Ontario Energy Board P.O. Box 2319, 27<sup>th</sup> Floor 2300 Yonge Street Toronto, ON M4P 1E4

Attention: Kirsten Walli, Board Secretary

Dear Ms. Walli:

# Re: North Bay Hydro Distribution Ltd. – Application for 2017 Electricity Distribution Rates EB-2016-0214

North Bay Hydro Distribution Ltd. ("NBHDL") is pleased to submit to the Ontario Energy Board (the "Board") its 2017 electricity distribution rate application in accordance with the Board's *Filing Requirements for Electricity Distribution Rate Applications – 2016 Edition for 2017 Rate Applications* as issued July 14, 2016 under the 4<sup>th</sup> Generation Incentive Rate-setting plan under the Price Cap IR method.

In a letter dated July 14, 2016, the Board identified NBHDL as one of the distributors on the 2017 IRM schedule, grouped into Tranche 2, with a filing deadline of September 26, 2016. The filing requirements indicate that each application should include:

- A Manager's Summary documenting and explaining all rate adjustments applied for;
- The primary contact information for the IRM application;
- A completed Rate Generator model and supplementary work forms as provided by the Board, both in electronic (i.e. Excel) and PDF form;
- A PDF copy of the current Tariff Sheet;
- Supporting documentation cited within the application;
- A statement as to who will be affected by the application;
- A statement confirming the accuracy of the billing determinates for pre-populated models; and
- A text-searchable Adobe PDF format for all documents.

The completed 2017 Rate Generator Model and Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) Work Form are attached along with supporting documentation, tariff sheets and bill impact information. The Manager's Summary for NBHDL's 2017 rate application is also attached to this letter.

This Application will affect all ratepayers in NBHDL's service territory.

The primary contact for this application is Melissa Casson, Regulatory Manager. Contact details are below.

If directed by the Board, NBHDL proposes to publish the Notice of Application in the following publication:

The North Bay Nugget 259 Worthington West North Bay, ON P1B 3B4

NBHDL's 2017 electricity distribution rate application will be sent to the Board in the following form:

- (a) Electronic filing through the Board's web portal, consisting of one (1) electronic copy of the application in text-searchable / unrestricted Adobe PDF format and one (1) electronic copy in Microsoft Excel format of the completed Rate Generator Model, the completed LRAMVA Work Form and the final CDM evaluation reports from the IESO; and
- (b) Two (2) paper copies of the application, including the Manager's Summary, the Rate Generator Model and the LRAMVA Work Form.

NBHDL would be pleased to provide any further information or details that the Board may require relative to this application.

Yours truly,

Original signed by

Melissa Casson, CPA, CGA Regulatory Manager North Bay Hydro Distribution Limited (705) 474-8100 (300) mcasson@northbayhydro.com

### **CERTIFICATE OF EVIDENCE**

As President and Chief Operating Officer of North Bay Hydro Distribution Ltd. I certify that to the best of my knowledge the evidence filed in NBHDL's 2017 4<sup>th</sup> Generation Incentive Rate-setting Mechanism, Price Cap IR application is accurate, complete and consistent with the filing requirements of Chapter 3 of the Filing Requirements for Electricity Distribution Rate Applications revised on July 14, 2016. I also confirm the accuracy of the billing determinants for pre-populated models.

Todd Wilcox

President and Chief Operating Officer

#### APPLICATION

North Bay Hydro Distribution Ltd. ("NBHDL") is a licensed electricity distributor (ED-2003-0024) that owns and operates the electricity distribution system that provides service to the City of North Bay. NBHDL charges its customers distribution rates and other charges as authorized by the Ontario Energy Board (the "Board"). In this application, NBHDL is applying for rates and other charges effective May 1, 2017. This Application will affect all ratepayers in NBHDL's service territory. NBHDL requests that, pursuant to Section 34.01 of the Board's *Rules of Practice and Procedure*, this proceeding be conducted by way of written hearing. In the event that the Board is unable to provide a Decision and Order in this Application for implementation by the Applicant as of May 1, 2017, NBHDL requests that the Board issue an Interim Rate Order declaring the current Distribution Rates and Specific Service Charges as interim until such time as the 2017 rates are approved. In the event that the effective date does not coincide with the Board's decided implementation date for 2017 Distribution Rates and Charges, NBHDL requests to be permitted to recover the incremental revenue from the effective date to the implementation date.

NBHDL filed a comprehensive Cost of Service ("COS)" rebasing application for the 2015 Test Year (EB-2014-0099) with interim rates set July 1, 2015 and final rates effective December 1, 2015. Subsequent to that NBHDL filed its first application under the Board's 4<sup>th</sup> Generation Incentive Rate-making Mechanism (IRM4), under the Price Cap IR method. The 2016 IRM application (EB-2015-0092) was submitted March 23, 2016 with rates set May 1, 2016. A copy of NBHDL's current Tariff of Rates and Charges, for rates effective and implemented May1, 2016, is included as Appendix "A". Accordingly, this is NBHDL's second application under the Board's 4<sup>th</sup> Generation Incentive Rate-making Mechanism (IRM4), under the Price Cap IR method. NBHDL has prepared the application in accordance with the Board's Filing Requirements for Electricity Distribution Rate Applications - 2016 Edition for 2017 Rate Applications (the "Filing Requirements") as issued July 14, 2016 and has adhered to Filing Instructions provided in the Board's 2017 IRM Rate Generator Model Version 1.3, which incorporates the Retail Transmission Service Rates ("RTSR") model and the Tax Sharing model, referred to collectively as the "Model". The completed 2017 IRM Rate Generator Model, in PDF format, is included as Appendix "D". NBHDL understands that Staff will update the Model for updated Retail Transmission Service Rates and parameters for determining the Annual Adjustment Mechanism when established by the Board. NBHDL has also completed the Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) Work Form ("LRAMVA WF") in accordance with Filing Instructions provided in the Work Form. The completed LRAMVA WF, in PDF format, is included as Appendix "E".

Specifically, NBHDL's application hereby applies for an Order or Orders approving distribution rates updated and adjusted in accordance with the Chapter 3 Requirements as follows:

- An Annual Adjustment Mechanism of 1.8% applied to existing distribution rates. The adjustment is determined by the OEB's calculated inflation factor for incentive rate setting under the Price Cap IR Price Escalator of 2.1%, reduced by the Productivity Factor of 0%, and reduced further by the Stretch Factor Value of 0.3% (Group III values);
- Adjust the fixed and variable rates for the Residential service classification in accordance with Section 3.2.3 of the Filing Requirements. The proposed change entails increasing the fixed service charge by \$3.31 per month including the annual adjustment under this IRM application, and decreasing the variable charge by \$.0035/kWh. This application includes the second of four annual adjustments in order to have residential customers on a fully fixed distribution rate by the year 2020;
- The continuation of the Low Voltage Service Rates as approved in the 2014 COS Application (EB-2014-0099);
- Proposed new Rate Riders for the Global Adjustment Sub-Account (2017) effective until April 30, 2018;
- Proposed new Rate Riders for Disposition of Deferral/Variance Accounts (2017) effective until April 30, 2018;
- The continuation of Rate Riders for the disposition of Accounts 1575 and 1576 effective until June 30, 2017;
- Proposed new Rate Rider for Recovery of LRAM Variance Account effective until April 30, 2018;
- An adjustment to the retail transmission service rates as provided in Guideline (G-2008-0001) on Retail Transmission Service Rates – October 22, 2008 (Revision 4.0 June 28, 2012);
- The continuation of the Wholesale Market Service Rate, Rural Rate Protection Charge, and the Ontario Electricity Support Program Charge. NBHDL expects that any changes to the Rural Rate Protection charge, as a result of Provincial government directives, will be updated and incorporated into the Model by Staff as information becomes available; and
- The continuation of the Standard Supply Service Charge, Specific Service Charges, microFIT Service Charge, Retail Service Charges, Transformation and Primary Metering Allowances, the Smart Metering Entity Charge and Loss Factors as approved in the 2014 COS Application (EB-2014-0099).

#### MANAGER'S SUMMARY

For purposes of the 2017 Price Cap IR Application, NBHDL has relied upon the following OEB issued documents and guidelines:

- Chapter 3 of the Filing Requirements for Electricity Distribution Rate Applications 2016 Edition for 2017 Rate Applications, updated on July 14, 2016 ("Filing Guidelines");
- Board Policy: A New Distribution Rate Design for Residential Electricity Customers (EB-2012-0410);
- Report of the Board on Electricity Distributors' Deferral and Variance Account Review (EDDVAR) – July 31, 2009
- Guideline (G-2008-0001) on *Retail Transmission Service Rates* October 22, 2008 (Revision 4.0, June 28, 2012) known as ("RSTR Guidelines").

This Manager's Summary will address the following items:

- 1) Annual Adjustment Mechanism
- 2) Revenue to Cost Ratio Adjustment
- 3) Rate Design for Residential Electricity Customers
- 4) Retail Transmission Service Rates
- 5) Disposition of Deferral and Variance Account Balances
  - a. Wholesale Market Participants
  - b. Global Adjustment Settlement Process
  - c. Global Adjustment Class A Participants
- 6) LRAM Variance Account (LRAMVA)
- 7) Tax Changes
- 8) Z-Factor Claim / ICM Claim
- 9) Treatment of Costs for 'eligible investments'
- 10) Conservation and Demand Management Costs
- 11) Off-ramps
- 12) Low Voltage Service Charges
- 13) Rate Rider Accounts 1575 & 1576
- 14) Bill Impacts

Appendices are as follows:

- Appendix A Current Tariff of Rates and Charges
- Appendix B Proposed Tariff of Rates and Charges
- Appendix C Proposed Bill Impacts
- Appendix D 2017 IRM Rate Generator Model

- Appendix E 2017 LRAMVA Work Form
- Appendix F IndEco 2013a 2014 LRAMVA Report
- Appendix G 2015 RRR Filing 2.1.5.4 Demand and Revenue

#### 1) Annual Adjustment Mechanism

The annual adjustment mechanism indexes distribution base rates to reflect expected increases in a distributors' input prices (the inflation factor) less an adjustment to reflect appropriate rates of productivity and an efficiency incentive (the X-factor).

