1 INTRODUCTION AND SUMMARY

Renfrew Hydro Inc. (Renfrew Hydro) filed an application with the Ontario Energy Board (OEB) to change its electricity distribution rates effective January 1, 2017 (the Application). Under the OEB Act, distributors must apply to the OEB to change the rates they charge their customers.

Renfrew Hydro provides electricity distribution services to approximately 4,200 customers in the Town of Renfrew.

The OEB's policy for rate setting is set out in a report of the OEB entitled "Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach" (RRFE). The RRFE provides the distributor with performance-based rate application options that support the cost-effective planning and efficient operation of a distribution network. This framework provides an appropriate alignment between a sustainable, financially viable electricity sector and the expectations of customers for reliable service at a reasonable price.

Renfrew Hydro asked the OEB to approve its rates for five years using the RRFE Price-Cap Incentive rate-setting option. With this option, the approved 2017 rates are adjusted mechanistically through a price cap adjustment based on inflation and the OEB's assessment of Renfrew Hydro's efficiency.

Renfrew Hydro and parties resolved all issues associated with the Application at a December settlement conference and filed a Settlement Proposal with the OEB on January 20, 2017.

The Settlement Proposal reduces the applied for 2017 base revenue requirement of \$2,148,518 by \$145,080 to \$2,003,438. It also reduces the grossed up revenue deficiency from \$290,308 to \$112,000 (approximately 61%). In the Settlement Proposal, Renfrew Hydro acknowledges that the level of planned capital expenditures and the rationale for planning and pacing choices are appropriate to maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system¹.

For a typical residential customer with monthly consumption of 750 kWh, the total bill impacts under the Settlement Proposal would increase by about \$4.39 per month - a percentage increase of about 3%.

_

¹ Settlement Proposal, EB-2016-0166, Page 13

The OEB finds that the outcomes of the Settlement Proposal benefit consumers and are compatible with the operational effectiveness and other performance objectives of the RRFE.²

The OEB approves the rates that arise from the Settlement Proposal.

² Report of the Board: Renewed Regulatory Framework for Electricity Distributors: A Performance Based Approach, October 18, 2012

2 THE PROCESS

Renfrew Hydro filed an application on August 22, 2016 for 2017 rates. The OEB issued a Notice of Application on September 21, 2016, inviting parties to apply for intervenor status. The Vulnerable Energy Consumers Coalition (VECC) applied for, and was granted, intervenor status. OEB staff also was a party in this proceeding.

The OEB issued Procedural Order No.1 on October 13, 2016. This order established, among other things, the timetable for a written interrogatory discovery process. Renfrew Hydro responded to interrogatories and follow-up questions submitted by OEB staff and VECC.

The OEB issued an Interim Rate Order and Procedural Order No. 2 on December 1, 2016, which declared Renfrew Hydro's current rates interim and established processes for a non-transcribed technical conference via teleconference, the filing of a proposed issues list and a settlement conference by way of teleconference.

The settlement conference was held on December 21 and 22, 2016. Renfrew Hydro, VECC and OEB staff resolved all issues and filed a Settlement Proposal with the OEB on January 20, 2017 (see Schedule A attached).

3 DECISIONS ON THE ISSUES

The Settlement Proposal filed by the parties addressed all elements of the OEB's approved issues list for this proceeding, and represented a full settlement of all the issues. Through the settlement process, the parties agreed to certain reductions to Renfrew Hydro's proposed capital expenditures and operating, maintenance and administrative costs. These adjustments resulted in an overall reduction in the costs that are being recovered through the current rates paid by Renfrew Hydro's customers.

Findings

The OEB finds that the Settlement Proposal benefits consumers and produces outcomes that are consistent with the operational effectiveness and other performance objectives of the RRFE.

The OEB approves the Settlement Proposal (see Schedule A attached).

4 IMPLEMENTATION

The new rates are to be effective and implemented January 1, 2017. As indicated in the Settlement Proposal, Renfrew Hydro is able to implement rates for January 1, 2017 if approved by the OEB prior to mid-February. With the Settlement Proposal, Renfrew Hydro included tariff sheets and detailed supporting material, including all relevant calculations showing the impact of the implementation of the settlement on its approved revenue requirement, the allocation of the revenue requirement to its rate classes and the determination of the final rates and rate riders, including bill impacts.

The OEB made some changes to the wording of the tariff sheets attached to the Settlement Proposal to ensure consistency with the tariff sheets of other Ontario electricity distributors. The final, approved Tariffs of Rates and Charges are attached as Schedule B to this Decision and Rate Order.

VECC is eligible for cost awards in this proceeding. The OEB has made provision in this Decision and Rate Order for VECC to file its cost claims. The OEB will issue its cost award decision after the following steps are completed.

