and variance accounts. Note to Embedded Distributor(s), it also does not include Account 4750 Low Voltage (LV) Costs.

B) Calculated Class Revenues

2019	Row 18 CA		Row 23 CA		RateMaker Col K		Row 19 CA		
	Column 7B			Column 7C		Column 7D		Column 7E	
Classes (same as previous table)	Lo	ad Forecast	L	F. X current	L	.F X proposed	M	iscellaneous	
		(LF) X current		proved rates X		rates Revenue		Revenue	
Residential	\$	7,717,996	\$	7,969,236	\$	7,968,877	\$	383,347	
GS < 50 kW	\$	1,865,916	\$	1,926,657	\$	1,917,249	\$	70,959	
GS 50 to 4,999 kW	\$	2,902,229	\$	2,996,704	\$	2,996,831	\$	102,668	
Large User	\$	507,341	\$	523,857	\$	523,837	\$	19,118	
Street Lighting	\$	137,222	\$	141,689	\$	151,502	\$	13,045	
Unmetered Scattered Load (USL)	\$	24,999	\$	25,813	\$	25,659	\$	1,232	
Standby Approved on an Interim Basis									
0				•		•			
Total	\$	13,155,704	\$	13,583,955	\$	13,583,955	\$	590,370	

Notes:

- 1 Columns 7B to 7D LF means Load Forecast of Annual Billing Quantities (i.e. customers or connections X 12, (kWh or kW, as applicable). Revenue Quantities should be net of Transformer Ownership Allowance. Exclude revenue from rate adders and rate
- 2 Columns 7C and 7D Column total in each column should equal the Base Revenue Requirement
- 3 Columns 7C The Board cost allocation model calculates "1+d" in worksheet O-1, cell C21. "d" is defined as Revenue Deficiency/Revenue at Current Rates.
- 4 Columns 7E If using the Board-issued Cost Allocation model, enter Miscellaneous Revenue as it appears in Worksheet O-1, row 19.

C) Rebalancing Revenue-to-Cost (R/C) Ratios

2019				
Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
Class	Most Recent			Folicy Ralige
	Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2011			
	%	%	%	%
Residential	93%	98.63	98.63	85 - 115
GS < 50 kW	120%	117.78	117.22	80 - 120
GS 50 to 4,999 kW	107%	97.26	97.26	80 - 120
Large User	93%	93.46	93.46	85 - 115
Street Lighting	104%	70.53	75.00	80 - 120
Unmetered Scattered Load (USL)	120%	118.67	118.00	80 - 120

Standby Approved on an Interim Basis	0%		
0			

Notes

- 1 Previously Approved Revenue-to-Cost Ratios For most applicants, Most Recent Year would be the third year of the IRM 3 period, e.g. if the applicant rebased in 2009 with further adjustments over 2 years, the Most recent year is 2011. For applicants whose most recent rebasing year is 2006, the applicant should enter the ratios from their Informational Filing.
- 2 Status Quo Ratios The Board's updated Cost Allocation Model yields the Status Quo Ratios in Worksheet O-1. Status Quo means "Before Rebalancing".

D) Proposed Revenue-to-Cost Ratios

Class	Proposed Revenue-to-Cost Ratios							
	2016	2017	2018	2019	2020	Policy Range		
	%	%	%	%	%	%		
Residential	97.80	97.75	98.00	98.63		85 - 115		
GS < 50 kW	120.00	119.02	117.88	117.22		80 - 120		
GS 50 to 4,999 kW	97.80	97.88	97.87	97.26		80 - 120		
Large User	95.47	98.35	97.58	93.46		85 - 115		
Street Lighting	60.22	65.00	70.00	75.00		80 - 120		
Unmetered Scattered Load (USL)	120.00	118.98	118.50	118.00		80 - 120		
Standby Approved on an Interim Basis						0		
						0		
0						111111		

Note

1 The applicant should complete Table D if it is applying for approval of a revenue to cost ratio in 2014 that is outside the Board's policy range for any customer class. Table (d) will show the information that the distributor would likely enter in the IRM model) in 2014. In 2015 Table (d), enter the planned ratios for the classes that will be 'Change' and 'No Change' in 2014 (in the current Revenue Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision – Cost Revenue Adjustment', column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Appendix 2-P Cost Allocation - 2020

Please complete the following four tables.

