IESO Settlement Process

DEFERRAL AND VARIANCE ACCOUNTS OVERVIEW

- 2 E.L.K has included in this Cost of Service ("COS") Application, a request for approval for disposition of
- 3 Group 1 and Group 2 Deferral and Variance Account ("DVAs") balances as at December 31, 2015 and
- 4 the forecasted interest through April 30, 2017. E.L.K. has followed the Board's guidance in the Accounting
- 5 Procedures Handbook and FAQ's ("APH") for recording amounts in the deferral and variance accounts.
- 6 Such guidance also includes the Report of the Board on Electricity Distributors' Deferral and Variance
- 7 Account Review Initiative ("EDDVAR Report").
- 8 Table 9-1 contains descriptions of all the outstanding DVAs. E.L.K. confirms that it has used the DVAs in
- 9 the same manner described in the APH, and the account balance in Table 9-1 reconciles with the trial
- 10 balance reported through the Electricity Reporting and Record-keeping Requirements and E.L.K.'s
- 11 Audited Financial Statements, with the exception of three accounts which are explained below.
- 12 E.L.K. has provided a continuity schedule of the Group 1 and Group 2 DVAs in the live Excel format
- model named "E.L.K. 2017_DVA_Continuity_Schedule_CoS_v2_7_V2E.L.K." ("EDDVAR model"). As
- 14 explained below, tab 5. Allocation of Balances has been unlocked by Board staff to allow E.L.K. to
- 15 properly address the disposition of account 1595 associated with the balances for 2011 DVAs.
- 16 The forecasted interest on December 31, 2015 principal balances of the DVAs is calculated using the
- 17 Board's prescribed rate of 1.10% for the period of January 1, 2016 to April 30, 2017. The interest rates by
- 18 quarter for each year are provided in Table 9-4 in this Exhibit.
- 19 A breakdown of energy sales and cost of power expense balances, as reported in the Audited Financial
- 20 Statements by E.L.K., is provided in Table 9-5.
- 21 E.L.K. will continue or discontinue using the Group 2 accounts on a go-forward basis as outlined in Table
- 22 9-6 in this Exhibit.
- 23 Except for account 1595, E.L.K. has accepted the allocators as indicated in the EDDVAR Report. The
- 24 allocation of account 1595 has been allocated to rate classes based on Non-RPP kWh since as described
- 25 below under the explanation for account 1595 the balance in this account relates to Non-RPP customers.
- 26 The detailed information on the proposed method of disposition is provided in this Exhibit.
- 27 E.L.K. is not requesting any new accounts or sub-accounts in this COS application.
- 28 E.L.K. confirms that the IESO Global Adjustment Charge is pro-rated into the Regulated Price Plan
- 29 ("RPP") and Non-RPP portions.

Filed: November 1, 2016

ACCOUNT BALANCES

1 2

8

- Table 9-1 contains account balances from the 2015 Audited Financial Statements as at December 31, 3
- 4 2015 and agrees to the 2015 year end balances for Reporting and Record Keeping Requirement ("RRR")
- 5 filing E2.1.7 Trial Balance as filed April 30, 2016 with the OEB, with the exception of the accounts listed in
- 6 the table. These variances are described in the section "Explanation of Variances" below.
- 7 E.L.K. has used the DVAs in the same manner described in the APH.

Table 9-1 - December 31, 2105 Audited Balances - DVAs

Account Description	USoA#	Total Principal & Interest (Dec 31, 2015)	2.1.7 RRR Balances (Dec.31, 2015)	Variance
Group 1 Accounts:				
LV Variance Account	1550	\$186,702	\$186,702	\$0
Smart Metering Entity Charge Variance Account	1551	\$31,077	\$31,077	\$0

Filed: November 1, 2016

EXPLANATION OF VARIANCES TO 2.1.7 RRR BALANCES

- 2 Account 1595: Disposition and Recovery/Refund of Regulatory Balances \$101,093
- 3 There is a double count of (\$101,093) in the account 1595 in the 2.1.7 balances since this amount was
- 4 included in account 1595 as at the end of December 31, 2011. The disposition of DVA balances as at
- 5 December 31, 2011 was addressed in the approved DVA rate riders for 2013 and 2014. However, when
- 6 the approved December 31, 2011 balances was moved to a new sub account of account 1595, for
- 7 tracking purposes, the December 31, 2011 balance for 1595 was also moved from the original
- 8 subaccount to the new subaccount but the 1595 entry of (\$101,093) was not eliminated from original
- 9 subaccount.