5 ORDER

THE ONTARIO ENERGY BOARD ORDERS THAT:

- 1. The Tariff of Rates and Charges set out in Schedule B of this Order are final effective January 1, 2017, and will apply to electricity consumed, or estimated to have been consumed, on and after January 1, 2017. Renfrew Hydro Inc. shall notify its customers of the rate changes no later than the delivery of the first bill reflecting the new rates.
- 2. VECC shall submit its cost claim no later than 7 days from the date of issuance of this Decision and Rate Order.
- Renfrew Hydro Inc. shall file with the OEB and forward to VECC any objections to the claimed costs within 17 days from the date of issuance of this Decision and Rate Order.
- 4. VECC shall file with the OEB and forward to Renfrew Hydro Inc. any responses to any objections for cost claims within 24 days from the date of issuance of this Decision and Rate Order.
- 5. Renfrew Hydro Inc. shall pay the OEB's costs incidental to this proceeding upon receipt of the OEB's invoice.

All filings to the OEB must quote the file number, EB-2016-0166, filed through the Board's web portal at https://www.pes.ontarioenergyboard.ca/eservice/, and consist of two paper copies and one electronic copy in searchable / unrestricted PDF format. Filings must clearly state the sender's name, postal address and telephone number, fax number and e-mail address. Parties must use the document naming conventions and document submission standards outlined in the RESS Document Guideline found at http://www.ontarioenergyboard.ca/OEB/Industry. If the web portal is not available parties may email their documents to the address below. Those who do not have internet access are required to submit all filings on a CD in PDF format, along with two paper copies. Those who do not have computer access are required to file seven paper copies.

All communications should be directed to the attention of the Board Secretary at the address below, and be received no later than 4:45 p.m. on the required date.

With respect to distribution lists for all electronic correspondence and materials related to this proceeding, parties must include the Case Manager, Georgette Vlahos at georgette.vlahos@ontarioenergyboard.ca and Board Counsel, Maureen Helt at maureen.helt@ontarioenergyboard.ca.

1. SETTLEMENT PROPOSAL

Renfrew Hydro Inc. (the "Applicant" or "RHI") filed a Cost of Service application with the OEB on August 22, 2016 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that RHI charges for electricity distribution, to be effective January 1, 2017 (OEB file number EB-2016-0166) (the "Application").

The OEB issued a Notice of Hearing on September 21, 2016. On October 13, 2016, the OEB issued a Procedural Order No. 1, where the OEB approved Vulnerable Energy Consumers Coalition (VECC) for intervenor status as well as prescribing dates for the following: written interrogatories from OEB staff and VECC; RHI's responses to interrogatories; a Settlement Conference; and various other elements in the proceeding.

Following the receipt of interrogatories, RHI filed its interrogatory responses with the OEB on November 21, 2016.

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 6 of 51 Filed: January 20, 2017

On December 9, 2016 a non-transcribed technical conference by teleconference was held to clarify any matters arising from the interrogatories.

On December 14, 2016 following interrogatories and the issuance and responses to clarification questions, OEB Staff submitted a proposed issues list as agreed to by the Applicant, VECC and OEB staff (the "Parties") and confirmed that a settlement conference would occur in accordance with Procedural Order No. 2 .

The settlement conference was convened by way of teleconference on December 21 and 22, 2016 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's Practice Direction on Settlement Conferences (the "Practice Direction").

RHI and the following participated in the settlement conference:

- Vulnerable Energy Consumers Coalition (VECC);
- OEB staff

The role adopted by OEB staff is set out on page 5 of the Practice Direction. In this particular case, OEB staff acted as a party to this Settlement Proposal and is bound by the same confidentiality and privilege rules that apply to the Parties to the proceeding.

This document is called a "Settlement Proposal" as this is a proposal by the Parties presented to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties. However, as between the Parties, and subject only to the OEB approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and is binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms herein.

These settlement proceedings are subject to the rules relating to confidentiality and privilege contained in the Practice Direction. The Parties acknowledge that this settlement proceeding is confidential in accordance with the OEB's Practice Direction. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's *Practice Direction on Confidential Filings*, and the rules of that latter document do not apply. Instead, in this settlement conference, and in this Settlement Proposal, the Parties have interpreted "confidential" to mean that the documents and other information provided during the course of the settlement proceeding, the discussion of each issue, the offers and counter-offers,

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 7 of 51 Filed: January 20, 2017

and the negotiations leading to the settlement – or not – of each issue during the settlement conference are strictly privileged and without prejudice.

None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the settlement conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not physically in attendance at the settlement conference but were a) any persons or entities that the Parties engage to assist them with the settlement conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include a) additional information included by the Parties in this Settlement Proposal, and b) the Appendices to this document. The supporting Parties for each settled issue, as applicable, agree that the evidence in respect of that settled issue, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal. The Parties agree that references to the evidence in this Settlement Proposal shall, unless the context otherwise requires, include, in addition to the Application, the responses to interrogatories, responses to clarification questions and undertakings, and all other components of the record up to and including the date hereof, including additional information included by the Parties in this Settlement Proposal and the Attachments to this document.

Included with the Settlement Proposal are Attachments that provide further support for the proposed settlement. The Parties acknowledge that the Attachments were prepared by RHI. While VECC and OEB staff have reviewed the Attachments, they are relying on the accuracy of the underlying evidence in entering into this Settlement Proposal.