The inflation factor to be used in determining the annual adjustment mechanism is set at 2.1% and the OEB has determined that the appropriate value for the productivity factor is zero. In the report issued to the Board by Pacific Economics Group Research, LLC ("PEG") titled *Empirical Research in Support of Incentive Rate-Setting: 2015 Benchmarking Update* NBHDL was ranked in the 3<sup>rd</sup> efficiency grouping which provides for an efficiency incentive of .3%. NBHDL has used this as a proxy for the calculation.

NBHDL has applied a 1.8% adjustment to the fixed service charge and distribution variable rate of all customer rate classes. NBHDL understands that the Board will update NBHDL's Model when the final parameters are established by the Board.

#### 2) Revenue-to-Cost Ratio Adjustments

NBHDL's 2014 COS (EB-2014-0099) approved revenue-to-cost ratios were within the Board's target ranges and a phase in period was not proposed or required. Accordingly, NBHDL is not seeking Board authorization to change existing ratios. The approved ratios for each class are as follows:

Class	Approved Revenue- to-Cost Ratio	Board Target Low	Board Target High
Residential	100.4%	85.0%	115.0%
General Service < 50 kW	110.2%	80.0%	120.0%
General Service > 50 to 2,999 kW General Service > 3,000 to 4,999	87.0%	80.0%	120.0%
kW	98.1%	80.0%	120.0%
Street Lighting	120.0%	70.0%	120.0%
Sentinel Lighting	111.8%	80.0%	120.0%
Unmetered and Scattered Load	120.0%	80.0%	120.0%

#### TABLE 1 - APPROVED REVENUE/COST RATIOS

#### 3) Rate Design for Residential Electricity Customers

On April 2, 2015, the OEB released its *Board Policy: A New Distribution Rate Design for Residential Electricity Customers (EB-2014-0210)*, which stated that electricity distributors will transition to a fully fixed monthly distribution service charge for residential customers. This will be

implemented over a period of four years, beginning in 2016. NBHDL is proposing changes to residential rates consistent with this policy and is proposing the second of four annual shifts in the fixed/variable split. The adjustment to fixed / variable cost ratios for Residential customers results in a change from 68.3% / 31.7% in 2016, to 78.9% / 21.1% in 2017 (fixed / variable).

The OEB has established two thresholds which could either extend the transition period to greater than four years or result in possible rate mitigation. The first threshold is that the increase in the monthly service charge should not exceed \$4 per month. NBHDL completed Tab "16. Rev2Cost\_GDPIPI" of the Model to determine the proposed residential fixed and variable rates using the Board's approach of the four-year transition to fully fixed rates. This change entails increasing the fixed charge by \$2.92 and decreasing the variable charge by \$.0036/kWh in the 2017 rate year. The annual price cap rate adjustment is then calculated for a total increase of \$3.31 to the fixed service charge and a decrease to the variable charge of \$.0035/kWh. The proposed increase in the fixed rate is below \$4.00 per month.

The second threshold is to determine the combined effects of the shift to fixed rates and other bill impacts to a residential customer in the 10th percentile of consumption. If the total bill impact for these customers is 10% or greater, a distributor must file a plan to mitigate the impact for the whole residential class or indicate why such a plan is not required. NBHDL extracted monthly consumption for the full year 2015 for each residential customer. Customers that did not have a full 12 months of consumption were excluded from the analysis. NBHDL calculated the average kWh/month and further excluded all customers with less than an average 50 kWh/month. NBHDL sorted the remaining data set of 18,152 records in ascending order based on average monthly consumption per customer. The 10<sup>th</sup> consumption percentile of this data set was determined to be the 1,815<sup>th</sup> record and the average consumption of this customer was 294 kWh/month; this became the "ceiling" for the lowest 10<sup>th</sup> percentile. The total bill impact for a residential customer with consumption of 294 kWh is an increase of \$1.88 or 2.68%. The proposed increase in the fixed rate is below a 10% total bill impact per month.

NBHDL has met both thresholds set out in the Filing Requirements thus a four year transition period is adequate and an extension to the transition period is not required.

#### 4) Retail Transmission Service Rates

NBHDL is charged retail transmission service rates by both the Independent Electricity System Operator ("IESO") and by Hydro One Networks ("HON") and in turn has established approved rates to charge customers in order to recover these expenses.

Retail Transmission Service Rates ("RTSR") are to be adjusted based on a comparison of historical transmission costs adjusted for new Uniform Transmission Rates ("UTR") levels and revenues generated from existing RTSRs. NBHDL referred to the Board's Guideline *G-2008-0001 - Electricity Distribution Retail Transmission Service Rates, Revision 4.0 –* issued June 28, 2012 - in preparing its application and the model reflects the approach expected to minimize variances in USoA Accounts 1584 (Network) and 1586 (Connection).

NBHDL confirms that the rates entered in "10. RTSR Current Rates" of the Model are taken from the most recent Board-approved Tariff of Rates and Charges (EB-2015-00092). A copy of the Tariff can be found in Appendix "A". NBHDL also confirms the accuracy of the billing determinants included in this tab as those found in NBHDL's most recently reported RRR filing; the 2015 annual filing, E2.1.5.4 –Demand and Revenue (see Appendix "G"). NBNDL further confirms the loss factor applied to the metered kWh which can also be found in NBHDL's current Tariff in Appendix "A".

Billing determinants in Tab "12. RTSR – Historical Wholesale" are based on NBHDL's actual 2015 costs from the IESO and from Hydro One invoices for Trout Lake TS and North Bay TS. In order to obtain the kW values shown, the billed amounts by category were divided by the UTR applicable in the invoice period.

NBHDL understands that once January 1, 2017 UTR and sub-transmission rates are determined, the Board will adjust NBHDL's Model to incorporate this change.

#### 5) Deferral and Variance Account Rider

The *Report of the Board on Electricity Distributors' Deferral and Variance Account Review* Report (the "EDDVAR Report") provides that during the IRM term, distributor's Group 1 audited account balances will be reviewed and disposed if the preset disposition threshold of \$.001 per kWh (debit or credit) is exceeded. Consistent with a letter from the OEB on July 25, 2015, distributors may now elect to dispose Group 1 account balances below the threshold.

In the 2016 IRM (EB-2014-0099), the Board approved disposition of the balance in Account 1589 of \$950,051 over a one year period to be collected from Non-RPP Class B customers. The board also reviewed the Group 1 accounts and ordered that the balances be transferred to the applicable principal and interest carrying charge sub-accounts of Account 1595 for future disposition. In accordance with the Decision and Order, NBHDL transferred Group 1 Account balances as of December 31, 2014, with interest projected to April 30, 2016 to Account 1595 as shown in Table 2.

Group 1 Accounts:	Principal	Interest	Total
1550 - Low Voltage	14,179	345	14,523
1551 - SME	(86)	25	(61)
1580 - WMS	13,881	3,986	17,867
1584 - Network	34,402	1,040	35,442
1586 - Connection	90,615	2,290	92,905
1588 - Power	(172,148)	(2,873)	(175,021)
Group 1 Disposition	(19,157)	4,812	(14,344)

#### TABLE 2 – 2016 DISPOSITION OF GROUP 1 BALANCES

NBHDL has completed Tab "3. Continuity Schedule" of the Model and has reconciled December 31, 2015 audited balances with the April 30, 2016 RRR filing. The variance in cell "BV23" is a result of reclassifying the costs for Capacity Based Recovery ("CBR"). The 2015 RRR filing included these costs in Account 1580, however, the costs have been segregated in the appropriate sub-accounts for Class A and Class B in the Model. NBHDL would also note that in columns "BM" and "BN" for Account 1568, there are immaterial adjustments totaling \$2,217; these were minor adjustments made to the LRAMVA amounts to reconcile to final IESO results. NBHDL confirms that no additional adjustments have been made to any deferral or variance account balances that have been previously approved by the OEB on a final basis.

NBHDL confirms the accuracy of the billing determinants included in Tab "4. Billing Det. for Def-Var" as those found in NBHDL's most recently reported RRR filing, E2.1.5.4 – Demand and Revenue (see Appendix "G").

The total claim balance in the Group 1 accounts (Accounts 1550, 1551, 1580, 1584, 1586, 1588, and 1589) is (\$691,352) which leads to a threshold test value of (\$.0013/kWh) which exceeds the materiality threshold of +/-\$0.001/kWh as defined in the Filing Requirements. The total claim balance is driven primarily by the balance owing to customers in RSVA – Wholesale Market Service Charge (1580) of (\$1,078,441) and the balance owing from customers in RSVA – Global Adjustment (1589). NBHDL notes that the total claim balance does not include the sub-account CBR Class B amount included on the continuity schedule of \$131,509. NBHDL addresses the proposed disposition of Account 1568 in Section 6) LRAM Variance Account (LRAMVA) of the Manager's Summary.

