List of Attachments

- A. CNPI 2017 Proposed Tariff of Rates and Charges
- B. Calculation of Rate Riders for Recovery of Foregone Revenue
- C. CNPI 2017 Revenue Requirement Work Form
- D. Partial Settlement Proposal

As a result of the OEB's Decision, CNPI has revised a number of Excel models in support of this Draft Rate Order. These models have been filed through the OEB's e-filing service and include:

- a) 2017 Revenue Requirement Work Form
- b) 2017 Cost Allocation
- c) 2017 Income Tax PILS Work Form
- d) 2017 Chapter 2 Appendices¹
- e) 2017 Tariff Schedule and Bill Impact Model (1 for each service territory)
- f) 2017 Tariff (Harmonized)
- g) 2017 Foregone Revenue Calculations

The models listed below do not require changes as a result of the Settlement Proposal or the OEB's Decision, and therefore have not been revised. The most current versions of these models were filed in conjunction with Interrogatory Responses, or in conjunction with Technical Conference Undertakings, as required:

- a) 2017 Load Forecast Model Wholesale
- b) 2017 EDDVAR Continuity Schedule
- c) 2017 RTSR Model
- d) LRAMVA Model & Burman Report

¹ Only Tabs 2-JA, 2-JB, 2-JC and 2-L have been updated.

Canadian Niagara Power Inc. EB-2016-0061 Draft Rate Order Page 4 of 20 Filed: March 16, 2017

Introduction

Canadian Niagara Power Inc. (the "Applicant" or "CNPI") filed a Cost of Service application with the Ontario Energy Board (the "OEB") on April 29, 2016 under section 78 of the Ontario Energy Board Act, 1998, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that CNPI charges for electricity distribution, to be effective January 1, 2017 (OEB file number EB-2016-0061) (the "Application").

The OEB issued a Letter of Direction and Notice of Application on August 17, 2016. In Procedural Order No. 1, dated September 16, 2016, the OEB approved VECC, Energy Probe, and SEC for intervenor status as well as prescribing dates for the following: written interrogatories from OEB staff, VECC, Energy Probe, and SEC; CNPI's responses to interrogatories; a Technical Conference and a Settlement Conference; and various other elements in the proceeding.

Following the receipt of interrogatories, CNPI filed its interrogatory responses with the OEB on October 19, 2016.

On November 3, 2016, following interrogatories, OEB Staff submitted a proposed issues list as agreed to by the parties. On November 11, 2016 the OEB issued its decision on the proposed issues list, approving the list submitted by OEB staff as the final issues list (the "Issues List").

The settlement conference was convened on November 8 and 9, 2016 in accordance with the OEB's Rules of Practice and Procedure (the "Rules") and the OEB's Practice Direction on Settlement Conferences (the "Practice Direction"). Mr. Chris Haussmann acted as facilitator for the settlement conference.

CNPI and the following intervenors (the "Intervenors"), participated in the settlement conference:

- Vulnerable Energy Consumers Coalition ("VECC");
- Energy Probe Research Foundation ("EP" or "Energy Probe");
- School Energy Coalition ("SEC").

CNPI and the Intervenors are collectively referred to below as the "Parties".

Ontario Energy Board staff ("OEB staff") also participated in the settlement conference. The role adopted by OEB staff is set out on page 5 of the Practice Direction.

On January 5, 2017, the OEB accepted the partial settlement proposal (the "Settlement Proposal", see Attachment D). The following issues were not settled:

Canadian Niagara Power Inc. EB-2016-0061 Draft Rate Order Page 5 of 20 Filed: March 16, 2017

- Issue 1.2 Operations, Maintenance & Administrative Expenses (OM&A).
- Issue 2.1.1 Cost of Capital, whether and how possible changes in the cost of long-term debt in 2018 should be reflected in rates.
- Issue 4.1 Accounting Standards and related areas, the appropriate accounting for Pension and OPEB costs in rates (cash vs. accrual).
- Issue 4.2 Deferral and Variance Accounts, whether a variance account related to pension and OPEB costs and a variance account for future changes to the cost of long-term debt are appropriate.
- Issue 4.2.1 Effective Date, the issue of whether or not rates should be effective January 1, 2017.

Decision and Order

In its Decision and Order issued on March 9, 2017 (the "Decision"), the OEB found that:

- it is appropriate for Canadian Niagara Power to continue to account for Pensions and OPEBs using the accrual method pending the outcome of the OEB policy consultation;
- the OEB will not require Canadian Niagara Power to maintain a variance account for the differences in cash and accrual accounting methodologies;
- the OEB will not require Canadian Niagara Power to adjust its long term debt rate should it change in 2018;
- the OEB will approve an OM&A budget for 2017 of \$10.017 million; and
- the effective date of Canadian Niagara Power's rate order will be January 1, 2017.

This Draft Rate Order and the proposed Tariff of Rates and Charges (Attachment A) reflects the OEB's findings in its Decision and Order issued on March 9, 2017. Detailed supporting material, including all relevant calculations showing the impact of the March 9, 2017 Decision and Order on CNPI's revenue requirement; the determination of the final rates; and customer rate impacts are provided in the commentary and Attachments which follow.

Canadian Niagara Power Inc. EB-2016-0061 Draft Rate Order Page 6 of 20 Filed: March 16, 2017

Summary

The Decision approved an OM&A budget for 2017 of \$10.017 million, which represents a reduction of \$557,723 from CNPI's proposed 2017 OM&A budget of \$10,574,723. For the purpose of updating the relevant OEB models and determining final rates for 2017, CNPI has reflected this reduction in the category of General and Administrative expenses. CNPI notes that its actual OM&A reductions will likely be achieved across a variety of accounts and cost categories, however any allocation between categories and accounts at this point in time would be arbitrary. Any changes to cost allocation and final rate design resulting from any arbitrary allocation of the OM&A reduction would be immaterial, and reflecting the reduction in a single account/category allows efficient verification of all changes made to the OEB's Excel models filed in conjunction with this Draft Rate Order.

The OM&A reduction of \$557,723 has also been reflected as an identical decrease in working capital, and a corresponding decrease in rate base of \$41,829, resulting from the decrease in working capital, times the working capital allowance rate of 7.5%.

CNPI anticipates a May 1, 2017 implementation date for the rates proposed in this Draft Rate Order. In order to reflect the OEB's approval of a January 1, 2017 effective date, CNPI has calculated rate riders to recover the foregone revenue from the period of January 1, 2017 to April 30, 2017. These rate riders are proposed to be effective from May 1, 2017 to December 31, 2017. The calculation of these rate riders is described herein, and CNPI has filed a live Excel model consistent with the calculations shown in Attachment B.

The OEB's findings with respect to accounting for Pensions and OPEBs and with respect to the treatment of the cost of long-term debt are consistent with CNPI's Application and required no further adjustment.

Revenue Requirement

A Revenue Requirement Work Form, incorporating all changes required to reflect the Decision is filed with this Draft Rate Order.

CNPI has provided the following Table 1 highlighting the changes to its Cost of Capital, Rate Base and Capital Expenditures, Operating Expenses and Revenue Requirement from CNPI's Application through to the Decision. The items summarized in Table 1 are described in more detail in the following sections.

