Re: Milton Hydro Distribution Inc. 2016 Cost of Service Application OEB File No. EB-2015-0089 Draft Rate Order

Please find attached Milton Hydro's Draft Rate Order prepared in accordance with the Ontario Energy Board Decision and Order issued July 28, 2016 and letter dated February 10, 2016 for Milton Hydro's 2016 Cost of Service Rate Application. This Draft Rate Order and live Excel models have been filed through the RESS. Two hard copies of the Draft Rate Order will follow by courier under separate cover.

Yours truly,

Original signed by

Cameron McKenzie Director, Regulatory Affairs Milton Hydro Distribution Inc.

EB-2015-0089

IN THE MATTER OF the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15, 3 Schedule B, as amended (the "OEB Act);

AND IN THE MATTER OF an Application by Milton Hydro Distribution Inc. under Section 78 of the OEB Act to the Ontario Energy Board for an Order or Orders approving or fixing just and reasonable rates and other service charges for the distribution of electricity as of May 1, 2016.

MILTON HYDRO DISTRIBUTION INC. ("MILTON HYDRO")

DRAFT RATE ORDER

Filed: August 12, 2016

Cameron McKenzie Director, Regulatory Affairs Milton Hydro Distribution Inc. 200 Chisholm Drive Milton, Ontario L9T 3G9

Tel: (289) 429-5212 cameronmckenzie@miltonhydro.com

BACKGROUND:

Milton Hydro Distribution Inc. (the "Applicant" or "Milton Hydro") filed a cost of service application with the Ontario Energy Board (the "OEB") on August 28, 2015 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that Milton Hydro charges for electricity distribution, to be effective May 1, 2016 (OEB File Number EB-2015-0089) (the "Application").

Following the receipt of interrogatories, Milton Hydro filed its interrogatory responses with the OEB on December 18, 2015 and filed responses to VECC and Energy Probe clarifying questions on January 23, 2016.

On January 6, 2016 the OEB issued Procedural Order No. 2 rescheduling the dates for the Settlement Conference to January 25, 26 and 27, 2016.

A Settlement Conference was convened on January 25 and 26, 2016 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's *Practice Direction on Settlement Conferences* (the "Practice Direction").

Milton Hydro filed a Settlement Proposal on February 9, 2016 reflecting a partial settlement among all parties with respect to some of the issues in this proceeding. The unsettled issues were:

- 1. The 2016 Test Year Operations, Maintenance & Administration ("OM&A") expense;
- 2. The capital addition in respect of the Chisholm Drive building; and
- 3. The recovery of the 2011 2014 LRAMVA

The OEB determined that it would not deal with the third outstanding issue in this proceeding. It is being dealt with by the OEB on a more generic basis. The first two unsettled issues were the subject of an oral hearing conducted by the OEB on April 4 and 5, 2016.

On April 7, 2016, Milton Hydro filed an addendum to the Settlement Proposal to address an OEB staff submission with respect to the bill impact for the Sentinel Light class, which was agreed to by all parties.

The Parties have agreed that the effective date of the rates arising out of the Settlement Proposal, and out of the OEB's decision on the outstanding matters, should be May 1, 2016. Further, the parties agreed that in the event that it was not possible for the Board to issue its

Rate Order in time for May 1, 2016 implementation, a rate rider would be established to refund/recover to or from ratepayers the difference in revenue collected from the effective date of May 1, 2016 through to the actual implementation date as determined by the Board. Milton Hydro will prepare a draft rate rider as part of its draft rate order following the Board's issuance of a Decision and Order in this proceeding.

DECISION AND ORDER

Milton Hydro received the OEB's Decision and Order ("Decision") on its 2016 Cost of Service Application on July 28, 2016. The Decision dealt with the remaining unsettled issues resulting from the Settlement Conference held on January 25 and 26, 2016 being:

- 1. The 2016 Test Year Operations, Maintenance & Administration ("OM&A") expense; and
- 2. The capital addition in respect of the Chisholm Drive building.

