

## **RATE DESIGN**

### **1. INTRODUCTION**

This Exhibit presents the proposed rate design methodology for collecting the 2018 to 2022 revenue requirement and the proposed rates for the 2018 rate year. As discussed in Exhibit G1, Tab 3, Schedule 1, Hydro One has populated two cost allocation models for test years 2018 and 2021. The revenue requirement allocated to each rate class in 2018 and 2021 is established by the Cost Allocation Model (“CAM”). For rate years 2019, 2020 and 2022, the revenue requirement allocated to each rate class is based on the overall Hydro One year-over-year change in revenue requirement and load forecast in a given test year, as detailed later in this Exhibit.

The estimated rates over the Custom IR period are calculated based on the rate class revenue requirement after adjustments to the R/C ratios as described in Section 2.0 of this schedule. Calculation details are provided in Exhibit H1, Tab 1, Schedule 2 and Schedule 3.

The distribution rates for each rate class over the Custom IR period are summarized in Table 1. The calculated rates for 2019 through 2022 are shown for illustrative purposes and are calculated consistent with the assumptions outlined in Exhibit A, Tab 3, Schedule 2. Final rates for those rate years will be approved by the OEB in subsequent rate applications and are dependent on changes to parameters such as the OEB’s inflation adjustment factor, which is updated annually. Further details can be found in Exhibit A, Tab 3, Schedule 2.

\*ST rates are listed in Table 11.

The 2018 proposed rate schedules reflecting the rates shown in Table 1 are provided in Exhibit H1, Tab 2, Schedule 1. The currently approved rate schedules for Hydro One and the Acquired Utilities are provided in Exhibit H1, Tab 2, Schedule 2. The rate schedules for 2019 to 2022 will be determined as part of the annual process for setting rates, taking into account any changes as a result of the annual adjustments discussed in Section 2 of this Exhibit and Exhibit A, Tab 3, Schedule 2.

## 2. RATE DESIGN PROCESS

Generally accepted ratemaking principles guided Hydro One's development of rates for this application. Those principles are best summarized by James Bonbright's, *Principles*

Witness: Henry Andre

1 *of Public Utility Rates*. The OEB Staff's March 31, 2008, discussion paper *Rate Design*  
2 *for Recovery of Electricity Distribution Costs* (EB-2007-0031), cited these principles and  
3 summarized them as:

- 4 1) Full Cost Recovery – the level and design of rates should be sufficient to provide  
5 distributors with a reasonable opportunity to recover its revenue requirement, and for  
6 rates to be effective they should be practical, clear and uncontroversial;
- 7 2) Fairness – customers should, in general, pay rates for distribution service that reflects  
8 the costs they “cause” as determined by a Board-approved cost allocation study; and
- 9 3) Efficiency – rates should encourage customers to maximize use of existing  
10 distribution assets, and encourage existing and new customers to use the system in  
11 ways that lead to rational growth.

## 12 13 **2.1 REVENUE REQUIREMENT BY RATE CLASS**

14  
15 As discussed in Exhibit G1, Tab 3, Schedule 1, Hydro One has populated two cost  
16 allocation models for rate years 2018 and 2021. As such, the 2018 and 2021 revenue  
17 requirement by rate class is determined by the CAMs.

18  
19 For rate years, 2019, 2020 and 2022, a revenue cap approach is used to allocate the year-  
20 over-year change in total revenue requirement to individual rate classes, as described  
21 below.

### 22 23 2019 Revenue Requirement by Rate Class

24  
25 The 2019 revenue requirement by rate class, as shown in Table 2, was derived as follows:

- 26  
27 1. The overall prior year's (2018) revenue requirement is used as a starting point  
28 (column 1);

Witness: Henry Andre

- 1        2. The overall revenue requirement for the current year (2019) is determined using  
2            the revenue cap approach to increase the prior year's overall revenue requirement  
3            (i.e.  $\$1,499,881,927 \times 1.0341 = \$1,550,978,775^1$ );
- 4        3. Using a similar approach as in the Board's CAM, column 2 determines the  
5            revenue at current rates by applying the prior year's rates (2018) to the current  
6            year's (2019) charge determinants and adding the current year's miscellaneous  
7            revenue for each rate class; and
- 8        4. The multiplier required to collected the current year's (2019) approved overall  
9            revenue requirement is established (i.e.  $\$1,550,978,775 / \$1,498,127,222 =$   
10            $1.0353$ ) and applied uniformly to column 2 to determine the current year's (2019)  
11           revenue requirement by rate class as shown in column 3.

---

<sup>1</sup> Differences due to rounding.

## 2.2 REVENUE-TO-COST RATIO

Hydro One proposes to adjust class revenue recovery as necessary to move the revenue-to-cost ("R/C") ratios for all rate classes towards the Board-approved ranges, specified in EB-2010-0219 – Review of Electricity Distribution Cost Allocation Policy, Report of the Board, issued on March 31, 2011 and EB-2012-0383 – OEB Letter – New Cost Allocation Policy for Street Lighting Rate Class, issued on June 12, 2015.

The classes with R/C ratios outside the Board-approved ranges will have their R/C ratio change phased-in over multiple years, if necessary, to achieve the end state target while limiting total bill impacts to customers. Where necessary, adjustments are applied to move the R/C ratios towards the Board-approved range, consistent with the approach previously approved by the Board. To increase the R/C ratio of a rate class that is outside the Board-approved range requires an increase in revenue requirement for this rate class. That increase in revenue will be made up by decreasing the revenue collected from those classes with the highest R/C ratios above 1, as required. This decrease in revenue results in a decrease to the R/C ratio of these classes. For any given year, the increase in the revenue to be collected from rate classes whose R/C ratio was increased is exactly offset by an equal decrease in revenue to be collected from those rate classes whose R/C ratio was decreased.

### R/C Ratio from 2017 to 2018

Table 5 shows how the R/C ratio and revenue requirement by class are adjusted by the 2018 rate design process. In 2018, most of the 2018 R/C ratios as determined by the 2018 CAM are already within the Board-approved range and require no further adjustment. The exception is the Distribution Generation (DGen) class, which has a 2018 CAM R/C ratio of 0.57. Hydro One proposes to increase the DGen class R/C ratio to 0.63 in 2018, which is the maximum the R/C ratio can be increased while still limiting

Witness: Henry Andre

the total bill impact for a typical DGen customer to no more than 10%. This is the same approach proposed, and approved by the Board, in Hydro One's 2016 and 2017 Draft Rate Orders (EB-2015-0079 and EB-2016-0081). The increase in revenue collected from the DGen class is offset by decreasing the revenue collected from USL and Seasonal classes, which have the highest R/C ratios above 1.

**Table 5: Revenue-to-Cost Ratios and Class Revenue Recovery – 2017 to 2018**

Rate Class	2017		2018				Board Range

TOTAL		1,467.6			1,499.9	1,499.9	

\* Assume same as for GS, as previously approved in EB-2013-0416

#### R/C Ratio from 2018 to 2020

Table 6 and Table 7 show how the R/C ratio and revenue requirement by class are adjusted by the 2019 and 2020 rate design process. Hydro One proposes to continue increasing the DGen class R/C ratio from 0.63 in 2018 to 0.76 in 2019, which limits the total bill impact for a typical DGen customer to no more than 10% per year. The increase in revenue from the DGen class is made up by decreasing the revenue collected from the

Witness: Henry Andre

USL, Seasonal and R1 classes, which had the highest R/C ratios above 1. By 2020, the DGen rate class R/C ratio will be within the Board-approved range and no further adjustments will be required to any of the R/C ratios.

<b>TOTAL</b>		1,551.0			1,601.9	1,601.9

R/C Ratio from 2020 to 2021

The 2021 R/C ratios as determined by the 2021 CAM are the starting point for the 2021 rate design. As shown in Table 8 most of the rate classes are already within the Board-approved range and require no further adjustment. The five rate classes whose R/C ratios require adjustment are the AUGe, AUGd, AR, AGSe and AGSd classes, which are all new rate classes created as a result of incorporating the Acquired Utilities.

Hydro One proposes to phase-in an increase to the R/C ratios for these classes to within the Board-approved range while limiting the total bill impact. The principle adopted for determining how much to increase the R/C ratio for these rate classes is based on the following considerations:

Witness: Henry Andre

- 1 i) Acquired customers' base distribution rates have been frozen since 2014, while base  
2 distribution rates of existing Hydro One customers have increased about 22% over the  
3 period from 2015 to 2021;
- 4 ii) The total bill impacts for acquired customers should be similar to what other Hydro  
5 One customers in a similar rate class will experience in 2021; and
- 6 iii) The bill impact due to phasing in R/C ratios to within the Board-approved range  
7 should not exceed either i) or ii), whichever is higher.
- 8

9 Following the above principle, Hydro One proposes to adjust the 2021 R/C ratios as  
10 follows:

11

- 12 • AUGe from 0.59 to 0.68, resulting in a distribution bill impact of 22% and a total bill  
13 impact of 3.3% for an average customer;
- 14 • AUGd from 0.43 to 0.61, resulting in a total bill impact of 0.4% for an average  
15 customer, which is similar to the total bill impact for an average customer in the UGd  
16 class;
- 17 • AR from 0.78 to 0.85, which raises the R/C ratio to within the Board-approved range  
18 while resulting in a total bill impact of 4.8% for an average former Haldimand  
19 County Hydro customer and a total bill impact of 5.6% for an average former Norfolk  
20 Power customer;
- 21 • AGSe from 0.74 to 0.78, resulting in a distribution bill impact of 22% and a total bill  
22 impact of 3.9% for an average former Haldimand County Hydro customer. An  
23 average former Norfolk Power customer will see a total bill impact of 0.2%; and
- 24 • AGSd from 0.53 to 0.67, resulting in total bill impacts of 0.8% and 0.6% for an  
25 average former Haldimand County Hydro customer and an average former Norfolk  
26 Power customer, respectively. These increases are similar to the total bill impact for  
27 an average customer in the GSd class.

Witness: Henry Andre

The increase in revenue from these classes is offset by decreasing the revenue collected from the UR, R1, Seasonal and USL classes, which had the highest R/C ratios above 1.

**Table 8: Revenue-to-Cost Ratios and Class Revenue Recovery – 2020 to 2021**

Rate Class	2020		2021				Board Range R/C (%)
	R/C	Revenue Requirement (S M)	R/C		Revenue Requirement (\$ M)		
			CAM	After Rate Design	CAM	After Rate Design	
UR	1.07	104.8	1.10	1.10	108.6	108.2	85 - 115

TOTAL		1,601.91			1,680.4	1,680.4	

R/C Ratio from 2021 to 2022

Table 9 shows how the R/C ratio and revenue requirement by class are adjusted by the 2022 rate design process. Hydro One proposes to increase the AUGe, AUGd, AGSe and AGSd class R/C ratios to the Board-approved value of 0.80, which can be achieved while still limiting the total bill impact to well below 10%. The increase in revenue from these classes is offset by decreasing the revenue from the R1, UR and USL classes, which had the highest R/C ratios above 1.

Witness: Henry Andre

**Table 9: Revenue-to-Cost Ratios and Class Revenue Recovery – 2021 to 2022**

<b>TOTAL</b>		1,680.4			1,728.2	1,728.2

R/C ratio adjustment calculation details are provided in Exhibit H1, Tab 1, Schedule 2, which is also provided in Excel format.

Witness: Henry Andre

1     **2.3     FIXED VERSUS VOLUMETRIC CHARGES**

2  
3     **2.3.1     MOVE TO ALL-FIXED RATES FOR RESIDENTIAL CLASSES**

4  
5     In the Report of the Board: A New Distribution Rate Design for Residential Electricity  
6     Customers (EB-2012-0410) issued April 2, 2015, the Board confirmed that rates for  
7     residential customers will migrate to a fixed monthly distribution (“all-fixed”) charge  
8     over a transition period commencing in 2016.

9  
10    Hydro One Existing Residential Rate Classes

11    In its Decision on Hydro One’s 2016 Draft Rate Order (EB-2013-0416/EB-2015-0079),  
12    the Board approved Hydro One’s proposed mitigation plan to extend the phase-in period  
13    to five years for the UR class and ordered an eight-year phase-in period for the R1, R2  
14    and Seasonal rate classes.

15  
16    In this application, Hydro One continues to use the same methodology, approved by the  
17    Board in Hydro One’s 2016 and 2017 Draft Rate Orders (EB-2015-0079 and EB-2016-  
18    0081) to calculate the proposed monthly fixed service charges and corresponding  
19    volumetric charges for 2018 to 2022 rates for the R1, R2, UR and Seasonal rate classes.  
20    The transition to all-fixed distribution rates will be complete in 2020 for UR rate class  
21    and 2023 for R1, R2 and Seasonal rate classes.

22  
23    The detailed calculations are shown in Exhibit H1, Tab 1, Schedule 2.

24  
25    Acquired Residential Rate Classes

26    In its Decisions on the 2016 distribution rates applications for Norfolk Power (EB-2015-  
27    0269), Haldimand County Hydro (EB-2015-0259), and Woodstock Hydro (EB-2015-  
28    0271), the Board ordered multi-year phase-in periods for the transition to all-fixed

Witness: Henry Andre

1 residential rates, commencing in 2016. Specifically, the Board ordered a four-year phase-  
2 in for Norfolk Power and a five-year phase-in for Haldimand County Hydro and  
3 Woodstock Hydro. By 2020, the phase-in period will have ended for the Acquired  
4 Utilities. As such, the proposed 2021 residential rates for the customers formerly served  
5 by the Acquired Utilities are 100% fixed. The year-over-year move to all-fixed  
6 residential distribution charges for the Acquired Utilities will continue to proceed via  
7 annual rate applications, to be filed separately with the Board, for 2018 to 2020 rates.

### 8 9 **2.3.2 NON-RESIDENTIAL CLASSES**

#### 10 11 Hydro One Existing Non-Residential Rate Classes

12 Hydro One proposes to maintain the same fixed-to-variable revenue split for all non-  
13 residential rate classes (except DGen) that were approved by the Board in Hydro One's  
14 last distribution rate application and subsequent Draft Rate Orders (EB-2013-0416, EB-  
15 2015-0079 and EB-2016-0081).

16  
17 Given the approach previously adopted for fixed and variable charges to the DGen class  
18 as a result of phasing-in its R/C ratio to the Board-approved range, Hydro One proposes  
19 to reset the DGen fixed charge in 2018 to the minimum system values calculated in Sheet  
20 O2 of the 2018 CAM. Hydro One also proposes that this fixed charge remain unchanged  
21 for the 2018 to 2022 period, while revenue increases over the 2019 to 2022 period are to  
22 be absorbed by increases to the volumetric charges.

#### 23 24 Acquired Non-Residential Rate Classes

25 The AUGe and AUGd classes consist of customers formerly served by Woodstock  
26 Hydro. Hydro One proposes to maintain the same fixed-to-variable split in revenue,  
27 approved by the Board in Woodstock Hydro's last Cost-of-Service distribution rate

application. The fixed-to-variable split for these classes will remain unchanged over the 2021 to 2022 period to provide stability in customer rates and revenue mix.

The AGSe and AGSd classes consist of customers formerly served by Norfolk Power and Haldimand County Hydro. Hydro One proposes to use a blended fixed-to-variable split, which is a revenue weighted average of the two ratios approved by the Board in Norfolk Power and Haldimand Hydro's last Cost-of-Service distribution rate applications. The fixed-to-variable split for AGSe and AGSd will remain unchanged over the 2021 to 2022 period to provide stability in customer rates and revenue mix.

Table 10 below summarizes the current and proposed fixed and volumetric revenue split.

**Table 10: Current and Proposed Fixed and Volumetric Revenue Split – 2017 to 2022**

Rate Class	2017		2018		2019		2020		2021		2022

1    **3. CALCULATION OF SUB-TRANSMISSION (ST) RATES**

2  
3    **3.1 INTRODUCTION**

4  
5    The charges for the use of Common ST lines, High Voltage Distribution Stations  
6    (“HVDS”), Low Voltage Distribution Stations (“LVDS”) and Specific ST Line, were  
7    derived using the results of the 2018 and 2021 CAMs, and reflect the changes in revenue  
8    requirement and load forecast in those years. The methodology used in this application  
9    for the allocation of costs to the ST rate class, as well as for the design of ST rates has not  
10   changed from the methodology that was used in Hydro One’s 2015-2017 Distribution  
11   Rate Application (EB-2013-0416). Hydro One has had approved ST rates applicable to  
12   its embedded distributors since 2008. As such, embedded distributors have had the  
13   opportunity to review the cost allocation and rate design of the rates applicable to them as  
14   part of the regulatory approval process for Hydro One’s previous rate applications.

15  
16   The HVDS and Common ST line charges are billed to customers supplied from multiple  
17   feeders connected to the same Transmission Station (“TS”) or HVDS based on their  
18   aggregated billing demand. The aggregation of billing demand is consistent with the  
19   billing of Retail Transmission Service Rates (“RTSR”) for ST customers and was most  
20   recently reviewed and approved in Hydro One’s 2015 to 2017 distribution rate  
21   application (EB-2013-0416).

22  
23   As previously reviewed and approved by the Board in Hydro One’s most recent  
24   distribution rate application, customers with load displacement generation above 1 MW,  
25   or 2 MW for renewable generation, installed after October 1998, are billed ST volumetric  
26   charges on a gross load basis.

