**HYDRO ONE NETWORKS INC.**

**LONDON HYDRO INC.**

**Joint Application for Elimination of Load Transfer Arrangements**

**BY DELEGATION, BEFORE: Brian Hewson**  
Vice President  
Consumer Protection and Industry Performance

---

**May 18, 2017**

## INTRODUCTION AND SUMMARY

Hydro One Networks Inc. (Hydro One) and London Hydro Inc. (London Hydro) have jointly applied to the Ontario Energy Board (OEB) for approval to amend the service areas of both distributors such that all existing load transfer arrangements between the two distributors are eliminated. A load transfer arrangement is a situation in which an electricity consumer located in the licensed service area of one distributor (the geographic distributor) is physically served by another distributor (the physical distributor).

The application is granted, as set out in this Decision and Order.

## THE PROCESS

This Decision and Order is being issued without a hearing by Delegated Authority, pursuant to Section 6(4) of the *Ontario Energy Board Act, 1998* (the Act).

## THE APPLICATION

Hydro One and London Hydro (collectively, the Applicants) filed a joint application on February 28, 2017 under sections 74 and 86(1)(b) of the Act.

The application was filed pursuant to the Distribution System Code (DSC) amendments made in the OEB proceeding EB-2015-0006 and in accordance with the OEB's filing guidelines for combined service area amendments and sale of assets. In the EB-2015-0006 proceeding, the OEB set out its policy on the elimination of load transfer arrangements between electricity distributors in Ontario. On December 21, 2015, the DSC was amended in order to facilitate distributors' compliance with the policy. In particular, section 6.5.3 of the DSC now requires distributors to eliminate all load transfer arrangements by June 21, 2017, and section 6.5.6 prohibits distributors from entering into any new load transfer arrangements.

Through the application, Hydro One seeks to transfer six specific customers of various rate classes to London Hydro. Of these customers, three are "Residential" customers and the other three are "General Service" customers. Hydro One also requests OEB's approval to sell the distribution assets servicing these customers to London Hydro for \$36,252.65 plus applicable taxes.

London Hydro seeks to transfer six specific customers of various rate classes to Hydro One. Of these customers, five are “Residential” customers and one is a “General Service” customer. London Hydro also requests OEB’s approval to sell the distribution assets servicing these customers to Hydro One for \$8,360 plus applicable taxes.

The application notes that there are no third parties impacted by this sale. The Applicants also state that no assets will be stranded if the application is approved.

## **FINDINGS**

I find it to be in the public interest to approve the service area amendments and sale of assets as proposed by the Applicants in order to eliminate the load transfer arrangements between Hydro One and London Hydro. Hydro One and London Hydro’s licences will be amended to reflect the proposed transfer of affected customers.

As prescribed in section 6.5.4 of the DSC, the affected Residential and General Service customers moving from London Hydro to Hydro One shall receive a monthly bill credit to offset the increase in delivery charges. The credit shall be calculated using each customer’s average monthly consumption over the most recent 12 months from the application filing date with the OEB. The credit shall be fixed at this calculated level and remain in place as long as the customer remains the account holder.

The Residential and General Service customers being transferred from Hydro One to London Hydro will see a reduction in their monthly delivery charges and, therefore, no credits are required for these customers.

Hydro One requested a deferral account to record lost revenue resulting from the rate impact mitigation plan as well as any costs involved in the set-up of such a plan. The OEB will allow Hydro One to track these costs in a deferral account. Hydro One shall record these costs in account 1508, Other Regulatory Assets, Sub-account LTLT Rate Impact Mitigation. Consideration of the disposition of the deferral account will occur in the normal manner in the rate setting process.

Hydro One and London Hydro are reminded that both geographic and physical distributors shall ensure that all relevant consumer information including, but not limited to, information regarding security deposits and consumption is properly transferred to

the physical distributor to allow for the continuous billing of consumers and the continuous application of Ontario Electricity Support Program (OESP) rate assistance to the bills of eligible consumers.

An itemized list of assets authorized for transfer between Hydro One and London Hydro is set out in Schedule A of this Decision and Order.

**IT IS ORDERED THAT:**

1. Schedule 1 (Appendix B, Tab 1 and 4) of Hydro One Networks Inc.'s Electricity Distribution Licence (ED-2003-0043) is amended. The amended licence is attached to this Decision and Order.
2. Schedule 1 of London Hydro Inc.'s Electricity Distribution Licence (ED-2003-0043) is amended. The amended licence is attached to this Decision and Order.
3. Hydro One Networks Inc. is granted leave to sell assets listed in Schedule A (Table 1) to London Hydro Inc.
4. London Hydro Inc. is granted leave to sell assets listed in Schedule A (Table 2) to Hydro One Networks Inc.
