**RESS, EMAIL & COURIER**

Ontario Energy Board  
P.O. Box 2319  
27th Floor  
2300 Yonge Street  
Toronto, ON M4P 1E4

Attention: Ms. K. Walli, Board Secretary

Dear Ms. Walli:

**Re: Henvey Inlet – Application for Leave to Construct Transmission Facilities (EB-2016-0310) – Applicant Responses to Hull Interrogatories and Kaster Information**

We are counsel to Henvey Inlet Wind GP Inc. and Henvey Inlet Wind LP (together, “Henvey”) in respect of the above-referenced proceeding. This letter is filed in response to paragraph 3 of Procedural Order No. 2, issued by the Board on March 20, 2017. Paragraph 3 requires Henvey to file with the Board responses to interrogatories from Mr. Hull, and provides Henvey with the opportunity to respond to information filed by the Kasters.

Hull Interrogatories

One interrogatory was filed on behalf of Mr. Hull on March 27, 2017. The Applicant’s response is provided in **Schedule ‘A’** attached hereto.

Response to Kaster Information

The Kasters filed a letter dated March 22, 2017 in response to paragraph 2 of Procedural Order No. 2, which provided them with an opportunity to file new information to support their request that the Board’s decision in Procedural Order No. 1 be reviewed and varied so as to grant them intervenor status in this proceeding (the “Kaster Letter”). Most aspects of the Kaster Letter have already been addressed by the Applicant’s letter of March 23, 2017 (the “Henvey March 23 Letter”), which although dated after the Kaster Letter was issued before Henvey received a copy of the Kaster Letter from Board staff on March 27, 2017. The Applicant further responds to the Kaster Letter as follows.

The Kaster Letter purports to provide additional information to support the Kasters’ contention that the Applicant’s proposed transmission line directly affects their properties. It includes a copy of a survey, which identifies the particular parcels owned by the Kasters. The Kaster Letter also includes a drawing taken from [REDACTED] of Henvey’s originally filed

application. The Kasters argue that the drawing shows that the proposed transmission corridor extends over Parts 4 and 5 as shown on the survey. The Kasters also comment that certain orange markings on the drawing appear to demonstrate that the proposed transmission corridor affects Parts 1, 2, 3 and 6 as shown on the survey.

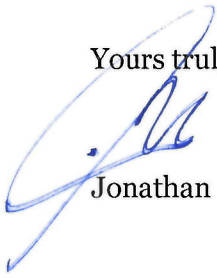

As indicated in the Henvey March 23 Letter, Henvey determined that certain aspects of the drawing referenced in the Kaster Letter do not accurately reflect the proposed routing and land rights needed for this portion of the proposed transmission facilities. The Applicant noted that certain other aspects of the application accurately demonstrated the Applicant's intention to avoid the Kaster properties in accordance with this landowner's expressed wishes. In particular, their properties were not included in the landowner line list and the Plan and Profile Drawing at

shows the routing of the transmission line going around and not across the Kaster-owned parcels. Appendix 'F' of the Henvey March 23 Letter shows more clearly that the proposed transmission corridor does not include any of the Kaster Parcels.

In the final paragraph of the Kaster Letter, the Kasters comment that they find it "disturbing" to find that the Applicant is proposing to narrow the width of its corridor to avoid their property. As noted in the Henvey March 23 Letter, the Kasters expressed their desire for the proposed transmission line to not cross their property. In accordance with those wishes, Henvey revised its transmission line design prior to filing the application for leave to construct so as to avoid the Kaster properties. There is no requirement for the corridor to be a particular width. It is up to the proponent to determine their preferred corridor width, taking into account applicable technical standards, constructability, maintenance, availability of land rights and other factors. While Henvey has generally sought a corridor of 150 feet in width, this is not uniform along the entire length of the line and there is no requirement that it be so. As noted in response to Board Staff Interrogatory #2 and reiterated in the March 23, 2017 letter, the Applicant confirms that its planned alignment within the proposed corridor at this location, despite being less than 150 feet in width, will meet all applicable technical standards, including for clearances and setbacks and having regard for sag and swing conditions.