NBHDL is proposing to dispose of the balance of (\$1,343,920) in Accounts 1550, 1551, 1580, 1584, 1586, and 1588 and the balance of \$131,509 in sub-account 1580 – CBR Class B over a one year period commencing May 1, 2017 and carrying charges have been calculated from

January 1, 2016 to April 30, 2017 at the Board's prescribed interest rate of 1.10%. The amount will be refunded to all customers. NBHDL notes that the CBR Class A costs are not included in the requested disposition amounts as this cost will be adjusted directly on the Class A customer account.

NBHDL served one (1) Class A participant beginning July 1, 2015. As this customer was considered a Class B participant from January through June 2015, NBHDL has input the applicable data in Tabs "6. GA Calculation" and "6.a GA allocation\_Class A" in order for the Model to generate the appropriate proposed Global Adjustment - Class B rate rider. The new Class A customer's former Class B consumption, during the period of January through June 2015, accounted for 3.81% of the total Class B consumption. This ratio resulted in a GA variance amount of \$19,824 being attributed to this customer. NBHDL is proposing to dispose of this GA amount in twelve (12) monthly equal payments of \$1,652. The total claim amount for Account 1589 has been adjusted to reflect the portion of consumption for the former Class B customer and NBHDL is proposing to dispose of the balance of \$500,735 in Account 1589 over a one year period commencing May 1, 2016. Carrying charges have been calculated from January 1, 2016 to April 30, 2017 at the Board's prescribed interest rate of 1.10%. The amount will be collected from Non-RPP Class B customers.

In accordance with *Accounting Guidance – Capacity Based Recovery* issued by the Board July 25, 2016, NBHDL has segregated Class A and Class B costs into the sub-accounts of 1580. The following table provides the cost allocation breakdown of the sub-account for Class B and the proposed rate riders by class. Consistent with the allocation of Account 1580-WMS, NBHDL has utilized the 2015 RRR billing determinants for kWh to allocate the costs to each class for rate rider calculation purposes.

Unit	Total Metered kWh	Total Metered kW	Allocation (kWh)		R - Class B Claim		BR-Class B location (\$)	Proposed Rate Riders
				\$ 1	131,508.93			
kWh	196,730,101	-	39.4%			\$	51,848.23	0.0003
kWh	83,568,205	-	16.7%			\$	22,024.40	0.0003
kW	216,238,874	537,897	43.3%			\$	56,989.76	0.1059
kWh	42,934	-	0.0%			\$	11.32	0.0003
kW	373,881	1,034	0.1%			\$	98.54	0.0953
kW	2,036,369	5,690	0.4%			\$	536.69	0.0943
	498,990,364	544,621	100%		-	\$	131,508.93

#### TABLE 3 – ACCT 1580 WMS - SUB-ACCOUNT CBR-CLASS B DISPOSITION

NBHDL understands that the treatment of the CBR costs are to be handled differently as the CBR recovery is allocated in the same manner as Global Adjustment (i.e.; recovering peak capacityrelated costs in a manner that is tied to the contribution of various consumers to peak-capacity resources). NBHDL has proposed rate riders that take this segregation into consideration, however, for the purposes of implementing these rate riders NBHDL proposes to include these costs in the overall calculation of the DVA rate rider for Group 1 account balances in order to minimize administrative costs and maintain billing efficiency. NBHDL only has one Class A customer and this allows ease in segregating costs and variances related to Class B. NBHDL believes it to be more cost effective to set-up one rate rider for Group 1 balances rather than maintain two separate rate riders in the system for the segregation of one customer. NBHDL's position is that it is burdensome to the utility and of no value to the customer to have an additional Deferral/Variance Accounts rate rider. NBHDL has no preference as to whether the costs for the sub-account Class B are transferred to the WMS Control account for disposition (similar to the treatment for utilities that do not serve Class A customers) or kept segregated with the proper documentation and continuity schedules providing detailed calculations on rate rider determination. Table 4 below provides the proposed rate riders by class should the Board determine that one rate rider is an acceptable disposition proposal.

		Total	Total				CBR -			Proposed
		Metered	Metered	DV	A - Group	C	Class B	Pre	oposed DVA -	Rate
Rate Class	Unit	kWh	kW		l Claim		Claim	Gr	oup 1 Claim	Riders

Per '7. Calculation of Def-Var RR'			,	\$(	1,343,420)					

#### TABLE 4 - PROPOSED DVA (GROUP 1) RATE RIDERS WITH CBR-CLASS B COSTS

NBHDL will defer disposition of sub-account 1595 (2015) until such time as the balances have been audited and a review has taken place for possible disposition.

a) Wholesale Market Participants

NBHDL does not have any Wholesale Market Participant customers.

#### b) Global Adjustment (GA) - Settlement Process

Consistent with 2016 applications, a distributor must provide a description of its settlement process with the IESO or host distributor. It must specify the GA rate it uses when billing its customers (1st estimate, 2nd estimate or actual) for each rate class, itemize its process for providing consumption estimates to the IESO and describe the true-up process to reconcile estimates of RPP and non-RPP consumption once actuals are known. The description should detail the distributor's method for estimating RPP and non-RPP consumption, as well as its treatment of embedded generation or any embedded distribution customers.

NBHDL uses the 1<sup>st</sup> estimate GA rate for all rate classes when billing Class B customers.

NBHDL determines consumption by utilizing the total monthly system load (AQEW provided by IESO preliminary data) and adjusting for:

- Generation;
- Interval metered load (i.e.; customers on hourly pricing);
- GS>50 non-interval load (i.e.; customers paying NSLS) estimate based on the kWh from the prior month's billing and compared to prior year historical billing for reasonability;
- Class A consumption based on interval meter data; and
- Residential/GS<50 non-RPP consumption aggregate report generated from smart meter data which totals kWh by TOU peaks and meter. The data is crossreferenced to billing data in order to determine which accounts are currently with a retailer.

The net result of these adjustments is the assumed low volume RPP consumption. This consumption is allocated to TOU based on the data provided in the aggregated report identified above and the remaining consumption is assumed tier; which is allocated to Tier 1 and Tier 2 based on the prior month billing. NBHDL reconciles these estimates monthly by comparing actual billed data against the estimates and truing up accordingly, for both kWh and dollar values.

NBHDL pays embedded generators their contract price for the generation injected to the distribution system. NBHDL collects from the IESO the difference between HOEP and the contract price paid to each generator. All settlement for embedded generators is based on actual calendar month generation data.

NBHDL notes that additional detail regarding NBHDL's GA settlement process was provided to the OEB March 2, 2016 as part of the OEB sector review GA survey. In addition, NBHDL submitted its self-certification for RPP settlement to the IESO on May 27, 2015 for the 2014 fiscal year end and on March 29, 2016 for the 2015 fiscal year end. It is NBHDL's understanding that the IESO has established a self-certification program to enhance the consistency of the 1598 claims process and the level of assurance provided by LDCs regarding the calculation and recording of claims.

#### c) Global Adjustment – Class A Participants

NBHDL served one (1) Class A participant beginning July 1, 2015. As this customer was considered a Class B participant from January through June 2015, NBHDL has input the applicable data in Tabs "6. GA Calculation" and "6.a GA allocation\_Class A" in order for the Model to generate the appropriate proposed Global Adjustment - Class B rate rider as explained above and the proposed monthly fixed charge for the Class A customer's portion of the variance amount.

#### 6) LRAM Variance Account (LRAMVA)

On March 31, 2010, the Minister of Energy and Infrastructure issued a directive (the "Directive") to the Board regarding electricity CDM targets to be met by licensed electricity distributors. The Directive required that the Board amend the licenses of distributors to add, as a condition of license, the requirement for distributors to achieve reductions in electricity demand through the delivery of CDM programs over a four-year period beginning January 1, 2011. Section 12 of the Directive required that the Board have regard to the objective that lost revenues that result from CDM Programs should not act as a disincentive to a distributor. On April 26, 2012, the Board issued Guidelines for Electricity Distributor Conservation and Demand Management ("CDM Guidelines"). In keeping with the Directive, the Board adopted a mechanism to capture the difference between the results of actual, verified impacts of authorized CDM activities undertaken by distributors between 2011 and 2014 and the level of activities embedded into rates through the distributors load forecast in an LRAM variance account.

For CDM programs delivered within the 2011 to 2014 period, the Board established Account 1568 as the LRAMVA to capture the variance between the Board-approved CDM forecast and the actual results at the customer rate class level. At a minimum, distributors must apply for the disposition of the balance in the LRAMVA as part of their COS applications. In accordance with these guidelines, NBHDL requested approval for the recovery of lost revenue resulting from its CDM activities for 2011, 2012, and 2013 OPA programs, including carrying charges through to

April 30, 2015 as part of its 2014 COS Application (EB-2014-0099). The final approved amount for recovery was \$229,636.58, including carrying charges of \$7,712.48.

Accordingly, NBHDL intended to seek recovery for lost revenues from CDM programs in 2014 and material adjustments to 2013 CDM program results that were provided with the 2014 final IESO/OPA results. However, on March 3, 2016, the OEB issued a letter announcing that it was holding a meeting on March 31, 2016 to gather input on the approach to recording the revenue impact of demand (kW) savings in the LRAMVA. The result of this consultation was a revised report of the Board Updated Policy for the Lost Revenue Adjustment Mechanism Calculation: Lost Revenues and Peak Demand Savings from Conservation and Demand Management Programs, EB-2016-0182, May 19, 2016.

