**Subject:** Expansion of Natural Gas

Good morning.

The intent of the motion from the township was to support the concept of the expansion of Natural Gas into areas of the Township that currently are not serviced by natural gas. The Township however was not willing to contribute financially to the project or would not be looking to have any reduction in the Assessment Value that would be placed on the Gas Company as a result of new construction that would create additional tax revenue for the municipality. Should expansion happen then the Gas Company should be responsible for dealing with the costs.

The Township was not looking at participating at the hearing.

If you require further clarification please do not hesitate to contact the undersigned.