Based on the foregoing, it is the Applicant's submission that the record is now clear that Henvey does not require any interests in land from the Kasters for purposes of the proposed transmission line. Moreover, the Kasters have not filed any additional information that would call into question the Board's finding in Procedural Order No. 1 that the Kasters raised no issues related to price, reliability or quality of electricity service. As such, it is the Applicant's view that there is no basis for the Board to vary its decision in Procedural Order No. 1 in respect of denying intervenor status to the Kasters.

Yours truly,

A handwritten signature in blue ink, appearing to be 'J. Myers', written over the printed name 'Jonathan Myers'.

Jonathan Myers

**Schedule 'A'**

**Responses to Hull Interrogatories**

**HENVEY INLET WIND LP**

**Responses to Interrogatories from Jeff Hull**

**HULL – 1**

**Topic:** Hull Property

**Reference:** n/a

**Preamble:** n/a

**Request:**

Mr. Hull requests the following information and material from the Applicant that is in addition to the Applicant's pre-filed evidence with the OEB, and that is relevant to the hearing:

- a) All reports, studies, and/or documents in the possession, control or power of the Applicant in relation to the impact of the proposed transmission lines to Mr. Hull's property.

---

**Response:**

- a) Please see Appendix 'A' for copies of the requested materials, which include the following:

	<b>Page(s)</b>	<b>Document</b>	<b>Comments</b>
1.	1	Property map dated October 21, 2015	Shows pre-leave to construct routing contemplated near Hull property, which included an access road on the southeast corner of the property.
2.	2	Reference Map 16-0506 Rev 19	Map prepared March 30, 2017 depicting the transmission easement parallel to the HONI utility line and showing the previously contemplated access road going through Mr. Hull's property. This transmission route option was contemplated in October 2015 but is no longer planned. Please note that Mr. Hull's property is depicted as one continuous parcel based on current knowledge, but at the time the route was contemplated the Applicant was unaware of this continuous ownership.

3.	3	Reference Map 16-0506 Rev 19 V2	See above comment. Version 2 depicts Mr. Hull's property as two discontinuous parcels, consistent with the Applicant's understanding at the time the route was contemplated.
4.	4	Property map dated January 6, 2016	Shows revised pre-leave to construct routing contemplated near Hull property, which had no access roads and included only a small transmission easement on the southeast corner of the property.
5.	5	Reference Map 16-0506 Rev 18	Map prepared March 30, 2017 depicting the transmission line route crossing a corner of Mr. Hull's property with no access road proposed on the parcel owned by Mr. Hull. This route option was contemplated in early 2016 (January-February) but is no longer planned. Please note that Mr. Hull's property is depicted as one continuous parcel, but at the time this route was contemplated the Applicant was unaware of this continuous ownership.
6.	6	Reference Map 16-0506 Rev 18 V2	See above comment. Version 2 depicts Mr. Hull's property as two discontinuous parcels, consistent with the Applicant's understanding at the time the route was contemplated.
7.	7	Reference Map 16-0506 V6	Map prepared March 30, 2017 depicting the proposed transmission route and access routes as filed in the LTC application. There are no access roads proposed on Mr. Hull's property. This route has been contemplated since late summer/early fall 2016. At the time, the Applicant was unaware that Mr. Hull's parcel was a continuous parcel and believed that Mr. Hull would therefore not be an affected landowner because the transmission line ran through the previously perceived gap between the two portions of

			the Hull property, which are now understood to form a continuous parcel.
8.	8-10	Landowner Record of Consultation – Hull Property	None
9.	11-15	Emails re: “Mill Lake Workaround Files HVY8077 and 8079, Jeff and Brian Hull” (most recent email dated February 16, 2016)	None
10.	16-18	Emails re: “Henvey Transmission Line – Rev19 Data” (most recent email dated July 7, 2016)	None
11.	19-27	Emails re: “Pattern-Henvey Inlet-Council Meeting List JULY13 Update” (most recent email dated September 26, 2016)	This document includes a reference to “Dave Todd” but we confirm that it was intended to reference Jeffrey Todd Hull.

