**Re: Application for LRAMVA Recovery 2011 to 2014 CDM
OEB File No. EB-2016-0242**

Milton Hydro Distribution Inc. ("Milton Hydro") filed an Application on August 4, 2016 requesting the recovery of its Lost Revenue related to its 2011 to 2014 Conservation and Demand Management programs.

Milton Hydro noticed a typographical error in Table 3 under the Proposed Billing Determinants and has made the correction to agree with Milton Hydro's load forecast as approved in the OEB Decision and Order on Milton Hydro's 2016 Cost of Service Application EB-2015-0089 dated July 28, 2016.

This correction does not impact the Notice to Customers provided with the Letter of Direction dated August 25, 2016 as the increase to the residential and general service <50 kW customers does not change. Milton Hydro has completed paragraphs 1 to 4 of the Letter of Direction and in particular delivered the updated Application with Table 3 corrected to the intervenors as directed. Milton Hydro will be filing its affidavit on August 31, 2016.

Milton Hydro respectfully requests that this corrected Application replace the previous Application on the OEB's webdrawer.

Yours truly,