- 10 Account 1508: Other Regulatory Assets Sub-Account Deferred IFRS Transition Costs and
- 11 Account 1575: IFRS-CGAAP Transition PP&E Amounts Balance + Return Component Offsetting
- 12 amount of \$21,601
- 13 The amount recorded in account 1575 in the 2.1.7 balances should have been recorded in the reference
- 14 sub-account for 1508.
- 15 Account 1531: Renewable Generation Connection Capital Deferral Account (\$176,493)
- 16 The amount recorded in account 1531 in the 2.1.7 balances has been addressed by using the direct
- 17 benefit and provincial benefit method outlined in Appendices 2-FA through 2-FC. These appendices form
- 18 the mechanism to calculate the applied-for capital costs and the shares of total costs to be recovered
- 19 from all Ontario ratepayers (i.e. the provincial benefit amount) and the E.L.K.'s customers (i.e. the direct
- 20 benefit amount). The appendices also provide a revenue requirement calculation for the asset costs to be
- 21 recovered annually in accordance with O.Reg. 330/09 Provincial Rate Protection.
- 22 Account 1568: LRAM Variance Account 34,657
- 23 The amount recorded in account 1568 in the 2.1.7 balances of zero did not account for the LRAM
- 24 variance account claim outlined in the LRAMVA Work form. In the LRAMVA Work form, the \$34,657 is the
- total amount shown in tab 1. LRAMVA Summary, cell K38 minus the interest shown in cell K37.

ENERGY SALES AND COST OF POWER

- 2 The sale of energy is a flow through revenue and the cost of power is a flow through expense. Energy
- 3 sales and the cost of power expense by component are presented in Table 9-2 as reported in the Audited
- 4 Financial Statements and the USoA within the RRR filing 2.1.7. E.L.K. has no profit or loss resulting from
- 5 the flow through of energy revenues and expenses.

<u>Table 9-2 – Energy Revenue and Cost of Power Expenses</u>

Account Description	USoA#	2013 Actual	2014 Actual	2015 Actual
ENERGY REVENUE:				
Residential Energy Sales	4006	(7,721,551)	(9,174,803)	(12,391,488)
Commercial Energy Sales	4010	(2,488,304)	(3,676,302)	(2,935,078)
Revenue Adjustment	4050	(7,587,671)	(15,237,981)	(10,972,037)
Wholesale Market Service Charges	4062	(1,268,575)	(1,402,334)	(976,847)
Network	4066	(1,295,994)	(1,313,528)	(1,236,989)

INTEREST RATES APPLIED

1

- 2 E.L.K. has used the Board's prescribed interest rates when calculating carrying charges on the DVA
- 3 balances. Table 9-3 below shows the Board's prescribed interest rates starting from 2011 Q1 onward.
- 4 Interest is calculated based on the opening monthly principle balances.
- 5 In accordance with the filing requirements, the most recent posted interest rate (1.10% for Q3 of 2016)
- 6 has been used to forecast carrying charges to April 30, 2017. The interest component for DVA balances
- 7 is included in the principal balance for each account.

Table 9-3 - Interest Rates Applied to Deferral and Variance Accounts

Period	Interest Rate
Q1 2011	1.47%

PROPOSED DISPOSITION

1

5

- 2 E.L.K. is requesting a net disposition of \$1,952,657 to be collected from customers, based on the 2015
- 3 year end balances less the amounts approved through the 2016 IRM process (EB-2015-0064). Details of
- 4 each account disposition request are discussed in detail in the evidence that follows.

<u>Table 9-4 – Proposed Disposition</u>

Account Description	USoA#	Total Principal & Interest (Dec 31, 2015)	2016 Disposition	Interest to April 30, 2017	Total Claim
Group 1 Accounts:					
LV Variance Account	1550	\$186,702	\$2,173	\$2,706	\$187,235
Smart Metering Entity Charge Variance Account	1551	\$31,077	\$28,470	\$38	\$2,645
RSVA - Wholesale Market Service Charge	1580	(\$1,072,809)	(\$520,003)	(\$8,108)	(\$560,914)

E.L.K. Energy Inc. EB-2016-0066 Exhibit 9 Page 8 of 22

Filed: November 1, 2016

GROUP ONE ACCOUNT ANALYSIS

- 2 E.L.K. last disposed of Group One account balances in its 2016 IRM Rate Application (EB-2015-0064).
- 3 The Board's Filing Requirements specify that the continuity schedule should show the balance details
- 4 from the last disposition. Accordingly, E.L.K. has entered the 2016 Continuity data into Tab 2 of the
- 5 EDDVAR Model.

1

- 6 The following sections provide details of the Group One accounts utilized by E.L.K. and the respective
- 7 disposition requests.

