Subject: EB-2015-0055 Decision and Order

Good Afternoon Christiane,

We have discovered an inconsistency with the bill impacts provided in the model included with our Decision and Order .

Specifically, for the General Service less than 50 kW classification, there are fixed distribution rate riders which do not appear on the sheet. They should appear both in the Current and Proposed columns (at the same total rate of \$7.31).

Can you please advise whether any action is required to correct the bill impacts section at this point?