Canadian Niagara Power Inc. EB-2016-0061 Draft Rate Order Page 7 of 20 Filed: March 16, 2017

Table 1: Revenue Requirement

	Description	Application (A)	IR/TC Responses (B)	Settlement (C)	Decision (D)	Variance (E) = (D) - (C)

Bill Impacts

Table 2 below illustrates the updated Bill Impacts based on the all changes made to reflect the Decision. The impact of rate riders for foregone revenue is included in the bill impacts. CNPI has filed a live Excel version of the OEB's Tariff Schedule and Bill Impact Model for each of its service territories in conjunction with this Draft Rate Order. The bill impacts vary slightly as a result of rate riders that were not previously harmonized. With the harmonization of rate riders across all service areas accepted in the Settlement Proposal, a single Tariff is now applicable to all on CNPI's service areas.

Planning

Capital

The Settlement Proposal accepted CNPI's proposed 2017 capital expenditures, as summarized in Table 3 below, as appropriate.

Table 3: 2017 Gross Capital Expenditures

Category	Application	IR/TC Responses	Settlement	Decision
System Access	908,897	908,897	908,897	908,897
System Renewal	4,990,817	4,990,817	4,990,817	4,990,817
System Service	1,841,678	1,841,678	1,841,678	1,841,678
General Plant	2,015,766	2,015,766	2,015,766	2,015,766
Total Expenditure	9,757,158	9,757,158	9,757,158	9,757,158

OM&A

The Decision approved an OM&A budget for 2017 of \$10.017 million, which represents a reduction of \$557,723 from CNPI's proposed 2017 OM&A budget of \$10,574.723. For the purpose of updating the relevant OEB models and determining final rates for 2017, CNPI has reflected this reduction in the category of General and Administrative expenses. This adjustment in shown in Table 4 below.

Table 4: 2017 Test Year OM&A Expenditures

Description	Application (A)	IR/TC Responses (B)	Decision (C)	Variance (D) = (C) - (B)
Operations	1,847,897	1,847,897	1,847,897	0

Administrative and General	4,437,601	4,467,601	3,909,878	(557,723)
Total Expenditure	10,544,723	10,574,723	10,017,000	(557,723)

Revenue Requirement

A Revenue Requirement Work Form, incorporating all changes required to reflect the Decision is filed with this Draft Rate Order, and all components of revenue requirement are summarized in Table 5 below.

All changes from the Settlement Proposal to the Decision all follow either directly or indirectly from the reduction to 2017 OM&A expenses.

Table 5: Revenue Requirement

	Description	Application (A)	IR/TC Responses (B)	Settlement (C)	Decision (D)	Variance (E) = (D) - (C)
Cost of Capital	Regulated Return on Capital	6,456,937	6,129,330	6,128,463	6,125,604	(2,859)

	Deficiency / (Sufficiency)	2,316,325	1,769,650	1,668,623	1,107,513	(561,110)

Cost of Capital

The applicable rates for debt and equity included in the Settlement Proposal are not affected by the Decision. The total amounts of interest and return on equity included in revenue requirement are however slightly reduced as a result of the decrease in 2017 OM&A expenses, flowed through to working capital and ultimately to rate base.

Table 6 below shows the overall changes in cost of capital between the Settlement Proposal and the Decision.

Table 6: Cost of Capital Calculation

		Settleme	nt Agreement		
	Debt	(%)	(\$)	(%)	(\$)
1 2 3	Long-term Debt Short-term Debt Total Debt	56.00% 4.00% 60.00%	\$50,203,913 \$3,585,994 \$53,789,907		(1) \$2,916,847 (1) \$63,113 \$2,979,961

13	Total Equity	40.00%	\$35,843,206	8.78%	\$3,147,033

Rate Base

Working capital has been reduced by \$557,723, the amount of the 2017 OM&A reduction resulting from the Decision. At a working capital allowance rate of 7.5%, this results in a reduction to rate base of \$41,829, as shown in Table 7 below.

Table 7: Rate Base

Description	Application (A)	IR/TC Responses (B)	Settlement (C)	Decision (D)	Variance (E) = (D) - (C)

Load Forecast, Cost Allocation and Rate Design

Test Year Billing Determinants and Customer Forecast

CNPI's Test Year load forecast was adjusted in response to interrogatories as shown in Table 12 below. This adjusted forecast was accepted in the Settlement Proposal. Likewise, the Test Year customer and connection counts remain as per CNPI's initial Application, and these values are also summarized in Table 12 below.

Table 12: 2017 Test Year Billing Determinants and Customer/Connection Counts

	Customers /	Applic	Application		sponses	Settlement		Decision	
Rate Class	Connections	kWh	kW	kWh	kW	kWh	kW	kWh	kW
Residential	26,074	198,077,803		201,294,289		201,294,289		201,294,289	
GS < 50	2,489	67,907,332		69,390,323		69,390,323		69,390,323	
GS > 50	217	184,944,203	593,383	190,144,345	610,067	190,144,345	610,067	190,144,345	610,067
Embedded Distributor	1	5,129,448	13,717	5,205,754	13,921	5,205,754	13,921	5,205,754	13,921
Street Light	5,713	2,781,556	8,591	2,991,556	9,240	2,991,556	9,240	2,991,556	9,240
Sentinel Light	695	629,014	1,916	629,014	1,916	629,014	1,916	629,014	1,916

Total	35,224	460,932,117	617,607	471,118,042	635,144	471,118,042	635,144	471,118,042	635,144

Loss Factors

Loss Factors remain unchanged from CNPI's initial Application and are summarized in Table 13 below.

Table 13: Test Year Loss Factors

Description	2017 Proposed
Total Loss Factor – Secondary Metered Customer <5,000kW	1.0530
Total Loss Factor – Primary Metered Customer <5,000kW	1.0425

LRAMVA Baseline

The LRAMVA baseline for 2017 was adjusted in conjunction with updates to CNPI's 2017 load forecast in response to interrogatories. The values agreed to in the Settlement Proposal are shown in Table 14 below.

Table 14: LRAMVA Baseline kWhs and kWs

	2017 kWh		LRAMVA	LRAMVA
Rate Class	Pre-CDM Adjustment	Share	Baseline kWh	Baseline kW
Residential	202,582,789	14.02%	1,648,000	
GS < 50	70,434,323	11.16%	1,312,000	
GS > 50	196,138,345	67.91%	7,981,000	25,607
Street Light	3,720,056	6.90%	811,000	2,505
Total	472,875,514	100.00%	11,752,000	28,111

Cost Allocation and Revenue to Cost Ratios

In the Settlement Proposal, Parties agreed to set the revenue to cost ratio of the newly created Embedded Distributor class to 100%, and accepted the methodology that CNPI used to determine and re-balance the ratios of all other classes in accordance with OEB policies and practices.

As a result of the Decision, the reduction of \$557,723 to 2017 OM&A expenses was reflected in the OEB's Cost Allocation Model. CNPI again set the Embedded Distributor class to 100%, and re-balanced the remaining classes, using the same methodology as previously accepted, resulting in the revenue to cost ratios shown in Table 15 below.