8 Account 1550: LV Variance Account

- 9 This account is used to record the difference between the low voltage charges billed to E.L.K. customers
- 10 and the charges paid to Hydro One for low voltage service. E.L.K. uses the accrual method. The Board
- 11 prescribed interest rates are used to calculate the carrying charges.
- 12 E.L.K. requests disposition of Account 1550 for the amount of \$187,235 to be collected from customers,
- 13 including interest to April 30, 2017.

14 Account 1551: Smart Metering Entity Charge Variance Account

- 15 This account is used to record the difference between the Smart Meter Entity amounts billed to E.L.K.
- 16 customers and the charges paid to the IESO. E.L.K. uses the accrual method. The Board prescribed
- 17 interest rates are used to calculate the carrying charges.
- 18 E.L.K. requests disposition of Account 1551 for the amount of \$2,645 to be collected from customers,
- 19 including interest to April 30, 2017

20 Account 1580: RSVA - Wholesale Market Service Charge

- 21 This account is used to record the difference between the amounts charged by the IESO for wholesale
- 22 market services and the amount billed to E.L.K. customers using the Board Approved rates. E.L.K. uses
- the accrual method. The Board prescribed interest rates are used to calculate the carrying charges.
- 24 E.L.K. requests disposition of Account 1580 for the amount of \$560,914 as a refund to customers,
- 25 including interest to April 30, 2017.

26 Account 1584: RSVA - Retail Transmission Network Charge

- 27 This account is used to record the net of the amount charged by the IESO, based on the settlement
- 28 invoice for transmission network services, and the amount billed to customers using the OEB-approved

Filed: November 1, 2016

- 1 Retail Transmission Rate for network services. E.L.K. uses the accrual method. The Board prescribed
- 2 interest rates are used to calculate the carrying charges.
- 3 E.L.K. requests disposition of Account 1584 for the amount of \$422,813 to be collected from customers,
- 4 including interest to April 30, 2017.

5

Account 1586: RSVA - Retail Transmission Connection Charge

- 6 This account is used to record the net of the amount charged by the IESO, based on the settlement
- 7 invoice for transmission connection services, and the amount billed to customers using the OEB-
- 8 approved Retail Transmission Rate for connection services. E.L.K. uses the accrual method. The Board
- 9 prescribed interest rates are used to calculate the carrying charges.
- 10 E.L.K. requests disposition of Account 1586 for the amount of \$450,387 to be collected from customers,
- 11 including interest to April 30, 2017.

12 Account 1588: RSVA - Power (excluding Global Adjustment)

- 13 This account is used to recover the net difference between the energy amount billed to customers and the
- 14 energy charged to E.L.K. using the settlement invoice from the IESO. E.L.K. uses the accrual method.
- 15 The Board prescribed interest rates are used to calculate the carrying charges.
- 16 E.L.K. requests disposition of Account 1588 for the amount of \$697,161 as a refund to customers,
- 17 including interest to April 30, 2017.

18 Account 1589: RSVA - Global Adjustment

- 19 This account is used to recover the net difference between the provincial benefit amount billed to non-
- 20 RPP customers and the GA adjustment charge to E.L.K. using the settlement invoice from the IESO.
- 21 E.L.K. uses the accrual method.
- 22 The Board prescribed interest rates are used to calculate the carrying charges.
- 23 E.L.K. requests disposition of Account 1589 for the amount of \$714,442 as a refund to non-RPP
- 24 customers, including interest to April 30, 2017.

25

26

E.L.K. Energy Inc. EB-2016-0066 Exhibit 9 Page 10 of 22 Filed: November 1, 2016

Account 1595: Disposition and Recovery/Refund of Regulatory Balances

- 2 This account includes the regulatory asset or liability balances authorized by the Board for recovery in
- 3 rates or payments/credits made to customers. Separate sub-accounts are maintained for expenses,
- 4 interest, and recovery amounts for each Board-approved recovery.
- 5 The amount requested for disposition below relates to residual balances from rate riders that concluded in
- 6 2015. The amount in account 1595 relates to amounts that should be collected from non-RPP since
- 7 E.L.K. has not fully been reimbursed through the variance account process. As part of preparing this
- 8 application, E.L.K. discovered that with respect to the General Service 50 to 5,4999 Service
- 9 Classification, the rate rider called Disposition of Global Adjustment (2016) effective until April 30, 2017
- was incorrectly used in E.L.K.'s CIS system through a misinterpretation of the description of the rate rider.
- 11 This rate rider is applicable for only non-RPP customers. E.L.K. originally applied this to retailer accounts
- 12 only, but should have been all non-RPP customers, which is retailers and weighted average price
- 13 customers.
- 14 E.L.K. uses the accrual method on this account and the Board prescribed interest rates are used to
- 15 calculate the carrying charges.
- 16 E.L.K. requests disposition of Account 1595 for the amount of \$2,826,024 to be collected from Non-RPP
- 17 customers, including interest to April 30, 2017.