A) Allocated Costs

2020 Row 40 CA Costs Allocated Costs Allocated in Test Year Classes from Previous % % Study Study (Column 7A) 7,166,577 Residential 60.86% 8,659,735 59.57% GS < 50 kW 1.700.371 14.44% 1.687.341 11.61% GS 50 to 4,999 kW 2,282,143 19.38% 3,325,533 22.88% 465,454 111,797 3.95% 0.95% 618,223 222,837 Large User 4.25% 1.53% Street Lighting Unmetered Scattered Load (USL) 49,290 0.42% 22,782 0.16% \$ Standby Approved on an Interim 0.00% 0.00% Basis 0.00% 0.00% 0.00% 0.00% Total 11,775,632 100.00% 14,536,451

Notes

- 1 Customer Classification If proposed rate classes differ from those in place in the previous Cost Allocation study, modify the rate classes to match the current application as closely as possible.
- 2 Host Distributors Provide information on embedded distributor(s) as a separate class, if applicable. If embedded distributor(s) are billed as customers in a General Service class, include the allocated cost and revenue of the embedded distributor(s) in the applicable class. Also complete Appendix 2-Q.
- 3 Class Revenue Requirements If using the Board-issued model, in column 7A enter the results from Worksheet O-1, Revenue Requirement (row 40 in the 2013 model). This excludes costs in deferral and variance accounts. Note to Embedded Distributor(s), it also does not include Account 4750 Low Voltage (LV) Costs.

B) Calculated Class Revenues

2020	Rov	Row 18 CA		Row 23 CA		RateMaker Col K		v 19 CA
		Column 7B		Column 7C		Column 7D		Column 7E
Classes (same as previous table)	Lo	ad Forecast	L	F. X current	L	F X proposed	M	iscellaneous
		(LF) X current		proved rates X		rates Revenue		
Residential	\$	8,019,476	\$	8,209,156	\$	8,208,999	\$	390,118
GS < 50 kW	\$	1,865,343	\$	1,909,463	\$	1,899,911	\$	70,460
GS 50 to 4,999 kW	\$	3,027,697	\$	3,099,309	\$	3,099,472	\$	106,009
Large User	\$	524,363	\$	536,765	\$	536,742	\$	19,721
Street Lighting	\$	151,822	\$	155,413	\$	165,099	\$	13,171
Unmetered Scattered Load (USL)	\$	25,055	\$	25,647	\$	25,527	\$	1,218
Standby Approved on an Interim Basis								
0								
Total	\$	13,613,755	\$	13,935,754	\$	13,935,749	\$	600,697

Notes:

- 1 Columns 7B to 7D LF means Load Forecast of Annual Billing Quantities (i.e. customers or connections X 12, (kWh or kW, as applicable). Revenue Quantities should be net of Transformer Ownership Allowance. Exclude revenue from rate adders and rate
- 2 Columns 7C and 7D Column total in each column should equal the Base Revenue Requirement
- 3 Columns 7C The Board cost allocation model calculates "1+d" in worksheet O-1, cell C21. "d" is defined as Revenue Deficiency/Revenue at Current Rates.
- 4 Columns 7E If using the Board-issued Cost Allocation model, enter Miscellaneous Revenue as it appears in Worksheet O-1, row 19.

C) Rebalancing Revenue-to-Cost (R/C) Ratios

Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Dalieu Banga
Class	Most Recent			Policy Range
	Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2011			
	%	%	%	%
Residential	93%	99.30	99.30	85 - 115
GS < 50 kW	120%	117.34	116.77	80 - 120
GS 50 to 4,999 kW	107%	96.39	96.39	80 - 120
Large User	93%	90.01	90.01	85 - 115
Street Lighting	104%	75.65	80.00	80 - 120
Unmetered Scattered Load (USL)	120%	117.93	117.40	80 - 120

Standby Approved on an Interim Basis	0%		
0			

Notes

- 1 Previously Approved Revenue-to-Cost Ratios For most applicants, Most Recent Year would be the third year of the IRM 3 period, e.g. if the applicant rebased in 2009 with further adjustments over 2 years, the Most recent year is 2011. For applicants whose most recent rebasing year is 2006, the applicant should enter the ratios from their Informational Filing.
- 2 Status Quo Ratios The Board's updated Cost Allocation Model yields the Status Quo Ratios in Worksheet O-1. Status Quo means "Before Rebalancing".

D) Proposed Revenue-to-Cost Ratios

Class		Delieu Benge				
	2016	2017	2018	2019	2020	Policy Range
	%	%	%	%	%	%
Residential	97.80	97.75	98.00	98.63	99.30	85 - 115
GS < 50 kW	120.00	119.02	117.88	117.22	116.77	80 - 120
GS 50 to 4,999 kW	97.80	97.88	97.87	97.26	96.39	80 - 120
Large User	95.47	98.35	97.58	93.46	90.01	85 - 115
Street Lighting	60.22	65.00	70.00	75.00	80.00	80 - 120
Unmetered Scattered Load (USL)	120.00	118.98	118.50	118.00	117.40	80 - 120
Standby Approved on an Interim Basis						0
