Ottawa, ON K1R 7S8

Dear Mr. Laszlo:

Re: Billing for Customers with Load Displacement Generators (Board File No. EB-2016-0189) and Rate Design for Commercial and Industrial Customers (Board File No. EB-2015-0043)

Thank you for your letter on behalf of the Ontario CHP Consortium regarding the Ontario Energy Board's (OEB) initiatives regarding billing for customers with load displacement generators and rate design for commercial and industrial customers. These are important initiatives, and we encourage the Ontario CHP Consortium and/or its individual participants to actively take part in them.

Although the period for commenting on OEB staff's discussion paper in the rate design project has now expired, as indicated in the OEB's March 31, 2016 letter there will be opportunities for further input before an OEB policy is finalized. We do note that certain of your working group members are participating in that consultation, and have submitted comments on the staff discussion paper.

We expect to issue a letter in the near term that will provide further details regarding the consultation on billing for customers with load displacement generators. We would be pleased to meet with you to further discuss the Ontario CHP's Consortium's concerns after that letter has been issued.

Yours truly,

A handwritten signature in black ink, appearing to read "Peter Fraser".