E.L.K. Energy Inc. EB-2016-0066 Exhibit 9 Page 11 of 22

Filed: November 1, 2016

GROUP TWO ACCOUNT ANALYSIS

- 2 Excluding accounts 1531 and 1568, the total disposition amount for the remaining group two accounts is
- 3 \$59. As a result, E.L.K. is not seeking disposition of remaining group two accounts at this time as it is
- 4 immaterial. In addition, the disposition of account 1576 was approved in E.L.K.'s 2012 cost of service
- 5 application. With the movement to IFRS there was no change in the continuity statements since the IFRS
- 6 standards had been previously established which eliminated the need for account 1575.

7 Account 1531: Renewable Generation Connection Capital Deferral Account

- As outlined above this account has been addressed by using the direct benefit and provincial benefit 8
- 9 method outlined in Appendices 2-FA through 2-FC.

10 11

1

Account 1568: LRAM Variance Account

- 12 This account includes the lost revenue adjustment mechanism ("LRAM") variances in relation to the
- 13 conservation and demand management ("CDM") programs or activities undertaken by E.L.K. in
- 14 accordance with OEB prescribed requirements. The details of this claim are outlined the LRAMVA Work
- form. E.L.K. requests disposition of Account 1568 for the amount of \$36,012 to be collected from 15
- customers, including interest to April 30, 2017. 16

GROUP 2 ACCOUNTS - TO BE CONTINUED AND DISCONTINUED ON A GO-FORWARD BASIS

- 2 Table 9-5 below lists all Group 2 accounts which E.L.K. will continue and discontinue on a going-forward
- 3 basis.

1

4 Explanations for those accounts that will be discontinued are provided in Table 9-5.

5 <u>Table 9-5 - Group 2 Accounts - Continue & Discontinue</u>

Account Description	USoA#	Continue / Discontinue	Explanation
Group 2 Accounts - Continue:			
Other Regulatory Assets - Sub-Account - Other	1508	Continue	On-going use
Other Regulatory Assets - Sub-Account - Deferred IFRS Transition Costs	1508	Continue	On-going use until account is eventually cleared
Retail Cost Variance Account - Retail	1518	Continue	On-going use
Misc. Deferred Debits	1525	Continue	On-going use
Retail Cost Variance Account - STR	1548	Continue	On-going use
LRAM Variance Account	1568	Continue	On-going use
PILs and Tax Variance	1592	Continue	On-going use until account is eventually cleared

CALCULATION OF RATE RIDERS

1

5

6

7

8

9

10

- 2 For the calculation of proposed rate riders, E.L.K. has utilized the billing determinants arising from the
- 2017 Load Forecast inclusive of CDM Adjustments, as presented in Table 9-6 below. For more details 3
- regarding the 2017 Load Forecast and billing determinants please see Exhibit 3. 4

Table 9-6 Total Billing Determinants

Rate Class	Customer Numbers	kWh	kW
Residential	10,386	91,658,363	-
General Service < 50 kW	1,253	28,971,935	-
General Service 50 to 4,999 kW	93	61,328,530	190,362
Unmetered Scattered Load	31	264,832	-
Sentinel Lights	7	5,962	14
Street Lights	2,826	2,380,054	6,476
Embedded Distributor	4	45,143,217	96,786
Total	14,600	229,752,894	293,638

In accordance with the OEB's Filing Requirements it is stated that:

- ... distributors must establish separate rate riders to recover the balances in the RSVAs from Market Participants ("MPs") who must not be allocated the RSVA account balances related to charges for which the MPs settle directly with the IESO"; and,
- 11 "Distributors who serve Class A customers per O. Reg 429/04 (i.e. customers greater than 5 MW) must propose an appropriate allocation for the recovery of the global adjustment variance balance 12 13 based on their settlement process with the IESO."
- 14 As of December 31, 2015, the E.L.K. customer's affected by these requirements is described as follows:
 - No market participants settle directing with the IESO, therefore, no separate rate riders to recover RSVAs is required, and
 - The one customer in the Embedded Distributor rate class is treated in the same manner as a Class A customer.

18 19

15

E.L.K. Energy Inc. EB-2016-0066 Exhibit 9 Page 14 of 22 Filed: November 1, 2016

As of July 1, 2016, E.L.K. notes the Embedded Distributor customer has remain as a Class A customer.