Please note that certain information in the documents has been redacted by the Applicant. Consistent with the interrogatory request, which is for materials that are relevant to the hearing, the Applicant has redacted information contained in the documents that is not relevant to the hearing. In particular, the Applicant has redacted information relating to environmental, health, aesthetic or property value impacts (which were identified by the Board in the Notice of Application as being matters outside the scope of the Board’s jurisdiction), as well as information relating to properties other than Mr. Hull’s.

**General Notes**

Landowner didn't call me to set up appointment for presentation as previously agreed via email. I sent another email as follows:

Hello Jeff,

I have been expecting your call this past week in regards to your property in McDougall.

The reason I am trying to reach you is, our company is working together with Pattern Energy on the development of Henvey Inlet Wind Centre. Currently, we are conducting environmental studies on directly affected parcels. Your parcel is not directly affected, however we need to use the road running from McDougall Road through your property to access a few other parcels of land. You would be compensated \$2,000 for allowing us to use the road running through your property.

If you could please contact me at your earliest convenience in order to speak about this in more detail.

Thank you.  
Tatiana

---------------------------	---	---------	-----------------------------------	--------------------------	----------------------	------------

**General Notes**

Discussed the project at length with landowner. He requested maps of his property in relation to access road and proposed transmission line to be sent to him for his further review before he agrees to meet with me. I sent him an email with requested information.

21/07/2015 4:00:00 PM	Tatiana Dujovic, Field Specialist, CanACRE	License	Agreement Presentation	Negotiations In Progress	Follow up after Open House	03/08/2015
--------------------------	---	---------	------------------------	--------------------------	----------------------------	------------

**General Notes**

Met with landowner and his brother at their office in Mississauga. [REDACTED]

[REDACTED] Landowner had multiple technical questions regarding the project such as exact height of the poles to be used, how low would the span go over the river, how many lines would run per pole, etc, as well as inquiries regarding the future development of the transmission line. I provided information in my knowledge and advised the landowner to attend the Open House in Parry Sound on August 1, 2015 for opportunity to speak directly to the representatives of Pattern Energy. I also advised him to visit the Henvey Inlet web site for additional information.

Hi Allison.

**McDougal Road 2** – Thanks for the back history. I knew there was a reason we didn't have it in there. Makes me feel more sane in this whole process. Yes, please add a road in the HONI corridor and have Haseeb take a look so he is comfortable it can be permitted. It will be our only route into that piece of the line.

Hi Becky,

No problem.