## 3.2 DERIVATION OF ST RATES

Table 11 shows the current approved 2017 ST charges, the proposed 2018 and the estimated 2019-2022 ST charges. Details of the derivation of the proposed ST Charges are provided in Exhibit H1, Tab 1, Schedule 3, which has also been provided in Excel format.

**Table 11: Current and Proposed ST Charges**

	Unit	Current	Proposed				
		2017	2018	2019	2020	2021	2022
Fixed Service Charge	\$	492.55	530.96	543.52	557.71	564.12	577.38
Meter Charge	\$/meter	764.01	668.25	680.45	698.22	706.25	722.85
Common Line	\$/kW	1.2052	1.3103	1.3658	1.4137	1.4497	1.4912
Specific ST Line	\$/km	812.8973	641.9008	641.9008	641.9008	720.1311	720.1311
HVDS-high	\$/kW	1.8088	1.8451	1.8451	1.8451	1.8773	1.8773
HVDS-low	\$/kW	3.3552	3.3439	3.3573	3.3577	3.6543	3.6532
LVDS-low	\$/kW	1.5464	1.4988	1.5122	1.5126	1.7770	1.7759

### 3.2.1 FIXED SERVICE CHARGE

Hydro One applies a monthly fixed service charge per delivery point where an ST customer uses Common ST lines or HVDS facilities. As discussed in section 2.2.2, Hydro One proposes to maintain the same fixed-to-variable revenue ratios by class for most non-residential rate classes. The same approach applies to ST rate class. As such, the fixed-to-variable split for ST class will remain unchanged over the 2018 to 2022 period to provide stability in customer rates and revenue mix.

The fixed service charges in 2018 and 2021 are based on results from the 2018 and 2021 CAMs and associated charge determinants.

Witness: Henry Andre

1  
2 For rate years 2019, 2020 and 2022, the revenue requirement increases to the ST class are  
3 determined using the methodology described in section 2.1 of this exhibit. The fixed  
4 charge revenue requirement is then determined by applying the same fixed-to-variable  
5 revenue split. The fixed service charges in 2019 is determined by dividing the 2019 ST  
6 fixed charge revenue requirement by the 2019 charge determinant (i.e., number of  
7 delivery points where an ST customer uses Common ST lines or HVDS facilities). The  
8 same approach is used for determining the 2020 and 2022 fixed service charge.

### 9 10 **3.2.2 METER RATE FOR HYDRO ONE OWNED METER**

11  
12 Many customers in the ST group provide their own metering facilities. To reflect this,  
13 Hydro One has an additional fixed charge, per metering facility, applicable to customers  
14 for whom Hydro One provides metering facilities. The 2018 and 2021 meter charges are  
15 set to recover Hydro One's low voltage metering facility costs allocated to the ST rate  
16 class in the 2018 and 2021 CAM. The annual increases in revenue requirement for the  
17 ST class in 2019, 2020 and 2022 are applied to the meter charges in those years.

### 18 19 **3.2.3 COMMON ST LINE RATE**

20  
21 The CAM and rate design process determine the total rates revenue requirement to be  
22 collected from the ST rate class. The amount that is not recovered through the other ST  
23 charges (i.e., fixed service, meter, HVDS-high, HVDS-low, LVDS-low and Specific ST  
24 Line) are recovered through the Common ST Line charge. Common ST Line is a  
25 volumetric charge. Details of the derivation of the Common ST Line rates are provided  
26 in Exhibit H1, Tab 1, Schedule 3.

1       **3.2.4   HVDS-HIGH RATE**

2  
3       Customers in the ST class can obtain transformation from above 50 kV to a voltage  
4       between 44 kV and 13.8 kV either through the use of an HVDS-high, or a TS owned by  
5       Hydro One Transmission. Customers that obtain supply through a TS are charged RTSR  
6       – Transformation. Therefore, for consistency purposes, the HVDS-high rate is set  
7       equivalent to the RTSR – Transformation rate adjusted for losses. HVDS-high is a  
8       volumetric charge. This approach will apply for all years of the application.

9  
10       **3.2.5   HVDS-LOW RATE**

11  
12       HVDS-low stations transform power from above 50 kV to under 13.8 kV. Consistent  
13       with the current rate structure, the HVDS-low rate is set to be the sum of the HVDS-high  
14       rate and LVDS-low rate. This ensures that the rate for transformation from above 50 kV  
15       to below 13.8 kV is equivalent for all delivery points, regardless of the type of upstream  
16       transformation facilities used. HVDS-low is a volumetric charge. This approach will  
17       apply for all years of the application.

18  
19       **3.2.6   LVDS-LOW RATE**

20  
21       LVDS-low stations transform power from above (or at) 13.8 kV to under 13.8 kV. The  
22       rate is set to recover the LVDS-low portion of the costs attributable to distribution  
23       stations that are allocated to the ST rate class. The ST LVDS-low portion of the  
24       distribution stations costs is based on the gross book value of assets associated with  
25       providing ST service from LVDS-low stations as a share of the total LVDS station assets.  
26       LVDS-low is a volumetric charge. Output from the 2018 and 2021 CAMs are used to  
27       derive 2018 and 2021 LVDS-low rates. The annual increases in revenue requirement for  
28       the ST class in 2019, 2020 and 2022 are applied to the LVDS-low rates in those years.

Witness: Henry Andre

1 Details of the derivation of the LVDS-low rate are provided in Exhibit H1, Tab 1,  
2 Schedule 3.

### 3 4 **3.2.7 SPECIFIC ST LINE RATE**

5  
6 An ST line section between 44 kV and 13.8 kV is “specific” if it supplies solely one LDC  
7 and is within that LDC’s territory. The Specific ST line rate is set to the average per  
8 kilometer cost for all ST lines on Hydro One’s distribution system.

9  
10 The annual increases in revenue requirement for the ST class from 2018 to 2022 are  
11 reflected in the increases in Specific ST Line Rates for those years.

12  
13 The Specific ST line rate is applied to the length of the specific line section (km) rather  
14 than to demand (kW). Details of the derivation of the Specific ST Line rate are provided  
15 in Exhibit H1, Tab 1, Schedule 3.

### 16 17 **3.2.8 UPDATING ST CHARGES OVER THE CUSTOM IR PERIOD**

18  
19 As described in Section 8, Retail Transmission Service Rates (“RTSR”) will be updated  
20 as a part of the annual draft rate orders prepared over the Custom IR period in the event  
21 new Uniform Transmission Rates (“UTR”) are approved for the corresponding year.  
22 Since the HVDS-high charge is set at the same value as the proposed RTSR-  
23 Transformation rate, and the HVDS-low and Common ST line rates are in-turn impacted  
24 by the HVDS-high charge, it is anticipated that these three ST rates will be updated as  
25 part of the draft rate order associated with future years of the Custom IR period to remain  
26 consistent with the latest approved UTR.

1   **4. REVENUE RECONCILIATION**

2  
3   A reconciliation of the revenue at proposed rates and the revenue requirements by rate  
4   class, as per Chapter 2, section 2.8.10 of the Board's Filing Requirements, are provided  
5   in Exhibit H1, Tab 1, Schedule 4.

6  
7   **5. TRANSFORMER OWNERSHIP ALLOWANCE**

8  
9   There are circumstances under which Hydro One does not supply customers with  
10   transformation equipment, but rather the customer provides its own equipment. This  
11   occurs usually when the customer has unique consumption characteristics that require the  
12   use of special equipment not usually provided by Hydro One. Since the rates developed  
13   for most customer classes assume that Hydro One provides transformation to the  
14   customer, customers in classes that provide their own transformation are entitled to  
15   receive a credit equivalent to the costs of transformation included in their rates.

16  
17   The transformation allowance has been set on a generic basis for LDCs throughout the  
18   province. Hydro One is proposing to maintain its currently approved Transformer  
19   Ownership Allowance at the previously established rate of \$0.60/kW. This is the same  
20   rate that currently applies to demand customers of the Acquired Utilities. The Acquired  
21   Utilities take the same approach to transformer cost allowance and therefore no change is  
22   required in 2021 as a result of rate harmonization. Some customers that provide their  
23   own transformation may be energy billed, therefore, in order to be able to provide these  
24   customers with a Transformer Ownership Allowance, an equivalent 0.14 ¢/kWh rate  
25   previously approved by the OEB will be maintained. The proposed Transformer  
26   Ownership Allowance will also apply to single-phase customers that provide their own  
27   transformation equipment.

Witness: Henry Andre

The projected cost of the Customer Supplied Transformer Allowance (“CSTA”) credit results in the rate adders shown in Table 12, which are included in the volumetric rates shown on the proposed rates calculated in Exhibit H1, Tab 1, Schedule 2 for the GSd, UGd, AUGd, AGSd, and DGen rate classes.

**Table 12: CSTA Rate Adders**

<b>Year</b>	<b>CSTA Credit Amount to be Recovered (\$)</b>	<b>Rate Adder for CSTA (\$/kW)</b>
<b>2018</b>	703,342	0.0637
<b>2019</b>	699,689	0.0640
<b>2020</b>	702,004	0.0643
<b>2021</b>	983,940	0.0824
<b>2022</b>	985,709	0.0827

## **6. HOPPER FOUNDRY RATE ADJUSTMENT**

In accordance with the Board’s Decision in Hydro One’s cost-of-service application EB-2007-0681, Hydro One continues to levy the General Service Demand rates applicable to Hopper Foundry using monthly kW billing determinants determined on a time-of-use basis. As a result of using this approach, Hydro One will collect less revenue from Hopper Foundry in each year of the Custom IR period. The lost revenue amounts and associated adder to be included in the volumetric rates for the GSd class are provided in Table 13. The resulting volumetric rate is shown in the rates calculated in Exhibit H1, Tab 1, Schedule 2.

**Table 13: Hopper Foundry Rate Adders**

<b>Year</b>	<b>Lost Revenue Amount (\$)</b>	<b>Hopper Foundry Rate Adder (\$/kW)</b>
<b>2018</b>	62,040	0.0077
<b>2019</b>	64,335	0.0081
<b>2020</b>	66,357	0.0084
<b>2021</b>	68,176	0.0086
<b>2022</b>	69,955	0.0089

## **7. BILLING DETERMINANTS**

Hydro One is not proposing any changes to the type of billing determinants currently approved for its existing Hydro One customer classes. Customers will continue to be billed a monthly fixed charge and a kWh or kW volumetric charge. For the Streetlight, Sentinel light and Unmetered Scattered Load classes, customers will continue to be charged a monthly per account service charge and a volumetric charge based on estimated kWh.

As discussed in Section 4.0 of Exhibit G1, Tab 2, Schedule 1, Hydro One proposes that acquired customers from the Acquired Utilities currently in the Street Lighting and Sentinel Lighting classes be merged into the equivalent Hydro One rate classes in 2021. While the current Board-approved distribution volumetric charges for customers in these classes from the Acquired Utilities are based on kW consumption, Hydro One proposes that customers from the Acquired Utilities adopt the Hydro One convention in 2021 when they are merged into the equivalent Hydro One rate classes. The existing kWh consumption from these acquired Street Lights and Sentinel Lights customers will be used as the billing determinants.

Witness: Henry Andre

## **8. RETAIL TRANSMISSION SERVICE RATES**

### **8.1 INTRODUCTION**

The proposed Retail Transmission Service Rates (“RTSR”) in this application will continue to reflect the existing Uniform Transmission Rates (“UTR”) effective January 1, 2016 approved by the Board as part of proceeding EB-2014-0140. It is expected that the Board will approve new UTRs on an annual basis. In the event a new UTR is approved at the time a Draft Rate Order for new Distribution rates in a specific year is prepared over the Custom CIR period, Hydro One will update the proposed RTSR to reflect the new UTR as a part of the Draft Rate Order process. Changes to the UTR will also affect some ST rates, as discussed in Section 3.2.8.

Aggregation at a TS or HVDS for purposes of billing RTSR charges was approved by the Board in proceedings EB-2013-0416 and other past distribution rate proceedings (EB-2004-0451, EB-2007-0681 and EB-2009-0096). For customers that are being aggregated for purposes of RTSR, the aggregated demand is determined by applying losses to the measured quantities of individual delivery points.

### **8.2 APPROVED TRANSMISSION RATES**

The UTR approved in proceeding EB-2015-0311, effective January 1, 2016, comprise the following charges:

- A Transmission Network charge of \$3.66/kW to be applied to the demand at each transmission delivery point based on billed demand which is defined to be the larger

1 of: a) 85% of non-coincident peak from 7 a.m. to 7 p.m. IESO business days; or b)  
2 the peak coincident with the transmission system peak.

- 3 • Line and transformation connection charges of \$0.87/kW and \$2.02/kW, respectively,  
4 which are applied to the non-coincident peak at each transmission delivery point.

5  
6 These rates apply to the load at the transmission delivery point which is defined to be on  
7 the high voltage side of the transmission station transformer. Since metering is typically  
8 on the low voltage side of a transmission station, appropriate loss factors have been  
9 applied to adjust the meter readings to the high voltage side of the transformer.

### 11 **8.3 RTSR CALCULATION METHODOLOGY**

12  
13 Hydro One is billed by the IESO at each of its transmission delivery points for the  
14 transmission of power to its customers. Total transmission charges are the sum of all  
15 applicable Network, Line Connection and Transformation Connection charges at these  
16 delivery points. Delivery point charges are based on the contribution of customer class'  
17 load downstream of the delivery point. A large amount of power purchased by Hydro  
18 One is supplied to its ST customer class, which includes embedded LDCs. For these  
19 customers, metering data is available to accurately identify the ST share of the  
20 transmission charges incurred by Hydro One. Given the need to first split transmission  
21 charges between ST and non-ST customers, Hydro One does not use the Board's RTSR  
22 Workform approach for establishing its RTSR rates. Rather, Hydro One uses the  
23 methodology that has been reviewed and approved by the Board for Hydro One's  
24 distribution rate filings since 2008, which more accurately reflects the share of  
25 transmission charges incurred by each class. This methodology is described further  
26 below.

Witness: Henry Andre

1       **8.3.1     2018 AND 2021 TRANSMISSION CHARGES FROM THE IESO**

2  
3       To estimate the transmission charges from the IESO, Hydro One used the forecast 2018  
4       and 2021 load at each of its transmission connections and applied the currently approved  
5       Transmission rates as of January 1, 2016. This resulted in estimated Network,  
6       Transformation Connection and Line Connections charges in 2018 and 2021, as shown in  
7       Table 14.

8  
9       **8.3.2     ALLOCATING TRANSMISSION CHARGES TO RATE CLASSES**

10  
11       The estimated 2018 to 2022 transmission charges from the IESO need to be recovered  
12       from all Hydro One's distribution customers. For the ST customer class, sufficient  
13       connectivity data exists to allow Hydro One to allocate the appropriate share of  
14       transmission charges based on the total ST customer's load coincident with the IESO's  
15       monthly billing peak for their transmission delivery point. In 2018, this results in 42% of  
16       the transmission charges being allocated to the ST class with the residual 58% being  
17       recovered from the other existing Hydro One rate classes. Among the other rate classes,  
18       hourly load shape data is used to allocate the costs to each individual class.

19  
20       The above steps were repeated for the test year 2021, resulting in 41% of the transmission  
21       charges being allocated to the ST class with the residual 59% being recovered from other  
22       rate classes, including the six new acquired rate classes. Similar to the approach used for  
23       2018, hourly load shape data is used to allocate the costs among the other classes.

24  
25       For rate years 2019 and 2020, the transmission charges are allocated to all rate classes  
26       using the 2018 percentages by rate classes. Similarly, the 2022 transmission charges are  
27       allocated to all rate classes using the 2021 percentages by rate classes.

Witness: Henry Andre

1 Table 14 shows the estimated 2018 and 2021 IESO charges allocated to the customer  
2 classes. Since the data in Table 14 will be impacted by changes to the UTR, Hydro One  
3 proposes to provide an update to the table below as part of the Draft Rate Order process  
4 for subsequent years of the Custom IR period.

Witness: Henry Andre

1     **8.4     PROPOSED 2018 TO 2022 RTSR**

2  
3     The transmission charges allocated to each rate class shown in Table 14 are divided by  
4     the corresponding loss-adjusted billing parameters for each class, resulting in the  
5     proposed 2018 and 2021 RTSR rates shown in Table 15. Table 15 also shows the  
6     currently approved RTSR for Hydro One and the Acquired Utilities.

7  
8     Similar to Table 14, the data in Table 15 will also be impacted by changes to the UTR.  
9     As such, Hydro One proposes to provide an update to the tables below as part of the Draft  
10    Rate Order process for subsequent years of the Custom IR period.

11  
12    Energy-billed customers will be charged RTSR applied to metered quantities uplifted for  
13    losses. Demand-billed customers will be charged the rates shown, uplifted for losses.  
14    For customers that installed load displacement generation after October 1998, the RTSR  
15    connection charge is billed on gross demand consistent with section 11.3.2.5 of the  
16    Distribution Rate Handbook.