Table 15: Summary of 2017 Revenue to Cost Ratios

Rate Class	Application (A)	IR/TC Responses (B)	Settlement (C)	Decision (D)	Variance (E) = (D) - (C)
Residential	95.37%	94.84%	94.85%	95.06%	0.21%
GS < 50	109.22%	109.56%	109.49%	109.35%	(0.14%)
GS > 50	106.96%	108.32%	108.19%	107.60%	(0.59%)
Embedded Distributor	95.37%	94.84%	100.00%	100.00%	0.00%
Street Light	120.00%	120.00%	120.00%	120.00%	0.00%
Sentinel Light	105.08%	104.46%	104.35%	103.78%	(0.57%)
USL	95.37%	94.84%	94.85%	95.05%	0.20%

Rate Design

In the Settlement Proposal, Parties accepted that all elements of rate design had been correctly determined in accordance with OEB policies and practices. With respect to any unsettled issues, the proposed 2017 rates included in the Settlement Proposal were calculated using values from CNPI's initial Application, as adjusted in response to any interrogatories. Table 16 below shows the 2017 proposed rates resulting from the Decision, with comparison to the values included in the Settlement Proposal.

Table 16: 2017 Proposed Rates

		Settlement Proposal (A)			Decision (B)			Variance (C) = (B) - (A)					
Rate Class	Billing Determinant	Fix	xed Rate	Var	iable Rate	Fi	xed Rate	Vari	iable Rate	Fi	ixed Rate	Vari	able Rate
Residential	kWh	\$	29.45	\$	0.0112	\$	27.7200	\$	0.0122	-\$	1.7300	\$	0.0010
GS < 50	kWh	\$	30.92	\$	0.0252	\$	30.0200	\$	0.0244	-\$	0.9000	-\$	0.0008
GS > 50	kW	\$	166.12	\$	7.2864	\$	161.3100	\$	7.0854	-\$	4.8100	-\$	0.2010
Embedded Distributor	kW	\$	604.27	\$	8.3238	\$	580.4800	\$	8.1509	-\$	23.7900	-\$	0.1729
Street Light	kW	\$	3.97	\$	8.6511	\$	3.8900	\$	8.4588	-\$	0.0800	-\$	0.1923
Sentinel Light	kW	\$	5.57	\$	6.4563	\$	5.4100	\$	6.2695	-\$	0.1600	-\$	0.1868
USL	kWh	\$	48.32	\$	0.0262	\$	47.3300	\$	0.0257	-\$	0.9900	-\$	0.0005

Residential Rate Design

In the Settlement Proposal, Parties accepted that CNPI's proposal to move to a fully fixed monthly charge by 2020 is in accordance with OEB policies, subject to any adjustments that flow from the decision on unsettled issues.

As indicated in the Summary section above, the bill impacts for residential customers at the 10th percentile of consumption (i.e. 210 kWh per month) range from 6.95-9.37%, depending on the service territory and whether or not the customer is enrolled with a retailer. These bill impacts include the move to a fully fixed monthly charge over four remaining years (2017-2020), and also include the effect of rate riders for foregone revenue resulting from the difference between the effective and implementation dates of 2017 rates.

Accordingly, residential bill impacts for low volume customers remain within OEB guidelines, and the methodology agreed to in the Settlement Proposal remains appropriate.

Low Voltage Service Rates and Retail Transmission Service Rates

The calculation of Low Voltage Service Rates and Retail Transmission Service Rates were accepted in the Settlement Proposal, and were not subject to any further updates. For convenience, these rates are reproduced in Table 17 and Table 18 below.

Table 17: Low Voltage Service Rates

Rate Class	% Allocation	Charges	Volume	Rate	Determinant
Residential	42.1%	\$ 59,743.43	211,962,886	\$ 0.0003	kWh
GS < 50	12.5%	\$ 17,754.14	73,068,010	\$ 0.0002	kWh
GS > 50	43.5%	\$ 61,674.53	610,067	\$ 0.1011	kW
Embedded Distributor	1.0%	\$ 1,407.34	13,921	\$ 0.1011	kW
Street Light	0.5%	\$ 712.74	9,240	\$ 0.0771	kW

Canadian Niagara Power Inc. EB-2016-0061 Draft Rate Order Page 18 of 20 Filed: March 16, 2017

Accounting

In the Settlement Proposal, the Parties accepted the evidence of CNPI that all impacts of changes to accounting standards, policies, estimates, and adjustments had been properly identified and recorded in accordance with the OEB's policies and properly reflected in rates, with the exception of the manner in which Pension and OPEB costs have been accounted for in rates.

In its Decision, the OEB found that it is appropriate for Canadian Niagara Power to continue to account for Pensions and OPEBs using the accrual method pending the outcome of the OEB policy consultation. The OEB also decided that it will not require Canadian Niagara Power to maintain a variance account for the differences in cash and accrual accounting methodologies.

Accordingly, no changes with respect to accounting for Pensions and OPEB's are required to be incorporated in this draft rate order.

For convenience, accounting related matters affecting the rates that appear on CNPI's Tariff of Rates and Charges are summarized below.

Rate Riders (DVA and LRAMVA)

In the Settlement Proposal, Parties accepted that all elements of the applied for deferral and variance accounts are appropriate, including the balances in the existing accounts and their disposition on a harmonized basis commencing January 1, 2017 and the continuation of existing accounts.

With the Decision confirming a January 1, 2017 effective date, and CNPI's proposed implementation date of May 1, 2017, the bill impacts for low-volume, retailer enrolled, residential customers, resulted in bill impacts exceeding 10% if the rate riders were adjusted to an 8 month recovery period. As a result, CNPI proposes to extend recovery of DVA and LRAM rate riders to December 31, 2018 (i.e. 20 months), and has recalculated these riders in Table 19 below.

Similarly, the fixed rate riders related to stranded and MIST meter recovery for the GS>50 class will now be effective for 56 rather than 60 months, and have been recalculated appropriately.

Table 19: DVA and LRAMVA Rate Riders

		Disposition of DVA's (2017) & MIST/Stranded Meters					
Rate Class	Billing Determinant		\$/kWh	\$/kW		\$/month/customer

GS > 50	kW			\$	0.1012	

Effective and Implementation Dates and Rate Riders for Foregone Revenue

In its Decision dated March 9, 2017, the OEB found that that the effective date of Canadian Niagara Power's rate order will be January 1, 2017. Given the timelines set out for comments and responses, CNPI anticipates a May 1, 2017 implementation date for the rates proposed in this Draft Rate Order. In order to reflect the OEB's approval of a January 1, 2017 effective date, CNPI has calculated rate riders to recover the foregone revenue from the period of January 1, 2017 to April 30, 2017. These rate riders are proposed to be effective from May 1, 2017 to December 31, 2017.

CNPI has calculated both fixed and variable rate riders to recover the foregone revenue, consistent with its 2017 Test Year load forecast and customer/connection counts. These calculations are provided in Attachment B, and CNPI has also filed a live Excel model in support of these calculations.