- 2 Since the DVA balances proposed for disposition relate to variances created prior to December 31, 2015,
- 3 E.L.K. proposes the rate riders be applicable to the customers who contributed to those variances. In this
- 4 case, this customer was a Class A customer before December 31, 2015 and they did not contribute to the
- 5 variance in account 1589 thus, there is no requirement to dispose of variances created prior to December
- 6 31, 2015.

1

- 7 For Class A customers, E.L.K. settles the GA based on the actual GA rate. In contrast, for Class B Non-
- 8 RPP customers, E.L.K. settles GA based on the First Estimate GA rate. Accordingly, E.L.K.'s Class A
- 9 customer has not and will not contribute to the creation of Account 1589 variances and should be
- 10 excluded from its disposition.
- 11 As noted above, as of December 31, 2015, E.L.K. has one Class A customer who is excluded from any
- 12 GA variance account disposition. As there is only one Class A customer from 2014 through to the current
- 13 period, there is no residual GA variance balances that have accrued prior to the customer being classified
- 14 as a Class A customer. As mentioned previously, E.L.K. settles GA with Class A customers on a monthly
- 15 basis and on the basis of actual cost. As a result, Class A customers do not contribute to the balance in
- 16 RSVA 1589 GA for the period they were Class A customers. The RSVA 1589 GA balance has been
- 17 allocated to the remaining Non-RPP customers based on the total Non-RPP consumption per class,
- 18 excluding Class A customers.
- 19 To develop the 2017 Non-RPP billing determinants to be applied to calculate the proposed GA rate riders,
- 20 E.L.K. first calculated the relationship by rate class of the 2015 Non-RPP results as a percentage of the
- 21 2015 total by rate class for each the kWh consumption. E.L.K. then applied the rate class specific
- 22 percentage to the 2017 Load Forecast results presented in Table 9-6. The Embedded Distributor
- 23 determinants are also deleted since no GA balance is allocated to this customer. The results are
- 24 presented in Table 9-7 below.

25

26

27

28

29

Table 9-7 Billing Determinants for GA Rate Rider

Rate Class	2015 % Non RPP	2017 kWh Non-RPP less Class A
Residential	14.3%	13,101,771
General Service < 50 kW	19.3%	5,588,832
General Service 50 to 4,999 kW	93.9%	57,567,899
Unmetered Scattered Load	100.0%	264,832
Sentinel Lights	100.0%	5,962
Street Lights	100.0%	2,380,054
Embedded Distributor		
Total		78,909,350

The billing determinants used to develop the various rate riders are presented in Table 9-8 below.

Table 9-8 2017 Detailed Load Forecast Billing Determinants for Disposition Calculations

Rate Class	Customer Numbers	kWh	kW	2017 kWh Non-RPP less Class A
Residential	10,386	91,658,363	-	13,101,771

PROPOSED RATE RIDERS

- 2 Consistent with the EDDVAR model provided by the OEB, E.L.K. has calculated the following rate riders:
 - Rate Rider Calculation for Group One Deferral / Variance Accounts Balances (excluding Global Adi.)
 - Rate Rider Calculation for RSVA Power Global Adjustment
 - Rate Rider Calculation for Account 1568

8

1

4 5

6 7

Each calculation and results will be discussed in the sections below.

10 11

Rate Rider Calculation for Group One Deferral / Variance Accounts Balances (excluding Global Adj.)

1 2

IESO SETTLEMENT PROCESS

3 4 5

Global Adjustment

6

- 7 On a monthly basis, E.L.K. must settle with the IESO for GA. GA is applicable to all provincial
- 8 customers who pay the Hourly Ontario Energy Price ("HOEP"), or have signed a retail contract,
- 9 and accounts for the differences between the market price and the rates paid to regulated and
- 10 contracted generators and for CDM programs.
- 11 The GA varies from month to month, responding to changes in both the HOEP and contract
- terms. Generally speaking, when the HOEP is lower, then the GA is higher in order to cover the
- 13 additional costs.
- 14 E.L.K. confirms that the GA charge is pro-rated into RPP and non-RPP.

15 Class A Customers

- 16 Class A customers were traditionally defined as customers with a peak demand of 5 MW or more.
- 17 However, on July 1, 2015, Class A eligibility was been expanded under a new conservation
- initiative to allow customers with a peak demand greater than 3 MW but less than or equal to 5
- MW to opt into this category. Conversely, customers with a peak demand of 5 MW or more may
- 20 opt into Class B.
- 21 The GA for Class A customers is based on their percentage contribution to the top five peak
- 22 Ontario demand hours. Hence, it is designed to encourage these users to shift their energy use
- 23 away from system-wide peaks. The IESO monthly GA Class A charges are passed on directly to
- 24 each Class A customer. Accordingly, E.L.K.'s Class A customer does not contribute to the
- creation of Account 1589 variances and are excluded from disposition calculation.
- 26 The one customer in the Embedded Distributor rate class is treated in the same matter as a Class
- 27 A customer.