**Table 15: Proposed 2018 and 2021 RTSR**

RATECLASS	Approved 2017 Rates		Proposed 2018 Rates		Proposed 2021 Rates	
	Network	Line Connection	Network	Line Connection	Network	Line Connection
Urban Residential (\$/kWh)	0.0067	0.0047	0.0078	0.0064	0.0077	0.0063

Acquired Urban General Service energy (\$/kWh)	0.0065	0.0053			0.0056	0.0046
Acquired Urban General Service demand (\$/kW)	2.6779	2.1539			1.7785	1.4393
Acquired Residential (\$/kWh)	0.0067	0.0024			0.0071	0.0060
Acquired General Service energy (\$/kWh)	0.0061	0.0040			0.0053	0.0044
Acquired General Service demand (\$/kW)	2.3798	1.5785			1.7498	1.4296

For customer classes that do not have separate proposed Line and Transformation charges, the Line Connection charges shown include Transformation charges.

Approved 2017 RTSRs for Acquired Urban rate classes are approved 2017 RTSRs for customers formerly served by Woodstock Hydro. Approved 2017 RTSRs for the other Acquired rate classes are represented as a weighted average of the approved 2017 RTSRs for the customers formerly served by Haldimand County Hydro and Norfolk Power.

Details of the derivation of the proposed RTSRs are provided in Excel format as Attachments 1 (2018) and 2 (2021) to this Exhibit.

Witness: Henry Andre

## PROPOSED RATE SCHEDULES 2018

**Hydro One Networks Inc.**  
**TARIFF OF RATES AND CHARGES**  
**Effective and Implementation Date January 1, 2018**  
**This schedule supersedes and replaces all previously**  
**approved schedules of Rates, Charges and Loss Factors**

## **RESIDENTIAL SERVICE CLASSIFICATIONS**

A year-round residential customer classification applies to a customer's main place of abode and may include additional buildings served through the same meter, provided they are not rental income units. All of the following criteria must be met:

1. Occupant represents and warrants to Hydro One Networks Inc. that for so long as he/she has year-round residential rate status for the identified dwelling, he/she will not designate another property that he/she owns as a year-round residence for purposes of Hydro One rate classification.
2. Occupier must live in this residence for at least four (4) days of the week for eight (8) months of the year and the Occupier must not reside anywhere else for more than three (3) days a week during eight (8) months of the year.
3. The address of this residence must appear on documents such as the occupant's electric bill, driver's licence, credit card invoice, property tax bill, etc.
4. Occupants who are eligible to vote in Provincial or Federal elections must be enumerated for this purpose at the address of this residence.

Seasonal Residential customer classification is defined as any residential service that does not meet residential year-round criteria. It includes dwellings such as cottages, chalets and camps.

Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## **APPLICATION**

Hydro One Networks' residential service area is sub-divided into three density zones according to the following:

- Urban Density Zone is defined as areas containing 3,000 or more customers with a line density of at least 60 customers per circuit kilometer.
- Medium Density Zone is defined as areas containing 100 or more customers with a line density of at least 15 customers per circuit kilometer.
- Low Density Zone is defined as areas other than Urban or Medium Density Zone.

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

# Hydro One Networks Inc.

**Effective and Implementation Date January 1, 2018**  
**This schedule supersedes and replaces all previously**  
**approved schedules of Rates, Charges and Loss Factors**

**ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

In addition to the charges specified on the preceding Residential Service Classification pages of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

**APPLICATION**

The application of the credits is in accordance with the Distribution System Code (Section 9) and subsection 79.2 of the Ontario Energy Board Act, 1998.

The application of these credits shall be in accordance with the License of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

“Aboriginal person” includes a person who is a First Nations person, a Métis person or an Inuit person; “account-holder” means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

“electricity-intensive medical device” means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

“household” means the account-holder and any other people living at the accountholder’s service address for at least six months in a year, including people other than the account-holder’s spouse, children or other relatives;

“household income” means the combined annual after-tax income of all members of a household aged 16 or over;

**MONTHLY RATES AND CHARGES**

**Class A**

- (a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;
  - (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;
  - (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons;
  - (d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons;
- but does not include account-holders in Class E.

### Effective and Implementation Date January 1, 2018

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

## ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

### Class D

- (a) account-holders with a household income of \$28,000 or less living in a household of five persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;  
but does not include account-holders in Class H.

OESP Credit \$ (51.00)

### Class E

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (52.00)

### Class F

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or  
(c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:

- i. the dwelling to which the account relates is heated primarily by electricity;  
ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or  
iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (57.00)

### Class G

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

### Class H

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (63.00)

### Class I

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

**Effective and Implementation Date January 1, 2018**  
**This schedule supersedes and replaces all previously**  
**approved schedules of Rates, Charges and Loss Factors**

## **GENERAL SERVICE CLASSIFICATIONS**

General Service classification applies to any service that does not fit the description of residential classes. It includes combination type services where a variety of uses are made of the service by the owner of one property, and all multiple services except residential. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

Hydro One Networks' General Service area is sub-divided into two density zones according to the following:

- Urban Density Zone is defined as areas containing 3,000 or more customers with a line density of at least 60 customers per circuit kilometer.
- Non-Urban Density Zone is defined as areas other than Urban Density Zone.

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

The rate rider for the disposition of WMS – Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2018

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## SUB TRANSMISSION – ST

This classification applies to either:

- Embedded supply to Local Distribution Companies (LDCs). “Embedded” meaning receiving supply via Hydro One Distribution assets, and where Hydro One is the host distributor to the embedded LDC. Situations where the LDC is supplied via Specific Facilities are included. OR
- Load which:
  - is three-phase; and
  - is directly connected to and supplied from Hydro One Distribution assets between 44 kV and 13.8 kV inclusive; the meaning of “directly” includes Hydro One not owning the local transformation; and
  - is greater than 500 kW (monthly measured maximum demand averaged over the most recent calendar year or whose forecasted monthly average demand over twelve consecutive months is greater than 500 kW).

Hydro One establishes billing determinants for demand customers’ Distribution charges at the greater of 100 per cent of kW and 90 per cent of kVA where kVA metering is installed. When a customer’s power factor is known to be less than 90 per cent, a kVA meter or other equivalent electronic meter shall be used for measuring and billing.

Class A and Class B consumers are defined in accordance with O. Reg. 429/04.

### MONTHLY RATES AND CHARGES – Delivery Component

## **UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION**

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. The amount of electricity consumed by unmetered connections will be based on detailed information/documentation provided by the device's manufacturer and will be agreed to by Hydro One and the customer and may be subject to periodic monitoring of actual consumption. Eligible unmetered loads include cable TV amplifiers, bus shelters, telephone booths, traffic signals, railway crossings and other small fixed loads. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2018

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## SENTINEL LIGHTING SERVICE CLASSIFICATION

This rate is applicable to all Hydro One Networks' customers who have separate service to a sentinel light. The energy consumption for sentinel lights is estimated based on Networks' profile for sentinel lighting load, which provides the amount of time each month that the sentinel lights are operating. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2018

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

## STREET LIGHTING SERVICE CLASSIFICATION

This rate is applicable to all Hydro One Networks' customers who have streetlights, which are devices owned by or operated for a road authority and/or municipal corporation. The energy consumption for street lights is estimated based on Networks' profile for street lighting load, which provides the amount of time each month that the street lights are operating. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES – Delivery Component

Service Charge	\$	4.07
Rate Rider for Disposition of Deferral/Variance Accounts (2018) – effective until December 31, 2018	\$	0.01
Distribution Volumetric Rate	\$/kWh	0.0976
Rate Rider for Disposition of Deferral/Variance Accounts (2018) – effective until December 31, 2018	\$/kWh	(0.00005)
Rate Rider for Disposition of Deferral/Variance Accounts (2018) – effective until December 31, 2018	\$/kWh	0.00004

### Effective and Implementation Date January 1, 2018

This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors

## ALLOWANCES

### CUSTOMER-SUPPLIED TRANSFORMATION ALLOWANCE

Applicable to customers providing their own transformers and the primary voltage is under 50 kV

Demand Billed - per kW of billing demand/month	\$/kW	(0.60)
Energy Billed – per kWh of billing energy/month	\$/kWh	(0.0014)

### TRANSFORMER LOSS ALLOWANCE

Applicable to non-ST customers requiring a billing adjustment for transformer losses as the result of being metered on the primary side of a transformer. The following uniform values shall be applied to measured demand and energy to calculate transformer losses for voltages up to and including 50 kV (as metered on the primary side).

For installations up to and including bank capacity of 400 kVA	%	(1.5)
For bank capacities over 400 kVA	%	(1.0)

Applicable to ST customers requiring a billing adjustment for transformer losses as the result of being metered on the secondary side of a transformer. The uniform value of 1 % shall be added to measured demand and energy (as measured on the secondary side) to adjust for transformer losses.

Alternately, transformer losses may be determined from transformer test data, and measured demand and energy adjusted accordingly.

For services which are not demand metered, an assumed demand of 50% of the transformer capacity will be used to calculate the loss allowance. Where several transformers are involved, the bank capacity is assumed to be the arithmetic sum of all transformer capacities.

## LOSS FACTORS

Residential - UR	1.057

## **TARIFF OF RATES AND CHARGES**

### **Effective and Implementation Date January 1, 2018**

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

#### NOTES

1. The basis of the charge is the customer's monthly maximum demand. For an ST customer with multiple delivery points served from the same Transformer Station or High Voltage Distribution Station, the aggregated demand will be the applicable billing determinant. Demand is not aggregated between stations.
2. The basis of the charge is the customer's monthly maximum demand. For an ST customer with multiple delivery points served from the same Transformer Station or High Voltage Distribution Station, the aggregated demand will be the applicable billing determinant. Demand is not aggregated between stations.
3. The basis of the charge is the "non-coincident demand" at each delivery point of the customer supplied by the station. This is measured as the kW demand at the delivery point at the time in the month of maximum load on the delivery point. For a customer connected through two or more distribution stations, the total charge for the connection to the shared distribution stations is the sum of the relevant charges for each of the distribution stations.
4. The monthly billing determinant for the RTSR Network Service rate is:
  - a. For energy-only metered customers: the customer's metered energy consumption adjusted by the total loss factor as approved by the Ontario Energy Board.
  - b. For interval-metered customers: the peak demand from 7 AM to 7 PM (local time) on IESO business days in the billing period. The rates shown are to be adjusted by the total loss factor as approved by the Ontario Energy Board.
  - c. For non-interval-metered demand billed customers: the non-coincident peak demand in the billing period. The rates shown are to be adjusted by the total loss factor as approved by the Ontario Energy Board.
5. The monthly billing determinant for the RTSR Line and Transformation Connection Service rates is:
  - a. For energy-only metered customers: the customer's metered energy consumption adjusted by the total loss factor as approved by the Ontario Energy Board.  
For all demand billed customers: the non-coincident peak demand in the billing period. The rates shown are to be adjusted by the total loss factor as approved by the Ontario Energy Board.
  - b. For customers with load displacement generation above 1 MW, or 2 MW for renewable generation, installed after October 1998, RTSR connection is billed at the gross demand level.
6. Delivery point with respect to RTSR is defined as the low side of the Transformer Station that steps down voltage from above 50 kV to below 50 kV. For customer with multiple interval-metered delivery points served from the same Transformer Station, the aggregated demand at the said delivery points on the low side of the Transformer Station will be the applicable billing determinant.
7. The loss factors, and which connection service rates are applied, are determined based on the point at which the distribution utility or customer is metered for its connection to Hydro One Distribution's system. Hydro One Distribution's connection agreements with these distribution utilities and customers will establish the appropriate loss factors and connection rates to apply from Hydro One Distribution's tariff schedules.
8. The Common ST Lines rate also applies to the supply to Distributors which use lines in the 12.5 kV to 4.16 kV range from HVDSs or LVDSs.
9. Rate Rider for Disposition of Deferral/Variance Accounts (General) is charged based on appropriate billing kW.
10. Rate Rider for Disposition of Deferral/Variance Account (non-WMP customers) applies to non-WMP Class A or Class B customers.
11. The Meter charge is applied per metering facility at delivery points for which Hydro One owns the metering.
12. The Wholesale Market Service Rate, the Rural or Remote Electricity Rate Protection Charge and the Ontario Electricity Support Program Charge are applied solely to non-Wholesale Market Participants. For Class A customers, distributors shall bill the actual CBDR costs to Class A customers in proportion to their contribution to peak. These rates pertain to the IESO's defined point of sale; consequently, appropriate loss factors as approved by the Ontario Energy Board must be applied to the customers metered energy.
13. For customers with load displacement generation at 1MW or above, or 2 MW or above for renewable generation, installed after October 1998, the ST volumetric charges are billed at the gross demand level.

## **CURRENT RATE SCHEDULES**

Included in this Exhibit are the current OEB-approved Tariffs of Rates and Charges for Hydro One Networks Inc. and the Acquired Utilities. The Tariffs of Rates and Charges are included as follows:

- Attachment 1: Hydro One Networks Inc.
- Attachment 2: Norfolk Power Distribution Inc.
- Attachment 3: Haldimand County Hydro Inc.
- Attachment 4: Woodstock Hydro Services Inc.

The Tariff of Rates and Charges for Hydro One Networks Inc. is included as approved in EB-2016-0081. The Tariffs of Rates and Charges for the Acquired Utilities are included as approved in EB-2016-0082.

## **RESIDENTIAL SERVICE CLASSIFICATIONS**

A year-round residential customer classification applies to a customer's main place of abode and may include additional buildings served through the same meter, provided they are not rental income units. All of the following criteria must be met:

1. Occupant represents and warrants to Hydro One Networks Inc. that for so long as he/she has year-round residential rate status for the identified dwelling, he/she will not designate another property that he/she owns as a year-round residence for purposes of Hydro One rate classification.
2. Occupier must live in this residence for at least four (4) days of the week for eight (8) months of the year and the Occupier must not reside anywhere else for more than three (3) days a week during eight (8) months of the year.
3. The address of this residence must appear on documents such as the occupant's electric bill, driver's licence, credit card invoice, property tax bill, etc.
4. Occupants who are eligible to vote in Provincial or Federal elections must be enumerated for this purpose at the address of this residence.

Seasonal Residential customer classification is defined as any residential service that does not meet residential year-round criteria. It includes dwellings such as cottages, chalets and camps.

Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## **APPLICATION**

Hydro One Networks' residential service area is sub-divided into three density zones according to the following:

- Urban Density Zone is defined as areas containing 3,000 or more customers with a line density of at least 60 customers per circuit kilometer.
- Medium Density Zone is defined as areas containing 100 or more customers with a line density of at least 15 customers per circuit kilometer.
- Low Density Zone is defined as areas other than Urban or Medium Density Zone.

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

**EB-2016-0081**

## ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

In addition to the charges specified on the preceding Residential Service Classification pages of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

### APPLICATION

The application of the credits is in accordance with the Distribution System Code (Section 9) and subsection 79.2 of the Ontario Energy Board Act, 1998.

The application of these credits shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

“Aboriginal person” includes a person who is a First Nations person, a Métis person or an Inuit person; “account-holder” means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

“electricity-intensive medical device” means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

“household” means the account-holder and any other people living at the accountholder’s service address for at least six months in a year, including people other than the account-holder’s spouse, children or other relatives;

“household income” means the combined annual after-tax income of all members of a household aged 16 or over;

### MONTHLY RATES AND CHARGES

#### Class A

- (a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;
  - (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;
  - (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons;
  - (d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons;
- but does not include account-holders in Class E.

OESP Credit \$ (30.00)

#### Class B

- (a) account-holders with a household income of \$28,000 or less living in a household of three persons;
  - (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of four persons;
  - (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of six persons;
- but does not include account-holders in Class F.

OESP Credit \$ (34.00)

#### Class C

- (a) account-holders with a household income of \$28,000 or less living in a household of four persons;
  - (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons;
  - (c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more persons;
- but does not include account-holders in Class G.

OESP Credit \$ (38.00)

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

**EB-2016-0081**

## ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

### **Class D**

- (a) account-holders with a household income of \$28,000 or less living in a household of five persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;  
but does not include account-holders in Class H.

OESP Credit \$ (42.00)

### **Class E**

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (45.00)

### **Class F**

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or  
(c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:

- i. the dwelling to which the account relates is heated primarily by electricity;  
ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or  
iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (50.00)

### **Class G**

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (55.00)

### **Class H**

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

### **Class I**

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (75.00)

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors**

**EB-2016-0081**

## GENERAL SERVICE CLASSIFICATIONS

General Service classification applies to any service that does not fit the description of residential classes. It includes combination type services where a variety of uses are made of the service by the owner of one property, and all multiple services except residential. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

Hydro One Networks' General Service area is sub-divided into two density zones according to the following:

- Urban Density Zone is defined as areas containing 3,000 or more customers with a line density of at least 60 customers per circuit kilometer.
- Non-Urban Density Zone is defined as areas other than Urban Density Zone.

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

The rate rider for the disposition of WMS – Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors**

#### SUB TRANSMISSION – ST

This classification applies to either:

- Embedded supply to Local Distribution Companies (LDCs). “Embedded” meaning receiving supply via Hydro One Distribution assets, and where Hydro One is the host distributor to the embedded LDC. Situations where the LDC is supplied via Specific Facilities are included. OR
- Load which:
  - is three-phase; and
  - is directly connected to and supplied from Hydro One Distribution assets between 44 kV and 13.8 kV inclusive; the meaning of “directly” includes Hydro One not owning the local transformation; and
  - is greater than 500 kW (monthly measured maximum demand averaged over the most recent calendar year or whose forecasted monthly average demand over twelve consecutive months is greater than 500 kW).