RESIDENTIAL SERVICE CLASSIFICATION

The Residential Class (Regular) refers to a service taking electricity normally at 750 volts or less where the electricity is used for domestic and household purposes in a single family unit. A single family unit being a permanent structure located on a single parcel of land and approved by a civic authority as a dwelling and occupied for that purpose by a single customer. Residential rates are also applied to apartment buildings with 6 units or less that are bulk metered. Apartment buildings with more than 6 units that are bulk metered are deemed to be General Service. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

Service Charge	\$	27.72
Rate Rider for Smart Meter Entity Charge - effective until October 31, 2018	\$	0.79
Rate Rider for Disposition of Group 2 Accounts (2017) – effective until December 31, 2018	\$	(0.09)

Standard Supply Service - Administrative Charge (if applicable)	\$	0.25

Effective Date January 1, 2017 Implementation Date May 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0061

ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

In addition to the charges specified on Residential Classification pages of this tariff of rates and charges, the following credits are to be applied to eliqible residential customers.

APPLICATION

The application of the charges are in accordance with the Distribution System Code (Section 9) and subsection 79.2(4) of the Ontario Energy Board Act. 1998.

The application of these charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

- "Aboriginal person" includes a person who is a First Nations person, a Métis person or an Inuit person;
- "account-holder" means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year:
- "electricity-intensive medical device" means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;
- "household" means the account-holder and any other people living at the accountholder's service address for at least six months in a year, including people other than the account-holder's spouse, children or other relatives;
- "household income" means the combined annual after-tax income of all members of a household aged 16 or over;

MONTHLY RATES AND CHARGES

Class A

- (a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;
- (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons; and
- (d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons; but does not include account-holders in Class E.

OESP Credit \$ (30.00)

Class B

- (a) account-holders with a household income of \$28,000 or less living in a household of three persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of four persons;
- (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of six persons;

but does not include account-holders in Class F.

OESP Credit \$ (34.00)

Class C

- (a) account-holders with a household income of \$28,000 or less living in a household of four persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons;
- (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more persons;

but does not include account-holders in Class G.

OESP Credit \$ (38.00)

Class D

- (a) account-holders with a household income of \$28,000 or less living in a household of five persons; and
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;

but does not include account-holders in Class H.

OESP Credit \$ (42.00)

Class E

Effective Date January 1, 2017 Implementation Date May 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0061

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (45.00)

Class F

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or
- (c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:
 - i. the dwelling to which the account relates is heated primarily by electricity;
 - ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or
 - iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates

OESP Credit \$ (50.00)

Class G

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (55.00)

Class H

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

Class I

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (75.00)

Effective Date January 1, 2017 Implementation Date May 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0061

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) less than 50 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer. An apartment building with more than 6 units that is bulk metered and has an average peak demand less than 50 kW is deemed to be General Service less than 50 kW. The common area of a separately metered apartment building having a demand less than 50 kW is also deemed to be General Service less than 50 kW. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

EB-2016-0061

GENERAL SERVICE 50 TO 4.999 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to single commercial or industrial customer and whose average peak demand is (or is forecasted to be) equal to or greater than 50 kW but less than 5000 kW. Single commercial or industrial customers are interpreted as a structure or structures on a single parcel of land occupied by one customer. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0061

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to the supply of electrical service to a customer that is deemed to have a constant load over a billing period, normally with minimum electrical consumption and the consumption is unmetered. Energy consumption is based on connected wattage and calculated hours of use. Examples of unmetered scattered load are cable television amplifiers, billOntario Energy Boards, area lighting. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

Effective Date January 1, 2017 Implementation Date May 1, 2017

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0061

STANDBY POWER SERVICE CLASSIFICATION

The Standby subclass charge is applied to a customer with load displacement facilities behind its meter but is dependent on Canadian Niagara Power Inc. to supply a minimum amount of electricity in the event the customer's own facilities are out of service. The minimum amount of supply that Canadian Niagara Power Inc. must supply is a contracted amount agreed upon between the customer and Canadian Niagara Power Inc. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment, and the HST.

MONTHLY RATES AND CHARGES - APPROVED ON AN INTERIM BASIS

Standby Charge – for a month where standby power is not provided. The charge is applied to the contracted amount (e.g. nameplate rating of generation facility)

\$/kW

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing the application or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.

While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the results.

Notes:

Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- Net of addbacks and deductions to arrive at taxable income
- Average of Gross Fixed Assets at beginning and end of the Test Year
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.

 Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- 4.0% unless an Applicant has proposed or been approved for another amount.
- The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.
- (10) See 2-Energy Probe-5. Reduction in 2016 capitalized expenditures of \$483k and corresponding depreciation expense and CCA adjustments.
- (11) See 1-Staff-17. Increase relates to \$30k Letter of Credit fees; -\$169k WCA adjustment for vehicle depreciation included in OM&A per Settlement. (12) COP adjustment based 3.0-VECC-18 (load forecast and other price updates)
- (13) +\$30k per 3.0-VECC-23 (Interest and Dividend Income); Offset \$6k adjustment related to JTC 1.3 (OEB 4375 revenue decrease); +\$100k per Settlement
- (14) Adjustment based on load forecast update as per 3.0-VECC-18.(15) Decrease in total revenue required at proposed rates resulting from the net impact of all adjustments required based on IR and TC responses and partial settlement.
- (16) JTC 1.1. Cost of capital update per OEB release on Oct 27, 2016.
- (17) Adjustment per Decision and Order; Note that amounts referenced in Decision are totals of Rows 36 and 38 (OM&A Expenses and Property Taxes)

Notes

(1) Line 11 - Line 8

Percentage Change Relative to Initial Application

- (3) See 1-Staff-17. Increase relates to \$30k Letter of Credit fees.
- (4) See 2-Energy Probe-5. Reduction in 2016 capitalized expenditures of \$483k and corresponding depreciation expense adjustments.
- (5) Changes are due to cumulative impact of all adjustments required based on IR and TC responses and partial settlement. See Tab 14 for (6) \$30k adjustment based on 3.0-VECC-23. Increase relates to Interest and Dividend Income. Offset \$6k adjustment related to JTC 1.3.
- (6) \$30k adjustment based on 3.0-VECC-23. Increase relates to Interest and Dividend Income. Offset \$6k adjustment related to JTC 1.3. +\$100k per Settlement
- (7) Adjustment per Decision and Order

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

Stage in Process:

Per Board Decision

	Customer Class
	Input the name of each customer class.

Total 460,932,117

Notes:

(1) Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Per Board Decision

A) Allocated Costs

Name of Customer Class (3)		Allocated from vious Study (1)	%	 llocated Class nue Requirement	%
From Sheet 10. Load Forecast				(1) (7A)	
Residential	\$	11,876,815	62.62%	\$ 13,474,424	63.00%
GS < 50	\$ \$	2,376,032	12.53%	\$ 2,652,019	12.40%
GS > 50	\$	4,090,319	21.57%	\$ 4,684,181	21.90%
Embedded Distributor				\$ 132,000	0.62%
Street Light	\$ \$	503,635	2.66%	\$ 316,701	1.48%
Sentinel Light	\$	82,426	0.43%	\$ 61,500	0.29%
USL	\$	36,954	0.19%	\$ 67,846	0.32%
Total	\$	18,966,181	100.00%	\$ 21,388,671	100.00%
			Service Revenue Requirement (from Sheet 9)	\$ 21,388,669.32	

