To whom it may concern,

This inquiry is in regards to the notice the Ontario Energy Board posted in the 13Jan17 Parry Sound Beacon Star newspaper. This notice was relating to the application proposed by the Henvy Inlet Wind LP and a new high voltage transmission line they are planning.

I am concerned because I operate a Citizen Band Radio base station, and have done so for over 30 years at the address noted above. I operate on 10, 11 & 12 meters. Noise is currently a relatively small issue with the current transmission lines, that I live less than 550 feet from, but I am anxious that the new high voltage lines will impair the radio even further.

My request is this, I would like to be provided free of charge a filter for my existing Citizen Band Radio. This will cancel out any future noise from the Henvy Inlet Wind LP high voltage transmission lines.

I thank you for your time and consideration. I look forward to hearing back from you via mail or telephone at your earliest convenience.

Sincerely,
Tim Emerson