Class B Customers

- 30 Class B customers include: (a) customers with a peak demand below 5MW (or who have opted
- 31 into this category) and (b) residential and business customers who have a retail contract for

Filed: November 1, 2016

- electricity. As of December 31, 2015, the majority of E.L.K.'s large volume customers were 1
- included in Class B. 2
- For Class B customers, the IESO provides three variations of the GA, which can be used by 3
- distributors to bill customers. These variations are described as follows: 4

1st Estimate Variation 5

- The 1st Estimate for a given month comprises three components an estimate of the GA costs 6
- 7 based on the previous month, an estimate of Ontario demand for the given month, and a true up
- accounting for the difference between the previous month's 1st Estimate and the actual rate. 8
- The 1st Estimate for the upcoming month is published on the last business day of the preceding 9
- 10 month. For example, the 1st Estimate for April is published at the end of March.
- 11 E.L.K. currently bills all Class B customers using the 1st Estimate Variation.

2nd Estimate Variation 12

- The 2nd Estimate is a separate calculation based on actual GA costs and demand information 13
- available at the time it is published, an estimate for GA and demand for the remaining days of the 14
- month, and a true up accounting for the difference between the previous month's 2nd Estimate 15
- and the actual rate. 16
- The 2nd Estimate for a given month is published on the last business day of that month. For 17
- example, the 2nd Estimate for April is published at the end of April. 18
- 19 E.L.K. currently does not bill any Class B using the 2nd Estimate Variation. This is due to the fact
- 20 that E.L.K. does not wish to create inequities within rate classes related to the GA variances
- accumulating the GA account 1589. Since E.L.K. has ongoing monthly billing cycles, some 21
- 22 customers within each rate class are billed for a based on a period which ends prior to the
- 23 availability of the IESO's 2nd Estimate. Thus, by using only the 1st estimate, E.L.K. ensures that
- 24 all customers within a rate class contribute equally to the GA variance accumulating in account
- 1589. This ensures an equitable disposition of the 1589 variance account to all rate classes. 25

26

Actual Variation

- Filed: November 1, 2016
- The Actual rate, based on actual electricity demand and GA costs, is published on the tenth 1
- 2 business day of each month. For example, the Actual rate for April is published on the tenth
- business day of May. 3

IESO Reporting Process 4

- E.L.K. settles with the IESO for the estimated difference between spot and RPP pricing, for RPP 5
- customers within four business days of month end. 6
- 7 Conventional meters (Designated customers on Tier1\2 pricing) - Total estimated consumption
- (kWh) is determined by multiplying the current number of active customers (excluding those with 8
- 9 retailers) by same month of the previous year's average consumption for that group. This
- 10 estimated consumption is then split between Tier 1 and Tier 2 pricing based on historical trending.
- 11 Time of use meters - Total estimated consumption (kWh) is determined by multiplying the current
- 12 number of active customers (excluding those with retailers) by same month of the previous year's
- 13 average consumption for that group. This estimated consumption is then split between on-peak,
- 14 off-peak and mid-peak, based on historical trending.
- 15 Total RPP consumption is then calculated by adding the consumption of customers on
- 16 conventional meters to the time of use customer consumption.
- E.L.K. notes that its process for providing consumption (kWh) estimates to the IESO contains 17
- 18 some inherent assumptions, in part due to data timing and data limitations.
- 19 E.L.K. has completed the IESO RPP Self-Certification process, as required by all distributors. This
- documentation was submitted to the IESO by the March 31, 2016 due date. 20
- E.L.K. uses the IESO reconciliation as the basis for its quarterly accounting accrual journal entries 21
- and subsequently reverses these accruals and records the actual IESO invoice when it is 22
- received. 23

24

25

E.L.K. Energy Inc. EB-2016-0066 Exhibit 9 Page 21 of 22 Filed: November 1, 2016

1

3

4

2

The True-up Process

- 5 As described above, E.L.K. reconciles the estimates of RPP and Non-RPP consumption to
- 6 actuals on a quarterly basis.
- 7 The total volume is determined by taking the actual kWh volume purchased from the IESO plus
- 8 any embedded generation volume and less any Class A volume, to determine the total actual
- 9 volume to be split between RPP and Non-RPP. An IT system query is run, which identifies
- monthly consumption for Non-RPP customers, with the difference being RPP volume.
- 11 The RPP volume is multiplied by the actual GA rate to determine the GA allocated to RPP
- customers and is netted against the estimate that was either paid to or received from the IESO on
- a monthly basis. This difference is then settled with the IESO on a quarterly basis.
- 14 Embedded generation is taken into consideration with determining the total power purchases for
- the month.