Hydro One establishes billing determinants for demand customers' Distribution charges at the greater of 100 per cent of kW and 90 per cent of kVA where kVA metering is installed. When a customer's power factor is known to be less than 90 per cent, a kVA meter or other equivalent electronic meter shall be used for measuring and billing.

Class A and Class B consumers are defined in accordance with O. Reg. 429/04.

#### MONTHLY RATES AND CHARGES – Delivery Component

Service Charge	\$	492.55
Rate Rider for Disposition of Deferral/Variance Accounts (2017) – effective until December 31, 2017	\$	11.86
Meter Charge (for Hydro One ownership) (see Note 11)	\$	764.01
Facility Charge for connection to Common ST Lines (44 kV to 13.8 kV) (see Notes 1, 8 and 14)	\$/kW	1.2052
Facility Charge for connection to Specific ST Lines (44 kV to 13.8 kV) (see Note 2)	\$/km	812.8973

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. The amount of electricity consumed by unmetered connections will be based on detailed information/documentation provided by the device's manufacturer and will be agreed to by Hydro One and the customer and may be subject to periodic monitoring of actual consumption. Eligible unmetered loads include cable TV amplifiers, bus shelters, telephone booths, traffic signals, railway crossings and other small fixed loads. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES – Delivery Component

Service Charge	\$	35.18
Rate Rider for Disposition of Deferral/Variance Accounts (2017) – effective until December 31, 2017	\$	0.51
Rate Rider for Disposition of Global Adjustment Account (2017) – effective until December 31, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## SENTINEL LIGHTING SERVICE CLASSIFICATION

This rate is applicable to all Hydro One Networks' customers who have separate service to a sentinel light. The energy consumption for sentinel lights is estimated based on Networks' profile for sentinel lighting load, which provides the amount of time each month that the sentinel lights are operating. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES – Delivery Component

Service Charge	\$	2.71
Rate Rider for Disposition of Deferral/Variance Accounts (2017) – effective until December 31, 2017	\$	0.05
Distribution Volumetric Rate	\$/kWh	0.1178
Rate Rider for Disposition of Deferral/Variance Accounts (2017) – effective until December 31, 2017	\$/kWh	0.0009
Rate Rider for Disposition of Global Adjustment Account (2017) – effective until December 31, 2017		
Applicable only for Non-RPP Customers (see Note 13)	\$/kWh	(0.0010)
Retail Transmission Rate – Network Service Rate (see Note 4)	\$/kWh	0.0045
Retail Transmission Rate – Line and Transformation Connection Service Rate (see Note 5)	\$/kWh	0.0027

### MONTHLY RATES AND CHARGES – Regulatory Component

Wholesale Market Service Rate - not including Capacity Based Recovery (see Note 12)	\$/kWh	0.0032
Capacity Based Recovery (CBR) – applicable for Class B customers (see Note 12)	\$/kWh	0.0004
Rural or Remote Electricity Rate Protection Charge (RRRP) (see Note 12)	\$/kWh	0.0021
Ontario Electricity Support Program Charge (OESP) (see Note 12)	\$/kWh	0.0011
Standard Supply Service – Administrative Charge (if applicable)	\$	0.25

# Hydro One Networks Inc.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors**

## STREET LIGHTING SERVICE CLASSIFICATION

This rate is applicable to all Hydro One Networks' customers who have streetlights, which are devices owned by or operated for a road authority and/or municipal corporation. The energy consumption for street lights is estimated based on Networks' profile for street lighting load, which provides the amount of time each month that the street lights are operating. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, it should be noted that the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES – Delivery Component

Service Charge	\$	4.25
Rate Rider for Disposition of Deferral/Variance Accounts (2017) – effective until December 31, 2017	\$	0.08
Distribution Volumetric Rate	\$/kWh	0.0924
Rate Rider for Disposition of Deferral/Variance Accounts (2017) – effective until December 31, 2017	\$/kWh	0.0007
Rate Rider for Disposition of Global Adjustment Account (2017) – effective until December 31, 2017

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## ALLOWANCES

### CUSTOMER-SUPPLIED TRANSFORMATION ALLOWANCE

Applicable to customers providing their own transformers and the primary voltage is under 50 kV

Demand Billed - per kW of billing demand/month	\$/kW	(0.60)
Energy Billed – per kWh of billing energy/month	\$/kWh	(0.0014)

### TRANSFORMER LOSS ALLOWANCE

Applicable to non-ST customers requiring a billing adjustment for transformer losses as the result of being metered on the primary side of a transformer. The following uniform values shall be applied to measured demand and energy to calculate transformer losses for voltages up to and including 50 kV (as metered on the primary side).

For installations up to and including bank capacity of 400 kVA	%	(1.5)
For bank capacities over 400 kVA	%	(1.0)

Applicable to ST customers requiring a billing adjustment for transformer losses as the result of being metered on the secondary side of a transformer. The uniform value of 1 % shall be added to measured demand and energy (as measured on the secondary side) to adjust for transformer losses.

Alternately, transformer losses may be determined from transformer test data, and measured demand and energy adjusted accordingly.

For services which are not demand metered, an assumed demand of 50% of the transformer capacity will be used to calculate the loss allowance. Where several transformers are involved, the bank capacity is assumed to be the arithmetic sum of all transformer capacities.

## LOSS FACTORS

Residential - UR	1.057
Residential - R1	1.076
Residential - R2	1.105
Residential - Seasonal	1.104

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

## RETAIL SERVICE CHARGES (if applicable)

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	100.00
Monthly Fixed Charge, per retailer	\$	20.00
Monthly Variable Charge, per customer, per retailer	\$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.25
Processing fee, per request, applied to the requesting party	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

# Hydro One Networks Inc.

## TARIFF OF RATES AND CHARGES

### Effective and Implementation Date January 1, 2017

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

#### NOTES:

- (1) The basis of the charge is the customer's monthly maximum demand. For a customer with multiple delivery points served from the same Transformer Station or High Voltage Distribution Station, the aggregated demand will be the applicable billing determinant. Demand is not aggregated between stations.
- (2) The basis of the charge is kilometers of line, within the supplied LDC's service area, supplying solely that LDC.
- (3) The basis of the charge is the "non-coincident demand" at each delivery point of the customer supplied by the station. This is measured as the kW demand at the delivery point at the time in the month of maximum load on the delivery point. For a customer connected through two or more distribution stations, the total charge for the connection to the shared distribution stations is the sum of the relevant charges for each of the distribution stations.
- (4) The monthly billing determinant for the RTSR Network Service rate is:
  - for energy-only metered customers: the customer's metered energy consumption adjusted by the total loss factor as approved by the Ontario Energy Board.
  - for interval-metered customers: the peak demand from 7 AM to 7 PM (local time) on IESO business days in the billing period. The rates shown are to be adjusted by the total loss factor as approved by the Ontario Energy Board.
  - for non-interval-metered demand billed customers: the non-coincident peak demand in the billing period. The rates shown are to be adjusted by the total loss factor as approved by the Ontario Energy Board.
- (5) (a) The monthly billing determinant for the RTSR Line and Transformation Connection Service rates is:
  - for energy-only metered customers: the customer's metered energy consumption adjusted by the total loss factor as approved by the Ontario Energy Board.
  - for all demand billed customers: the non-coincident peak demand in the billing period. The rates shown are to be adjusted by the total loss factor as approved by the Ontario Energy Board.
 (b) For customers with load displacement generation above 1 MW, or 2 MW for renewable generation, installed after October 1998, RTSR connection is billed at the gross demand level.
- (6) Delivery point with respect to RTSR is defined as the low side of the Transformer Station that steps down voltage from above 50 kV to below 50 kV. For customer with multiple interval-metered delivery points served from the same Transformer Station, the aggregated demand at the said delivery points on the low side of the Transformer Station will be the applicable billing determinant.
- (7) The loss factors, and which connection service rates are applied, are determined based on the point at which the distribution utility or customer is metered for its connection to Hydro One Distribution's system. Hydro One Distribution's connection agreements with these distribution utilities and customers will establish the appropriate loss factors and connection rates to apply from Hydro One Distribution's tariff schedules.
- (8) The Common ST Lines rate also applies to the supply to Distributors which use lines in the 12.5 kV to 4.16 kV range from HVDSs or LVDSs.
- (9) Rate Rider for Disposition of Deferral/Variance Accounts (General) is charged based on appropriate billing kW.
- (10) Rate Rider for Disposition of Deferral/Variance Account (Wholesale Market Service Rate) applies to those customers who were charged Wholesale Market Service Charges by Hydro One Distribution.
- (11) The Meter charge is applied per metering facility at delivery points for which Hydro One owns the metering.
- (12) The Wholesale Market Service Rate, the Rural or Remote Electricity Rate Protection Charge and the Ontario Electricity Support Program Charge are applied solely to non-Wholesale Market Participants. For Class A customers, distributors shall bill the actual CBDR costs to Class A customers in proportion to their contribution to peak. These rates pertain to the IESO's defined point of sale; consequently, appropriate loss factors as approved by the Ontario Energy Board must be applied to the customers metered energy.
- (13) The Global Adjustment rate rider applies to the non-LDC, non-RPP and Class B ST customers that were charged Wholesale Market Service Charges by Hydro One Distribution.
- (14) For customers with load displacement generation at 1MW or above, or 2 MW or above for renewable generation, installed after October 1998, the ST volumetric charges are billed at the gross demand level.

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

EB-2016-0082

## RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES – Delivery Component

Service Charge	\$	28.81

## **ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

### **APPLICATION**

The application of the credits is in accordance with the Distribution System Code (Section 9) and subsection 79.2 of the Ontario Energy Board Act, 1998.

The application of these credits shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

“Aboriginal person” includes a person who is a First Nations person, a Métis person or an Inuit person;  
“account-holder” means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;  
“electricity-intensive medical device” means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;  
“household” means the account-holder and any other people living at the accountholder’s service address for at least six months in a year, including people other than the account-holder’s spouse, children or other relatives;  
“household income” means the combined annual after-tax income of all members of a household aged 16 or over;

### **MONTHLY RATES AND CHARGES**

#### **Class A**

(a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;  
(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons;  
(d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons;  
but does not include account-holders in Class E.

OESP Credit \$ (30.00)

#### **Class B**

(a) account-holders with a household income of \$28,000 or less living in a household of three persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of four persons;  
(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of six persons;  
but does not include account-holders in Class F.

OESP Credit \$ (34.00)

#### **Class C**

(a) account-holders with a household income of \$28,000 or less living in a household of four persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons;  
(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more persons;  
but does not include account-holders in Class G.

OESP Credit \$ (38.00)

## **ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

### **Class D**

(a) account-holders with a household income of \$28,000 or less living in a household of five persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;  
but does not include account-holders in Class H.

OESP Credit \$ (42.00)

### **Class E**

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

(a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (45.00)

### **Class F**

(a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or  
(c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:

i. the dwelling to which the account relates is heated primarily by electricity;  
ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or  
iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (50.00)

### **Class G**

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

(a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (55.00)

### **Class H**

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

(a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

### **Class I**

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

(a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

## **GENERAL SERVICE LESS THAN 50 kW SERVICE CLASSIFICATION**

This classification applies to a non residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### **MONTHLY RATES AND CHARGES – Delivery Component**

## **GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION**

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to a customer's main place of abode and may include additional buildings served through the same meter, provided they are not rental income units. Residential includes Urban, Suburban and Farm customer's premises which can be occupied on a year-round and seasonal basis. Farm applies to properties actively engaged in agricultural production as defined by Statistics Canada. These premises must be supplied from a single phase primary line. The farm definition does not include tree, sod, or pet farms. Services to year-round pumping stations or other ancillary services remote from the main farm shall be classed as farm. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## **ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

### **APPLICATION**

The application of the credits is in accordance with the Distribution System Code (Section 9) and subsection 79.2 of the Ontario Energy Board Act, 1998.

The application of these credits shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

“Aboriginal person” includes a person who is a First Nations person, a Métis person or an Inuit person;

“account-holder” means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

“electricity-intensive medical device” means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

“household” means the account-holder and any other people living at the accountholder’s service address for at least six months in a year, including people other than the account-holder’s spouse, children or other relatives;

“household income” means the combined annual after-tax income of all members of a household aged 16 or over;

### **MONTHLY RATES AND CHARGES**

#### **Class A**

(a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons;

(d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons;  
but does not include account-holders in Class E.

OESP Credit \$ (30.00)

#### **Class B**

(a) account-holders with a household income of \$28,000 or less living in a household of three persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of four persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of six persons;

but does not include account-holders in Class F.

OESP Credit \$ (34.00)

#### **Class C**

(a) account-holders with a household income of \$28,000 or less living in a household of four persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more persons;

but does not include account-holders in Class G.

## **ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

### **Class D**

(a) account-holders with a household income of \$28,000 or less living in a household of five persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;  
but does not include account-holders in Class H.

OESP Credit \$ (42.00)

### **Class E**

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (45.00)

### **Class F**

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;
- (b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or

(c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:

- i. the dwelling to which the account relates is heated primarily by electricity;
- ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or
- iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (50.00)

### **Class G**

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (55.00)

### **Class H**

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

### **Class I**

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;
- (b) the account-holder or any member of the account-holder's household is an Aboriginal person; or
- (c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

## **GENERAL SERVICE LESS THAN 50 kW SERVICE CLASSIFICATION**

General Service does include farms supplied from polyphase primary lines. General Service includes commercial, industrial, educational, administrative, auxiliary and government services. It also includes combination services where a variety of uses are made of the service by the owner of one property. This classification applies to a non-residential account whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### **MONTHLY RATES AND CHARGES – Delivery Component**

Service Charge	\$	26.94
Rate Rider per Hydro One Networks' Acquisition Agreement – effective until June 30, 2020	\$	(0.27)

## **GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION**

General Service does include farms supplied from polyphase primary lines. General Service includes commercial, industrial, educational, administrative, auxiliary and government services. It also includes combination services where a variety of uses are made of the service by the owner of one property. This classification applies to a non-residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## **UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION**

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## **RETAIL SERVICE CHARGES (if applicable)**

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	100.00
Monthly Fixed Charge, per retailer	\$	20.00
Monthly Variable Charge, per customer, per retailer	\$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.25
Processing fee, per request, applied to the requesting party	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year		no charge
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

## **LOSS FACTORS**

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor – Secondary Metered Customer < 5,000 kW	1.0655
Total Loss Factor – Primary Metered Customer < 5,000 kW	1.0548
Total Loss Factor – Embedded Distributor – Hydro One Networks Inc.	1.0288

## RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES – Delivery Component

## **ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS**

In addition to the charges specified on page 1 of this tariff of rates and charges, the following credits are to be applied to eligible residential customers.

### **APPLICATION**

The application of the credits is in accordance with the Distribution System Code (Section 9) and subsection 79.2 of the Ontario Energy Board Act, 1998.

The application of these credits shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

In this class:

“Aboriginal person” includes a person who is a First Nations person, a Métis person or an Inuit person;

“account-holder” means a consumer who has an account with a distributor that falls within a residential-rate classification as specified in a rate order made by the Ontario Energy Board under section 78 of the Act, and who lives at the service address to which the account relates for at least six months in a year;

“electricity-intensive medical device” means an oxygen concentrator, a mechanical ventilator, or such other device as may be specified by the Ontario Energy Board;

“household” means the account-holder and any other people living at the accountholder’s service address for at least six months in a year, including people other than the account-holder’s spouse, children or other relatives;

“household income” means the combined annual after-tax income of all members of a household aged 16 or over;

### **MONTHLY RATES AND CHARGES**

#### **Class A**

(a) account-holders with a household income of \$28,000 or less living in a household of one or two persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of three persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of five persons;

(d) account-holders with a household income of between \$48,001 and \$52,000 living in a household of seven or more persons;

but does not include account-holders in Class E.

OESP Credit \$ (30.00)

#### **Class B**

(a) account-holders with a household income of \$28,000 or less living in a household of three persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of four persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of six persons;

but does not include account-holders in Class F.

OESP Credit \$ (34.00)

#### **Class C**

(a) account-holders with a household income of \$28,000 or less living in a household of four persons;

(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of five persons;

(c) account-holders with a household income of between \$39,001 and \$48,000 living in a household of seven or more persons;

but does not include account-holders in Class G.

OESP Credit \$ (38.00)

## ONTARIO ELECTRICITY SUPPORT PROGRAM RECIPIENTS

### Class D

- (a) account-holders with a household income of \$28,000 or less living in a household of five persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of six persons;  
but does not include account-holders in Class H.

OESP Credit \$ (42.00)

### Class E

Class E comprises account-holders with a household income and household size described under Class A who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (45.00)

### Class F

- (a) account-holders with a household income of \$28,000 or less living in a household of six or more persons;  
(b) account-holders with a household income of between \$28,001 and \$39,000 living in a household of seven or more persons; or  
(c) account-holders with a household income and household size described under Class B who also meet any of the following conditions:

- i. the dwelling to which the account relates is heated primarily by electricity;  
ii. the account-holder or any member of the account-holder's household is an Aboriginal person; or  
iii. the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (50.00)

### Class G

Class G comprises account-holders with a household income and household size described under Class C who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (55.00)

### Class H

Class H comprises account-holders with a household income and household size described under Class D who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

OESP Credit \$ (60.00)

### Class I

Class I comprises account-holders with a household income and household size described under paragraphs (a) or (b) of Class F who also meet any of the following conditions:

- (a) the dwelling to which the account relates is heated primarily by electricity;  
(b) the account-holder or any member of the account-holder's household is an Aboriginal person; or  
(c) the account-holder or any member of the account-holder's household regularly uses, for medical purposes, an electricity-intensive medical device at the dwelling to which the account relates.