For McDougall Road 2

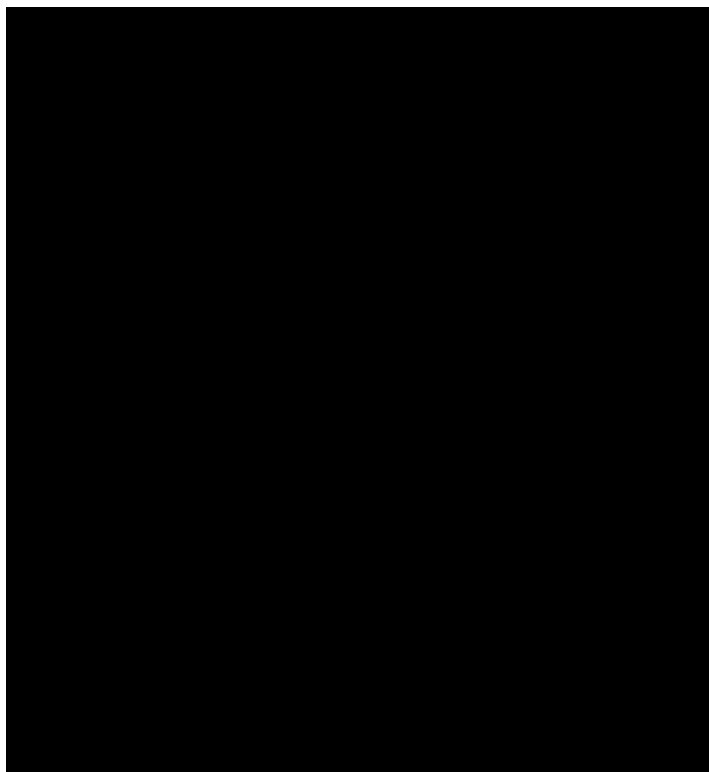

- This is the one with the LO issue The LO of HVY8077,HVY8079 (HULL, property highlighted) is not interested. Rob has met with the landowner and the landowner has made it clear that he is not interested in discussing the project.

- Would you like us to add an access route in the HONI corridor instead?

- [illegible]

Thanks,  
Allison

**Subject:** Henvey Transmission Line - Rev19 Data

Good Morning All,

The Rev19 v00 Transmission Shapefiles are attached, including the following files.

- Off-Reserve Transmission Easement
  - o *Changes made to align with MTO/ HONI corridors and to address landowner requirements.*
- On and Off-Reserve Transmission Poles and Centerline (from Chimax)
  - o *Changes made to reflect use of H-Frame structures and accommodate easement changes noted above.*
- POI
  - o *No change from Rev18.*
- Switching Station Area
  - o *No change from Rev18.*
- HONI Lands
  - o *Added to encompass lands where POI is located, outside the Switching Station Area.*

The following transmission files are being finalized and update version will be released when available.

- Access routes
- Laydown areas

Please let me know of any questions.

Thanks

Becky Grieve

Hi Dan,

In the screenshot below the light blue is the 150ft TLine easement.

Without Hull, there is only 83ft easement.

There is a small distribution line that you can see in the imagery, which is why the TLine easement wasn't pushed SW.

Hi Rob,

I have ccd Allison on this email.

Allison,

What do you think, do we still need this landowner? Essentially, we want 150' for the LTC, no exceptions. If we don't take Hull are we left with 20'?

Can you send us a screenshot?

Thanks,

Dan

**Subject:** Mill Lake Workaround Files HVY8077 and 8079, Jeff and Brian Hull

Hi Dan:

I wanted to confirm with you if we should pursue an overhanging easement for .08021 acre over land owned by Jeff Hull (Brian Hull is Jeff's father and the previous owner). The Hulls have been opposed to the HIW project and when approached before about the use of the property for access purposes, they said no to the project and no to the use. Do we want to formally approach the owner to show him the proposed requirement and receive his refusal then remove the overhanging area from his property or delete it now and not approach him. My recommendation is to present the proposed easement area to the owner and then have his refusal documented for OEB purposes.

I have attached for your reference the sketch showing the small area of overhanging easement along with the ROC's stating his opposition to the project and the refusal to co-operate in granting access road rights previously.

Your earliest response is greatly appreciated.

Thanks

Regards

Rob

Hi Kyle,

I confirm this is the correct alignment at this parcel.

Cheers

Becky Grieve

Hi Jenna,

Upon further review of the image provided, it appears that this may be showing the original alignment rather than the current Mill Lake workaround. Can you confirm?

Hi Everyone,

Please see the screenshot below which shows the Hull properties (in black) in relations to the TLine easement (in yellow) as well as the attached ROC reports for this landowner.