The Decision summarized the disallowances and adjustments that Milton Hydro is required to make in the preparation of this Draft Rate Order as follows:

- (i) For the capital gain realized on the sale of the property at the Fifth Line and Main Street

 a rate base reduction of about \$506,000;
- (ii) For 6,800 square feet of excess office space a rate base reduction of \$675,722;
- (iii) For the capital cost differential between inside and outside storage a rate base reduction of \$753,480;
- (iv) The reversal and elimination of the revenue requirement offset of \$87,975;
- (v) For OM&A cost reductions related to excess office space and the use of building space as the equivalent of outside storage – a total amount of \$50,000 included in the \$550,000 OM&A expenses disallowance found in Section 6.2 of this Decision and Order; and
- (vi) For the reversal of accumulated depreciation amounts at December 31, 2015 related to the depreciable components of disallowed rate base items – a total amount of \$33,000.
 Rate base for 2016 will increase by this amount.

Rate Base Adjustment

Milton Hydro has combined the rate base adjustments identified in the summary issues i) in the amount of \$506,000 as discussed above in relation to the gain on the sale of Fifth & Main; ii) in the amount \$675,722 for the excess square feet of office space; and iii) in the amount of \$753,480 being the capital cost differential between inside and outside storage, into a single total reduction to the building costs for 200 Chisholm Drive in the amount of \$1,935,202. Milton Hydro has reduced its Rate Base accordingly and has also removed the revenue offset in the amount of \$87,975 as set out in issue iv) above.

Fixed Asset Continuity Schedule

Milton Hydro has provide the Table 1a below reflecting the changes to the 2015 additions as set out in the Rate Base Adjustment above removing the \$1,935,202 from the building addition for 200 Chisholm Drive. The building cost as filed was \$10,460,000 and has been reduce to \$8,524,798 as per the Decision.

Operations, Maintenance & Administration

Milton Hydro has reduced its total OM&A costs by \$550,000 as per issue v) above for the reduction of costs related to the excess office space in the amount \$50,000 and the disallowance of OM&A expenses in the amount of \$500,000.

The following Table 2 is similar to the Table 1 above but summarizes the adjustment to Milton Hydro's Cost of Capital, Rate Base and Capital Expenditures; Operating Expenses and Revenue Requirement throughout this proceeding and up to the OM&A adjustment in the amount of \$550,000.

Allocation of the Revenue Requirement

Milton Hydro has allocated it Revenue Requirement in accordance with the results of the cost allocation model set out in Table 5 below. All cost allocation ratios, as agreed to in Milton Hydro's Settlement Proposal filed February 9, 2016 are within the OEB-Approved ranges except the Sentinel Light class cost allocation ratio which was agreed to in the Addendum to the

Settlement Proposal filed April 7, 2016. The Sentinel Light cost allocation ratio will be adjusted upwards to 80% over the following two year Incentive Regulation Applications and any revenue impacts to the remaining classes will be adjusted accordingly.

	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios
Class	Most Recent		
	Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)

Distribution Rates

Milton Hydro's distribution charges are calculate based on the current 2015 fixed/variable split for each customer class except for the Residential customer class as discussed above and the General Service 50 to 999 kW customer class whereby the fixed distribution charge was not changed from the 2015 OEB approved fixed charge as agreed to in the Settlement Proposal.

The following Table 8 sets out Milton Hydro's proposed distribution rates by customer class.

Table 8

Proposed Distribution Rates

Customer Class	Total Net Rev. Requirement	Rev Requirement %	Proposed Fixed Rate	Proposed Variable Rate	Total Fixed Revenue	Total Variable Revenue	sformer owance	Gross Distribution Revenue

Low Voltage Charges

Milton Hydro has allocated its Low Voltage costs in the amount of \$535,000 across each customer class based on the retail transmission connection rate calculated in the 2016 Retail Transmission Service Rate model. The following Table 10 provides the allocation of Milton Hydro's Low Voltage costs to each customer class and Table 11 sets out the Low Voltage Charge by customer class as agreed to in the Settlement Proposal.

Table 10	
Low Voltage Costs Allocated to Customer Classes

Foregone Revenue

Milton Hydro has prepared its foregone distribution revenues and rate riders for each rate class for the period May 1, 2016 to August 31, 2016 or four months expecting the implementation of rates for September 1, 2016.

Milton Hydro has used the actual kWh consumption and kW demand for May and June 2016 in calculating the foregone distribution revenue for the Residential, General Service <50 kW, General Service 50 to 999 kW, Large User and Street Light customer classes. July and August actual kWh and kW is not available as of the filing date of this Draft Rate Order and therefore Milton Hydro has used its load forecast model for determining the kWh and kW for these two months.

