Subject: Staff Discussion Paper on a Cap and Trade Regulatory Framework for Natural Gas Utilities - EB-2015-0363

Importance: High

Good Evening,

As a concerned residential rate payer in Ontario, I think the idea that the per-cubic meter charge for facility-related obligation costs “should be included in the delivery charge on the customer’s bill” is a terrible idea. I would like to see the charge for my carbon emissions shown as a separate line item on my Enbridge Gas bill.

I fail to see how this could present any issues since Gaz Metro, in Quebec, shows the carbon charge as a separate line item on their bills.

If there are to be any public forums on this issue, please let me know where I can find such info.

Regards,

Chris Evanoff
