The President & CEO of Brant County Power Inc. Mr. I. Miles, sent a proposal to the OEB on October 15, 2015. We consider this action to be suspicious. The current customers of this utility will have to pay unreasonable extra costs. This proposal must not be approved.

Please read our complaint.

Sincerely yours,

[REDACTED]

RE: 2016 Distribution Rate Adjustment Application, EB 2015-0054 by Brant County Power Inc.

As residential customers of Brant County Power Inc ("BCP") we like to bring to your attention a section of this 243-page proposal, mentioned above, sent to the OEB by BCP on October 15, 2015.

This utility is sold to Cambridge and North Dumfries Hydro Inc ("CND") and for this reason BCP will no longer be in existence on January 01, 2016.

We read this report online and came to the realization that this proposal is very unreasonable. In this age that we urged to reduce energy consumption to save our planet, this proposal of BCP is doing the exact opposite.

As you can see the increase for a residential customer consuming 100 Kw/h (Appendix C- Bill Impacts, page 218), will be 28.73%, and for a residential customer consuming 2000 Kw/h (page 228) the increase will be 12.93%. The customer with 2000 Kw/h should have the increase of 28.73%, not the customer with 100 Kw/h.

A customer with 100 Kw/h will pay \$8.05 a month more. A customer with 2000 kw/h will pay \$40.20 a month more. This means that a customer who

consumes 20 times more electricity will only pay 5 times more.

Instead, the customer who consumes 2000 Kw/h electricity should have to pay $20 \times \$8.05 = \161.00 more.

The OEB must not approve this proposal of the dying BCP. An unreasonable, additional increase in our hydro rates must be stopped. We are paying more than enough already.

Sincerely yours,

Eduard W.J. Kerkhoven