For ease of reference, this Settlement Proposal follows the format of the final Approved Issues List.

The Parties are pleased to advise the OEB that a complete settlement with respect to all of the issues in this proceeding was reached, specifically:

	Number of
Description	issues
	settled

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 8 of 51 Filed: January 20, 2017

"Complete Settlement means an issue for which complete settlement was reached by all Parties, and if this Settlement Proposal is accepted by the OEB, the Parties will not adduce any evidence of argument during the hearing in respect of these issues.	All
"Partial Settlement" means an issue for which there is partial settlement as RHI and the Intervenors who take any position on the issue were able to agree on some but not all aspects of the particular issues. If this Settlement Proposal is accepted by the OEB, the Parties who take any position on the issue will not adduce any evidence of argument during the hearing on those positions of the issues not addressed in the Settlement Proposal	Not Applicable
"No Settlement" means an issue for which no settlement was reached. RHI and the intervenors who take a position on the issue will adduce evidence and/or argument at the hearing on the issue.	Not Applicable

Per the Practice Direction (p.4), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. These adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB does not accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

If the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all the Parties who took a position on an issue must agree with any revised Settlement Proposal as it relates to that issue prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of the Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not RHI is a party to such proceeding, so long as no Party shall take a position that would result in this Settlement Proposal not applying in accordance with the terms contained herein.

Where in this Agreement, the Parties "Accept" the evidence of RHI, or "Agree" to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 9 of 51 Filed: January 20, 2017

2. SUMMARY

In reaching this Settlement, the Parties have been guided by the Filing Requirements for 2017 rates and the Approved Issues List.

This Settlement Proposal reflects a complete settlement of the issues in the proceeding.

The Parties have agreed to an effective date of January 1, 2017 for the proposed new rates. The proposed new rates can be implemented by RHI if approved by the OEB before February 10, 2017, when bills for January consumption will be issued.

The Parties note that this Settlement Proposal includes all tables, appendices and the live Excel models that represent the evidence and the settlement between the Parties at the time of filing the Settlement Proposal.

A Revenue Requirement Work Form, incorporating all terms that have been agreed to is filed as an Appendix to the Settlement Proposal. Through the settlement process, RHI has agreed to certain adjustments to its original 2017 Application. The changes are described in the following sections.

RHI has provided the following Table 1 highlighting the changes to its Rate Base and Capital, Operating Expenses and Revenue Requirement from RHI's Application as filed, and through interrogatories and clarifying questions and this Settlement Proposal.

Table 1- Summary of Changes

	Application (a)	IR Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
Rate Base	\$6,933,995	\$6,788,867	-\$145,128	\$6,684,775	-\$104,092
Weighted Average Cost of Capital	6.25%	5.67%	-0.61%	5.67%	0%
Return of Rate Base					
Deemed Interest Expense	\$180,866	\$146,205	-\$34,661	\$143,963	-\$2,242
Return on Deemed Equity	\$254,894	\$238,425	-\$16,469	\$234,769	-\$3,656
OM&A Expenses	\$1,549,280	\$1,553,280	\$4,000	\$1,473,280	-\$80,000
Amortization/Depreciation	\$247,981	\$245,809	-\$2,172	\$243,152	-\$2,657
Income Taxes (Grossed up)	\$23,047	\$20,526	-\$2,521	\$21,278	\$752

Service Revenue Requirement (before Revenues)	\$2,256,068	\$2,204,245	-\$51,823	\$2,116,443	-\$87,802
Revenue Offsets	\$107,550	\$107,550	\$0	\$113,005	\$5,455
Base Revenue Requirement	\$2,148,518	\$2,096,695	-\$51,823	\$2,003,438	-\$93,257
Grossed up Revenue Deficiency	\$290,308	\$207,074	-\$83,234	\$112,001	-\$95,073

Based on the above, and the evidence and rationale provided below, the Parties accept this Settlement Proposal as appropriate and recommend its acceptance.

Attachment A sets out an updated Tariff of Rates and Charges based on the outcome of this Settlement Proposal which is subject to the OEB's acceptance.

Table 2 and 3 below and Attachment B illustrate the updated Bill Impacts based on the results of this Settlement Proposal.

Table 2- 2017 Summary of Total Bill Impacts

Attachment B contains the Bill Impacts by rate class for all components of RHI's monthly electricity bill.

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 12 of 51 Filed: January 20, 2017

3. RENEWED REGULATORY FRAMEWORK FOR ELECTRICITY OUTCOMES

In reaching this Settlement Proposal, the Parties have taken into consideration the outcomes as defined by the *Renewed Regulatory Framework for Electricity* ("RRFE"). For the purpose of the settlement of the issues in this proceeding, and subject to the adjustments noted in this Settlement Proposal, the Parties accept that RHI's proposed rates in the 2017 Test Year will, in all reasonably foreseeable circumstances, allow the Applicant to meet its obligations to its customers while maintaining its financial viability. Further, RHI agrees to continue the evolution of its customer engagement efforts, and to link customer feedback to its capital planning.

