Regarding: Letter of Support for Natural Gas Delivery to Milverton Ontario EB-2016-0004 and EB-2015-0179

Mornington Communications is a strong supporter for the construction and delivery of natural gas to the community of Milverton Ontario. As a business in Milverton that uses energy and sells services to the local residences, we see a strong correlation with the reduced operating costs resulting from the use of natural gas and additional community growth. Further, as the community grows local businesses like ours can grow as well.

Today's competitive nature requires businesses to operate on tighter margins than ever before. The significant savings of having natural gas could make the difference of a business being thriving and viable or closing forever. To maintain the current business environment and attract new ventures Milverton requires that our business customers enjoy the same cost base as neighbouring communities.

Thank you,

Ken Naylor
General Manager
Mornington Communications Coop Ltd
