## LETTER OF COMMENT

### Comments:

This is nothing more than another Tax Grab by Kathleen Wynne.

I retired in 2002. Since then my cost of living has outpaced my income. Like many seniors, I have experienced significant increases in, municipal taxes, health insurance premiums, car & house insurance, water bill, telephone bill, grocery bill, hydro and now gas rates. My disposable income has decreased, my savings dwindling (used to help pay bills) and our quality of life has been reduced over the years. As a proud Canadian I will pay my share but resent being taken advantage of.

According to a report by Mark Bonokoske in the Edmonton Sun his sources indicate the world produces 36 trillion tons of carbon/year. Canada's share is 1.67%, which equals 601.2 million tons. Canada's forest, wetland and farmland absorbs almost four times the carbon it emits while here in Ontario we continue to eat the emissions produced by Michigan's heavy industry blown over by prevailing westerly winds.(Windsor Star)

At the risk of losing my home of forty-three years, I no longer can afford to throw money away on the foolish schemes of this provincial government. The people need to be seriously listened too and not just used to complete a process. NO, TO INCREASE RATES.