4. PLANNING

- 4.1. Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to?
 - Customer feedback and preferences;
 - Productivity;
 - Benchmarking of costs;
 - Reliability and service quality;
 - Impact on distribution rates;
 - Trade-offs with OM&A spending;
 - · Government-mandated obligations; and
 - The objectives of the Applicant and its customers

The Parties accept the capital expenditures as appropriate subject to the following adjustments:

RHI agrees to use the amount of \$542,500 for 2017 capital additions to rate base which includes the following adjustments from the original application:

- The 2017 addition of the Hunter Gate project (\$102,000) originally planned for 2016, but delayed by the developer.
- The removal of the MS1 reclosers from the 2017 Test Year (\$300,000) in light of the findings from the draft Field Service Report for the MS1 Sub dated December 16, 2016, and attached to this Settlement Proposal at Attachment E. Based on the results from

the Report, the replacement of the MS1 breakers and underground cable is not required in 2017.

RHI also agrees to file as part of its next cost of service application a Distribution System Plan that:

- describes how outages are linked to defective equipment and how RHI will address such outages;
- includes a detailed asset condition assessment, including a health index and a description of how asset conditions were ascertained;
- includes business cases for material projects included in the DSP
- indicates how its capital plan is linked to customer feedback; and
- considers the pacing of material projects.

A summary of gross capital expenditures is presented in Table 4 below. The complete Fixed Asset Continuity Schedules for 2016 and 2017 are presented at Appendix D.

Table 4- 2016-2017 Capital Expenditures (Excluding Disposals)

2016	Application (a)	IR Undertaking (b)	Variance (c) = (b)- (a)	Settlement (d)	Variance (e) = (d)- (b)
System Access	\$95,000	\$5,197	-\$89,803	\$5,197	\$0
System Renewal	\$422,000	\$350,043	-\$71,957	\$350,043	\$0
System Service	\$10,000	\$0	-\$10,000	\$0	\$0
General Plant	\$20,500	\$34,750	\$14,250	\$34,750	\$0
Total	\$547,500	\$389,990	-\$157,510	\$389,990	\$0

2017	Application (a)	IR Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
System Access	\$5,000	\$5,000	\$0	\$107,000	\$102,000
System Renewal	\$615,000	\$615,000	\$0	\$315,000	-\$300,000
System Service	\$110,000	\$110,000	\$0	\$110,000	\$0
General Plant	\$10,500	\$10,500	\$0	\$10,500	\$0
Total	\$740,500	\$740,500	\$0	\$542,500	-\$198,000

For the purposes of settlement of all the issues in this proceeding, the Parties accept the evidence of RHI that the level of planned capital expenditures and the rationale for planning and pacing choices are appropriate to maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system.

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 14 of 51 Filed: January 20, 2017

The Parties further accept that the Distribution System Plan filed in this proceeding, combined with the resources made available to RHI in the Test Year under the terms of this Settlement Proposal, will:

- Maintain system reliability and service quality objectives; and
- Allow adequate resources for expansion of the distribution network; and
- Maintain reliable and safe operation of its distribution system.

4.1.1. OPERATIONS, MAINTENANCE AND OPERATING EXPENSES

Is the level of planned Operations, Maintenance and Operating ("OM&A") expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:

- · Customer feedback and preferences;
- Productivity;
- Benchmarking of costs;
- Reliability and service quality;
- Impact on distribution rates;
- Trade-offs with capital spending;
- · Government-mandated obligations; and
- The objectives of the Applicant and its customers.

The Parties accept the OM&A expenditures as proposed by RHI subject to the adjustments set out in Table 5 below. The Parties have agreed that the total adjustment, an \$80,000 decrease in OM&A in the Test Year, is based on an "envelope" approach, so that any determination of potential budget reductions to reflect the OEB-approved 2017 OM&A will be at the discretion of RHI.

A summary of the adjusted OM&A expenditures is presented in Table 5 below. RHI has identified in the table below the revised OM&A budget for the 2017 Test Year.

Table 5- 2017 Test Year OM&A Expenditures

	Application (a)	IR Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
Operations	\$296,946	\$296,946	\$0	\$284,906	-\$12,040
Maintenance	\$196,759	\$196,759	\$0	\$171,759	-\$25,000
Billing and Collecting	\$467,660	\$467,660	\$0	\$448,699	-\$18,961
Community Relations	\$6,000	\$6,000	\$0	\$5,757	-\$243
Administration & General +LEAP	\$581,915	\$585,915	\$4,000	\$562,159	-\$23,756
Total	\$1,549,280	\$1,553,280	\$4,000	\$1,473,280	-\$80,000

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 16 of 51 Filed: January 20, 2017

4.1.2. OM&A Expenditures

For the purposes of the settlement of all issues in this proceeding, the Parties agree to reduce the OM&A expenditures in the 2017 Test Year by \$80,000, which further aligns with RHI's objective of continuous improvement and achieving productivity improvements.