**This schedule supersedes and replaces all previously  
approved schedules of Rates, Charges and Loss Factors**

EB-2016-0082

## **microFIT SERVICE CLASSIFICATION**

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### **MONTHLY RATES AND CHARGES – Delivery Component**

Service Charge	\$	5.40

## ALLOWANCES

Transformer Allowance for Ownership - per kW of billing demand/month	\$/kW	(0.60)
Primary Metering Allowance for transformer losses – applied to measured demand and energy	%	(1.00)

## SPECIFIC SERVICE CHARGES

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### Customer Administration

Notification charge	\$	15.00
Returned cheque charge (plus bank charges)	\$	15.00
Legal letter charge	\$	15.00
Account set up charge / change of occupancy charge (plus credit agency costs if applicable)	\$	30.00
Meter dispute charge plus Measurement Canada fees (if meter found correct)	\$	30.00
Statement of account	\$	15.00
Account history	\$	15.00

#### Non-Payment of Account

Late payment - per month	%	1.50
Late payment - per annum	%	19.56
Collection of account charge – no disconnection	\$	30.00
Disconnect/reconnect at meter – during regular hours	\$	65.00
Disconnect/reconnect at meter – after regular hours	\$	185.00
Install / remove load control device – during regular hours	\$	65.00
Install / remove load control device – after regular hours	\$	185.00

#### Other

Special meter reads	\$	30.00
Specific Charge for Access to the Power Poles – per pole/year (with the exception of wireless attachments)	\$	22.35

## **RETAIL SERVICE CHARGES (if applicable)**

### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	100.00
Monthly Fixed Charge, per retailer	\$	20.00
Monthly Variable Charge, per customer, per retailer	\$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.25
Processing fee, per request, applied to the requesting party	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year		no charge
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

## **LOSS FACTORS**

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor – Secondary Metered Customer < 5,000 kW	1.0431
Total Loss Factor – Secondary Metered Customer > 5,000 kW	1.0145
Total Loss Factor – Primary Metered Customer < 5,000 kW	1.0326
Total Loss Factor – Primary Metered Customer > 5,000 kW	1.0044

## **SPECIFIC SERVICE CHARGES**

### **1. INTRODUCTION**

Specific Service Charges are charges for specific services over and above the standard level of service as defined by the Distribution System Code. Each miscellaneous service has an OEB-approved fixed rate and is charged to a customer based on a customer's request or as the result of a customer's action or inaction that would impose a cost on Hydro One.

In its last distribution rate filing (EB-2013-0416), Hydro One proposed rates for miscellaneous services in Exhibit G2, Tab 5, Schedule 1 of that application. The rationale was that regular distribution rates only recover costs of providing standard distribution services. In its Decision issued on March 12, 2015 in relation to EB-2013-0416, the OEB directed Hydro One to file with this Application a study assessing whether its Specific Service Charges reflect its underlying costs to perform those services ("the Time Study") and propose changes accordingly. Hydro One has completed the Time Study and proposes the new charges detailed in this Exhibit.

### **2. THE STUDY**

In response to the OEB's direction, with the support of Elenchus Research Associates Inc., Hydro One completed a year-long time study of the tasks involved in providing miscellaneous services and the associated costs, including labour rates and burdens, fleet costs, material costs and pass-through charges. The charges studied included those included in Chapter 11 of the OEB's *2006 Electricity Distribution Rate Handbook* (the "Rate Handbook").

Hydro One used the approaches found in Chapter 11 of the Rate Handbook to define the level of the charge to bill the customer. The Study details its context and methodology and is included as Attachment 1 to this Exhibit.

### **3. THE PROPOSED SPECIFIC SERVICE CHARGES**

A summary of all the proposed 2018-2022 charges can be found in Table 1 of this Exhibit (Schedule 11-1 of the Rate Handbook). Descriptions of the miscellaneous services (as found in Attachment 1 of this Exhibit) and details of the methodology used to determine the charges are provided in Appendices A and B to this Exhibit. Except where identified, the proposed charges align with the associated labour and materials identified in the Time Study.

In Appendices A and B, the Specific Service Charge for each service is based on average elapsed hours required to carry out the work, as well as burdened labour rates, vehicle costs, and material. Refer to Exhibit E1, Tab 1, Schedule 2, and Table 2 of this Exhibit (“Capital Contributions”) for a summary of the historical volumes along with 2018-2022 forecasted volumes and projected revenues for each service.

Appendix A: Charges listed in Chapter 11 of the 2006 Rate Handbook and updated as per the Time Study.

Appendix B: Hydro One-specific charges, primarily calculated based on labour, as per the Time Study.

Appendix C: Hydro One-specific charges, calculated as per previously approved OEB methodology.

- 1 For the services listed in Appendix C, Specific Service Charges are determined by
- 2 methodologies that take into account the value of assets, volumes of those assets and the
- 3 costs associated with the maintenance of those assets.

**Table 1: Schedule 11-1 Specific Service Charges: Standard Amounts**

(\* indicates charges which reflect the average cost over the forecast period)

OEB Rate Code	Specific Service Charge Standard Name	Calculation Method	Currently Approved Rate	2018 Charge	2019 Charge	2020 Charge	2021 Charge	2022 Charge

\*Data unavailable at the time the Application was originally filed.

## **APPENDIX A**

The charges described in this section are listed in the Rate Handbook. Most of these charges are calculated based on the labour required to perform the work, as per the Time Study.

### **1. SPECIFIC SERVICE CHARGES: STANDARD FORMULAE, UPDATED AMOUNTS**

#### **1.1 SPECIFIC SERVICE CHARGES IN SCHEDULE 11-2(A) OF THE RATE HANDBOOK**

Hydro One determined the costs for these services using the OEB-approved methodology, adjusting for the labour hours and materials reported in the Time Study. It found that the costs to provide some of these services were higher or lower than the charges prescribed by the Handbook.

Hydro One provides a number of customer services described in Appendix A and Schedule 11-2 of the Rate Handbook. For these services, identified by the OEB rate codes 1 to 24 (excluding 6a), Hydro One proposes to charge customers flat fees over the 2018-2022 period in order to align with Hydro One's customer-friendly policies and avoid customer confusion. Furthermore, implementing changes to the following systems and processes on an annual basis would be costly: Hydro One's Customer Information System ("CIS"), customer correspondence, Hydro One's website and self-service portal, agent training, and internal work instructions.

In each case, the proposed fee is an average of the cost to provide the service over the 2018-2022 period, as indicated by the Time Study, rounded down to the nearest

1 dollar. For clarity, external revenue projections (as outlined in Exhibit E1, Tab 1,  
2 Schedule 2) are based on the actual cost to provide the service as indicated by the Time  
3 Study. As such, any corresponding revenue impacts would be borne by Hydro One and  
4 would not affect ratepayers. No cross-subsidy from ratepayers would occur.

5  
6 Hydro One does not offer the following services identified in the Rate Handbook for the  
7 reasons indicated below.

- 8
- 9 1. **Arrears Certificate (Rate Code 1)** – Prior to 2005 and market restructuring, Ontario  
10 Hydro recovered unpaid final bill arrears from property owners through the municipal  
11 property tax roll under the *Public Utilities Act*. Market restructuring brought about the  
12 corporatization of the distribution sector and removed this tool to collect arrears. The  
13 former practice was to provide an "arrears certificate" to the purchaser's solicitor to  
14 advise of any registered hydro liens and a final bill estimate for a hold back of funds if  
15 required. Hydro One no longer offers this service.
  - 16 2. **Pulling Post-Dated Cheques (Rate Code 3)** - Customers may elect to send Hydro One  
17 post-dated cheques at the beginning of the year. Hydro One's systems are unable to  
18 retrieve or pull post-dated cheques. Therefore, Hydro One does not offer this service,  
19 and customers must issue a stop payment on the cheque(s).
  - 20 3. **Notification Charge (Rate Code 8)** - Hydro One is unable to ascertain the definition of  
21 this service and has never charged this fee.
  - 22 4. **Charge to Certify Cheque (Rate Code 12)** – Hydro One does not perform this service.
  - 23 5. **Collection of Account Charge – No Disconnection – After Regular Hours (Rate**  
24 **Code 17)** - Hydro One does not perform collection tasks after regular hours. The cost of  
25 overtime to perform this service after regular hours would add to the underlying costs and  
26 may add further hardship to a customer.

1           **1.1.1    STATEMENT OF ACCOUNT (RATE CODE 2)**

2

3   Statements of account are used to satisfy customer requests for support documentation for  
4   income tax purposes and to satisfy requests for other billing information.

1

1           **1.1.4   EASEMENT LETTERS (RATE CODE 6)**

2  
3   An easement or right-of-way is an agreement that confers on an individual, company or  
4   municipality the right to use a landowner's property in some way. While these agreements  
5   grant rights, they also have the effect of partially restricting an owner's use of the affected  
6   portions of land. The holder (beneficiary or grantee) of an easement or right-of-way holds  
7   certain rights regarding usage of the property described in the agreement. The holder's rights  
8   of use are described and restricted by the agreement. The landowner continues to own the  
9   land and has only given up defined rights on the portion of land used for the right-of-way or  
10   easement. The Hydro One Easement / Real Estate department deals with payments and  
11   issues related to new easement and unregistered easements only. Search for unregistered  
12   easements can be conducted on-line or by sending a letter of request to Hydro One with a  
13   legal description of the property in question.

14  
15                   **1.1.4.1           EASEMENT LETTER – LETTER REQUESTS (RATE**  
16                   **CODE 6A)**

17  
18   Based on the Time Study, the proposal is to increase the easement letter charge (for when the  
19   request is made by letter to the Real Estate department) to the applicable rates as seen in  
20   Table 4.

1

**Table 4: Easement Letters – Letter Requests**

Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/ Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/ Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge
2018	6a	Easement Letters - Letter Requests	Direct Labour - Clerical	\$80.08	0.70		\$56.06	\$30.05		Material	\$0.80	1.00	\$0.80			
			Payroll Burden	53.60%					<b>\$86.10</b>					<b>\$0.80</b>	<b>\$86.90</b>	<b>\$86.90</b>
2019	6a	Easement Letters - Letter Requests	Direct Labour - Clerical	\$81.00	0.70		\$56.70	\$30.79		Material	\$0.80	1.00	\$0.80			
			Payroll Burden	54.30%					<b>\$87.49</b>					<b>\$0.80</b>	<b>\$88.29</b>	<b>\$88.29</b>
2020	6a	Easement Letters - Letter Requests	Direct Labour - Clerical	\$81.96	0.70		\$57.37	\$31.50		Material	\$0.80	1.00	\$0.80			
			Payroll Burden	54.90%					<b>\$88.87</b>					<b>\$0.80</b>	<b>\$89.67</b>	<b>\$89.67</b>

			Payroll Burden	55.60%					<b>\$90.32</b>					<b>\$0.80</b>	<b>\$91.12</b>	<b>\$91.12</b>
2022	6a	Easement Letters - Letter Requests	Direct Labour - Clerical	\$84.20	0.70		\$58.94	\$32.77		Material	\$0.80	1.00	\$0.80			
			Payroll Burden	55.60%					<b>\$91.71</b>					<b>\$0.80</b>	<b>\$92.51</b>	<b>\$92.51</b>

**1.1.4.2 EASEMENT LETTERS – WEB REQUESTS (RATE CODE 6B)**

Hydro One currently charges \$25 for web-based easement searches to cover the costs of web development, maintenance, data updates (i.e. as utilities are acquired), planned enhancements, e-billing services and credit card fees. Hydro One has continued to charge the historical fee of \$25 that Ontario Hydro had been charging for easement letters irrespective of whether it was an easement letter request or self-initiated web inquiry. This provides parties with an equal cost for inquiries irrespective of source option. This fee did not reflect either the true cost of responding to letter inquiries, which based on the Time Study should be a charge of approximately \$90, or the cost to develop the web application.

The initial development cost of the web application was approximately \$500,000 with an annual maintenance cost of \$10,000 to \$20,000 for database management. On a present value basis and considering future enhancements of approximately \$100,000, such as a GIS search interface and expanded payment capabilities, the costs are not estimated to be fully recovered until 2022 at the present rate of \$25 per inquiry. More so, the future enhancements in 2018 are considered key to the forecast for easement letters in the forecast period.

**1.1.5 INCOME TAX LETTERS (RATE CODE 7)**

An income tax letter is usually used to satisfy customer requests for support documentation for income tax purposes.

1

**Table 5: Income Tax Letters**

Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge

			Payroll Burden	55.60%					<b>\$13.10</b>					<b>\$0.80</b>	<b>\$13.90</b>	<b>\$13.00</b>

1           **1.1.6   ACCOUNT HISTORY (RATE CODE 9)**

2

3   Customer requests for account history only occur when there has been a change in the  
4   Hydro One billing system. Customer account information for customers billed through  
5   Hydro One's old retail customer information system until mid-1998 has been archived to  
6   Microfiche. Account history information for customers billed using the Customer  
7   Service System after mid-1998, is archived in Hydro One's Heritage Data Library.

1

1           **1.1.7   CREDIT REFERENCE/CREDIT CHECK (RATE CODE 10)**

2

3   The fee for performing this specific service is charged when a customer requests a credit  
4   reference letter from Hydro One, to be used to show other utilities that they are a  
5   satisfactory credit risk. This may determine whether the customer's security deposit can  
6   be waived or not.

1

**Table 7: Credit Reference/Credit Check**

Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge

			Payroll Burden	55.60%					<b>\$20.96</b>					<b>\$0.00</b>	<b>\$20.96</b>	<b>\$13.00</b>

1           **1.1.8    RETURNED CHEQUE CHARGE (RATE CODE 11)**

2

3   Hydro One charges customers a fee if insufficient funds are available in the account on  
4   which the money was drawn. There are no other pass-through costs; the banks invoice  
5   their fees directly to the customer.

1

**Table 8: Returned Cheque**

Charge Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge

			Payroll Burden	55.60%					<b>\$7.86</b>					<b>\$0.00</b>	<b>\$7.86</b>	<b>\$7.00</b>

1           **1.1.9   LEGAL LETTER CHARGE (RATE CODE 13)**

2  
3   Legal letters are processed for many reasons and may include the requirement for Hydro  
4   One's legal department to do research into the matter. Hydro One proposes that actual  
5   costs, based on time, equipment and materials, be charged for the performance of this  
6   service.

7  
8           **1.1.10   ACCOUNT SET UP CHARGE/CHANGE OF OCCUPANCY**  
9           **CHARGE (RATE CODE 14)**

10  
11   This charge is levied when a new account is set up or an account is transferred from one  
12   person to another. A property owner or occupant requesting to open an account agrees to  
13   be a Hydro One customer and assumes responsibility for distribution service charges  
14   provided to the service address. This process is triggered by a Customer / Landlord  
15   request for a Start / Transfer Contract via phone, fax or e-mail. A new account set up  
16   charge applies to the new accounts and appears on the customer's first electricity bill.  
17   This occurs when a customer is opening a new electricity account or moving from one  
18   Hydro One property to another.

1

**Table 9: Account Set Up Charge/Change of Occupancy Charge**

Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge

			Payroll Burden	55.60%					<b>\$39.30</b>					<b>\$0.00</b>	<b>\$39.30</b>	<b>\$38.00</b>

**1.1.11 SPECIAL METER READS - RETAILER REQUESTED OFF-  
CYCLE READ (RATE CODE 15)**

Where a Service Transfer Request is made, a switch bill will be issued to the customer. This bill will be based on an actual meter read unless the Customer, Hydro One and the Retailer agree in writing to an alternative. The effective date of the service transfer shall be the next scheduled meter reading date unless a request is made for a special meter reading and Hydro One can accommodate the request. In these instances, Hydro One proposes to recover the cost of labour and material by implementing the charge in Table 10.

1

1           **1.1.12     COLLECTION OF ACCOUNT CHARGES**

2  
3     As outlined in Chapter 11 of the Rate Handbook, Section 11.3.2, pursuant to section 31  
4     of the *Electricity Act*, a distributor may consider disconnection of electricity services for  
5     non-payment of account. The collection of account charge is intended to cover the field  
6     costs, or part of the costs, of additional collection activities that are beyond the routine of  
7     a distributor, as a result of an individual customer's non-payment of its account. The  
8     Distribution System Code defines a disconnect/collect trip as, a visit to a customer's  
9     premises by an employee or agent of the distributor to demand payment of any  
10    outstanding amount, or to shut off or limit distribution of electricity to the customer  
11    failing payment. Furthermore, as outlined in Section 11.3.3 of the Rate Handbook, a  
12    distributor may establish a reconnection of electricity service charge. This charge would  
13    recover the costs of the physical process of re-establishing power to the customer.

