To whom it may concern,

Amherst Island residents are very concern about the Wind Turbines Project. I am aware Windlectric has applied to The Energy Board for a Electricity Generation License.

Windlectric's request is premature as they have not met the deadline for starting the transmission line, also they don't have approval for the CPU Amendment or a Roads Use Agreement with the county of Lennox and Addington.

Please help cancel this unneeded project and help save the Ontario taxpayers more than \$500 million over the next twenty years.

Thank you for your time,

Danielle Sparks