5. REVENUE REQUIREMENT

5.1. Are all elements of the Revenue Requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?

The Parties accept the Revenue Requirement proposed by the Applicant including the specific adjustments as a result of the IR Responses and the Settlement Proposal that are summarized below and described in detail in the relevant sections:

- Section 5.1.1: Cost of Capital (Issues' list 2.1)
- Section 5.1.2: Rate Base(Issues' list 2.1)
- Section 5.1.3: Working Capital(Issues' list 2.1)
- Section 5.1.4: Depreciation(Issues' list 2.1)
- Section 5.1.5: Taxes(Issues' list 2.1)
- Section 5.1.6: Other Revenue(Issues' list 2.1)

A summary of the adjusted Revenue Requirement is presented in Table 6 below.

Table 6 - 2017 Revenue Requirement

	Application (a)	IR Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)

ΑII

5.1.1. Cost of Capital

The Parties have agreed on the Applicant's proposal to use the deemed interest rate of 3.72% for long term debt. This proposed rate aligns with the updated 2017 cost of capital parameters issued by the OEB.

RHI has a \$2,705,168 Promissory note to the sole shareholder, the Town of Renfrew, signed January1, 2001, with no specific terms of repayment, payable on demand, and at an interest rate of 7.25%. The interest rate of 7.25% per annum was based on the debt rate per annum established by the OEB as set out in Chapter 3 of the OEB's electricity Distribution Rate Handbook issued March 9, 2000. In compliance with OEB policy, which states that a utility should use the lower of the actual interest rate or the OEB prescribed debt, RHI has applied the current long-term debt rate deemed by the OEB for rate-setting purposes. Currently, RHI is paying interest only; no payments toward the principal have been made.

Table 7 below details the Cost of Capital parameters.

Table 7 - 2017 Cost of Capital

Capital Structure:	Application (a)	IR Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
Long-term debt Capitalization Ratio (%)	56.0%	56.0%	0.0%	56.0%	0.0%
Short-term debt Capitalization Ratio (%)	4.0%	4.0%	0.0%	4.0%	0.0%

5.1.4. Depreciation

The Parties accept that the forecast depreciation/amortization expenses are appropriate.

The adjustment noted below is the result of the revised capital continuity statements to reflect the addition of the Hunters Gate project (+\$102,000) and the removal of the MS#1 reclosers (-\$300,000) to the 2017 Test Year. The Hunters Gate project was originally planned for 2016, but the developer has postponed the project until 2017. The MS1 reclosers were removed in light of the MS1 Report described above in section 4.1. As a result of the adjustment, the amortization expense for the 2017 Test Year was recalculated.

5.2. Has the Revenue Requirement been accurately determined based on these elements?

For the purposes of settlement of all the issues in this proceeding, and subject to the adjustments expressly noted in this Settlement Proposal, the Parties accept the evidence of RHI that the proposed Base Revenue Requirement has been determined accurately

6. LOAD FORECAST, COST ALLOCATION AND RATE DESIGN

6.1. Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of the applicant's customers?

The Parties accept the evidence of RHI that the methodology used for the load forecast, customer forecast, loss factors and Conservation and Demand Management ("CDM") adjustments, subject to the changes noted below, are appropriate. Specific adjustments as a result of IR responses and the Settlement Proposal are summarized immediately below and are described in detail in the specified sections further below:

- Section 6.1.1: Customer/Connections Forecast (Issues' list 3.1)
- Section 6.1.2: Load Forecast (Issues' list 3.1)
- Section 6.1.3: Loss Factors (Issues' list 3.1)
- Section 6.1.4: CDM Adjustments (Issues' list 3.1)

The resulting billing determinants are presented in Table 13 below.

6.1.3. Loss Factors

The Parties agree to the Loss Factors proposed in the Application with no changes as summarized below:

Table 17- 2017 Loss Factor

Particulars	Application (a)	IR Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
Loss Factor	1.081	1.081	0	1.081	0
				_	

The Parties acknowledge that the proposed Total Loss Factor of 1.081 was based on the five year historical average which has decreased from 1.0856 reported in the 2010 application (.4%). The five year historical average Distribution Loss of 1.0455 is also less than the 1.0499 reported in the 2010 application (.4%). RHI agrees to undertake a line loss system study in 2017 to look for opportunities to reduce Distribution System Losses. In addition to this, RHI will also examine the relationship with HONI and its supply to the substations to find opportunities to reduce its Total Loss Factor.

6.1.4. Load Forecast CDM Adjustments

The Parties agree to the Load Forecast CDM Adjustment by rate class proposed in the Application with changes as summarized below:

 The weight factors were updated on the CDM work form to adjust 2015 to 0.5, full year impact in 2016 and a half year impact in 2017.RHI has already accounted for the full year impact of 2015 CDM programs in its Load Forecast Model.