NBHDL is proposing to seek recovery for lost revenues from CDM programs in 2014 and material adjustments to 2013 CDM program results that were provided with the 2014 final IESO/OPA results in the amount of \$206,220.17, including carrying charges of \$6,858.79 over a one (1) year period. NBHDL obtained the assistance of a third party (IndEco Strategic Consulting Inc.) to calculate the lost revenues resulting from participation in the OPA/IESO Contracted Province Wide CDM Programs. A copy of IndEco's supporting report can be found in Appendix "F". A summary of the proposed disposition amounts by class are provided in the following table.

		Carrying	
Rate Class	LRAMVA	Charges	<b>Total Claim</b>
Residential	43,254	1,474	44,728
GS <50 kW	44,032	1,479	45,511
GS 50 to 2,999 kW	46,829	1,731	48,560
Street Lighting	65,248	2,175	67,422
Total Claim	199,362	6,859	206,221
Future Disposition			
GS 3,000 to 4,999 kW	715	24	739
Total LRAMVA-IndEco Report	200,077	6,883	206,960

#### TABLE 5 - LRAMVA PROPOSED DISPOSITION AMOUNTS BY CLASS

NBHDL would note that the claim amount for the GS 3,000 to 4,999 kW class is immaterial and results in a \$0.0000/kWh rate rider within the Model. Based on this, NBHDL proposes to leave this amount in Account 1568 for future disposition.

In accordance with the Filing Guidelines NBHDL confirms the following:

- NBHDL has used the most recent input assumptions available at the time of program evaluation when calculating the lost revenue amount;
- NBHDL has relied on the most recent and appropriate final CDM evaluation report from the IESO in support of its lost revenue calculation. The reports issued by the IESO are included as separate Excel files included with the application;
- NBHDL has completed the LRAMVA WF and this is included in Appendix "E";
- Carrying charges have been applied in accordance with the Filing Requirements and calculated using the current prescribed rate of 1.10%; and
- NBHDL did not offer Board-approved custom programs in relation to the LRAMVA disposition request.

#### 7) Tax Changes

In its Supplemental Report of the Board on 3rd Generation Incentive Regulation for Ontario's Electricity Distributors, the Board determined that a 50/50 sharing of the impact of legislated tax changes between shareholders and ratepayers is appropriate. The tax reduction will be allocated to customer rate classes on the basis of the last Board approved COS distribution revenue. The Board has determined that currently known tax changes from the level reflected in the Boardapproved base rates will be reflected in the IRM adjustments.

NBHDL re-based in 2014 and the 2015 test year income tax calculations were based on a tax rate of 26.5%; the most current information and rates available. As there are no known tax changes from the level reflected in the Board-approved base rates, the Incremental Tax Savings is \$nil.

#### 8) Z-Factor Claims / Incremental Capital Module (ICM)

NBHDL is not proposing to seek recovery for a Z-Factor claim or utilize the ICM option.

#### 9) Treatment of Costs for 'eligible investments'

NBHDL submitted its 5 year Distribution System Plan (DSP) with its 2014 COS Application. As referenced within Section 4.3 of the DSP, NBHDL's distribution system is fully capable of accommodating REG and no capital investments are needed for capacity upgrades to facilitate the connection of renewable energy generation plant at this time and therefore no requirement to establish deferral accounts for these types of costs or recovery of costs is requested or required. NBHDL's DSP also included a 5 year plan in relation to smart grid investments and at this time cost recovery is not requested or required.

#### 10) Conservation and Demand Management Costs for Distributors

NBHDL confirms, in accordance with the Section 3.3.4 of the 2016 Filing Requirements that no CDM costs are included in distribution rates. These costs were excluded from Revenue Requirement calculations in NBHDL's 2014 COS application (EB-2014-0099).

#### 11) Off-Ramps

NBHDL reported its Return on Equity (ROE) for 2015 as 10.65% and this figure will be included on NBHDL's 2015 published scorecard. The amount was within the +/- 300 basis points of the Board approved ROE of 9.30% which was set in NBHDL's 2014 COS application. NBHDL does not anticipate a regulatory review in this matter.

#### 12) Low Voltage Service Charges

For 2016 rates, NBHDL proposes to maintain the low voltage service charge rates as approved in its current tariff sheet.

#### 13) Rate Rider – Accounts 1575 & 1576

NBHDL's current rate riders for the Disposition of Accounts 1575 & 1576 have a sunset date of June 30, 2017 as approved in the 2014 COS Application (EB-2014-0099).

#### 14) Bill Impacts

NBHDL's proposed tariff can be found in Appendix "B". Bill impacts by customer class are included in Appendix "C". The table below summarizes the monthly bill impacts by customer class.

Class	Average Mor kWh	nthly Volume kW	RPP / Non- RPP	Тс	otal Current Bill	Total oposed Bill	Total Bill Impact (\$)	Total Bill Impact (%)
Residential	750	-	RPP	\$	143.96	\$ 142.95	\$ (1.01)	-0.70%
Residential - 10 <sup>th</sup> Percentile	294	-	RPP	\$	70.13	\$ 72.01	\$ 1.88	2.68%
GS<50 kW	2,000	-	RPP	\$	382.17	\$ 379.26	\$ (2.91)	-0.76%
GS 50 TO 2,999 kW	-	455	Non-RPP	\$	32,557.69	\$ 31,788.73	\$ (768.96)	-2.36%
GS 3,000 TO 4,999 kW	-	3,300	Non-RPP	\$	250,426.05	\$ 241,873.29	\$ (8,552.76)	-3.42%
UMSL	150	-	RPP	\$	31.75	\$ 31.49	\$ (0.26)	-0.82%
Sentinel Lighting	-	1	RPP	\$	49.41	\$ 48.92	\$ (0.49)	-0.99%
Street Lighting	-	470	Non-RPP	\$	71,042.68	\$ 71,093.44	\$ 50.76	0.07%

#### TABLE 6 – BILL IMPACT SUMMARY

NBHDL had to make several manual adjustments to Tab "20. Bill Impacts". NBHDL would bring these to Staff's attention when finalizing the Model and Tariff of Rates and Charges:

- NBHDL has been approved for a 5-digit rate rider for the Low Voltage Service Rate for the Residential, GS < 50 kW and Unmetered Scattered Load rate classes;</li>
- NBHDL manually input RTSRs for the Residential (RPP) low volume bill impact, the Residential (non-RPP) bill impact, the GS less than 50 (non-RPP) bill impact, and the GS 3,000 to 4,999 kW class;
- The Global Adjustment rate rider for the GS 3,000 to 4,999 kW class should be \$0.0000 as this class has 0 kWh for current Class B consumption; and
- Manually input the SSS Admin fee in the GS 50 to 2,999 kW class.

#### 15) Conclusion

In summary, total bill impacts are well below the rate mitigation threshold and NBHDL considers the proposed rates and applicable disposition periods to be both reasonable and prudent.

APPENDIX "A"

CURRENT TARIFF OF RATES AND CHARGES

Effective and Implementation Date May 1, 2016

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

EB-2015-0092

### **RESIDENTIAL SERVICE CLASSIFICATION**

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### **MONTHLY RATES AND CHARGES - Delivery Component**

Service Charge	\$	18.90
Rate Rider for Recovery of Stranded Meter Assets - effective until June 30, 2016	\$	0.85
Rate Rider for Smart Metering Entity Charge - effective until October 31, 2018	\$	0.79
Distribution Volumetric Rate	\$/kWh	0.0108
Low Voltage Service Rate	\$/kWh	0.00007
Rate Rider for Disposition of Global Adjustment Account (2016) - effective until April 30, 2017		
Applicable only for Non-RPP Customers	\$/kWh	0.0038
Rate Rider for Disposition of Global Adjustment Account (2015) - effective until June 30, 2016		
Applicable only for Non-RPP Customers	\$/kWh	0.0017
Rate Rider for Disposition of Deferral/Variance Accounts (2015) - effective until June 30, 2016	\$/kWh	(0.0010)
Rate Rider for Disposition of Accounts 1575 and 1576 - effective until June 30, 2017	\$/kWh	(0.0036)
Rate Rider for Recovery of LRAM Variance Account - effective until June 30, 2016	\$/kWh	0.0002
Retail Transmission Rate - Network Service Rate	\$/kWh	0.0067
Retail Transmission Rate - Line and Transformation Connection Service Rate	\$/kWh	0.0058
MONTHLY BATES AND CHARGES Begulatory Component		

#### **MONTHLY RATES AND CHARGES - Regulatory Component**

Wholesale Market Service Rate	\$/kWh	0.0036
Rural or Remote Electricity Rate Protection Charge (RRRP)	\$/kWh	0.0013
Ontario Electricity Support Program Charge (OESP)	\$/kWh	0.0011
Standard Supply Service - Administrative Charge (if applicable)	\$	0.25

Effective and Implementation Date May 1, 2016

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

EB-2015-0092

### **ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

#### APPLICATION

The application of the charges are in accordance with the Distribution System Code (Section 9) and subsection 79.2(4) of the Ontario Energy Board Act, 1998.

The application of these charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

"Aboriginal person" includes a person who is a First Nations person, a Métis person or an Inuit person;

"account-holder" means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

"electricity-intensive medical device" means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

"household" means the account-holder and any other people living at the accountholder's service address for at least six months in a year, including people other than the account-holder's spouse, children or other relatives;

"household income" means the combined annual after-tax income of all members of a household aged 16 or over;

#### MONTHLY RATES AND CHARGES

#### Class A

(a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons; and

(d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons;

but does not include account-holders in Class E.

