Subject: re EB-2017-0120 Amherst Island

Amherst Island / Windlectric

There is no revenue for the Government on this turbine project. After spending millions of tax dollars . Home owners , will still not afford their electric bills . OPG will purchase electricity from Windlectric for a major loss .  
Endangered Birds and Animals in a negative position. Human health also at risk .

Who in the Government is going to boast about this ( GREEN PROJECT ) .  
Since it has failed on every level from the start .

Thanks  
Roy Sparks