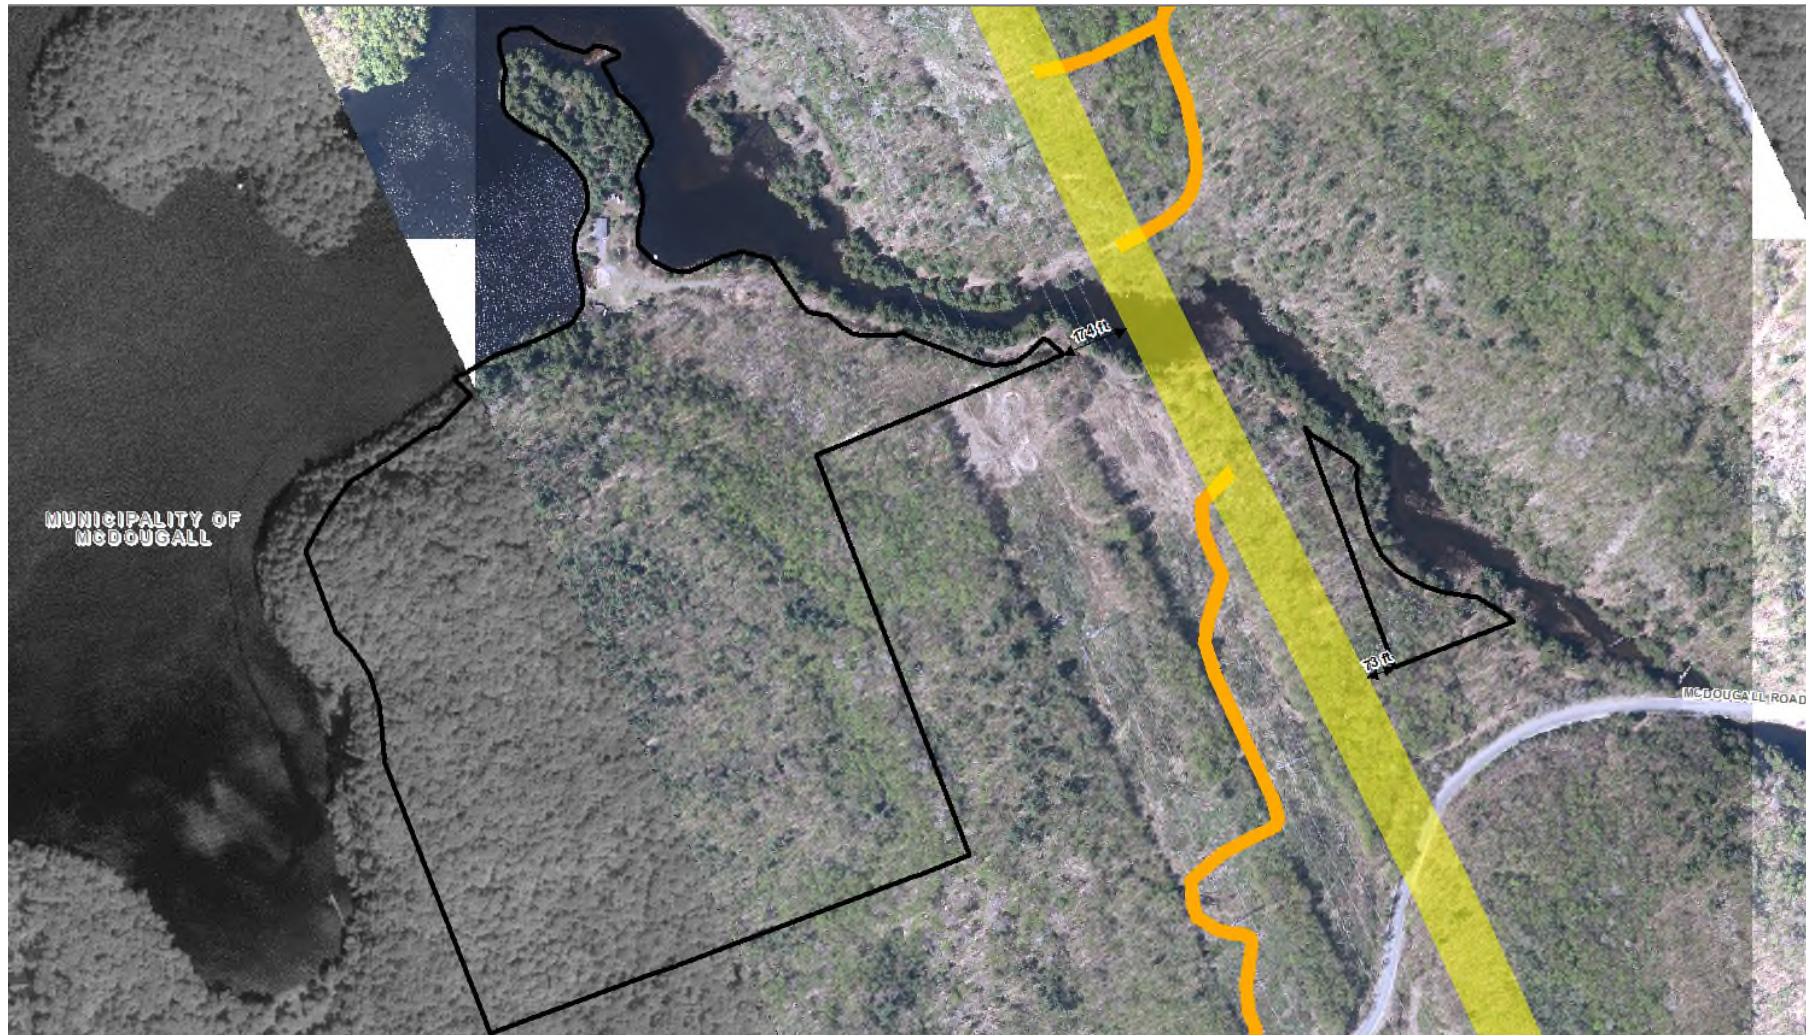

Also confirmed that his properties are not affected by laydowns or access roads (in orange)

In the first screenshot Allison added measurements to show the distance between the Hull property and the TLine Easement.

Let me know if you require anything further for this landowner.

Thank you,

Jenna

Great. Thanks Rob.

Jenna,

Can you please send a off of the Hull roc to the team members included on this email? A screenshot of the Hall property in relation to the latest tline route would be helpful as well.

Thanks,

Dan

Hi Dan:

I believe we are still unclear if the last name is Todd or Hull? I believe it to be Jeffrey Hull a landowner in the Mill Lake area.

[REDACTED] I am not aware of any owner in the Mill Lake area by the name of Jeffrey Todd.

If the landowner is Jeffrey Hull, we have a lot of correspondence and ROC's recording his opposition to the proposed transmission line. Mr. Hull on the original