Effective and Implementation Date May 1, 2016

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

EB-2015-0092

### **GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION**

This classification includes non residential accounts taking electricity at 750 volts or less where monthly average peak demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## **RESIDENTIAL SERVICE CLASSIFICATION**

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

#### APPLICATION

The application of the charges are in accordance with the Distribution System Code (Section 9) and subsection 79.2(4) of the Ontario Energy Board Act, 1998.

The application of these charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

"Aboriginal person" includes a person who is a First Nations person, a Métis person or an Inuit person;

"account-holder" means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

"electricity-intensive medical device" means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

"household" means the account-holder and any other people living at the accountholder's service address for at least six months in a year, including people other than the account-holder's spouse, children or other relatives;

"household income" means the combined annual after-tax income of all members of a household aged 16 or over:

## **GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION**

This classification includes non residential accounts taking electricity at 750 volts or less where monthly average peak demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Specific charge for access to the power poles - \$/pole/year	\$	22.35
	(with the exception of wireless attachr	nents)

Effective and Implementation Date May 1, 2017 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0214

1.0366

## **RETAIL SERVICE CHARGES (if applicable)**

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$ 100.00
Monthly Fixed Charge, per retailer	\$ 20.00
Monthly Variable Charge, per customer, per retailer	\$ 1.37
Distributor-consolidated billing monthly charge, per customer, per retailer	\$ 0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$ (0.30)
Service Transaction Requests (STR)	
Request fee, per request, applied to the requesting party	\$ 0.25
Processing fee, per request, applied to the requesting party	\$ 0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 2.00

## LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle. Total Loss Factor - Secondary Metered Customer < 5,000 kW 1.0471

Total Loss Factor - Primary Metered Customer < 5,000 kW

## PROPOSED BILL IMPACTS

APPENDIX "C"

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to page 9 of the Filing Requirements For Electricity Distribution Rate Applications issued July 14, 2016.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2016 of \$0.113/kWh (IESO's Monthly Market Report for May 2016, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.

2. Due to the change to energy consumption used in the calculation of GA rate riders for the 2017 rate year, the separate "GA Rate Riders" line is only applicable to the "Proposed" section of the bill impact tables.

3. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

**TARIFF OF RATES AND CHARGES** 

Effective and Implementation Date May 1, 2016 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2015-0092

### RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also gualify as residential customers. All customers are single-phase. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

# **Incentive Regulation Model for 2017 File** ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

#### APPLICATION

The application of the charges are in accordance with the Distribution System Code (Section 9) and subsection 79.2(4) of the Ontario Energy Board Act, 1998.

The application of these charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule. In this class:

"Aboriginal person" includes a person who is a First Nations person, a Métis person or an Inuit person;

"account-holder" means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

"electricity-intensive medical device" means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

"household" means the account-holder and any other people living at the accountholder's service address for at least six months in a year, including people other than the account-holder's spouse, children or other relatives;

"household income" means the combined annual after-tax income of all members of a household aged 16 or over;

# Incentive Regulation Model for 2017 File UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification includes accounts taking electricity at 750 volts or less where monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. These connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retailer-consolidated billing monthly credit, per customer, per retailer	\$	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.25
Processing fee, per request, applied to the requesting party	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the		
Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

## LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle

apoint the mot cabeequerit binning for each binning eyere.	
Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0471
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0366

Please complete the following continuity schedule for the following Deferral/Variance Accounts. Enter information into green cells only. Column BU has been prepopulated from the latest 2.1.7 RRR filling.

When inputting balances in the continuity schedule, Account 1580 RSVA - Wholesale Market Service Charge is to exclude any amounts relating to CBR. The CBR amounts are to be entered separately in the Class A and Class B 1580 sub-accounts. Only Class B amounts are to be disposed. Class A amounts are not to be disposed.

If you have received approval to dispose of balances from prior years, the starting point for entries in the schedule below will be the balance sheet date as per your general ledger for which you received approval. For example, if in the 2016 EDR process (CGS or IRM) you received approval for the December 31, 2014 balances, the starting point for your entries below should be the 2013 year. This will allow for the correct starting point for the 2014 opening balance columns for both principal and interest.

Please complete the following continuity schedule for the following Deferral/Variance Accounts. Enter Information into green cells only. Column BU has been prepopulated from the latest 2.1.7 RRR filling.

When inputting balances in the continuity schedule, Account 1580 RSVA - Wholesale Market Service Charge is to exclude any amounts relating to CBR. The CBR amounts are to be entered separately in the Class A and Class B 1580 sub-accounts. Only Class B amounts are to be disposed. Class A amounts are not to be disposed.

If you have received approval to dispose of balances from prior years, the starting point for entries in the schedule below will be the balance sheet date as per your general ledger for which you received approval. For example, if in the 2016 EDR process (CGS or IRM) you received approval for the December 31, 2014 balances, the starting point for your entries below should be the 2013 year. This will allow for the correct starting point for the 2014 opening balance columns for both principal and interest.

Please complete the following continuity schedule for the following Deferral/Variance Accounts. Enter Information into green cells only. Column BU has been prepopulated from the latest 2.1.7 RRR filling.

When inputting balances in the continuity schedule, Account 1580 RSVA - Wholesale Market Service Charge is to exclude any amounts relating to CBR. The CBR amounts are to be entered separately in the Class A and Class B 1580 sub-accounts. Only Class B amounts are to be disposed. Class A amounts are not to be disposed.

If you have received approval to dispose of balances from prior years, the starting point for entries in the schedule below will be the balance sheet date as per your general ledger for which you received approval. For example, if the 2016 EDR process (CGS or IRM) you received approval for the December 31, 2014 balances, the starting point for your entries below should be the 2013 year. This will allow for the correct starting point for the 2014 opening balance columns for both principal and interest.

Please refer to the footnotes for further instructions.

If you have a Class A customer, 1580 sub-account CBR Class B will be disposed through a rate rider calculated outside the model (if significant). If you have only Class B customers, the balance applicable to Class B will be allocated and disposed with account 1580. Please click if you have one or more Class A customers.

\*\* Used to allocate Account 1551 as this account records the variances arising from the Smart Metering Entity Charges to Residential and GS<50 customers.

Below is a GA calculation based on non-RPP consumption data minus Class A consumption. If a Class B customer switched into Class A during the 2015 rate year click this checkbox:

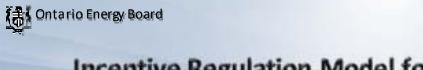

Identify the total billed consumption for former Class B customers prior to becoming Class A customers (i.e.Jan.1 to June 30, 2015) in columns G.

The purpose of this tab is to calculate the GA rate riders for all current Class B customers of the distributor.

Effective January 2017, the billing determinant and all rate riders for the disposition of GA balances will be calculated on an energy basis (kWhs) regardless of the billing determinant used for distribution rates for the particular class (see Chapter 3, Filing Requirements, section 3.2.5.2)

		Total Metered Non-RPP	Total Metered Class A Consumption in 2015 (partial and/or full year Class A	prior to becoming Class A (i.e. Jan.	Customers (Non-RPP consumption LESS WMP, Class A and new Class A's former Class B		otal GA \$ allocated to Current Class B

	Total	251,192,005	8,496,29	2 9,242,344	233,453,369	100.0%	\$500,735		

\*For new Class A customers (who became Class A in 2015), add their consumption only related to July to December period.

A customers. The tables below calculate specific amounts for each customer who made the change. Consistent with both decisions for 2016 rates and EDDVAR, distributors are generally expected to settle the amount through 12 equal adjustments to bills. A one-time settlement is acceptable if the affected customer has expressed a clear preference for this approach. (see Filing Requirements section 3.2.5.2)

2014

Year of Group 1 Account Balance Last Disposed

(e.g. If in the 2015 EDR process, you received approval to dispose the GA variance account balance as of December 31, 2013, please enter 2013 in cell B16.)

#### Allocation of total Non-RPP consumption (kWh) between Class B and New Class A (Former Class B) customers

		Total	2015
(Non-RPP consumption LESS WMP and Class A)	А	242,695,713	242,695,713
New Class A Customer(s)' Former Class B Consumption	В	9,242,344	9,242,344
Portion of Consumption of Former Class B Customers	C=B/A	3.81%	

#### Allocation of Total GA Balance \$

Total GA Balance	D	\$ 520,559
New Class A Customer(s)' Former Class B Portion of GA	E=C*D	\$ 19,824
GA Balance to be disposed to Current Class B Customers	F=D-E	\$ 500,735

#### Allocation of GA Balances to Former Class B Customers

# of Former Class B customer(s)	1				
	Total Metered kWh	Metered kWh Consumption			
	Consumption for each new	for each new Class A		Customer specific GA	
	Class A customer for the period	customer for the period		allocation for the period prior	
Customer	prior to becoming Class A	prior to becoming Class A	% of kWh	to becoming Class A	Monthly Equal Payments
Customer 1	9,242,344	9,242,344	100.00%	\$ 19,824	\$ 1,652
Total	9,242,344	9,242,344	100.00%	\$ 19,824

											(1,343,419.99)

<sup>1</sup> When calculating the revenue reconciliation for distributors with Class A customers, the balances of sub-account 1580-CBR Class A and B will not be taken into consideration since the rate riders, if any, are calculated outside of the model. <sup>2</sup> Only for rate classes with WMP customers are the Deferral/Variance Account Rate Riders for Non-WMP (column H and J) calculated separately. For all rate classes without WMP customers, balances in account 1580 and 1588 are included in column G and disposed through a combined Deferral/Variance Account and Rate Rider.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Wybro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in orange, please double check the billing data entered in "Units Billed" and "Amount" Columns. The highlighted trates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctiv. blease provide explanation for the discrepancy in rates.