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

Name of Customer Class	current approved approved rates X rates (1+d)		LF X Proposed Rates		Miscellaneous Revenues		
		(7B)	(7C)		(7D)		(7E)
Residential	\$	10,393,768	\$ 11,042,911	\$	11,131,084	\$	1,677,078
GS < 50	\$	2,440,047	\$ 2,592,440	\$	2,592,440	\$	307,463
GS > 50	\$	4,270,634	\$ 4,537,356	\$	4,537,356	\$	502,892
Embedded Distributor	\$	94,935	\$ 100,865	\$	120,434	\$	11,565
Street Light	\$	439,797	\$ 467,265	\$	344,571	\$	35,470
Sentinel Light	\$	53,757	\$ 57,114	\$	57,114	\$	6,711
USL 3 9 9 9 9	\$	40,027	\$ 42,526	\$	57,477	\$	7,013
Total	\$	17,732,965	\$ 18,840,478	\$	18,840,478	\$	2,548,193

⁽⁴⁾ In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

⁽⁵⁾ Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

⁽⁶⁾ Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

⁽⁷⁾ Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2016 %	%	%	%
Residential	91.42%	94.40%	95.06%	85 - 115
GS < 50	109.34%	109.35%	109.35%	80 - 120
GS > 50	119.94%	107.60%	107.60%	80 - 120
Embedded Distributor		85.17%	100.00%	
Street Light	96.28%	158.74%	120.00%	80 - 120
Sentinel Light	91.42%	103.78%	103.78%	80 - 120
USL	120.00%	73.02%	95.05%	80 - 120

⁽⁸⁾ Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

 ⁽⁹⁾ Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".
 (10) Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

(D) Proposed Revenue-to-Cost Ratios (11)

Name of Customer Class	Propos	ed Revenue-to-Cost Ratio		Policy Range
	Test Year	Test Year Price Cap IR Period		
	2017	2018	2019	
Residential	95.06%	95.06%	95.06%	85 - 115
GS < 50	109.35%	109.35%	109.35%	80 - 120
GS > 50	107.60%	107.60%	107.60%	80 - 120
Embedded Distributor	100.00%	100.00%	100.00%	
Street Light	120.00%	120.00%	120.00%	80 - 120
Sentinel Light	103.78%	103.78%	103.78%	80 - 120
USL	95.05%	95.05%	95.05%	80 - 120

⁽¹¹⁾ The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2017 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2018 and 2019 Price Cap IR models, as necessary. For 2018 and 2019, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2017 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

New Rate Design Policy For Residential Customers

Please complete the following tables.

A Data Inputs (from Sheet 10. Load Forecast)

Test Year Billing Determinants for Residential Class					
Customers	26,074				
kWh	201,294,289				

Proposed Residential Class Specific	\$ 11,131,083.96
Revenue Requirement ¹	

Residential Base Rates on Current Tariff					
Monthly Fixed Charge (\$)	\$	23.44			
Distribution Volumetric Rate (\$/kWh)	\$	0.0152			

B Current Fixed/Variable Split

	Base Rates	Billing Determinants	Revenue	% of Total Revenue
Fixed	23.44	26,074	\$ 7,334,094.72	70.56%
Variable	0.0152	201,294,289	\$ 3,059,673.19	29.44%
TOTAL	-	-	\$ 10,393,767.91	-

C Calculating Test Year Base Rates

Number of Remaining Rate Design Policy	
Transition Years ²	4

	ear Revenue @ rent F/V Split	Test Year Base Rates @ Current F/V Split	Reconciliation - Test Year Base Rates @ Current F/V Split
--	---------------------------------	---	---

Fixed	\$ 7,854,362.80	25.1	\$ 7,853,488.80
Variable	\$ 3,276,721.15	0.0163	\$ 3,281,096.91
TOTAL	\$ 11,131,083.96	-	\$ 11,134,585.71

	New F/V Split	Revenue @ new F/V Split	Final Adjusted Base Rates	Revenue Reconciliation @ Adjusted Rates
Fixed	77.92%	\$ 8,673,543.09	\$ 27.72	\$ 8,673,255.36
Variable	22.08%	\$ 2,457,540.87	\$ 0.0122	\$ 2,455,790.33
TOTAL	-	\$ 11,131,083.96	-	\$ 11,129,045.69

Checks ³									
Change in Fixed Rate	\$	2.62							
Difference Between Revenues @		(\$2,038.27)							
Proposed Rates and Class Specific		-0.02%							

Notes:

- The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. A distributor transitioning to fully fixed rates over a four year period and began the transition in 2016 would input the number "3" into cell D40. A distributor transitioning over a five-year period would input the number "4". Where the change in the residential rate design will result in the fixed charge increasing by more than \$4/year, a distributor may propose an additional transition year.
- 3 Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluentric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

No	es:															Rates recover re	evenue requ	uirement	Base Revenue Requ	irement	\$18,840,476.32
1	Transformer Ownership Allowance is a	entered as a positive a	amount, and only for	those classes to w	hich it applies.														Difference % Difference		-\$ 4,456.52 -0.024%

Transformer Ownership Allowance is entered as a positive amount, and only for those classes to which it applies.

The Fixed/Variable split, for each customer class, drives the "tate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

(2) Short description of change, issue, etc.

LIST OF ATTACHMENTS

- A. Revenue Requirement Workform
- B. 2016 and 2017 Fixed Asset Continuity Schedule

Note:

Canadian Niagara Power Inc. has filed revised models as evidence to support this Settlement Proposal. The models have been filed through the OEB's e-filing service and include:

- a) Filing Requirements Chapter 2 Appendices
- b) 2017 Revenue Requirement Workform
- c) 2017 Test Year Income Tax PILs Model
- d) 2017 Cost Allocation Model

The models listed below do not require changes as a result of this Settlement Proposal, and therefore have not been revised. The most current versions of these models have been filed in conjunction with Interrogatory Responses, or in conjunction with Technical Conference Undertakings, as required:

- a) 2017 Load Forecast Model Wholesale
- b) 2017 EDDVAR Continuity Schedule
- c) 2017 RTSR Model
- d) LRAMVA Model & Burman Report

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 4 of 49 Filed: December 1, 2016

SETTLEMENT PROPOSAL

Canadian Niagara Power Inc. (the "Applicant" or "CNPI") filed a Cost of Service application with the Ontario Energy Board (the "OEB") on April 29, 2016 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that CNPI charges for electricity distribution, to be effective January 1, 2017 (OEB file number EB-2016-0061) (the "Application").

The OEB issued a Letter of Direction and Notice of Application on August 17, 2016. In Procedural Order No. 1, dated September 16, 2016, the OEB approved VECC, Energy Probe, and SEC for intervenor status as well as prescribing dates for the following: written interrogatories from OEB staff, VECC, Energy Probe, and SEC; CNPI's responses to interrogatories; a Technical Conference and a Settlement Conference; and various other elements in the proceeding.

Following the receipt of interrogatories, CNPI filed its interrogatory responses with the OEB on October 19, 2016.

On November 3, 2016, following interrogatories, OEB Staff submitted a proposed issues list as agreed to by the parties. On November 11, 2016 the OEB issued its decision on the proposed issues list, approving the list submitted by OEB staff as the final issues list (the "Issues List").

The settlement conference was convened on November 8 and 9, 2016 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's Practice Direction on Settlement Conferences (the "Practice Direction"). Mr. Chris Haussmann acted as facilitator for the settlement conference.

CNPI and the following intervenors (the "Intervenors"), participated in the settlement conference:

- Vulnerable Energy Consumers Coalition ("VECC");
- Energy Probe Research Foundation ("EP" or "Energy Probe");
- School Energy Coalition ("SEC").

