**Subject:** Hydro Rates

Thankfully the price of candles hasn't kept pace with hydro rates. Cold showers in a 15 degree C house is now the norm! (I have baseboard heat). My house is full of LED bulbs. There is a timer on the hot water heater.

Seriously people, you are killing this province, industry (public and private).

My personal usage is 10% peak, 10 % mid and 80% off peak. Yet the average price per kwh is .28 plus.

Lower the rate now.

L. Goheen
