Dear Mr. Wachsmuth:

**Re: Union Gas Limited
2016 Leamington Expansion Project
Change Requests
Board File No. EB-2016-0013**

The Ontario Energy Board (OEB) is in receipt of your change request letter dated July 12, 2016. In the letter, Union requested approval of two changes to the Leamington Expansion Project.

The OEB has a few questions regarding the second change request (i.e. change to the installation method for the crossing of County Road 18 from directional drill to open cut). The OEB requires Union to file responses to the following questions. After the responses are filed, the OEB will proceed with its response to your letter.

1. Please advise whether an update to the Environmental Report is required as a result of this proposed change. If yes, please provide the status of the update. If not, please explain why.
2. Please advise whether Union consulted with the First Nations and Métis about the proposed change and please discuss the outcome of this consultation.
3. Union seems to have applied for, and received, the work permit from the Essex Region Conservation Authority regarding the proposed change to the installation

method for the road crossing while the Leamington Expansion proceeding was ongoing (and well before a decision was issued). Please explain why Union did not request approval from the OEB to make this change during the hearing (at the time that it first requested and received the permit).

Yours truly,