CNPI and the Intervenors are collectively referred to below as the "Parties".

Ontario Energy Board staff ("OEB staff") also participated in the settlement conference. The role adopted by OEB staff is set out on page 5 of the Practice Direction. Although OEB staff is not a party to this Settlement Proposal, as noted in the Practice Direction, OEB staff who did participate in the settlement conference are bound by the same confidentiality and privilege rules that apply to the Parties to the proceeding.

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 5 of 49 Filed: December 1, 2016

This document is called a "Settlement Proposal" as this is a proposal by the Parties presented to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

These settlement proceedings are subject to the rules relating to confidentiality and privilege contained in the Practice Direction. The Parties acknowledge that this settlement proceeding is confidential in accordance with the OEB's Practice Direction on settlement conferences. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's Practice Direction on Confidential Filings, and the rules of that latter document do not apply. Instead, in this settlement conference, and in this Settlement Proposal, the specific rules with respect to confidentiality and privilege set out in the Practice Direction on Settlement Conferences, as amended on October 28, 2016. Parties have interpreted the revised Practice Direction to mean that the documents and other information provided during the course of the settlement proceeding, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement – or not – of each issue during the settlement conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the settlement conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not physically in attendance at the settlement conference but were a) any persons or entities that the Parties engage to assist them with the settlement conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled and partially settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include a) additional information included by the Parties in this Settlement Proposal, and b) the Appendices to this document. The supporting Parties for each settled and partially settled issue, as applicable, agree that the evidence in respect of that settled or partially settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal. The Parties agree that references to the evidence in this Settlement Proposal shall, unless the context otherwise requires, include, in addition to the Application, the responses to interrogatories, responses to clarification

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 6 of 49 Filed: December 1, 2016

questions and undertakings, and all other components of the record up to and including the date hereof, including additional information included by the Parties in this Settlement Proposal and the Attachments to this document.

Included with the Settlement Proposal are Attachments that provide further support for the proposed settlement. The Parties acknowledge that the Attachments were prepared by CNPI. While the Intervenors have reviewed the Attachments, the Intervenors are relying on the accuracy of the Attachments and the underlying evidence in entering into this Settlement Proposal.

For ease of reference, this Settlement Proposal follows the format of the final Approved Issues List.

The Parties have reached a full settlement with respect to many of the issues in this proceeding, with only the following 5 discrete issues going to hearing:

- Issue 1.2 OM&A, no settlement, full issue to hearing.
- Issue 2.1.1 Cost of Capital, partial settlement, the issue of whether and how expected changes in the cost of long-term debt in 2018 should be reflected in rates will go to hearing.
- Issue 4.1 Accounting Standards etc., partial settlement, the discrete issue of the appropriate accounting for Pension and OPEB costs in rates (cash vs. accrual) will go to hearing.
- Issue 4.2 Deferral and Variance Accounts, partial settlement, the issue of whether a variance
 account related to pension and OPEBs is appropriate will go to hearing, and the issue of whether a
 variance account should be established for future changes to the cost of long-term debt will go to
 hearing.
- Issue 4.2.1 Effective Date, no settlement, the issue of whether rates should be effective January 1, 2017 will go to hearing.

According to the Practice Direction (p.4), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. These adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB does not accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept.

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 7 of 49 Filed: December 1, 2016

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all of the Parties must agree with any revised Settlement Proposal as it relates to that issue, or take no position, prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of the Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not CNPI is a party to such proceeding, provided that no Party shall take a position that would result in the Agreement not applying in accordance with the terms contained herein.

Where in this Agreement, the Parties "Accept" the evidence of CNPI, or "agree" to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 8 of 49 Filed: December 1, 2016

SUMMARY

In reaching this Settlement, the Parties have been guided by the Filing Requirements for 2017 rates and the Approved Issues List.

This Settlement Proposal reflects a partial settlement of the issues in the proceeding. The Parties have described below, in detail, areas where they have either settled an issue by agreeing to adjustments to the application as updated, and highlighted areas where one, some, or all aspects of an issue will be subject to a hearing by the Board.

For ease of reference, the following list contains all of the issues that will proceed to hearing if the Board accepts this Settlement Proposal:

- Issue 1.2 OM&A, no settlement, full issue to hearing.
- Issue 2.1.1 Cost of Capital, partial settlement, the issue of whether and how expected changes in the cost of long-term debt should be reflected in rates will go to hearing.
- Issue 4.1 Accounting Standards etc., partial settlement, the discrete issue of the appropriate
 accounting for Pension and OPEB costs in rates (cash vs. accrual) will go to hearing and the issue
 of whether a variance account should be established for future changes to the cost of long-term
 debt will go to hearing.
- Issue 4.2 Deferral and Variance Accounts, partial settlement, the issue of whether a variance account related to pension and OPEBs is appropriate will go to hearing.
- Issue 4.2.1 Effective Date, no settlement. The issue of whether rates should be effective January 1, 2017 will go to hearing.

Various other issues are fully settled in principle, but their final determination in support of rates depends in part on one or more of the issues that will go to hearing. Accordingly, while the Parties have noted those "consequential" issues as settled, the final calculations for such issues cannot be provided until the issues that are going to hearing are decided by the Board.

The Parties note that this settlement proposal includes all tables, appendices and the live Excel models that represent the evidence and the settlement between the Parties at the time of filing the settlement proposal. Some of this evidence may need to be updated subject to the OEB's determination of the unsettled issues.

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 9 of 49 Filed: December 1, 2016

A Revenue Requirement Work Form, incorporating all terms that have been agreed to in this Proposal is filed with the Settlement Proposal. Through the settlement process, CNPI has agreed to certain adjustments to its original 2016 Application. The changes are described in the following sections.

CNPI has provided the following Table 1 highlighting the changes to its Rate Base and Capital, Operating Expenses and Revenue Requirement from CNPI's Application as filed as a result of interrogatories, technical conference questions and this Settlement Proposal. This Table, together with that of Table 2, and the other relevant Tables herein, does not reflect any further changes to the Application for the issues not settled and yet to be determined by the OEB.

Table 1: Revenue Requirement

	Description	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)	Settlement (D)	Variance (E) = (D) - (B)

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 11 of 49 Filed: December 1, 2016

RRFE OUTCOMES

The Parties accept the Applicant's compliance with the Board's required outcomes as defined by the Renewed Regulatory Framework for Electricity (RRFE). For the purpose of the settlement of the issues in this proceeding, and subject to the adjustments noted in this Settlement Proposal, the Parties accept that CNPI's proposed rates in the 2017 Test Year will, in all reasonably foreseeable circumstances, allow the Applicant to meet its obligations to its customers while maintaining its financial viability.

1 PLANNING

1.1 Capital

Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to:

- Customer feedback and preferences;
- Productivity;
- Compatibility with historical expenditures;
- Compatibility with applicable benchmarks;
- Reliability and service quality;
- Impact on distribution rates;
- Trade-offs with OM&A spending;
- Government-mandated obligations; and
- The objectives of Canadian Niagara Power and its customers.

Complete Settlement

The Parties accept the 2017 capital expenditures as appropriate.

