Attn: Kirsten Walli, Board Secretary

Dear Ms. Walli:

Re: EB-2016-0152 – OPG 2017-2021 – Transcribed Technical Conference

We are counsel to the School Energy Coalition ("SEC"). Pursuant to Procedural Order No.1, wherein it was indicated that parties may request presentations at the untranscribed technical conference to be held on September 23, 2016, of additional aspects of Ontario Power Generation's ("OPG") Darlington Refurbishment Program ("DRP") and rate smoothing deferral account than those listed.

SEC has consulted with the Association of Major Power Consumers in Ontario ("AMPCO"), and on behalf of both parties, it is requested that OPG present an overview of its resourcing strategy and plan related to the DRP. SEC and AMPCO specifically ask OPG to include the following in its presentation:

- How SNC/Aecon plans to recruit the resources needed for the RFR project and the status of those plans?
- How existing OPG Unit 2 employees will be utilized/redeployed during the Unit 2 Refurbishment?
- How OPG ensures that its project management team and labour force has the appropriate expertise?
- How OPG ensures that the required resources are in place to meet the DRP schedule?
- How contractor resources and OPG resources will be integrated and scheduled?

Please do not hesitate to contact the undersigned if you have any questions or require further information.