Table 18- Load Forecast CDM Adjustment

Particulars	Application (a)	Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
Residential	428,476	427,609	-866	369,372	-58,237

6.1.5. Lost Revenue Adjustment Mechanism Variance Account ("LRAMVA") Threshold for Future Applications

The Parties agree to the below LRAMVA per class threshold for the purpose of future applications which reflects that annualized expected impact in 2017 of 2015, 2016 and 2017 CDM programs:

Table 19- DVA LRAM/LRAMVA Rate Rider

LANGE	2017 Load	Chara	Per Class Threshold	
kWh	Forecast	Share		
Residential	30,363,324	33.9%	533,328	
General Service < 50 kW	12,331,809	13.8%	216,607	
General Service > 50 to 4999 kW	45,587,384	50.9%	800,737

6.2. Is the proposed cost allocation methodology, allocations, and revenue-to-cost ratios appropriate?

The Parties accept the evidence of RHI that, subject to the adjustments identified below, the cost allocation methodology, allocations and revenue-to-cost ratios are appropriate.

RHI agrees to balance its revenue requirement across customer classes by using the OEB's standard methodology; that is by moving the revenue to cost ratios to the edge of the OEB range, if outside of the range, and then beginning with the lowest revenue to cost ratios, as determined by the cost allocation model, and increasing it until it matches the next lowest revenue to cost ratio, then continuing to increase each in this manner until the revenue requirement is balanced. The following Table 20 sets out the revenue to cost ratios settled upon by the Parties.

Table 20- Proposed 2017 Revenue to Cost Ratios

Particulars	Application (a)	Undertaking (b)	Variance (c) = (b)-(a)	Settlement (d)	Variance (e) = (d)-(b)
Residential	0.9649	0.9586	-0.0063	0.9563	-0.0023
General Service < 50 kW	1.2049	1.2004	-0.0045	1.2007	0.0003
General Service > 50 to 4999 kW	0.9035	0.9217	0.0182	0.9269	0.0052

6.3. Are the applicant's proposals, including the proposed fixed/variable splits, for rate design appropriate?

The Parties accept the evidence of RHI that all elements of the rate design have been correctly determined in accordance with OEB policies and practices. Specific adjustments to the rate design as a result of the IR Responses and the Settlement Proposal are summarized below and are described in detail in the specific sections further below.

- Section 6.3.1 Residential Rate Design
- Section 6.3.2 Tariff Sheet Updates

The resulting distribution rates are presented in Table 22 below.

Table 22- January 1, 2017 Distribution Rates

Customer Class Name	per	Fixed Rate	Fixed %	Variable Rate	Variable %
Residential	kWh	\$17.30	69.75%	0.0115	30.25%

6.3.1. Residential Rate Design

Under the OEB's new Policy entitled "A New Distribution Rate Design for Residential Electricity Customers" (EB-2012-0140), distributors are required to structure Residential distribution rates so that all costs for distribution service are collected through a fixed monthly charge within four years (i.e.: by 2019).

The Parties agree to the proposed implementation of a fixed monthly distribution charge for Residential customers over four years. The first year of the four year transition for RHI will be 2017.

6.4.3. MicroFit rate change

In its application, RHI proposed increasing the Monthly Service Charge (MSC) for its MicroFIT accounts. The current MSC is \$5.40 however RHI incurs a \$10.00 monthly fee per MicroFIT meter point from its vendor and wishes to recover this cost from MicroFIT customers.

Based upon the evidence presented, the Parties agree to the increase of RHI's MicroFIT charge from \$5.40 to \$10.00 to better reflect administrative costs associated with MicroFIT accounts.

7. ACCOUNTING

7.1.1. Have all impacts of any changes in accounting standards, policies, estimates, and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

Impacts of Changes in Accounting Standards

The Parties accept the evidence of RHI that all impacts of changes to accounting standards, policies, estimates, and adjustments have been properly identified and recorded in accordance with the OEB's policies and properly reflected in rates.

Deferral and Variance Accounts

The Parties accept the evidence of RHI that all elements of the deferral and variance accounts, including the balances in the existing accounts and their disposition periods as listed in 7.1.2 (Table 27) will commence January 1, 2017, as well as the continuation of existing accounts.

An updated EDDVAR Continuity Schedule is provided in working Excel format reflecting this Settlement Proposal and includes the calculation of the various riders discussed below.

7.1.2. Disposition Period for Rate Riders

The Parties have agreed to the following disposition periods for Rate Riders

Table 27 – Disposition Period for Rate Riders

Description	RHI Recovery	Disposition
	(Refund to Customers)	Period
1550, 1551, 1584, 1586,1595	117,035.00	1
1580 and 1588 (WMS and Power)	(55,002.00)	1
1589 GA	179,085.00	1
1000 071	170,000.00	
Group 2	54,797.00	1
1568 LRAM	65,154	1
1576 (Depreciation)	(839,148.00)	4
Stranded Meters	54,954.00	4
Smart Meters	355,525.44	4

The Parties acknowledge that the disposition periods were proposed after an in-depth analysis of various scenarios. The periods listed above offered total bill impacts of less than 10% for each customer class as evidenced in Table 2. Longer disposition periods were chosen for 1576, Stranded Meters and Smart Meters to minimize the impact of the larger one-time rate riders.

