LETTER OF COMMENT

Comments:

In regard to bill EB2016-0296 I feel this cap added to my bill if approved is something that union gas should be responsible for. This gas going into the air has been going on a long time I am sure. With all the knowledge at our disposal there should have been or can be a solution without charging customers for this extra expense to so called save the air. With your other bill EB2016-0296 putting another extra expense to my bill, with a max proposed at the moment of 24.00 yearly I feel my bill will cost a good 10.00 or more a month. Our household has not had a raise in pay in the last 6 yrs. At this rate the minimum wage would have to be 20.00 per hr. I am asking you to reconsider these to bills.
