1. Residential Rate Design Chapter 3.2.3..... 4

1. Residential Rate Design Chapter 3.2.3

a. Impact at the 10th Percentile of Consumption

Atikokan has chosen a 2 year transition period to be within the \$4.00 impact. The bill impact for all Residential customers from a variable to a fixed service charge shows an increase of \$3.95.

In accordance with section 3.2.3 of the 2016 Filing requirements, Atikokan has assessed the tenth consumption percentile in the Residential class. Consumption information was extracted from the 1400 residential customers billing statistics. The 10th percentile from this ascending list is 170 kWh customer number 140.

The tenth percentile shows a difference for RPP Customers prior to taxes and OCEB is 5.0%. This is within the 10% threshold.

The Non-RPP Residential shows a difference of 6.0% prior to taxes and OCEB. This is within the 10% threshold.

As a result of the Bill Impact Atikokan is not proposing any mitigation measures for residential customers.