Milton Hydro has used its load forecast model to calculate the foregone distribution revenue for the Sentinel Light and Unmetered/Scattered Load customer classes as these two customer classes are flat rate billed. The following Table 14 provides Milton Hydro's calculations for the foregone distribution revenue for each customer class.

Table 14

Foregone Distribution Revenue for May to August 2016

	Customer #'s from OEB- Approved Load Forecast	kWh or kW from OEB-Approved Load Forecast	kWh or kW to be recovered over XX Months	May 1, 2016 Interim Rates Fixed Distribution Charge	May 1, 2016 Interim Rates Variable Distribution Charge	Proposed Fixed Distribution Charge Effective	Proposed Variable Distribution Charge Effective	Difference in Fixed Distribution Charge	Difference in Variable Distribution Charge	Total Forgone Revenue Fixed Distribution Charge (F) =(B*E)	Total Forgone Revenue Variable Distribution Charge (F) =(B*E)	Year End Customer Count	Average kWh or kW Over Recovery Period	Foregone Fixed Distribution Revenue Rate Rider	Foregone Variable Distribution Revenue Rate Rider

Bill Impacts

The following Table 15 sets out the bill impacts for both the total bill and the distribution portion of the bill by customer class and varying consumption and demand. This table included the foregone revenue rate rider for May to August 2016.

Table 15Customer Class Bill Impacts

In calculating the 2015 charges the DRC was remove for the Residential Class only; the Wholesale Market Service Rate was set to the 2016 rate for all classes; the Ontario Electricity Support Program charge was set to the 2016 rate for all classes; Electricity rate impact is zero.

Tariff of Rates and Charges

Milton Hydro's tariff of rates and charges is attached as Appendix A.

CONCLUSION:

Milton Hydro has prepared the above Tables and its Tariff of Rates and Charges as filed in this Draft Rate Order in accordance with the OEB Decision and Order issued July 28, 2016 and the OEB letter dated August 10, 2016.

As indicated in Milton Hydro's letter dated August 9, 2016, Milton Hydro intends to file a Motion for Review of the Decision. As such, Milton Hydro respectfully requests that the OEB not issue a Final Rate Order at this time, pending the outcome of the Motion, as Milton Hydro submits that a second rate adjustment for 2016 (which may occur if the Motion is successful) may lead to confusion for Milton Hydro's customers.

ALL OF WHICH IS RESPECTFULLY SUBMITTED THIS 12TH DAY OF AUGUST, 2016.

Tariff of Rates and Charges

Effective and Implementation Date May 01, 2016

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors FB-2015-0089

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to detached, semi-detached and townhouse residential buildings as defined in local zoning bylaws. A residential service is a single-family unit used for domestic or household purposes, including seasonal occupancy. At Milton Hydro's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate by blocking the residential rate by the number of units. Further servicing details are available in the distributor's Conditions of Service.

Where the residential dwelling comprises the entire electrical load of a farm, it is defined as a residential service. Where the residential dwelling does not comprise the entire electrical load of the farm:

- The service will be defined as a General Service if the occupant derives his/her principal livelihood from the working of the farm;
- The service will be defined as a Residential Service if the occupant does not derive his/her principal livelihood from the working of the farm;
- Where the residential farm dwelling is supplied by one separately metered service and the electrical loads in other buildings are supplied by a different separately metered service, then the former is defined as a Residential Service and the latter is defined as a General Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	100.00
Monthly Fixed Charge, per retailer	\$	20.00
Monthly Variable Charge, per customer, per retailer	\$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.25
Processing fee, per request, applied to the requesting party	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the		
Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor – Secondary Metered Customer < 5,000 kW	1.0375
Distribution Loss Factor - Secondary Metered Customer > 5,000 kW	1.0154
Distribution Loss Factor - Primary Metered Customer < 5,000 kW	1.0272
Distribution Loss Factor - Primary Metered Customer > 5,000 kW	1.0054

Notes:

General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

(1)

All inputs are in dollars (\$) except where inputs are individually identified as percentages (%) Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use colimn M and Adjustments in column I (2)

(3) Net of addbacks and deductions to arrive at taxable income.

(4) (5)

- Average of Gross Fixed Assets at beginning and end of the Test Year Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- (6) Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- (7) (8) (9) 4.0% unless an Applicant has proposed or been approved for another amount.
- The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, WCA factor based on lead-lag study or approved WCA factor for another distributor, with supporting rationale.