### **RESIDENTIAL SERVICE CLASSIFICATION**

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### **MONTHLY RATES AND CHARGES - Delivery Component**

### ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

#### APPLICATION

The application of the charges are in accordance with the Distribution System Code (Section 9) and subsection 79.2(4) of the Ontario Energy Board Act, 1998.

The application of these charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

"Aboriginal person" includes a person who is a First Nations person, a Métis person or an Inuit person;

"account-holder" means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

"electricity-intensive medical device" means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

"household" means the account-holder and any other people living at the accountholder's service address for at least six months in a year, including people other than the account-holder's spouse, children or other relatives;

"household income" means the combined annual after-tax income of all members of a household aged 16 or over:

### MONTHLY RATES AND CHARGES

### **GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION**

This classification includes non residential accounts taking electricity at 750 volts or less where monthly average peak demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2016-0214

### **GENERAL SERVICE 50 TO 2,999 KW SERVICE CLASSIFICATION**

This classification includes non residential accounts where monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 3,000 kW. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### **MONTHLY RATES AND CHARGES - Delivery Component**

### UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification includes accounts taking electricity at 750 volts or less where monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. These connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### STREET LIGHTING SERVICE CLASSIFICATION

This classification is for roadway lighting with the Municipality. The consumption for this customer is based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### **RETAIL SERVICE CHARGES (if applicable)**

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$ 100.00
Monthly Fixed Charge, per retailer	\$ 20.00
Monthly Variable Charge, per customer, per retailer	\$ 1.37
Distributor-consolidated billing monthly charge, per customer, per retailer	\$ 0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$ (0.30)
Service Transaction Requests (STR)	
Request fee, per request, applied to the requesting party	\$ 0.25
Processing fee, per request, applied to the requesting party	\$ 0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 2.00

### LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle. Total Loss Factor - Secondary Metered Customer < 5,000 kW 1.0471

Total Loss Factor - Primary Metered Customer < 5,000 kW

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to page 9 of the Filing Requirements For Electricity Distribution Rate Applications issued July 14, 2016.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2016 of \$0.113/kWh (IESO's Monthly Market Report for May 2016, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.

2. Due to the change to energy consumption used in the calculation of GA rate riders for the 2017 rate year, the separate "GA Rate Riders" line is only applicable to the "Proposed" section of the bill impact tables.

3. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

User Inputs (Green) Auto Populated Cells (White) Amount of LRAM claimed in the past Years of LRAM Claimed Last Cost of Service Application (File No.)

Amount of LRAMVA to claim Recovery Period of LRAMVA Claim \$ 229,636.58 2005-2013 EB-2014-0099

\$206,960.25

### Table 1. Annual and Total LRAMVA by Rate Class

Description	Residential	GS < 50 kW	GS 50 to 2,999 kW	GS 3,000 to 4,999 kW	Unmetered Scattered Load	Sentinel Lighting	Street Lighting	Total
2011 Forecast								
2011 Actuals								
Amount Cleared								
2012 Forecast								
2012 Actuals								
Amount Cleared								
2013 Forecast								
2013 Actuals	\$2,188.50	\$778.36	\$11,605.81	\$43.42				\$14,616.09
Amount Cleared								
2014 Forecast								
2014 Actuals	\$41,065.51	\$43,253.27	\$35,222.95	\$671.59			\$65,247.59	\$185,460.91
Amount Cleared								
2015 Forecast								
2015 Actuals								
Amount Cleared								
Carrying Charges	\$1,473.79	\$1,478.98	\$1,731.37	\$24.47			\$2,174.65	\$6,883.26
Total LRAMVA Balance	\$44,727.79	\$45,510.61	\$48,560.13	\$739.48			\$67,422.24	\$206,960.25

# LRAMVA Work Form: CDM Allocation

### CDM Savings Target Allocation by Rate Class

Instruction	Please update the template as needed or replace this spreadsheet with an existing templates that estimated savings in CDM forecast. An example template is provided below and can be filled in if it is applicable to the LDC. The LDC may re-populate CDM savings by rate class for historical years based on past year's approved cost of service application, or relevant information from <b>Appendix 2-I</b> . Alternatively, LDCs may want to link this spreadsheet to their CDM savings allocation (e.g. appended as another tab in this workbook) to fill in <b>Tables 2, 3 and 4</b> below.
Legend	User Inputs (Green) Auto Populated Cells (White)

### Table 4. Forecast Lost Revenue Amounts by Rate Class

Forecast Year	Residential	GS < 50 kW	GS 50 to 2,999 kW	GS 3,000 to 4,999 kW	Unmetered Scattered Load	Sentinel Lighting	Street Lighting	Total
	\$	\$	\$	\$	\$	\$	\$	\$
2011								
2012								
2013								
2014								

Notes: Tables 2 and 3a not used, as the values do not impact LRAMVA and Tables 3a assumed allocation of CDM impacts based on kWh load share by rate class.

The load forecast affecting 2013 and 2014 is from the 2010 COS (EB-2009-0270). The forecast made adjustments for CDM results in 2009 and 2010, but not for programs offered after 2010.

# LRAMVA Work Form: Distribution Rates

### **Distribution Rates**

Instruction Please update Table 5 with the approved distribution rates for the utility's respective rate classes. The applicable rates to estimate lost revenues will autopopulate in Table 6 and be used in the LRAM Work Sheets (Tab 4 and Tab 5) for the applicable year in which LRAM is claimed. LDCs to update the rate classes as appropriate below depending on the utility's customer mix.

Street Lighting	kW			\$ 25.3328	\$ 25.7648	\$ 25.6689	\$ 25.2818	\$ 25.7369

### Table 6. Summary Table: Average Distribution Volumetric Rates by Year for LRAM Calculation

Rate Class	Billing Unit	2011	2012	2013	2014	2015	2016
Residential	kWh			\$ 0.0128	\$ 0.0129	\$ 0.0135	\$ 0.0130
GS < 50 kW	kWh			\$ 0.0164	\$ 0.0165	\$ 0.0172	\$ 0.0180
GS 50 to 2,999 kW	kW			\$ 2.0463	\$ 2.0693	\$ 2.2633	\$ 2.4688
GS 3,000 to 4,999 kW	kW			\$ 1.0866	\$ 1.0985	\$ 1.1244	\$ 1.1594
Unmetered Scattered Load	kWh			\$ 0.0158	\$ 0.0160	\$ 0.0140	\$ 0.0120
Sentinel Lighting	kW			\$ 15.0573	\$ 15.2184	\$ 15.8843	\$ 16.6607
Street Lighting	kW			\$ 25.4768	\$ 25.7328	\$ 25.4754	\$ 25.4335

Note:

2011-2012 rates removed, as 2011-2012 LRAMVA was disposed in the 2015 COS rate case.

### LRAMVA Work Form: 2011-2014 Lost Revenues Work Form

### 2011-2014 Lost Revenues Work Form

Instruction	The following LRAM work forms apply to LDCs that need to recover lost revenues from the 2011-2014 period. This workbook contains links from <b>Tab 3</b> (Distribution Rates) and <b>Tab 6</b> (Persistence Rates). Demand Response (RA) Swings should generally not be included with the LRAMA calculation, unless suported by empirical evidence Please ser revised LRAM policy related to pask demand savings, issued by the OEB in EB-2016-0162.
	LDC to adjust the rate allocations by class (columns h to n). Please insert IESO verified savings for applicable programs (columns f to g). Adjustments will apply to the year that LRAM is claimed.
Legend	User Inputs (Green) Auto Populated Cells (White)

## **LRAMVA Work Form:**

## 2015 Lost Revenues Work Form

### 2015 Lost Revenues Work Form

LDCs can apply for disposition of LRAMVA amounts at any time, but at a minimum, must do so as part of a Cost of Service application.

LCCs can apply to deplead to the CMWV a motion as a any aim, but is a minimum, make up so as part of a close of betwee application. Los trevenues for the period prior to rebasing should be included within the LDCs load forecast on a go forward basis, negating the need for perpetual LRAMVA claims related to persisting savings from historic programs. LDC to adjust the rate allocations by class (columns h to n). Please insert IESO verified savings for applicable programs (columns f to g). Adjustments will apply to the year that LRAM is claimed. This workbook contains links from **Tab 3** (Distribution Rates) and **Tab \$** (Persistence Rates).

## **LRAMVA Work Form: Persistence** Rates

### Persistence Rates

To apply persistence factors to previous year's savings, this can be determined by taking the ratio of verified savings to the savings that occurred in the first year the program began. Please update the summary tables (highlighted blue boxes) with the verified results provided by the IESO. For 2011-2014 programs, these tables refer to Tables 4 and 5 (Summary Achievement Against CDM Targets). The verified results include adjustments. In the event that an LDC uses initiative level persistence, the LDC must provide these calculations in a new table below those provided here.

Initiative

Consumer Program Appliance Retirement

Appliance Retirement Appliance Exchange HVAC Incentives Conservation Instant Coupon Booklet Bi-Annual Retailer Event Retailer Co-Op Residential Demand Response (switch/pstat) Residential New

Consumer Program Total

. The persistence factors will autopopulate on the LRAM forms. This form may need to be updated with IESO data on persistence of 2011-2014 programs into 2015-2020 term.