For all OEB-Approved dispositions, please ensure that the disposition amount has the same sign (e.g. debit balances are to have a positive figure and credit balance are to have a negative figure) as per the related OEB decision.

For RSVA accounts only, report the net variance to the account during the year. For all other accounts, record the transactions during the year. Do not include interest, adjustments, or OEB approved dispositions in this column.

Please provide explanations for the nature of the adjustments. If the adjustment relates to previously CEB Approved disposed balances, please provide amounts for adjustments and include supporting documentations.

As per the January 6, 2011 Letter from the CEB regarding the implementation of the Ontario Clean Energy Benefit:

"By way of exception... The Board does anticipate that licensed distributors that cannot adapt their invoices as of January 1, 2011 will require a variance account for OCEB purposes... The Board expects that any principal balances in "Sub account Financial Assistance Payment and Recovery Variance - Ontario Clean Energy Benefit Act" will be addressed through the monthly settlement process with the IESO or the host distributor, as applicable."

Please describe "other" components of 1508 and add more component lines if necessary.

Deferral accounts related to Smart Meter deployment are not to be recovered/refunded through the Deferral and Variance Account rate rider. For details on how to dispose of balances in Smart Meter accounts see the OEB's Guideline: Smart Meter Disposition and Cost Recovery (G-2011-0001)

The OEB requires that disposition of Account 1575 and Account 1576 shall require the use of separate rate riders. In the "Adjustments during 2015" column of the continuity schedule, please enter the amounts to be included in the Account 1576 and 1576 rate rider calculation from the applicable Chapter 2 appendices. For Account 1575, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, please provide the value in cell F39 from Chapter 2 Appendix 2-EA. For Account 1576, plea

Depending on the disposition period, balances may exist in Account 1575 and Account 1576 even if the accounts have been approved for disposition in a previous decision. Report these account balances in the continuity schedule if this is the case and leave the checkbox "Check to Dispose of Account" in the Total Claim column unchecked.

If the LDC's rate year begins on January 1, 2017, the projected interest is recorded from January 1, 2016 to December 31, 2016 on the December 31, 2015 balances adjusted for the disposed balances approved by the OEB in the 2016 rate decision. If the LDC's rate year begins on May 1, 2017, the projected interest is recorded from January 1, 2016 to April 30, 2017 on the December 31, 2015 balances adjusted for the disposed interest balances approved by the OEB in the 2016 rate decision.

Include Account 1595 as part of Group 1 accounts for review and disposition if the recovery (or refund) period has been completed. Check the "Check to Dispose Account" checkbox if disposition is requested. If the recovery (or refund) period has not been completed, do not include the respective balance in Account 1595 for disposition at this time.

Per the APH March 2015 Guidance, the Direct Benefits portion of Account 1531 should be transferred to rate base. The Direct Benefits portion of Account 1532 should be included in the DVA continuity schedule to be requested for disposition. In this continuity schedule, Account 1531 is listed for reference only. Account 1532 is included in the Group 2 allocation of balances that are used to calculate the rate riders. Only input the Direct Benefits portion of the account 1531 is listed for reference only. Account 1532 is included in the Group 2 allocation of balances that are used to calculate the rate riders. Only input the Direct Benefits portion of the account 1532 is included in the County of the Accou

When inputting balances in the continuity schedule, Account 1580 RSVA - Wholesale Market Service Charge is to exclude any amounts relating to CBR. The CBR amounts are to be entered separately in the Class A and Class B 1580 sub-accounts. Only Class B amounts are to be disposed. Class A amounts are not to be disposed.

Account 1557 is to be recovered in a manner similar to the Smart Meter accounts. Distributors should request for disposition upon completion of the MIST meter deployment. A prudence review and disposition should be done in the application, outside of this continuity schedule.

Input the LRAMVA balance in the continuity schedule as calculated from the LRAMVA model. The associated rate riders will be calculated in the DVA continuity schedule.

For all OEB-Approved dispositions, please ensure that the disposition amount has the same sign (e.g. d figure and credit balance are to have a negative figure) as per the related OEB decision.

For RSVA accounts only, report the net variance to the account during the year. For all other accounts, record the transactic column.

