Subject: EB-2015-0304 (Policy review of miscellaneous rates and charges)

BOMA Toronto is pleased that the Ontario Energy Board (OEB) is initiating a comprehensive policy review of miscellaneous rates and charges applied by electricity distributors for specific activities or services they provide to their customers and nominates Marion Fraser to represent this ratepayer association in any and all working groups established to do so. We understand that as a first component of this phase, the OEB plans to prioritize the review of wireline pole attachments. The OEB will establish a Pole Attachments Working Group (PAWG) to provide advice on the technical aspects and related details to be addressed in respect of pole attachments. The subsequent review of pole attachments will consider the methodology used for determining charges, including the appropriate treatment of any revenues that carriers may receive from third parties.

Marion Fraser has over 35 years of experience in Ontario's energy sector working and consulting with energy regulated and non-regulated energy companies and energy consumers as well as engaging in policy activities with respect to energy and environment matters. She has appeared as a witness, and expert witness and an intervenor in numerous hearings. A recent CV is attached.

BOMA Toronto applies for costs to participate in this process.

Thank you for your consideration in this matters.