14  
15           **1.1.12.1       COLLECTION OF ACCOUNT CHARGE - NO**  
16                           **DISCONNECTION - DURING REGULAR HOURS (RATE**  
17                           **CODE 16)**

18  
19    This service covers the field collection activities due to customer non-payment of bill.  
20    The work is initiated by a notification / order. If on arrival at the customer's site, the  
21    customer pays the outstanding balance, no disconnect will occur, however this charge  
22    will still apply to recover the cost of scheduling the visit and the staff making the visit to  
23    the customer's property.

5

6 When a customer has not paid their electricity bill for an extensive period (45 days) of  
7 time, an electricity disconnection notice is issued. If payment is still not received, a  
8 disconnection or the installation of a load limiter is performed. These activities are  
9 performed in accordance with Subsection 31(1) of the *Electricity Act, 1998* which  
10 provides that:

11  
12           *A distributor may shut off the distribution of electricity to a property if any*  
13           *amount payable by a person for the distribution or retail of electricity to*  
14           *the property pursuant to Section 29 is overdue.*

1           **1.1.12.4       COLLECTION OF ACCOUNT CHARGE –**  
2                           **DISCONNECT/RECONNECT AT POLE – DURING**  
3                           **REGULAR HOURS (RATE CODE 22)**  
4

5       When a customer has not paid their electricity bill for an extensive period (45 days)  
6       of time, an Electricity Disconnection Notice is issued. If payment is still not received  
7       a disconnection is performed. At times, a disconnection cannot be performed at the  
8       meter due to type of the meter or the meter is not accessible (e.g. located inside a  
9       locked building), therefore disconnection must be performed at the pole. These  
10      activities are performed in accordance with Subsection 31(1) of the *Electricity Act*,  
11      1998 which provides that:

12  
13      *A distributor may shut off the distribution of electricity to a property if any*  
14      *amount payable by a person for the distribution or retail of electricity to*  
15      *the property pursuant to Section 29 is overdue.*

**1.1.13 METER DISPUTE CHARGE – MEASUREMENT CANADA  
(RATE CODE 24)**

Meter dispute testing is typically the last step in a multi-stage escalation process between the customer and Hydro One. The process typically begins with a customer high bill inquiry, the object of which is to validate that the bill calculations, charges and bill determinants are accurate.

If Hydro One is satisfied with meter operation and accuracy of billing, and the customer is not satisfied, the customer will be referred to Measurement Canada. If the services of Measurement Canada are requested by the customer or retailer to resolve the issue, Hydro One may charge the customer for the costs of processing the application to Measurement Canada and removing and transporting the meter to a testing location. If the dispute is substantiated by Measurement Canada and the resolution is in the favour of the customer, Hydro One shall bear such costs.

The charges in Table 16 below only recover the work performed by Hydro One. Measurement Canada may charge an additional fee.

1 **Table 16: Meter Dispute Charge – Measurement Canada**

1           **1.1.14   SERVICE CALL - CUSTOMER OWNED EQUIPMENT –**

2                           **DURING/AFTER REGULAR HOURS (RATE CODE 25 & 26)**

3  
4   If Hydro One determines that the cause of a power issue is related to the customer-owned  
5   equipment, Hydro One crews may perform corrective service at the customer's request. The  
6   Specific Service Charge for Rate Code 25 covers only the administration and travel costs of  
7   this service. It does not cover any work associated with work on the customer-owned  
8   equipment, as it applies whether Hydro One crews work on the customer-owned equipment  
9   or not. Hydro One will charge the customer additional amounts, at actual costs, for  
10   performing any work on their equipment.

1           **1.1.15           INSTALL/REMOVE TEMPORARY SERVICES (RATE**  
2                           **CODES 27-29)**

3  
4   Customer requests for the installation and removal of a temporary service can vary  
5   greatly in the amount of work required. Each job will have its own unique working  
6   conditions. At the customer's request, a temporary service is connected. When the  
7   customer is ready to: (a) cancel the temporary service; or (b) transfer to the conductor  
8   and meter to the new permanent service, Hydro One will return to perform the relocation.

9  
10   To avoid cross-subsidization or over collection, Hydro One proposes that the fee for these  
11   specific services be derived on the actual costs of each individual job.

12  
13           **1.1.16    SPECIFIC CHARGE FOR ACCESS TO POWER POLES -**  
14                           **\$/POLE/YEAR (RATE CODE 30)**

15  
16   This charge is described and calculated in Appendix C.

## **APPENDIX B**

The charges described in this Appendix are Hydro One specific charges, calculated based on the labour hours and material used to perform the work. The required labour hours were studied as part of the Time Study. The proposed charges recover the cost of performing the work.

### **1. HYDRO ONE SPECIFIC SERVICE CHARGES: STANDARD FORMULA, UPDATED AMOUNTS**

#### **1.1 HYDRO ONE SPECIFIC CHARGES DESCRIPTION**

Hydro One has determined that customers should be charged the following fees for services that are beyond a distributor's normal business, and are not covered by rates. The labour hours and attributes were investigated as part of the Time Study, and the proposed charges recover the cost of performing the work and the associated material.

The following charges have previously been charged by Hydro One, but have been deemed to no longer apply.

1. Tingle/Stray Voltage Test – excess of 4 hours, if customer equipment is defective (Rate Code 43) - From the normal delivery and use of electricity, a small voltage may exist between two conductive surfaces that can be simultaneously contacted by an animal. Examples of the conductive surfaces include concrete floors, metal stabling, milk pipelines, and water bowls. This voltage is commonly referred to as, “animal contact voltage”, “stray voltage”, or “tingle voltage”. This voltage usually presents no harm. However, if the voltage level is high enough, it may affect livestock behaviour and health. Since 2009, the Distribution System Code (“DSC”) (Section 4.7 & Appendix H)

1 requires all Ontario Distribution Utilities to complete Stray Voltage Investigations on  
2 livestock farm customers by a competent person. Hydro One considers this service as part  
3 of the standard level of service in accordance with the DSC. Therefore, it is  
4 recommended that the current approved charge for Tingle/Stray Voltage Investigation be  
5 removed from the list of Hydro One Specific Services Charges.

- 6
- 7 2. A Stand-By Administration Charge (Rate Code 44) only covers the administration-related  
8 costs and not the costs of having distribution facilities in place to deliver stand-by power.  
9 Hydro One has no record of this charge ever being applied to Hydro One customers.

10

11 **1.1.2 VACANT PREMISE – MOVE IN WITH RECONNECT OF**  
12 **ELECTRICAL SERVICE – AT METER OR AT POLE (RATE CODE 31A**  
13 **& 31B)**

14

15 A Vacant Premise occurs when an existing customer cancels their account with Hydro One  
16 and the meter is left active when the existing customer's contract ends. When this occurs, if  
17 the new home owner, or landlord, does not call Hydro One to have the account for that  
18 premise moved into their name, Hydro One attempts to contact the premise owner by mail or  
19 letter delivered to the premise. If the owner of the premise does not contact Hydro One after  
20 the notices are given, Hydro One disconnects the service at the meter or pole, as the service  
21 is no longer associated with a customer.

22

23 When the new premise address owner or landlord contacts Hydro One to have an account set  
24 up in their name for the now disconnected service, Hydro One goes to the premise to perform  
25 a reconnect at the meter or pole. The reconnect service fee is recovered from the new  
26 premise address owner.

**1.1.3 RECONNECT COMPLETED AFTER HOURS (CUSTOMER/CONTRACT  
DRIVEN) – AT METER OR AT POLE (RATE CODE 32 & 33)**

All customers are responsible for maintaining their own equipment; therefore, Hydro One provides one yearly (calendar year January to December) Service Disconnection and Re-Connection (isolation and restoration) during regular business hours for customer maintenance purposes. There is a charge for a reconnection at the meter or pole performed after hours when the service is not ready to reconnect during regular hours due to the customer or contractor. The charge is only the difference between the charge for the service performed during regular hours and the charge for the service performed after regular hours.

**Table 3: Reconnect Completed After Hours (Customer/Contract Driven) – At Meter**

**1.1.4 ADDITIONAL SERVICE LAYOUT FEE – BASIC/COMPLEX – MORE  
THAN ONE HOUR (RATE CODE 34 & 35)**

When a customer determines that their distribution service requirement has changed from what was originally submitted and planned, Hydro One will determine the work required to modify the existing service layout to meet the customer's new needs. If work is required in excess of one hour, the fee in Table 5 below will be charged. In previous definitions, a basic service layout has involved a new single-phase service, while a complex additional service layout was for a three-phase service. The Study demonstrated that there was not a substantial difference between the work required to make changes to a three-phase service compared to a single-phase service. Hydro One is therefore proposing to charge the same rate, regardless of whether the changes required to the layout are basic or complex.

1        **1.1.5                      PIPELINE CROSSINGS (RATE CODE 36)**

2        Permission is required from the pipeline company before installing new wires (overhead  
3        or underground) crossing a pipeline Right of Way (“ROW”), or installing poles, anchors,  
4        or other equipment on a pipeline ROW. To generate the drawings, a great deal of  
5        information such as pipe depth, diameter, ROW width, and position of the line within the  
6        ROW must be collected at the site with a pipeline representative. The pipeline  
7        representative will determine what steps need to be taken and make suggestions for the  
8        best possible design. Hydro One charges the customer a fee that includes creation of the  
9        drawing, signing of the agreement, review of standards, obligations and conditions.

**1.1.6 WATER CROSSINGS (RATE CODE 37)**

Water Crossing fees are only charged when approval is being requested to cross the Rideau Canal and Trent Severn Waterway. Under emergency conditions, work may proceed but due diligence is required to prevent damage to fish habitats resulting in fines. Under normal circumstances, Hydro One staff will perform a self-assessment for Transport Canada (“TC”) and the Department of Fisheries and Oceans (“DFO”). The results of the self-assessment will dictate further interactions between Hydro One, the DFO, and TC in regards to new applications, special permits and guidance to prevent damage to fish habitat. The results of the self-assessment will also outline any concerns with the proposed work and if any timing restrictions apply (e.g., fish spawning season).

**1.1.7 RAILWAY CROSSINGS (RATE CODE 38)**

A new agreement is required from a railway authority before installing new wire across railway tracks or rights-of-way, or reconfiguring or modifying existing crossings of railway tracks or rights-of-way. Additional fees incurred from the railway authority application, the actual railway agreement, and flagging fees will be collected from the customer.

1       **1.1.8    LINE STAKING PER METER (RATE CODE 39A, B, C)**

2

3   For Hydro One to bring electrical service to a customer's property, an expansion from the

4   existing distribution line to the customer's property may have to be designed and built.

5   Hydro One will perform the staking of the line route according to the type of line to be built:

6   overhead, underground or submarine cable. Based on the 2006 Rate Handbook, all line

7   staking was charged at a common fee. The results of the Time Study have identified that

8   the underlying cost varies by the the type of line needing to be built. Hydro One therefore

9   proposes that the line staking per meter service be divided into three categories: overhead

10   line, underground line and submarine cable.

**Table 9: Overhead Line Staking Per Meter**

Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge

1       **1.1.9    CENTRAL METERING**

2  
3       Customers may opt for central metering (“CM”) to avoid having to pay for a large and expensive  
4       service located in one building to supply several separate buildings on one property, or to reduce  
5       having a meter on each building. If the customer requests, Hydro One Networks will install a  
6       CM service on a customer-owned pole. A maximum of four service connections can be  
7       connected at the CM location. If this is for a new service, where the load is greater than or equal  
8       to 45 kW, the CM service will be installed free of charge.

9  
10               **1.1.9.1    CENTRAL METERING – NEW SERVICE < 45 KW (RATE CODE**  
11               **40)**

12  
13       When the load supplied by the central metering service is less than 45 kW, the load does not  
14       justify the higher metering costs resulting from the use of instrument transformers, therefore the  
15       customer must pay to cover the instrument transformer costs.

1

**Table 12: Central Metering – New Service < 45 kW**

Year	Rate Code	Specific Service Charge Description	Labour Description	Rate Amount	Hours/Units	Overtime Factor	Calculated Total	Payroll Burdens	Total Labour	Other Description	Rate Amount	Hours/Units	Calculated Total	Total Other	Calculated Total Charge	Proposed Charge

**1.1.9.2            CONVERSION TO CENTRAL METERING < 45 KW (RATE  
CODE 41)**

Customers who request a conversion from conventional metering to CM require a new service layout, a change in their account, the removal of existing meters and equipment and installation of new equipment. This involves site visits for the layout, equipment modifications and administrative work. If the installation is to supply a load of less than 45 kW, the customer is charged for the associated labour plus the incremental cost of the instrument transformers.

**1.1.9.3            CONVERSION TO CENTRAL METERING  $\geq$  45  
KW (RATE CODE 42)**

Customers who request a conversion from conventional metering to central metering require a new service layout, a change in their account, the removal of existing meters and equipment, and installation of new equipment. This involves site visits for the layout, equipment modifications, and administrative work. Loads greater than or equal to 45 kW justify the costs for the required instrument transformer. Therefore, only the labour costs associated with performing this service are charged to the customer.

1                   **1.1.10      CONNECTION IMPACT ASSESSMENTS**

2  
3   Renewable generation development and the subsequent connection process involve a number of  
4   stages, including technical assessments. Hydro One assesses the technical impact of the  
5   renewable generation connection to its distribution system through a Connection Impact  
6   Assessment (“CIA”). A CIA is a more detailed assessment of a project's impact on the  
7   distribution system. The results include a technical report outlining project feasibility, technical  
8   specifications needed for the project and the impact the project would have on the distribution  
9   grid and any of its customers, in accordance with Section 6.2.14 of the DSC.

10  
11                   **1.1.10.1          CONNECTION      IMPACT      ASSESSMENTS      –      NET**  
12                   **METERING (RATE CODE 45A)**

13  
14   A net metering generator, as defined in section 7(1) of the Net Metering Regulation (O. Reg. 541  
15   / 05), generates electricity primarily for its own use from a renewable generation facility. Net  
16   metering involves the measurement of the quantity of electricity a generator uses against the  
17   quantity of electricity it generates resulting in a net total. Net metering projects include those  
18   which have a capacity greater than 10 kW but less than or equal to 500 kW that wish to connect  
19   to Hydro One’s distribution system.

**1.1.10.2 CONNECTION IMPACT ASSESSMENTS – EMBEDDED  
LDC GENERATORS (RATE CODE 45B)**

This category covers CIAs for Capacity Allocation Exempt (“CAE”) sized Distributed Generation (“DG”) projects, including load displacement and energy storage facilities, proposed for connection to the distribution system of an embedded LDC. This type of CIA is completed by Hydro One at the request of a downstream LDC for the connection of a CAE-sized project to a Hydro One shared feeder.

As per the DSC, a “CAE small embedded generation facility” is an embedded generation facility that has a name-plate rated capacity of 250 kW or less in the case of a facility connected to a less than 15 kV line, or 500 kW or less in the case of a facility connected to a 15 kV or greater line, and is not a micro-embedded generation facility.

**1.1.10.3 CONNECTION IMPACT ASSESSMENTS – SMALL  
PROJECTS < =500 KW (RATE CODE 45C)**

This category covers CIA completed for CAE-sized DG projects, including load displacement and energy storage facilities, proposed for connection to Hydro One distribution system. When no LDC is involved, this type of CIA is completed by Hydro One at the request of an applicant.

**1.1.10.4 CONNECTION IMPACT ASSESSMENTS – SMALL  
PROJECTS <= 500 KW, SIMPLIFIED (RATE CODE 45D)**

The following CAE-sized, three-phase projects are eligible for a simplified CIA based on size of the generator and its connecting voltage:

- 10 kW < DG project  $\leq$  30 kW if connecting to < 15 kV
- 10 kW < DG project  $\leq$  100 kW if connecting to  $\geq$  15 kV

The size of the three-phase project under each category is small enough that the impact on the system is not significant. Hence, the DG applicant receives a simplified CIA along with the class-C estimate. Single-phase projects are not eligible for the simplified CIA.

**1.1.10.5 CONNECTION IMPACT ASSESSMENTS – GREATER THAN  
CAPACITY ALLOCATION EXEMPT PROJECTS –  
CAPACITY ALLOCATION REQUIRED PROJECTS (RATE  
CODE 45E)**

The category covers the Capacity Allocation Required (“CAR”) CIAs for all DG projects, including net metering, load displacement and energy storage facilities, greater than Capacity Allocation Exempt (“CAE”) size. CAR projects have a capacity greater than 250 kW if connecting to less than 15 kV line, and greater than 500 kW if connecting to a line greater than or equal to 15 kV.

**1.1.10.6 CONNECTION IMPACT ASSESSMENTS –  
GREATER THAN CAPACITY ALLOCATION  
EXEMPT PROJECTS – TS REVIEW FOR LDC  
CAPACITY ALLOCATION REQUIRED PROJECTS  
(RATE CODE 45F)**

The Transformer Station (“TS”) review CIAs are completed for all DG projects greater than 500 kW, including load displacement and energy storage facilities, connecting to LDC dedicated feeders. TS review CIAs are performed to determine if any upgrades are required at an upstream TS in order to facilitate connection of the DG projects to the distribution system. Changes in the feeder protection schemes such as transfer trip, low set block signal, and distributed generator end open signal are evaluated to ensure adequate protection of the equipment in the event of a contingency on the system.

**APPENDIX C**

**1. SPECIFIC SERVICE CHARGES: OTHER FORMULAE, AMOUNTS**

**1.1 SPECIFIC CHARGES DESCRIPTION**

The charges in this section are determined by formulae that have been previously approved by the OEB.

