LETTER OF COMMENT

Comments:

Waterloo North Hydro has submitted rate impact filings for each of its rate classes. The Ontario Clean Energy Benefit (OCEB) is included in both the current and proposed rate structures.

As of January 1st, 2016 (the proposed start of the rate application), the OCEB will no longer be included on the bills of Ontario hydro customers. Therefore, the OCEB should show a 'zero' value for the proposed rate structures. This will result in a 10% increase to many customer's bills prior to the proposed increase by Waterloo North Hydro.

The total increase for those customers who currently receive the OCEB credit should be nullified until the impact of the removal of the OCEB is realized during the 2016 rate period.
