DECISION AND ORDER

EB-2017-0095

ALECTRA UTILITIES CORPORATION

BURLINGTON HYDRO INC.

Joint Application for Elimination of Load Transfer Arrangements

BY DELEGATION, BEFORE: Brian Hewson
Vice President
Consumer Protection and Industry Performance

May 4, 2017

INTRODUCTION AND SUMMARY

Alectra Utilities Corporation (Alectra) and Burlington Hydro Inc. (Burlington) have jointly applied to the Ontario Energy Board (OEB) for approval to amend the service areas of both distributors such that all existing load transfer arrangements between the two distributors are eliminated. A load transfer arrangement is a situation in which an electricity consumer located in the licensed service area of one distributor (the geographic distributor) is physically served by another distributor (the physical distributor).

The application is granted, as set out in this Decision and Order.

THE PROCESS

This Decision and Order is being issued without a hearing by Delegated Authority, pursuant to Section 6(4) of the *Ontario Energy Board Act, 1998* (the Act).

THE APPLICATION

Alectra and Burlington (collectively, the Applicants) filed a joint application on February 15, 2017 under sections 74 and 86(1)(b) of the Act. The application was filed pursuant to the Distribution System Code (DSC) amendments made in the OEB proceeding EB-2015-0006 and in accordance with the OEB's filing guidelines for combined service area amendments and sale of assets. In the EB-2015-0006 proceeding, the OEB set out its policy on the elimination of load transfer arrangements between electricity distributors in Ontario. On December 21, 2015, the DSC was amended in order to facilitate distributors' compliance with the policy. In particular, section 6.5.3 of the DSC now requires distributors to eliminate all load transfer arrangements by June 21, 2017, and section 6.5.6 prohibits distributors from entering into any new load transfer arrangements.

Through the application, Alectra seeks to transfer four specific customers of two rate classes to Burlington. Of these customers, two are "Residential" customers and the other two are "General Service" customers. There are no customers being transferred from Burlington to Alectra, as part of this application.

Alectra also requests OEB's approval to sell the distribution assets servicing the affected four customers to Burlington for \$5,785 plus applicable taxes. The application notes that there are no third parties impacted by this sale. The Applicants also state that no assets will be stranded if the application is approved.

FINDINGS

I find it to be in the public interest to approve the service area amendments and sale of assets as proposed by the Applicants in order to eliminate the load transfer arrangements between Alectra and Burlington. Alectra and Burlington's licences will be amended to reflect the proposed transfer of affected customers.

The customers being transferred from Alectra to Burlington will see a reduction in their monthly delivery charges and, therefore, no credits are required for these customers.

Alectra and Burlington are reminded that both geographic and physical distributors shall ensure that all relevant consumer information including, but not limited to, information regarding security deposits and consumption is properly transferred to the physical distributor to allow for the continuous billing of consumers and the continuous application of Ontario Electricity Support Program (OESP) rate assistance to the bills of eligible consumers.

An itemized list of assets authorized for transfer between Alectra and Burlington is set out in Schedule A of this Decision and Order.

IT IS ORDERED THAT:

1. Schedule 1 of Alectra Utilities Corporation's Electricity Distribution Licence (ED-2016-0360) is amended. The amended licence is attached to this Decision and Order.
2. Schedule 1 of Burlington Hydro Inc.'s Electricity Distribution Licence (ED-2003-0004) is amended. The amended licence is attached to this Decision and Order.
3. Alectra Utilities Corporation is granted leave to sell assets listed in Schedule A (Table 1) to Burlington Hydro Inc.

DATED at Toronto May 4, 2017