Legend

Instruction

### Note Tables 12 - 15 are not used and instead actual persistence from the IESO is used and these Tables are therefore hidden. These values are shown in Tables 16-22.

User Inputs (Green)

Auto Populated Cells (White)

	in 2014	1.132.093	609.244	7.632	40				

Note Persistence of 2011-2013 load impact removed for 2015 on, as the 2011-2013 CDM impact would be embedded in the load forecast base numbers in the 2015 COS load forecast.

## LRAMVA Work Form: Carrying Charges (by Rate Class)

### Carrying Charges by Rate Class

Instruction

Please update the carrying charges in **Table 14**. The interest amounts per year will autopopulate in the LRAMVA Summary Table in **Tab 1**. LDC to adjust the rate allocations by class (columns h to n). Please insert IESO verified savings for applicable programs (columns f to g). Please note that the carrying charges below pertain to the amount credited or debited to ratepayers based on how much was originally collected from the interest on the load forecast. As the amounts shown are running totals, please clear the yearly amounts once the LRAM claims are approved in order to cancel prior year interest collections.

Legend

User Inputs (Green) Auto Populated Cells (White)

# Introduction

The Lost Revenue Adjustment Mechanism (LRAM) was developed to remove a disincentive electricity local distribution companies (LDCs) may have to promote conservation and demand management (CDM) programs. CDM programs are designed to provide energy savings and peak demand reductions for the customers of LDCs, which directly impact the LDC's revenue. The LRAM allows LDCs to be compensated for lost revenue that resulted from CDM programs the LDC offered to its customers.

Starting in 2011, the Ontario Energy Board (OEB) authorized LDCs to establish an LRAM variance account (LRAMVA) to capture the impact of CDM programs on the revenue of LDCs. The variance in the LRAMVA is between the lost revenue due to independently verified load impacts of CDM and the lost revenue from any CDM impacts an LDC included in the LDC's load forecast.<sup>1</sup>

North Bay Hydro Distribution Ltd. (NBHDL) contracted with the Ontario Power Authority (OPA, which has now been merged into the Independent Electricity System Operator – IESO) to offer a suite of CDM programs to customers in a variety of rate classes for the 2011-2014 period. NBHDL is required to use "the most recent and appropriate final CDM evaluation report from the IESO in support of its lost revenue calculation."<sup>2</sup> NBHDL has submitted an LRAMVA claim for 2011-2013 based on the final 2013 results released by the IESO in 2014 as part of NBHDL's 2015 cost of service application (EB-2014-0099). In September 2015, the IESO released adjustments to the 2013 results, as well as the final 2014 results.

In 2015, the Board decided to postpone disposition of LRAMVA claims so the Board could consider how best to deal with lost revenues related to demand response programs that had arisen as an issue in multiple LRAMVA claims. With that resolved, updated calculations taking into account the Board's decision on demand response programs, and including final results for 2014, are reported in this document.

<sup>&</sup>lt;sup>1</sup> Guidelines for Electricity Distributor Conservation and Demand Management. Ontario Energy Board. April 26, 2012 (EB-2012-0003).

<sup>&</sup>lt;sup>2</sup> Filing Requirements For Electricity Distribution Rate Applications - 2016 Edition for 2017 Rate Applications - Chapter 2 - Cost of Service, Ontario Energy Board. July 14, 2016.

The future impacts of CDM were estimated as part of the load forecast for NBHDL's 2010 cost of service rate case (EB-2009-0270), however these only accounted for programs offered in 2009 and 2010, and not programs offered later than 2010. These were updated in NBHDL's 2015 Cost of Service application, but do not affect claims through December 2014. This report, and the associated OEB LRAMVA work form, show the variance account balance for the following revenue losses:

- Lost revenues in 2013 related to adjustments to results for programs offered in 2013,
- Lost revenues in 2014 related to programs offered in 2011,
- Lost revenues in 2014 related to programs offered in 2012,
- Lost revenues in 2014 related to programs offered in 2013, and
- Lost revenues in 2014 related to programs offered in 2014.

The carrying charges on the above variances through April 2017 are also reported.

# Methodology

In principle, the determination of lost revenues is a simple calculation:

LR = (CDM results – CDM results in the load forecast) \* rate

In practice, it is somewhat more complicated than that because of the limitations of the information available to calculate CDM results, the different time periods of results data and the rate year, and the need to determine carrying charges on the lost revenues.

The most recent input assumptions currently available have been used to calculate the lost revenue values.

## CDM results

From 2011 through 2014, NBHDL offered provincial programs in partnership with the Independent Electricity System Operator (IESO). NBHDL did not offer custom programs beyond the IESO programs.

## **IESO evaluation results**

The IESO performs evaluations of all of its programs, which examine gross energy savings from the programs, and the net-to-gross ratio (NTGR), and then from those calculates net energy savings by initiative within program group (residential, business, industrial and lowincome). Peak load reductions are also calculated, and reported in the same way.

Provincial results are allocated to individual LDCs based on each LDC's individual performance where possible, or through an allocation process.

The IESO reports energy savings and peak demand reductions, by initiative in the current year, adjustments to the previous year, based on updated validation, and contribution to total savings or reductions to the end of the 2011 to 2014 period. The savings and demand reductions for a particular year for a number of programs persist in the following years. The savings and demand reductions for demand response programs do not persist beyond the year in which those particular savings and demand reductions occur. The IESO was requested to provide the persistence into future years of savings and reductions for each program in each year, as well as for adjustments.

These are the best, most definitive and defensible estimates of results associated with these programs, and incorporate the most appropriate estimates of results from the measures installed.

However, these data have some limitations, and require some adjustments for use in lost revenue calculations.

## Allocating results to rate classes

The IESO reports results by 'initiative', within four main programs: residential, business (commercial and institutional), industrial and lowincome. These only partially map onto rate classes. For initiatives that apply to more than one rate class, NBHDL staff estimated the split by rate class, drawing on participant-specific information where available.

## Application of reported results

As previously mentioned, the IESO reports both energy savings and reductions in demand. Depending on the rate class, distribution revenue is based on either kilowatt-hours used, or the customer's monthly peak kilowatt use. For rate classes where the customer is charged for distribution by energy use (kWh), the IESO reported energy savings are used to calculate lost revenues related to CDM results. For customer classes where the LDC charges for distribution based on the customer's peak monthly demand (kW), the IESO reported demand reductions are used to calculate lost revenues related to CDM results. The demand reductions in the IESO reports should be multiplied by a multiplier based on the number of months a specific program impacts a customer's peak demand. "The IESO indicated that the demand savings from energy efficiency programs shown in the Final CDM Results should generally be multiplied by twelve (12) months to represent the demand savings the distributor has experienced over the entire year...In the case of the Building Commissioning initiative, the demand savings provided in the Final CDM Results should only be multiplied by three (3) as these savings are related to space cooling and do not occur throughout the full year, but only during the summer months, typically."3

The OEB has decided that lost revenue cannot be claimed from the kW values reported by the IESO for the Demand Response 3 (DR3) program. "The monthly peak demand of a demand-billed customer used for billing purposes may not correspond with the demand response event; even if it did, the lost revenues would only be related to a difference between the customer's peak demand absent the demand response event and the next highest peak demand for the customer in that month... Since the IESO's evaluations cannot confirm the nature of the demand savings relative to the billing period for demand-billed customers, it is not appropriate that distributors be credited with lost revenues from demand response programs, except for those situations where the distributor can explicitly demonstrate revenue impacts."<sup>4</sup>

<sup>&</sup>lt;sup>3</sup> Ontario Energy Board, Updated Policy for the Lost Revenue Adjustment Mechanism Calculation: Lost Revenues and Peak Demand Savings from Conservation and Demand Management Programs, EB-2016-0182, May 19, 2016, p. 4.

<sup>&</sup>lt;sup>4</sup> Ibid. p. 7.

## Load reductions accounted for in the load forecast

In recent years, LDCs have tried to account for load losses due to CDM programs in their load forecasts, submitted as part of their Cost of Service applications. These forecasted reductions need to be deducted from load losses attributable to CDM programs, to determine the final impact of CDM on revenues. That is, the impact is the *variance* between the results accounted for in the load forecast and the results attributable to the programs.

## Overall impact of CDM on load, by rate class

The overall impact of CDM energy savings and demand reductions on load is calculated from the IESO energy savings and peak demand reductions, allocated by rate class. Finally, the difference is calculated between the overall estimated impact on loads and the load reductions attributable to CDM that were captured in the most recent load forecast.

## Distribution rates

Revenue impacts to the LDC associated with CDM are calculated using the distribution volumetric rate. Most other rate components (e.g. service charges, global adjustment, transmission charges) are either fixed charges or pass-throughs for the utility that do not affect the LDC's revenues. An exception is for certain rate riders related to taxes, and these are added to the distribution volumetric rates for lost revenue calculations, where applicable.

For most electricity distribution utilities in Ontario, including NBHDL, distribution rates are set for the period from 1 May to 30 April of the next year. CDM results are reported for the calendar year, so average rates for the calendar year need to be calculated. For simplicity, the average rate is estimated based on the rate being four twelfths of the previous year's rate (for January through April), and eight twelfths of the current year's rate (for May through December).

## Lost revenues variance

Lost revenues in a particular rate class are the product of the savings or demand reductions in that class, less what was accounted for in the load forecast, multiplied by the average rate for that class in the calendar year for which the energy savings or demand reductions were reported.<sup>5</sup> The variance is the difference between these lost revenues and the quantity of CDM in the load forecast, or what is called 'the LRAMVA threshold'.

