I would like to strongly protest any rate increase proposed by Hydro One Networks Inc.

The rates we are paying at the present time are already excessively high. We in Ontario are amongst the highest

in North America and as a senior, I find that the obscene wages paid to the executives of Hydro One are the main reason we are being overcharged for the service provided.

As an example, I have a meter on a workshop on my property which consumes no electricity at all from November through May. I am charged 'delivery fees' for unused service to the tune of \$ 40.00 / month. I would love to have anyone at Hydro One rationalize this charge.

As a person on fixed income, along with all of the seniors in Ontario. I suggest that you fulfill your supposed mandate and ensure that you " provides you with reliable energy services at reasonable cost. "

You have been failing the residents of Ontario.

David G. Edward