Please provide explanations for the nature of the adjustments. If the adjustment relates to previously OEB Approved dispos As per the January 6, 2011 Letter from the OEB regarding the implementation of the Ontario Clean Energy Benefit:

By way of exception... The Board does anticipate that licensed distributors that cannot adapt their invoices as of January 1, account Financial Assistance Payment and Recovery Variance - Ontario Clean Energy Benefit Act* will be addressed through

Please describe "other" components of 1508 and add more component lines if necessary.

Deferral accounts related to Smart Meter deployment are not to be recovered/refunded through the Deferral and Variance At Smart Meter Disposition and Cost Recovery (G-2011-0001)

The OEB requires that disposition of Account 1575 and Account 1576 shall require the use of separate rate riders. In the "A Account 1575 and 1576 rate rider calculation from the applicable Chapter 2 appendices. For Account 1575, please provide I G39 from the relevant Chapter 2 Appendix 2-EB or 2-EC, respectively.

Depending on the disposition period, balances may exist in Account 1575 and Account 1576 even if the accounts have beer is the case and leave the checkbox "Check to Dispose of Account" in the Total Claim column unchecked.

If the LDC's rate year begins on January 1, 2017, the projected interest is recorded from January 1, 2016 to December 31, 2 rate decision. If the LDC's rate year begins on May 1, 2017, the projected interest is recorded from January 1, 2016 to April the 2016 rate decision.

Include Account 1595 as part of Group 1 accounts for review and disposition if the recovery (or refund) period has been conperiod has not been completed, do not include the respective balance in Account 1595 for disposition at this time.

Per the APH March 2015 Guidance, the Direct Benefits portion of Account 1531 should be transferred to rate base. The Di disposition. In this continuity schedule, Account 1531 is listed for reference only. Account 1532 is included in the Group 2 account before the incentional schedule.

when inputing balances in the continuity schedule, Account 1580 RSVA - Wholesale Market Service Charge is to exclude sub-accounts. Only Class B amounts are to be disposed. Class A amounts are not to be disposed.

Account 1557 is to be recovered in a manner similar to the Smart Meter accounts. Distributors should request for dispositic application, outside of this continuity schedule.

Input the LRAMVA balance in the continuity schedule as calculated from the LRAMVA model. The associated rate riders w

For all OEB-Approved dispositions, please ensure that the disposition amount has the same sign (e.g. of figure and credit balance are to have a negative figure) as per the related OEB decision.

For RSVA accounts only, report he net variance to the account during the year. For all other accounts, record the transactive of the control of the relative of the relativ

column.

Please provide explanations for the nature of the adjustments. If the adjustment relates to previously OEB Approved dispos As per the January 6, 2011 Letter from the OEB regarding the implementation of the Ontario Clean Energy Benefit:

"By way of exception... The Board does anticipate that licensed distributors that cannot adapt their invoices as of January 1, account Financial Assistance Payment and Recovery Variance - Ontario Clean Energy Benefit Act" will be addressed through

Please describe "other" components of 1508 and add more component lines if necessary.

Deferral accounts related to Smart Meter deployment are not to be recovered/refunded through the Deferral and Variance Ac Smart Meter Disposition and Cost Recovery (G-2011-0001)

The OEB requires that disposition of Account 1575 and Account 1576 shall require the use of separate rate riders. In the "A Account 1575 and 1576 rate rider calculation from the applicable Chapter 2 appendices. For Account 1575, please provide I 639 from the relevant Chapter 2 Appendix 2-EB or 2-EC, respectively.

Depending on the disposition period, balances may exist in Account 1575 and Account 1576 even if the accounts have beer is the case and leave the checkbox "Check to Dispose of Account" in the Total Claim column unchecked.

If the LDC's rate year begins on January 1, 2017, the projected interest is recorded from January 1, 2016 to December 31, 2 rate decision. If the LDC's rate year begins on May 1, 2017, the projected interest is recorded from January 1, 2016 to April the 2016 rate decision.

Include Account 1595 as part of Group 1 accounts for review and disposition if the recovery (or refund) period has been conperiod has not been completed, do not include the respective balance in Account 1595 for disposition at this time.

Per the APH March 2015 Guidance, the Direct Benefits portion of Account 1531 should be transferred to rate base. The Di disposition. In this continuity schedule, Account 1531 is listed for reference only. Account 1532 is included in the Group 2 account before the incentional schedule.

when inputing balances in the continuity schedule, Account 1580 RSVA - Wholesale Market Service Charge is to exclude sub-accounts. Only Class B amounts are to be disposed. Class A amounts are not to be disposed.

Account 1557 is to be recovered in a manner similar to the Smart Meter accounts. Distributors should request for dispositic application, outside of this continuity schedule.

Input the LRAMVA balance in the continuity schedule as calculated from the LRAMVA model. The associated rate riders \boldsymbol{w}