routing across Mill Lake was impacted by a proposed temporary access road. On the Mill Lake work around, Mr. Hull had only a small area of transmission line overhang on his property. I think for the LTC it was decided to delete him from the line list.

I am cc'ing Kyle with this email and attachments, should he wish to discuss with me further. If can ensure this is indeed Jeffrey Hull, Jenna can pull together the background information on this owner.

Should you have any questions in the interim, please do not hesitate to contact me.

Thanks

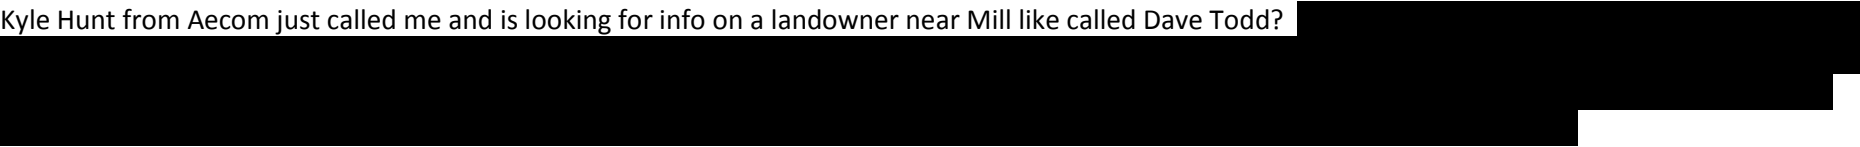

Regards

Rob

**Subject:** Henvey landowner inquiry

Hi Jenna,

Kyle Hunt from Aecom just called me and is looking for info on a landowner near Mill like called Dave Todd?

Can you do a little digging in the morning and rob all of the notes on this landowner (if any).

Rob,

Can you send them to Kyle Becky and Jody? Cc everyone else on this email.

Thanks,

Dan
