## LETTER OF COMMENT

### Comments:

As I understand this file EB-2016-0004 Union Gas is requesting that its current ratepayers pay (and all natural gas ratepayers?) a part of the cost of an expansion to communities that do not now have natural gas service.

Really? How ridiculous.

A private for profit corporation wants its current customers to help it earn more profit. The arrogance of this request is astounding.

I'm all in favour of extending natural gas pipelines to those communities that don't have them now but not subsidized by current customers.

In fact if what is needed is to connect remote communities to natural gas lines then maybe natural gas should become a public service owned and operated by the people of Ontario who would receive the benefit.