Attachment A -RHI Proposed January 1, 2017 Tariff Sheets

Effective and Implementation Date January 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates. Charges and Loss Factors

EB-2016-0166

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

MONTHLY RATES AND CHARGES - Delivery Component		
Service Charge	\$	17.30
Rate Rider for Smart Metering Entity Charge - effective until October 31, 2018	\$	0.79
Distribution Volumetric Rate	\$/kWh	0.0115
Rate Rider for Stranded Meter (2017) - effective until December 31, 2020	\$	0.17
Rate Rider for Smart Meter Disposition (2017) - effective until December 31, 2020	\$	1.42
Rate Rider for Disposition of Deferral/Variance Accounts (2017) - effective until December 31, 2017	\$/kWh	0.0013

Standard Supply Service - Administrative Charge (if applicable)	\$	0.25

ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

APPLICATION

The application of the charges are in accordance with the Distribution System Code (Section 9) and subsection 79.2(4) of the Ontario Energy Board Act, 1998.

The application of these charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

Effective and Implementation Date January 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates. Charges and Loss Factors

EB-2016-0166

In this class:

"Aboriginal person" includes a person who is a First Nations person, a Métis person or an Inuit person;

"account-holder" means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

"electricity-intensive medical device" means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

"household" means the account-holder and any other people living at the accountholder's service address for at least six months in a year, including people other than the account-holder's spouse, children or other relatives;

"household income" means the combined annual after-tax income of all members of a household aged 16 or over-

MONTHLY RATES AND CHARGES

Class A

- (a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;
- (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons; and
- $(d) \ account-holders \ with \ a \ household \ income \ of \ between \$48,001 \ and \$52,000 \ living \ in \ a \ household \ of \ seven \ or \ more \ persons;$

but does not include account-holders in Class E.

OESP Credit \$ (30.00)

Class B

- (a) account-holders with a household income of \$28,000 or less living in a household of three persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of four persons;
- (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of six persons;

but does not include account-holders in Class F.

OESP Credit \$ (34.00)

Class C

- (a) account-holders with a household income of \$28,000 or less living in a household of four persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons;
- (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more persons;

but does not include account-holders in Class G.

OESP Credit \$ (38.00)

Class D

- (a) account-holders with a household income of \$28,000 or less living in a household of five persons; and
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;

but does not include account-holders in Class H.

OESP Credit \$ (42.00)

Class E

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (45.00)

Class F

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or
- (c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:
 - i. the dwelling to which the account relates is heated primarily by electricity;
 - ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or
 - iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates

OESP Credit \$ (50.00)

Class G

Effective and Implementation Date January 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0166

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (55.00)

Class H

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

Class I

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (75.00)

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Renfrew Hydro Inc. EB-2016-0166 Settlement Proposal Page 48 of 51 Filed: January 20, 2017

Attachment B - RHI Updated Bill Impacts

Tariff Schedule and Bill Impacts Model (2017 Cost of Service Filers)

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. The OEB has established that, when assessing the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, a utility shall evaluate the total bill impact for a low volume residential customer consuming at the distributor's 10th consumption percentile19, to a minimum of 50 kWh per month. Refer to page 62 of Chapter 2 Filing Requirements For Electricity Distribution Rate Applications issued July 14, 2016.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2016 of \$0.113/kWh (IESO's Monthly Market Report for May 2016, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact chart for the specific class.
- applicaments should enter the contract price (pius GA) for a more accurate estimate. Changes to the cost of power can be made directly in the limiting plact chart or the specific class.

 2. Due to the change to energy consumption used in the calculation of GA rate inders for the 2017 rate year, the separate "GA real Riders" line is only applicable to the "Proposed" section of the bill impact tables.
- 3. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

Notes:

General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use
- colimn M and Adjustments in column I
- Net of addbacks and deductions to arrive at taxable income.
- (4) (5)
- Average of Gross Fixed Assets at beginning and end of the Test Year
 Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- 4.0% unless an Applicant has proposed or been approved for another amount.

 The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, WCA factor based on lead-lag study or approved WCA factor for another distributor, with supporting rationale

Notes (2)

9 10

Some Applicants may have a unique rate as a result of a lead-lag study. The default rate for 2016 cost of service applications is 7.5%, per the letter issued by the Board on June 3, 2015. Alternatively, a utility could conduct and file its own lead-lag study.

Average of opening and closing balances for the year.

Tracking Form

The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)
Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

(2) Short description of change, issue, etc.

60 Tracking Rows have been provided below. If you require more, please contact Industry Relations @ IndustryRelations@ontarioenergyboard.ca.