Because these revenues are lost throughout the year, and are only recovered through rate riders in subsequent years, the Ontario Energy

<sup>&</sup>lt;sup>5</sup> Where distribution rates are monthly rates for the peak kW in that month, the annual loss of revenue is the monthly rate times the number of months it applies to – usually twelve.

Board has permitted the LDCs to claim carrying charges on these lost revenues at a rate prescribed by the OEB, and published on the Board's website. The carrying charges are simple interest, not compounded and are calculated on the monthly lost revenue balance. Because the IESO final results estimates are reported annually, and monthly estimates are not available, the incremental results are assumed to be equally distributed across the months. So 1/12 of the annual results are allocated to each month of the year.

Carrying charges accrue from the time of the results, until disposition.

The LDC reports these lost revenues on its financial statements in Account 1568, and the associated rate class-specific sub-accounts.

## Results

Following the methodology described above, lost revenues were calculated for NBHDL.

## CDM results

## IESO evaluation results

The most recent and appropriate final CDM evaluation report from the IESO was used in support of the lost revenue calculations. A working Microsoft Excel file copy of the IESO evaluation report has been provided separately to NBHDL. The net verified final 2011-2014 results can be found in Table 1 of the *Verified 2011-2014 Final Results Report for North Bay Hydro Distribution Ltd.* file released by the IESO on September 1, 2015. The net adjustments to verified final 2011, 2012, and 2013 results can be found in Table 2 of the *Verified 2011-2014 Final Results Report for North Bay Hydro Distribution Ltd.* file released by the IESO on September 1, 2015.

The IESO provided NBHDL with persistence data for 2011-2014 results and 2011-2013 adjustments at the initiative level. The data provided are presented in new Tables 16 to 22 in Tab 6 of the LRAMVA work form provided by the OEB for use in LRAMVA claims that is filed with this document.

Table 16 of the OEB LRAMVA work form shows the persistence of 2011 results into future years. Table 17 of the OEB LRAMVA work form shows the persistence of 2012 results into future years. Table 18 of the OEB LRAMVA work form shows the persistence of 2013 results into future years. Table 19 of the OEB LRAMVA work form shows the persistence of 2011 adjustments into future years. Table 21 of the OEB LRAMVA work form shows the persistence of 2012 adjustments into future years. Table 22 of the OEB LRAMVA work form shows the persistence of 2013 adjustments into future years. No adjustments were provided for 2014 final results.

## Street lighting project

Between November 2011 and January 2014, the City of North Bay undertook at project under the Retrofit Program to retrofit streetlights to a more energy efficient light emitting diode (LED) technology. The retrofit was undertaken incrementally over the course of the project. North Bay Hydro worked with the City of North Bay to calculate the reduction in load from street lighting upgrades on a regular basis over the course of the project. North Bay Hydro's revenue from the Street Lighting rate class is based on kilowatts (kW) of demand. The actual billed kW for each month and the associated reduction from the October 2011 baseline value are show in Table 24 in Tab 8 of the OEB LRAMVA work form.

Year	Gross savings (kWh)	Net to gross ratio	Net savings (kWh)
2012	790,509	0.77	608,692
2013	458,444	0.68	311,742

The IESO included the calculated kilowatt hours (kWh) of energy savings from the street lighting project in North Bay Hydro's 2013 results and 2012 adjustments. These values are included in the table below:

As the street lighting rate class is billed by kW, the calculated kWh savings from the Retrofit project do not impact North Bay Hydro's revenue. Thus, the calculated kWh of savings have been manually removed from the persistence through 2014 of the 2013 results and 2012 adjustments for the 2014 lost revenue calculations. The actual lost revenue from the street lighting retrofit project in 2014 has been calculated directed by multiplying the 2014 net demand reduction from the project in 2014 by the 2014 Street Lighting rate.

## Allocating results to rate classes

NBHDL provided information on the allocation of results to rate classes. In most cases, the allocation is straightforward. Initiatives that can span multiple rate classes include Retrofit, Building Commissioning, New Construction, Energy Audit, Demand Response 3, Process & Systems Upgrades, Monitoring & Targeting, Energy Manager, Electricity Retrofit Incentive Program and High Performance New Construction. No allocation was provided for programs for which NBHDL has no program results.

NBHDL bills customers in different rate classes using different volumetric units, either kilowatt hours (kWh), or customer peak monthly kilowatts (kW). The rate classes (and billing units) for NBHDL are:

- Residential (kWh)
- GS < 50 kW(kWh)
- GS 50 to 2,999 kW (kW)
- GS 3,000 to 4,999 kW (kW)
- Unmetered scattered load (kWh)
- Sentinel lighting (kW)
- Street lighting (kW).

Table 7 of the OEB LRAMVA work form shows the percentage allocation by rate class for 2011 results and adjustments. Table 8 of the OEB LRAMVA work form shows the percentage allocation by rate class for 2012 results and adjustments. Table 9 of the OEB LRAMVA work form shows the percentage allocation by rate class for 2013 results and adjustments. Table 10 of the OEB LRAMVA work form shows the percentage allocation by rate class for 2014 results.

### Load reductions accounted for in the load forecast

NBHDL's previous cost of service application was filed for the 2010 rate year (EB-2009-0270). The load forecast associated with that application accounted for estimated load losses from 2009 – 2010 CDM programs. In NBHDL's cost of service application for the 2015 rate year (EB-2014-0096), NBHDL updated the load forecast for 2015 and beyond to capture the impact of CDM programs offered in 2014 and 2015. Neither of these forecasts includes results from 2011 – 2014 programs in 2013 and 2014.

Consequently, Table 3 of the OEB LRAMVA work form is blank (indicating zero kWh or kW for 2011 – 2014 programs in 2013 and 2014 are included in the load forecast).

## Overall impact of CDM on load, by rate class

Multiplying the adjusted energy savings or demand reduction reported for NBHDL for each program by the allocation by rate class provides the impact on load of that CDM program within the appropriate rate class. The sum of the energy savings and demand reductions for all of the programs for each rate class provides the overall impact of CDM on load by rate class. The overall load impact for each calendar year includes the results for the CDM programs and any adjustments to the results in that year.

The bottom of Table 9 of the OEB LRAMVA work form shows the overall impact of CDM on load by rate class for 2013 adjustments. The bottom of Table 10 of the OEB LRAMVA work form shows the overall impact of 2014 programs on load by rate class for 2014.

## Distribution rates

The distribution rates that are used to calculate the CDM impact on distributor revenue for each rate class for NBHDL are shown in Table 5 of the OEB LRAMVA work form. The distribution rates are pro-rated from the rate year to the calendar year, as needed, using the number of months of each rate year in each calendar year in the 2013 to 2014 time period. Table 6 of the OEB LRAMVA work form shows the pro-rated rates used for each calendar year.

## Lost revenues

The lost revenues for each year by rate class for NBHDL calculated from final CDM program results are shown in Table 1 of the OEB LRAMVA work form. The lost revenue for each year is based on the load impact for each rate class in that year multiplied by the rate for that rate class in that year. The load impact in a given year will include the impact of CDM programs in that year and the persistence of the CDM program impact from previous years in that year.

The lost revenue for 2013 adjustments and 2014 programs is based on final verified results provided by the IESO.

## Carrying charges

The monthly carrying charges by rate class on NBHDL's lost revenue are shown in Table 15 of the OEB LRAMVA work form. The carrying charges are reported monthly, by rate class, from the time the lost revenues resulted, through to April 30, 2017.

# Conclusions

The LRAMVA balance at the end of December 2014 for NBHDL that includes results from 2011 – 2014 CDM programs in 2014 and adjustments to 2013 program results in 2013 is \$200,077.00. The total carrying charges on this LRAMVA balance accumulated to April 30, 2017 are \$6,883.26. These balances are attributable to individual rate classes according to the following table:

Rate class	LRAMVA	Carrying charges	Total
Residential	\$43,254.00	\$1,473.79	\$44,727.79
GS < 50 kW	\$44,031.63	\$1,478.98	\$45,510.61
GS 50 to 2,999 kW	\$46,828.76	\$1,731.37	\$48,560.13
GS 3,000 to 4,999 kW	\$715.01	\$24.47	\$739.48
Street Lighting	\$65,247.59	\$2,174.65	\$67,422.24
Total	\$200,077.00	\$6,883.26	\$206,960.25

NOTE: There are no LRAMVA or carrying charge values associated with rate classes not included in this table.

## 2015 RRR FILING 2.1.5.4 – DEMAND AND REVENUE

APPENDIX "G"

## Table 3a

Total Metered Consumption (SSS + Retailer) by Detailed Rate Class

Metered consumption in kWhs and kW will auto-populate from Table 0 and Table 2b

The data populated in Table 3a will be used to further streamline the application process for formulaic adjustments to rates during an incentive ratesetting period.

Detailed Rate Class	Metered consumption in kWhs (a+c+e)	Metered consumption in kWs (b+d+f)
Residential	196,730,101.00	0
General Service Less Than 50 kW	83,568,205.00	0
General Service 50 to 2,999 kW	216,238,874.00	537,897
General Service 3,000 to 4,999 kW	17,738,636.00	39,466
Sentinel Lighting	373,881.00	1,034
Street Lighting	2,036,369.00	5,690
Unmetered Scattered Load	42,934.00	0
General Service 50 to 2,999 kW - Embedded Distributor	0.00	0