The Parties note that the sub-issues relating to "Productivity" and "Trade-offs with OM&A spending", while settled in relation to the proposed Capital Plan, remain unsettled to the extent that they relate to the appropriateness of the proposed OM&A budget under unsettled issue 1.2 "OM&A".

A summary of gross capital expenditures is presented in Table 3 below.

Table 3: 2017 Gross Capital Expenditures

Category	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)	Settlement (D)	Variance (E) = (D) - (B)
System Access	908,897	908,897	0	908,897	0
System Renewal	4,990,817	4,990,817	0	4,990,817	0
System Service	1,841,678	1,841,678	0	1,841,678	0
General Plant	2,015,766	2,015,766	0	2,015,766	0
Total Expenditure	9,757,158	9,757,158	0	9,757,158	0

For the purposes of settlement of all the issues in this proceeding, the Parties accept the evidence of CNPI that the level of planned capital expenditures and the rationale for planning and pacing choices are

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 13 of 49 Filed: December 1, 2016

appropriate in order to maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system.

ΑII

1.2 OM&A

Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:

- Customer feedback and preferences;
- Productivity;
- Compatibility with historical expenditures;
- Compatibility with applicable benchmarks;
- Reliability and service quality;
- Impact on distribution rates;
- Trade-offs with capital spending;
- Government-mandated obligations; and
- The objectives of Canadian Niagara Power and its customers.

No Settlement

The issue of OM&A is not settled and will proceed to hearing.

A summary of the OM&A expenditures, adjusted for IR responses and answers given at the technical conference is presented in Table 4 below for the purposes of the hearing of this issue.

The parties specifically note that one aspect of the unsettled OM&A issue relates to the accounting treatment for Pension and OPEB costs in rates, including the possibility of a new variance account related to Pension and OPEB costs; accordingly the related issues 4.1 and 4.2 remain unsettled in recognition of the Pension and OPEB cost issue, described in more detail under those issues.

Table 4: 2017 Test Year OM&A Expenditures

Description	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)
Operations	1,847,897	1,847,897	0
Maintenance	2,259,049	2,259,049	0

2 REVENUE REQUIREMENT

Are all elements of the Revenue Requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?

Complete Settlement

This issue is settled to the extent that the parties agree that the methodology used by CNPI to calculate the Revenue Requirement is appropriate. However, as that calculation relies on inputs from issues that remain outstanding, the final calculation cannot be performed until the incorporation of the results of the Board's decision on unsettled issues.

A summary of the adjusted Revenue Requirement reflecting adjustments and settled issues in accordance with the above is presented in Table 5 below.

Table 5: Revenue Requirement

	Description	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)	Settlement (D)	Variance (E) = (D) - (B)
Cost of Capital	Regulated Return on Capital	6,456,937	6,129,330	(327,608)	6,128,463	(866)
Cost of Capital	Regulated Rate of Return	7.18%	6.84%	-0.34%	6.84%	0.00%

2.1.1 Cost of Capital

Partial Settlement

The Parties agree to CNPI's proposed cost of capital parameters as updated to reflect the Board's deemed cost of capital parameters for the 2017 test year. The parties note that any changes to the cost of capital calculations that result from the Board's decision on unsettled issues will be recognized in an update to these calculations.

The parties have not agreed on whether it is appropriate to recognize and if so how to recognize in revenue requirement or rates any differential between the Applicant's cost of long term debt and current market rates for long term debt, or any change in the cost of long-term debt in 2018.

Table 6 below details the cost of capital calculation.

Table 6: Cost of Capital Calculation

	Initial A	pplication			
	(%)	(\$)	(%)		(\$)

Complete Settlement

The Parties accept the evidence of CNPI that the rate base calculations, after making the adjustment to the working capital rate base as detailed in this Settlement Proposal, is reasonable and have been appropriately determined in accordance with OEB policies and practices. Table 7 below outlines CNPI's Rate Base calculation. However as there are unsettled issues that impact the final Rate Base calculation, the issue remains unsettled until unsettled issues that are proceeding to hearing are resolved.

Table 7: Rate Base

Description	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)	Settlement (D)	Variance (E) = (D) - (B)
Gross Fixed Assets (Average)	147,209,031	146,726,031	(483,000)	146,726,031	0
Accumulated Depreciation (Average)	(62,743,580)	(62,702,246)	41,334	(62,702,246)	0
Net Fixed Assets (Average)	84,465,451	84,023,785	(441,666)	84,023,785	0
Working Capital Base	72,787,072	75,183,128	2,396,056	75,014,128	(169,000)
Working Capital Allowance (%)	7.5%	7.5%	0.0%	7.5%	0
Allowance for Working Capital	5,459,030	5,638,735	179,704	5,626,060	(12,675)
Total Rate Base	89,924,481	89,662,520	(261,962)	89,649,845	(12,675)

Note - Placeholder values used for the following unsettled items:

Working Capital Base (Settled with exception of OM&A component)

Allowance for Working Capital (Settled with exception of OM&A impact on Working Capital Base)

Total Rate Base (calculation includes both settled and placeholder values)

2.1.3 Working Capital Allowance

Complete Settlement

The Working Capital Allowance base has been updated to reflect the agreed upon updates to:

• The removal of amounts related to vehicle depreciation from the OM&A component of the calculation.

The Parties accepted the revised Working Capital Allowance amount incorporating the changes noted above. Table 8 below illustrates the calculation of the Working Capital Allowance, subject to any adjustments for components of the Working Capital Allowance calculation that are proceeding to hearing.

Table 8: Working Capital Allowance Calculation

Description	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)	Settlement (D)	Variance (E) = (D) - (B)
Operations	1,847,897	1,847,897	0	1,847,897	0
Maintenance	2,259,049	2,259,049	0	2,259,049	0

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 27 of 49 Filed: December 1, 2016

2.2 Has the revenue requirement been accurately determined based on these elements?

Complete Settlement

The Parties accept the evidence of CNPI that the proposed Base Revenue Requirement has been determined accurately, such that any changes to the components that make up the Base Revenue Requirement as a result of a Board Decision can be properly incorporated into an accurate redetermination of the Base Revenue Requirement.

3 LOAD FORECAST, COST ALLOCATION AND RATE DESIGN

3.1 Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of Canadian Niagara Power's customers?

Complete Settlement

The Parties accept the evidence of CNPI and its methodology used for the load forecast, customer forecast, loss factors and CDM adjustments, based on the updates resulting from CNPI's response to 3.0-VECC-18(c).

The resulting billing determinants are presented in Table 12 below.

Table 12: 2017 Test Year Billing Determinants (for Cost Allocation and Rate Design)

3.2 Is the proposed cost allocation methodology, and are the allocations and revenue-to-cost ratios, appropriate?

Complete Settlement

The Parties accept the evidence of CNPI that, subject to the adjustments identified below, the cost allocation methodology, allocations and revenue-to-cost ratios are appropriate.

CNPI agrees to reset the newly created Embedded Distributor Class to a revenue to cost ratio of 100%. CNPI updated its Cost Allocation Model to reflect all changes up to Partial Settlement, set the Embedded Distributor Class revenue to cost ratio to 100%, and then re-balanced its revenue requirement across classes by bringing the Streetlight revenue to cost ratio to the 120% ceiling of the Board's policy range and increasing both the Residential and USL ratios until the revenue requirement balanced.