Attachment E – Eaton – Draft Field Service Report – MS1 Sub

Eaton Corporation
Eaton Electrical Services and Systems
2615 Lancaster RD
Unit 26
Ottawa, ON K1B 5N2

December 16, 2016

Renfrew Hydro 499 O'Brien Rd Renfrew, ON

Attention: Bill Nippard

Subject: [FREE FORM TEXT ENTRY BOX-Subject]

Ref: Sub MS1

Attached please find our Field Service Report for the Sub MS1 maintenance performed on December 13, 2016. During the maintenance it was noticed that there are issues with moisture in the building causing problems with electrical equipment. It is highly recommended that these issues are resolved before there is any further damage to the electrical system.

The information submitted in this report summarizes all services, recommendations and comments made as a result of this service request.

Sincerely,

Christopher P Wolscht Field Service Representative Eaton Electrical Services & Systems ChristopherPWolscht@Eaton.com

<u>Http://www.eatonelectrical.com</u> 24-Hour Emergency Service: 613-739-1115

Job Summary:

Eaton Job Number: EOTJ160115

Date of Service: December 13, 2016

Service Location: Renfrew Hydro- MS1

Performed For: Renfrew Hydro

499 O'Brien Rd Renfrew, ON

Customer Order Number: 9912

Customer Contact: Bill Nippard

Service Performed by: Eaton Corporation

Eaton Electrical Services and Systems

2615 Lancaster RD

Unit 26

Ottawa, ON K1B 5N2

Field Service Representative: Christopher P Wolscht

Test Procedures:

MEDIUM VOLTAGE OIL BREAKER

Visual and Mechanical Inspection

Inspected breaker for physical damage and installation.

Performed mechanical operation, checked contact alignment, wipe, and gap in accordance with manufacturer's instructions.

Checked tightness of bolted bus joints.

Checked liquid level.

Inspected breaker to cell alignment and grounding.

Electrical Tests

Verified proper electrical closing/tripping operation by activation of auxiliary devices.

Tripped circuit breaker by operation of each protective device.

Performed insulation resistance test phase-to-ground, phase-to-phase and across open contacts.

Measured contact resistance.

Sampled insulating fluid in accordance with ASTM D-923 and ASTM D3613. Sample was laboratory tested for the following:

-PCB Content (EPA 8081A / 8082)

PROTECTIVE RELAY

Visual and Mechanical Inspection

Tightened case connections. Inspected cover for correct gasket seal. Inspected shorting hardware, connection paddles, and/or knife switches. Verified target reset.

Cleaned cover glass and relay components as required.

Checked relay components for proper operation and alignment, as applicable.

Verified proper identification of protective relays.

Electrical Tests

Performed the following tests at the settings specified by client:

Pickup parameters on each operating element of the relay.

Timing tests conducted to verify proper delay of each element.

Pickup target and seal-in units.

Performed functional test to ensure relay trips the associated breaker or auxiliary device, as applicable.

Performed insulation resistance test on each electrical circuit to frame.

TRANSFORMER TEST

Visual and Mechanical Inspection

Inspected physical and mechanical condition.

Verified removal of any shipping bracing and vent plugs.

Inspected all accessible bolted electrical connections for high resistance.

Verified correct liquid level in all tanks.

Verified correct equipment grounding.

Electrical Tests

Performed turns-ratio test at each tap changer position.

109

Insulation Resistance readings are very low. Hising sound was present while testing C Phase. It is suspected that the heaters in Cell 5 may not be working anymore. James from Renfrew Hydro is looking into it.

1 HV SUBSTATION MAINTENANCE-OPEN AIR MAINTENANCE SCHEDULED FOR DECEMBER 13, 2016

The Electrical Safety Authority (ESA) operates as a delegated authority on behalf of the provincial government in accordance with Part VIII, section 113 of the Electricity Act, 1998, S.O. 1998, c.15, Sched. A. (the Act), and the Safety and Consumer Statutes Administration Act, 1996, S.O. 1996, c.19. ESA's mandate is to administer the Act and corresponding Regulations on behalf of the Province of Ontario.

ESA is a not-for-profit corporation under the direction and control of a Board of Directors and is accountable to the Ministry of Government and Consumer Services in accordance with an Administrative Agreement.

SCHEDULE B: TARIFFS OF RATES AND CHARGES DECISION AND RATE ORDER RENFREW HYDRO INC. EB-2016-0166 FEBRUARY 9, 2017

Effective and Implementation Date January 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0166

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Service Charge	\$	17.30
Rate Rider for Smart Metering Entity Charge - effective until October 31, 2018	\$	0.79

Class C (a) account-holders with a household income of \$28,000 or less living in a household of four persons; (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons; (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more person but does not include account-holders in Class G.	ns;	
OESP Credit	\$	(38.00)
Class D (a) account-holders with a household income of \$28,000 or less living in a household of five persons; and (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons; but does not include account-holders in Class H.	,	
OESP Credit	\$	(42.00)

Effective and Implementation Date January 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0166

ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

Class E

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit

\$ (45.00)

Class F

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or
- (c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:
 - i. the dwelling to which the account relates is heated primarily by electricity;
 - ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or
 - iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates

OESP Credit

\$ (50.00)

Class G

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit

\$ (55.00)

Class H

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit

(60.00)

Class I

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

EB-2016-0166

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2016-0166

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.
