

EB-2016-0058

Brantford Power Inc.

**Application for electricity distribution rates
beginning January 1, 2017**

**PROCEDURAL ORDER NO. 1
August 3, 2016**

Brantford Power Inc. (Brantford Power) filed a complete cost of service application with the Ontario Energy Board (OEB) on May 4, 2016 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B), seeking approval for changes to the rates that Brantford Power charges for electricity distribution, to be effective January 1, 2017.

A Notice of Hearing was issued on July 7, 2016. Each of Energy Probe Research Foundation (Energy Probe), Vulnerable Energy Consumers Coalition (VECC) and School Energy Coalition (SEC) applied for intervenor status and cost eligibility.

No objection was received from Brantford Power.

Energy Probe, VECC and SEC are approved as intervenors and are each eligible to apply for an award of costs under the OEB's Practice Direction on Cost Awards. The list of parties in this proceeding is attached as Schedule A to this Procedural Order. .

Cost eligible intervenors should be aware that the OEB will not generally allow the recovery of costs for the attendance of more than one representative of any party, unless a compelling reason is provided when cost claims are filed.

Issues List

It is the OEB's expectation that parties will be best positioned to identify issues relevant to Brantford Power's application after the applicant has responded to interrogatories, and following a technical conference, should it be required. Brantford Power, OEB staff and the intervenors shall develop and OEB staff shall file a proposed issues list for the OEB's consideration. The OEB will approve an issues list prior to the Settlement Conference.

Interrogatories

At this time, provision is being made for written interrogatories. The OEB will review the single test year application both in the context of the projects and programs that are requested for the test year and from the perspective of the distributor's plans for the subsequent four years until the next scheduled rebasing application.

Parties should examine the value presented by the proposed investments as opposed to focussing only on the costs. Parties should also assess the fit between the applicant's plans and its stated objectives, and consider how the plans contribute to positive outcomes for customers, in particular those outcomes that arise from the asset management decisions reflected in the applicant's distribution system plan. The OEB will consider the entire five year distribution system plan to assess the planning and pacing proposals of the applicant and whether the test year requests are appropriately aligned with the distribution system plan. The OEB will also consider productivity and benchmarking results in assessing cost forecasts, bill impacts and distributor performance.

Parties should not engage in detailed exploration of items that do not appear to be material. Parties should use the materiality thresholds documented in Chapter 2 of the Filing Requirements as a guide. In making its decision on cost awards, the OEB will consider whether intervenors made reasonable efforts to ensure that their participation in the hearing was focused on material issues.

Parties should consult sections 26 and 27 of the OEB's Rules of Practice and Procedure regarding required naming and numbering conventions and other matters related to interrogatories.

It is necessary to make provision for the following matters related to this proceeding.