Table 17: Summary of 2017 Revenue to Cost Ratios

Rate Class	Application (A)	IR/TC Responses (B)	Variance (C) = (B) - (A)	Settlement (D)	Variance (E) = (D) - (B)
Residential	95.37%	94.84%	(0.53%)	94.85%	0.01%
GS < 50	109.22%	109.56%	0.34%	109.49%	(0.07%)
GS > 50	106.96%	108.32%	1.36%	108.19%	(0.13%)
Embedded Distributor	95.37%	94.84%	(0.53%)	100.00%	5.16%
Street Light	120.00%	120.00%	0.00%	120.00%	0.00%
Sentinel Light	105.08%	104.46%	(0.62%)	104.35%	(0.11%)
USL	95.37%	94.84%	(0.53%)	94.85%	0.01%

Methodology and target for Embedded Distributor class settled

Final results subject to change based on update of placeholder values for unsettled items in the Cost Allocation model

The Parties accept the evidence of CNPI that all elements of the cost allocation methodology allocation and Revenue-to-Cost ratios have been correctly determined in accordance with OEB policies and practices.

3.3 Are Canadian Niagara Power's proposals for rate design appropriate?

Complete Settlement

The Parties accept the evidence of CNPI that all elements of the rate design have been correctly determined in accordance with OEB policies and practices. Table 18 shows the rates that result from the Application as adjusted by the interrogatory and technical conference responses and the settled issues in this Proposal, with those rates being subject to further adjustments based on the results of the hearing of the unsettled issues.

Table 18: January 1, 2017 Distribution Rates

Rate Class	Fix	ced Rate	Billing Determinant	Var	riable Rate	Fixed %	Variable %
Residential	\$	29.45	kWh	\$	0.0112	80.37%	19.63%
GS < 50	\$	30.92	kWh	\$	0.0252	34.59%	65.41%

4 ACCOUNTING

4.1 Have all impacts of any changes in accounting standards, policies, estimates, and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

Partial Settlement

The Parties accept the evidence of CNPI that all impacts of changes to accounting standards, policies, estimates, and adjustments have been properly identified and recorded in accordance with the OEB's policies and properly reflected in rates, with the exception of the manner in which Pension and OPEB costs have been accounted for in rates.

CNPI has incorporated Pension and OPEB costs into rates on an accrual accounting basis; one or more intervenors may explore at the hearing the appropriateness of including Pension and/or OPEB costs in rates on a cash accounting basis, an accounting change that would impact the revenue requirement for the test period. CNPI notes that the issue of the appropriate regulatory treatment of Pensions and OPEB costs is currently being fully reviewed by the Ontario Energy Board in consultation EB-2015-0040 "Regulatory Treatment of Pensions and Other Post-Employment Benefit Costs", such that in CNPI's view it would be premature to decide that issue in this case prior to the Board's determination of the issue for the all LDCs.

An updated EDDVAR Continuity Schedule is provided in working Excel format reflecting this Settlement Proposal and includes the calculation of the various riders discussed above.

4.2 Are Canadian Niagara Power's proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts and the continuation of existing accounts, appropriate?

Partial Settlement

With three exceptions, detailed below, the Parties accept the evidence of CNPI that all elements of the applied for deferral and variance accounts are appropriate, including the balances in the existing accounts and their disposition on a harmonized basis commencing January 1, 2017 and the continuation of existing accounts.

Table 21 below summarizes the amounts for disposition and associated rate riders by rate class.

Table 21: DVA and LRAMVA Rate Riders

		Disposition of DVA's (2017) & MIST/Stranded Meters					tranded Meters
Rate Class	Billing Determinant		\$/kWh		\$/kW	\$/r	month/customer
Residential	kWh	-\$	0.0033			-\$	0.1500
GS < 50	kWh	-\$	0.0035				
GS > 50	kW			-\$	1.1120	\$	10.6500
Embedded Distributor	kW			-\$	1.3389		
Street Light	kW			-\$	1.1592

Rate Class	Billing Determinant	,	\$/kWh		\$/kW	
Residential	kWh	\$	0.0006			
GS < 50	kWh	\$	0.0023			
GS > 50	kW			\$	0.1687	

In connection with the unsettled issue concerning the proper accounting treatment of Pension and OPEB related OM&A costs, parties may make submissions in support of a new variance account related to Pension and OPEB costs, such that issue 4.2 remains unsettled to account for the possibility of that new variance account as a result of the resolution of the unsettled issue.

The Parties note that the likelihood of the Board releasing a decision on the unsettled issues prior to the proposed January 1, 2017 implementation date for all proposed rates is unlikely. CNPI in its application requested an order making its current rates interim as of January 1, 2017. The Parties acknowledge that the DVA and LRAMVA rate riders may be impacted as a result of an implementation date other than January 1, 2017.

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 44 of 49 Filed: December 1, 2016

In connection with the unsettled issue concerning the cost of long-term debt, some parties may take the position that a variance account should be established to capture some or all changes in the cost of long-term debt.

Canadian Niagara Power Inc. EB-2016-0061 Settlement Proposal Page 47 of 49 Filed: December 1, 2016

Attachment A – Revenue Requirement Workform

Revenue Requirement Workform (RRWF) for 2017 Filers

Version 7.02

Utility Name	Canadian Niagara Power Inc.
Service Territory	
Assigned EB Number	EB-2016-0061
Name and Title	Brian Vander Vloet, Manager Regulatory Accountin
Phone Number	905-871-0330 ext 3208
Email Address	brian.vandervloet@cnpower.com

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing the application or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.

While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the results.

General

Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- Net of addbacks and deductions to arrive at taxable income.
- Average of Gross Fixed Assets at beginning and end of the Test Year
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- 4.0% unless an Applicant has proposed or been approved for another amount.
- The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.
- (10) See 2-Energy Probe-5. Reduction in 2016 capitalized expenditures of \$483k and corresponding depreciation expense and CCA adjustments.
- (11) See 1-Staff-17. Increase relates to \$30k Letter of Credit fees; -\$169k WCA adjustment for vehicle depreciation included in OM&A per Settlement.
- (12) COP adjustment based 3.0-VECC-18 (load forecast and other price updates)
- (13) +\$30k per 3.0-VECC-23 (Interest and Dividend Income); Offset \$6k adjustment related to JTC 1.3 (OEB 4375 revenue decrease); +\$100k per Settlement
- (14) Adjustment based on load forecast update as per 3.0-VECC-18.
 (15) Decrease in total revenue required at proposed rates resulting from the net impact of all adjustments required based on IR and TC responses and partial settlement.
- (16) JTC 1.1. Cost of capital update per OEB release on Oct 27, 2016.

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

Stage in Process:

Proposed Rates and Class Specific		0.05%			

Notes

- 1 The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. A distributor transitioning to fully fixed rates over a four year period and began the transition in 2016 would input the number "3" into cell D40. A distributor transitioning over a five-year period would input the number "4". Where the change in the residential rate design will result in the fixed charge increasing by more than \$4/year, a distributor may propose an additional transition year.
- 3 Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluentric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

¹ Transformer Ownership Allowance is entered as a positive amount, and only for those classes to which it applies.

The Fixed/Variable split, for each customer class, drives the "tate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

(2) Short description of change, issue, etc.