**1.1.1 SENTINEL LIGHTS & POLES**

**1.1.1.1 SENTINEL LIGHTS (RATE CODE 50)**

The sentinel light rental program is designed to provide rural customers with low-cost security lighting. The service is provided primarily to rural residential, farm, and cottage customers, for whom street lighting is not available.

Based on Hydro One's recent Time Study, the customer charge is expected to increase slightly on an annual basis. Hydro One is proposing to charge a flat fee for these services over the entire planning period in order to avoid customer confusion and costly updates to its Customer Information System ("CIS"), customer correspondence, and internal work instructions.

The proposed rate for sentinel lights has been developed as follows:

1

**Table 1: Specific Service Charges: Sentinel Lights**

Specific Service Charges - Sentinel Lights							
Line No.	Particulars	Calculation of Revenue Requirement for Sentinel Lights					
		2017 (Current Rate)	2018	2019	2020	2021	2022
1	Mid-Year Rate Base	\$6.46	\$6.03	\$5.61	\$5.19	\$4.76	\$4.34
	Cost of Service						
2	Operating, maintenance & administrative	\$1.33	\$1.24	\$1.26	\$1.28	\$1.30	\$1.32
3	Depreciation & amortization	\$1.45	\$1.46	\$1.48	\$1.50	\$1.52	\$1.55
4	Income taxes	\$0.20	\$0.19	\$0.19	\$0.19	\$0.19	\$0.19
5	Cost of service excluding return	\$2.98	\$2.89	\$2.94	\$2.98	\$3.02	\$3.06
6	Return on capital	\$0.46	\$0.36	\$0.34	\$0.31	\$0.29	\$0.26
7	Total revenue requirement (\$M)	\$3.44	\$3.25	\$3.27	\$3.29	\$3.31	\$3.32
8	Mid- Year Number of Sentinel Lights	30,100	27,169	26,866	26,550	26,274	26,035
9	Annual Revenue Requirement per Light,\$	\$114.17	\$119.62	\$121.78	\$123.86	\$125.80	\$127.61
10	Calculated Monthly Charge Per Light	<b>\$9.51</b>	<b>\$9.97</b>	<b>\$10.15</b>	<b>\$10.32</b>	<b>\$10.48</b>	<b>\$10.63</b>
11	Proposed Monthly Charge Per Light		<b>\$10.00</b>	<b>\$10.00</b>	<b>\$10.00</b>	<b>\$10.00</b>	<b>\$10.00</b>

**1.1.1.2 SENTINEL LIGHT POLES (RATE CODE 51)**

The sentinel light pole rental program is designed to provide rural customers with a pole to attach a light. The service is provided primarily to rural residential, farm, and cottage customers.

The proposed rate for sentinel light poles has been developed as follows:

**Table 2: Specific Service Charges: Sentinel Light Poles**

Specific Service Charges - Sentinel Light Poles							
Line No.	Particulars	Calculation of Revenue Requirement for Sentinel Light Poles					
		2017 (Current Rate)	2018	2019	2020	2021	2022
1	Mid-Year Rate Base		\$1.20	\$1.16	\$1.13	\$1.09	\$1.06
	Cost of Service						
2	Operating, maintenance & administrative						
3	Depreciation & amortization		\$0.04	\$0.04	\$0.04	\$0.04	\$0.04
4	Income taxes		\$0.02	\$0.01	\$0.01	\$0.01	\$0.01
5	Cost of service excluding return		\$0.05	\$0.05	\$0.05	\$0.05	\$0.05
6	Return on capital		\$0.07	\$0.07	\$0.07	\$0.07	\$0.06
7	Total revenue requirement		\$0.12	\$0.12	\$0.12	\$0.12	\$0.11
8	Mid- Year Number of Sentinel Light Poles		1,428	1,418	1,407	1,399	1,392
9	Annual Revenue Requirement per Pole,\$		\$86.06	\$84.83	\$83.65	\$82.28	\$80.82
10	Calculated Monthly Charge Per Pole	<b>\$4.15</b>	<b>\$7.17</b>	<b>\$7.07</b>	<b>\$6.97</b>	<b>\$6.86</b>	<b>\$6.74</b>
11	Proposed Monthly Charge Per Pole		<b>\$7.00</b>	<b>\$7.00</b>	<b>\$7.00</b>	<b>\$7.00</b>	<b>\$7.00</b>

1       **1.1.2       JOINT USE CHARGES**

2  
3               **1.1.2.1 JOINT USE – TELECOMMUNICATIONS (RATE CODE 30)**

4  
5       In EB-2015-0141, the OEB accepted the methodology and determined a per attacher, per  
6       pole rate of \$41.28 for telecommunication companies that attach wireline attachments to  
7       Hydro One's poles. In November 2015, the OEB initiated a comprehensive policy  
8       review of miscellaneous rates and charges applied by electricity distributors, prioritizing  
9       the review of wireline pole attachments (EB-2015-0304). As a result of the consultation  
10      process, Hydro One expects the OEB will decide on an updated methodology for  
11      determining wireline charges for pole attachments.

12  
13      For this Application, as seen in Table 3 below, Hydro One has calculated Joint Use  
14      Telecom charges from 2018 to 2022, using the methodology approved in EB-2015-0141.  
15      Hydro One proposes adopting these charges until the OEB issues its decision in EB-  
16      2015-0304. Once the Decision is issued, Hydro One will revise its charges to comply  
17      with it prospectively.

18  
19      Using the methodology approved in EB-2015-0141, Table 3 shows how Hydro One  
20      updated the calculation using 2016 audited actual numbers as a basis to determine the  
21      2017 rate. Hydro One proposes that the 2017 rate is escalated at a rate of CPI, less the  
22      currently applicable Hydro One productivity factor, to determine the rates from 2018 to  
23      2022. Hydro One used the OEB inflation rates for 2017 and used projected CPI for the  
24      test years because the OEB inflation rates are not available during the test years period.

**Table 3: Specific Service Charges - Joint Use Telecom**

Calculation of Telecom Joint Use Costs	Rate based on EB-2015-0141		2017 (Based on Actual 2016 Data)	2018	2019	2020	2021	2022
Net Embedded Cost	\$944.49		\$1,178.33					
Depreciation per Pole	\$23.83		\$28.47					
Capital Carrying Cost	\$80.19		\$91.79					
Maintenance (Lines Only)	\$4.69		\$4.08					
Total Capital Related Costs	\$108.71		\$124.34					
Allocated Capital Cost	\$37.29		\$42.65					
Loss of Productivity	\$3.09		\$3.18					
Administration	\$0.90		\$0.93					
Vegetation Mgmt	\$0.00		\$0.00					
<b>Total Licensee Cost</b>	<b>\$41.28</b>		<b>\$46.75</b>	<b>\$47.43</b>	<b>\$48.16</b>	<b>\$48.90</b>	<b>\$49.65</b>	<b>\$50.40</b>

**Explanation of Underlying Pole Attachment Rate Calculations as seen in Table 3 above**

1. **2016 Net Embedded Cost (NEC) of \$1,178.33** = {[2016 Year End Acquisition Value (\$3,079,485,436) - 2016 Accumulated Depreciation (\$912,770,751) = \$2,166,714,685]/Qty. of Poles on December 31, 2016 (1,562,984)}\*85%  
\*Note: For clarity, the pole number above does not include poles from the Acquired Utilities. **2016 Depreciation Cost of \$28.47** = [2016 Year End Acquisition Value (\$3,079,485,436) \* HONI Depreciation Rate (1.7%) \* 85% allocation factor to remove any pole-associated assets] / Qty. of Poles (1,562,984)

2. **2016 Capital Carrying Cost of \$91.79** = 2016 NEC of \$1,178.33 \* 2016 Pre-Tax  
Weighted Average Cost of Capital (7.79%)

3. **2016 Pole Maintenance Costs of \$4.08** =

**Lines Maintenance**

- USofA 5120: Maintenance of Poles, Towers and Fixtures
  - Sub Account 1464 - Trouble Calls (\$14.14M) + Subaccount 1467 - OM&A Cost Storm Response (\$1.56M) + Subaccount 1469 - Defect Corrections (\$1.34M) = \$17.04M
  - \$17.04M x 5% (5% of the time work is pole related) = \$0.85M
- USofA 5125: Maintenance of Overhead Conductors and Devices
  - Subaccount 1464 - Trouble Calls (\$36.43M) + Subaccount 1467 - OM&A Cost Storm Response (\$4.03M) + Subaccount 1469 - Defect Corrections (\$6.81M) = \$47.27M
  - \$47.27M x 5% (5% of the time work is primary neutral conductor related) = \$2.36M
- USofA 5020: Maintenance Line Patrols
  - (\$8.16M)\*77.5% (77.5% of the time, work is attributable to Overhead Distribution Lines and Feeders) = \$6.32M
  - \$6.32M x 50% (50% of the time, work is related to the pole) = \$3.16M
- **Total Lines Maintenance** = \$0.85M + \$2.36M + \$6.32M
  - = \$6.37M
  - = \$6.37M / 1,562,984 poles
  - = **\$4.08/pole**

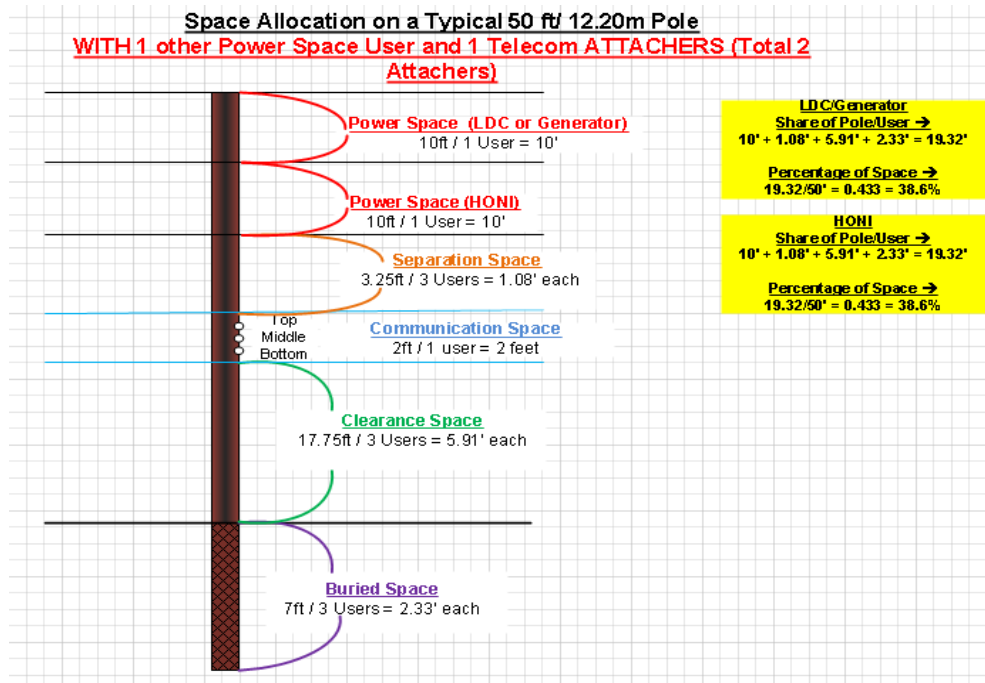

4. **Loss of Productivity of \$3.18** = Loss of Productivity approved in EB-2015-0141, escalated for two years by OEB-approved Inflation Rate (1.9%), minus Hydro One Productivity Factor (0.45%):  $3.09 * [1 + (0.019 - 0.0045)]^2 = \$3.18$

1 5. **Administration Costs of \$0.93** = Admin. Costs approved in EB-2015-0141,  
2 escalated for two years by OEB-approved Inflation Rate (1.9%), minus Hydro One  
3 Productivity Factor (0.45%):  $\$0.90 * [1 + (0.019 - 0.0045)]^2 = \$0.93$

4  
5 **1.1.2.2 JOINT USE – LOCAL DISTRIBUTION COMPANIES (LDCS)**  
6 **AND GENERATORS (RATE CODE 47 & 48)**  
7

8 As referenced in EB-2013-0416, LDCs and generators both use power space, and require  
9 the same space allocation. Using the OEB-approved methodology, as shown in Tables 4  
10 and 5, Hydro One calculated the proposed charges using 2016 audited actual numbers as  
11 a basis to determine the 2017 rate, with the modification of the space allocation factor  
12 from 28.1% to 38.6% on a 50-foot pole, as seen in Figure 1 below. Hydro One proposes  
13 escalating the 2017 rate at a rate of CPI, less the currently applicable Hydro One  
14 productivity factor, to determine the rates from 2018 to 2022. Hydro One used the OEB  
15 inflation rates for 2017 and used projected CPI for the test years as the OEB inflation  
16 rates are not available during the forecast period.

**Explanation of Underlying Pole Attachment Rate Calculations as seen in Table 4 above**

1. **2016 Net Embedded Cost (NEC) of \$1,178.33** = {[2016 Year End Acquisition Value (\$3,079,485,436) - 2016 Accumulated Depreciation (\$912,770,751) = [\$2,166,714,685]/Qty. of Poles on December 31, 2016 (1,562,984)}\*85%

2. **2016 Depreciation Cost of \$28.47** = [2016 Year End Acquisition Value (\$3,079,485,436) \* HONI Depreciation Rate (1.7%) \* 85% allocation factor to remove any pole-associated assets] / Qty. of Poles (1,562,984)

3. **2016 Capital Carrying Cost of \$91.79** = 2016 NEC of \$1,178.33 \* 2016 Pre-Tax Weighted Average Cost of Capital (7.79%)

4. **2016 Pole Maintenance Costs of \$87.00** =

**Lines Maintenance**

- USofA 5120: Maintenance of Poles, Towers and Fixtures

- Sub Account 1464 - Trouble Calls (\$14.14M) + Subaccount 1467 - OM&A Cost Storm Response (\$1.56M) + Subaccount 1469 - Defect Corrections (\$1.34M) = \$17.04M

- \$17.04M x 5% (5% of the time work is pole related) = \$0.85M

- USofA 5125: Maintenance of Overhead Conductors and Devices

- Subaccount 1464 - Trouble Calls (\$36.43M) + Subaccount 1467 - OM&A Cost Storm Response (\$4.03M) + Subaccount 1469 - Defect Corrections (\$6.81M) = \$47.27M

- \$47.27M x 5% (5% of the time work is primary neutral conductor related) = \$2.36M

- USofA 5020: Maintenance Line Patrols

- (\$8.16M)\*77.5% (77.5% of the time, work is attributable to Overhead Distribution Lines and Feeders) = \$6.32M

- $\$6.32\text{M} \times 50\%$  (50% of the time, work is related to the pole) =  
\$3.16M

- **Total Lines Maintenance** =  $\$0.85\text{M} + \$2.36\text{M} + \$3.16\text{M}$ 
  - = \$6.37M
  - =  $\$6.37\text{M} / 1,562,984$  poles
  - = **\$4.08/pole**

**Forestry Maintenance**

- Line Clearing = \$87.7M
- Brush Control = \$35M
- Customer Notification = \$6.9M
- **Total Forestry Maintenance** =  $\$87.7\text{M} + \$35\text{M} + \$6.9\text{M}$ 
  - =  $\$129.6\text{M} / 1,562,984$  poles
  - = **\$82.92/pole**

**Total Lines & Forestry Maintenance** =  $\$4.08/\text{pole} + \$82.92/\text{pole}$

- **\$87.00 per pole**

5. **Loss of Productivity of \$3.18** = In determining the Loss of Productivity for this current filing, HONI accepted the Loss of Productivity approved in EB-2015-0141, and it was escalated for two years by OEB-approved Inflation Rate (1.9%), minus Hydro One Productivity Factor (0.45%):  $\$3.09 * [1 + (0.019 - 0.0045)]^2 = \$3.18$
6. **Administration Costs of \$0.93** = In determining the Administration Costs for this current filing, HONI accepted the Administration Costs approved in EB-2015-0141, and it was escalated for two years by OEB-approved Inflation Rate (1.9%), minus Hydro One Productivity Factor (0.45%):  $\$0.90 * [1 + (0.019 - 0.0045)] = \$0.93$

3

**Explanation of Underlying Pole Attachment Rate Calculations as seen in Table 5 above**

1. **2016 Net Embedded Cost (NEC) of \$1,178.33** = {[2016 Year End Acquisition Value (\$3,079,485,436) - 2016 Accumulated Depreciation (\$912,770,751) = \$2,166,714,685]/Qty. of Poles on December 31, 2016 (1,562,984)}\*85%
2. **2016 Depreciation Cost of \$28.47** = [2016 Year End Acquisition Value (\$3,079,485,436) \* HONI Depreciation Rate (1.7%) \* 85% allocation factor to remove any pole-associated assets] / Qty. of Poles (1,562,984)
3. **2016 Capital Carrying Cost of \$91.79** = 2016 NEC of \$1,178.33 \* 2016 Pre-Tax Weighted Average Cost of Capital (7.79%)
4. **2016 Pole Maintenance Costs of \$87.00** =

