Re: Union Gas Plan

This plan by Union Gas to build a pipeline to Bruce County and charge current customers \$2.00 per month for the privilege of helping Union Gas get more customers and therefore more money, is ridiculous. If they want to get more Bruce County customers, then the cost of building the pipeline is just the cost of doing business. I can see them charging a surcharge to new customers who want to receive natural gas; but, why should existing customers pay to help Union Gas increase their profits?
