**Subject:** Staff Discussion Paper on a Cap and Trade Regulatory Framework for Natural Gas Utilities

Given the legislation and rule finalization around the Cap & Trade Program I would like to express both as a taxpayer of this Province and as a Customer of Union Gas that the costs associated with the program be designated as a separate line item on my Utility Bill. I think it is important for Consumers to understand the true costs being incurred as a result of this Government initiative. Please let me know how I can continue to monitor this issue.

Best Regards,

Mark L. Jones