**Lines Maintenance**

- USofA 5120: Maintenance of Poles, Towers and Fixtures
  - Sub Account 1464 - Trouble Calls (\$14.14M) + Subaccount 1467 - OM&A Cost Storm Response (\$1.56M) + Subaccount 1469 - Defect Corrections (\$1.34M) = \$17.04M
  - \$17.04M x 5% (5% of the time work is pole related) = \$0.85M
- USofA 5125: Maintenance of Overhead Conductors and Devices
  - Subaccount 1464 - Trouble Calls (\$36.43M) + Subaccount 1467 - OM&A Cost Storm Response (\$4.03M) + Subaccount 1469 - Defect Corrections (\$6.81M) = \$47.27M
  - \$47.27M x 5% (5% of the time work is primary neutral conductor related) = \$2.36M

- USofA 5020: Maintenance Line Patrols
  - $(\$8.16\text{M}) \times 77.5\%$  (77.5% of the time, work is attributable to Overhead Distribution Lines and Feeders) = \$6.32M
  - $\$6.32\text{M} \times 50\%$  (50% of the time, work is related to the pole) = \$3.16M
- **Total Lines Maintenance** =  $\$0.85\text{M} + \$2.36\text{M} + \$3.16\text{M}$ 
  - = \$6.37M
  - =  $\$6.37\text{M} / 1,562,984$  poles
  - = **\$4.08/pole**

**Forestry Maintenance**

- Line Clearing = \$87.7M
- Brush Control = \$35M
- Customer Notification = \$6.9M
- **Total Forestry Maintenance** =  $\$87.7\text{M} + \$35\text{M} + \$6.9\text{M}$ 
  - =  $\$129.6\text{M} / 1,562,984$  poles
  - = **\$82.92/pole**

**Total Lines & Forestry Maintenance** =  $\$4.08/\text{pole} + \$82.92/\text{pole}$

- **\$87.00 per pole**

5. **Loss of Productivity of \$3.18** = In determining the Loss of Productivity for this current filing, HONI accepted the Loss of Productivity approved in EB-2015-0141, and it was escalated for two years by OEB-approved Inflation Rate (1.9%), minus Hydro One Productivity Factor (0.45%):  $\$3.09 \times [1 + (0.019 - 0.0045)]^2 = \$3.18$
6. **Administration Costs of \$0.93** = In determining the Administration Costs for this current filing, HONI accepted the Administration Costs approved in EB-2015-0141, and it was escalated for two years by OEB-approved Inflation Rate (1.9%), minus Hydro One Productivity Factor (0.45%):  $\$0.90 \times [1 + (0.019 - 0.0045)]^2 = \$0.93$

## 1.0 EXECUTIVE SUMMARY

Hydro One's Distribution Rate filing (EB-2013-0416) proposed rates for miscellaneous services (Exhibit G2, Tab 5, Schedule 1) performed over and above the standard level of service as defined by the Distribution System Code. The costs of providing the standard level of service are recovered in a Local Distribution Company's ("LDC") regular distribution rates. Miscellaneous services are provided at a customer's request or as the result of a customer's action or inaction and impose costs on the distributor. In the Ontario Energy Board's ("OEB") Decision in this rate application issued March 12, 2015, Hydro One was directed to perform a study ("the Study") to determine Hydro One's underlying costs and propose changes to fees charged for the performance of miscellaneous services to allow recovery of the underlying costs of providing each service.

Hydro One performed a time study on the tasks of the specific services and identified other associated costs including labour rates and burdens, fleet costs, material costs and pass-through charges. The approaches found in the OEB's 2006 Electricity Distribution Rate Handbook, Chapter 11 were used to define the level of the charge to bill the customer. Factors considered in the proposals for changes to the specific service fees included:

- Recovery of underlying costs;
- Elimination of cross-subsidization of costs;
- Separating tasks to avoid over recovery for the benefit of the customer

The resulting proposals for changes to the fees for each service are found in Table 1. Further general recommendations can be found in Section 4.0.

**Table 1: Summary of Proposed Changes to the Fees Charges for Miscellaneous**

Rate Code	Standard Name	Std. Amount, 2006 & Hydro One Current Charge	Underlying Cost, 2016	\$ change	% change	Proposed Fee Change for Each Specific Service
1	Arrears certificate	\$ 15.00	N/A	N/A	N/A	Market restructuring brought about the corporatization of the distribution sector and removed this tool to recover payment defaults. This charge should be removed from the Handbook.
2	Statement of account	\$ 15.00	\$ 13.71	\$ (1.29)	-9%	Hydro One proposes this charge be decreased to \$13.71 to avoid over collection of underlying costs.
3	Pulling post- dated cheques	\$ 15.00	N/A	N/A	N/A	This service is not provided by Hydro One.
4	Duplicate invoices for previous billing	\$ 15.00	\$ 12.72	\$ (2.28)	-15%	Hydro One proposes this charge be decreased to \$12.72 to avoid over collection of underlying costs.
5	Request for other billing information	\$ 15.00	\$ 13.71	\$ (1.29)	-9%	Hydro One proposes this charge be decreased to \$13.71 to avoid over collection of underlying costs.
6	Easement letter	\$ 15.00	\$ 84.32	\$ 69.32	462%	Hydro One proposes this charge be increased to \$84.32 to allow recovery of underlying costs.
7	Income tax letter	\$ 15.00	\$ 12.72	\$ (2.28)	-15%	Hydro One proposes this charge be decreased to \$12.72 to avoid over collection of underlying costs.
8	Notification charge	\$ 15.00	N/A	N/A	N/A	This service is not provided by Hydro One.
9	Account History	\$ 15.00	\$ 13.71	\$ (1.29)	-9%	Hydro One proposes this charge be decreased to \$13.71 to avoid over collection of underlying costs.
10	Credit reference/credit check (plus credit agency costs)	\$ 15.00	\$ 18.84	\$ 3.84	26%	Hydro One proposes this charge be increased to \$18.84 to allow recovery of underlying costs.
11	Returned cheque charge	\$ 15.00	\$ 6.94	\$ 8.06	-54%	Hydro One proposes this charge be decreased to \$6.94 to avoid over collection of underlying costs.
12	Charge to certify cheque	\$ 15.00	N/A	N/A	N/A	This service is not provided by Hydro One.
13	Legal letter charge	\$ 15.00	N/A	N/A	N/A	Hydro One proposes the charge for preparing a legal letter should be based on the actual time and labour costs an individual basis.

# Miscellaneous Service Charges

Rate Code	Standard Name	Std. Amount, 2006 & Hydro One Current Charge	Underlying Cost, 2016	\$ change	% change	Proposed Fee Change for Each Specific Service
14	Account set up charge/change of occupancy charge (plus credit agency costs if applicable)	\$ 30.00	\$ 35.20	\$ 5.20	17%	Hydro One proposes this charge be increased to \$35.20 to allow recovery of underlying costs.
15	Special Meter Reads (retailer requested off-cycle read)	\$ 30.00	\$ 88.80	\$ 58.80	196%	Hydro One proposes this charge be increased to \$88.80 to allow recovery of underlying costs.
16	Collection of account charge - no disconnection	\$ 30.00	\$ 95.65	\$ 65.65	219%	Hydro One proposes this charge be increased to \$95.65 to allow recovery of underlying costs.
17	Collection of account charge - no disconnection - after regular hours	\$ 165.00	N/A	N/A	N/A	This service is not provided by Hydro One.
18	Collection - Disconnect/Reconnect at meter - during regular hours	\$ 65.00	\$ 114.54	\$ 9.54	76%	Hydro One proposes that due to the similarity of these two services, the rate codes be combined and the charge increased to \$114.65 to allow recovery of underlying costs.
19	Collection - Install/Remove load control device - during regular hours	\$ 65.00	\$ 119.02	\$ 4.02	83%	
20	Collection - Disconnect/Reconnect at meter - after regular hours	\$ 185.00	\$ 411.07	\$ 26.07	122%	Hydro One proposes that due to the similarity of these two services, the rate codes be combined and the charge increased to \$406.85 to allow recovery of underlying costs.
21	Collection - Install/Remove load control device - after regular hours	\$ 185.00	\$ 396.41	\$ 11.41	114%	
22	Collection - Disconnect/Reconnect at pole - during regular hours	\$ 185.00	\$ 302.35	\$ 117.35	63%	Hydro One proposes this charge be increased to \$302.35 to allow recovery of underlying costs.
23	Collection - Disconnect/Reconnect at pole - after regular hours	\$ 415.00	\$ 800.97	\$ 385.97	93%	Hydro One proposes this charge be increased to \$800.97 to allow recovery of underlying costs.
24	Meter Dispute Charge - Measurement Canada	\$ 30.00	\$ 274.92	\$ 244.92	816%	Hydro One proposes this charge be increased to \$274.92 to allow recovery of underlying costs.
25	Service call - customer owned equipment - during regular hours	\$ 30.00	\$ 201.15	\$ 171.15	570%	Hydro One proposes this charge be increased to \$201.15 to allow recovery of underlying costs.
26	Service call - customer owned equipment - after regular hours	\$ 165.00	\$ 745.17	\$ 580.17	352%	Hydro One proposes this charge be increased to \$745.17 to allow recovery of underlying costs.
27	Temporary Service Install & Remove - overhead - no transformer	\$ 500.00	N/A	N/A	N/A	The tasks associated with these services can greatly vary depending on the circumstances. Hydro One proposes that the fee charged to the customers be based on actual time, equipment and material costs to perform each specific job.
28	Temporary Service Install & Remove - underground - no transformer	\$ 300.00	N/A	N/A	N/A	
29	Temporary Service Install & Remove - overhead - with transformer	\$ 1,000.00	N/A	N/A	N/A	

# Miscellaneous Service Charges

Rate Code	Standard Name	Std. Amount, 2006 & Hydro One Current Charge	Underlying Cost, 2016	\$ change	% change	Proposed Fee Change for Each Specific Service
30	Specific Charge for Access to the Power Poles \$/pole/year	\$ 22.35	TBD	N/A	N/A	New proposed rates were not part of this time study. New rates will be calculated using the approved OEB methodology from EB-2015-0141.
31a	Vacant Premise - Move in with Reconnect of Electrical Service at Meter	NEW	\$ 93.09	NEW	NEW	This service is performed by Hydro One but has not been charged for in the past. Hydro One proposes the charge for performing this service be set at \$93.09 to allow recovery of the underlying costs.
31b	Vacant Premise - Move in with Reconnect of Electrical Service at Pole	NEW	\$ 286.09	NEW	NEW	This service is performed by Hydro One but has not been charged for in the past. Hydro One proposes the charge for performing this service be set at \$286.09 to allow recovery of the underlying costs.
32	Reconnect completed after hours (customer/contract driven) - at meter	NEW	\$ 231.66	NEW	NEW	This service is performed by Hydro One but has not been charged for in the past. Hydro One proposes the charge for performing this service be set at \$231.66 to allow recovery of the underlying costs.
33	Reconnect completed after hours (customer/contract driven) - at pole	NEW	\$ 453.72	NEW	NEW	This service is performed by Hydro One but has not been charged for in the past. Hydro One proposes the charge for performing this service be set at \$453.72 to allow recovery of the underlying costs.
34	Additional Service Layout Fee - Basic (more than one hour)	\$ 635.00	\$ 544.82	\$ (90.18)	-14%	Hydro One proposes that due to the similarity of these two services, the rate codes be combined and the charge increased to \$548.81 to allow recovery of underlying costs.
35	Additional Service Layout Fee - Complex (more than one hour)	\$ 845.00	\$ 553.06	\$ (291.94)	-35%	
36	Pipeline Crossings	\$ 2,540.00	\$ 2,295.10	\$ (244.90)	-10%	Hydro One proposes this charge be decreased to \$2,295.10 to avoid over collection of underlying costs.
37	Water Crossings	\$ 3,225.00	\$ 3,425.42	\$ 200.42	6%	Hydro One proposes this charge be increased to \$3,425.42 to allow recovery of underlying costs.
38	Railway Crossings	\$ 6,095.00	\$ 4,549.27	\$ (1,545.73)	-25%	Hydro One proposes this charge be decreased to \$4,549.27 to avoid over collection of underlying costs.
39a	Overhead Line Staking per Meter	\$ 4.95	\$ 4.04	\$ (0.91)	-18%	The study identified the variation in costs per meter to perform line staking for overhead, underground and submarine cable. Hydro One therefore proposes each type of line staking should have its own unique charge representative of the actual underlying costs.
39b	Under Ground Line Staking per Meter	\$ 4.95	\$ 2.92	\$ (2.03)	-41%	
39c	Submarine Cable Line Staking per Meter	\$ 4.95	\$ 2.55	\$ (2.40)	-49%	

# Miscellaneous Service Charges

Rate Code	Standard Name	Std. Amount, 2006 & Hydro One Current Charge	Underlying Cost, 2016	\$ change	% change	Proposed Fee Change for Each Specific Service
40	Central Metering - New Service <45kW	\$ 120.00	\$ 100.00	\$ (20.00)	-17%	Hydro One proposes this charge be decreased to \$100.00 to avoid over collection of underlying costs.
41	Conversion to Central Metering <45kW (Lines & MDET only)	\$ 1,035.00	\$ 1,495.00	\$ 459.81	44%	Hydro One proposes this charge be increased to \$1,495.00 to allow recovery of underlying costs.
42	Conversion to Central Metering >45kW (Lines & MDET only)	\$ 915.00	\$ 1,395.00	\$ 480.45	53%	Hydro One proposes this charge be increased to \$1,395.00 to allow recovery of underlying costs.
43	Tingle/Stray Voltage Investigation - excess of 4 hours, if customer equipment is defective	N/A	N/A	N/A	N/A	A charge for Tingle/Stray Voltage Investigation is no longer required.
44	Stand-by Administration Charge	N/A	N/A	N/A	N/A	Hydro One does not charge this fee.
45a	Connection Impact Assessments - Net Metering	\$ 5,620.00	\$ 3,051.48	\$ (2,568.52)	-46%	In review of the data collected in the performance of Connection Impact Assessments ("CIA"s), Hydro One has identified six different categories of CIAs. These six categories have unique underlying costs. Hydro One therefore proposes the underlying costs based on time, equipment and material for each type of CIA be charged to the customer for the performance of these services.
45b	Connection Impact Assessments - Embedded LDC Generators	\$ 5,620.00	\$ 2,727.78	\$ (2,892.22)	-51%	
45c	Connection Impact Assessments - Small Projects ≤ 500 kW	\$ 5,620.00	\$ 3,115.38	\$ (2,504.62)	-45%	
45d	Connection Impact Assessments - Small Projects ≤ 500 kW, Simplified	\$ 5,620.00	\$ 1,879.32	\$ (3,740.68)	-67%	
45e	Connection Impact Assessments - Greater than Capacity Allocation Exempt Projects - Capacity Allocation Required Projects	\$ 12,055.00	\$ 8,268.54	\$ (3,785.00)	-31%	
45f	Connection Impact Assessments - Greater than Capacity Allocation Exempt Projects - TS Review for LDC Capacity Allocation Required Projects	\$ 12,055.00	\$ 5,455.40	\$ (6,600.00)	-55%	

## 2.0 INTRODUCTION AND BACKGROUND

Miscellaneous Service Charges are an integral part of a distributor's approved schedule of rates. The revenue from these charges is taken into account in calculating total revenue requirement.

Hydro One's Distribution Rate filing (EB-2013-0416) proposed rates for miscellaneous services (Exhibit G2, Tab 5, Schedule 1) performed over and above the standard level of service as defined by the Distribution System Code. The costs of providing the standard level of service are recovered in an LDC's regular distribution rates. Miscellaneous services are provided at a customer's request or as the result of a customer's action or inaction and impose costs on the distributor.

The rates proposed by Hydro One in EB-2013-0416 for miscellaneous charges were as per the OEB's Distribution Rate Handbook (Section 11) which sets out the specific level of a charge or specific bases for the determination of a charge. Distributors can choose one of the following four approaches to define the level of charge to bill a customer:

- A standard amount as specified in Schedule 11-1 of the handbook;
- A standard formula, as specified in Schedule 11-2 of the handbook, with adjustments if the applicant elects to adjust the level determined by the standard formula. If adjusted, it must provide additional evidence of cost justification for the adjustments;
- A level determined on a basis other than the standard formula and evidence to justify the use of a non-standard formula;
- A distributor may also specify in its Conditions of Service that the specific service being provided will be charged on an actual cost, time and materials basis, or a pass-through of third party costs. On this basis, approval of the Board is not required, but the applicant must maintain records that demonstrate that the actual cost was charged to the customer.

The OEB's decision and direction in response to Hydro One's proposed Miscellaneous Charges Rates (EB-2013-0416 / EB-2014-0247, Exhibit G2, Tab 5, Schedule 1), dated March 12, 2015, is cited below.

*SIA [Sustainable Infrastructure Alliance] raised a concern that Hydro One's charges for miscellaneous services significantly under-recover the true cost of the services. SIA suggested that the charges should be updated to more closely reflect actual costs, which would offset some revenue to be collected from rates. While Hydro One agreed that the charges under-recover costs, the company submitted that the charges are consistent with the OEB's rate handbook, and that a review of the charges should be undertaken on a generic basis. The OEB has indicated that it will initiate a review of service charges in the distribution sector. However, as Hydro One has unique service characteristics, the OEB directs Hydro One to file, as part of its next rates application, a study assessing whether its service charges reflect Hydro One's underlying costs and to propose changes accordingly. Hydro One's study is to be informed by any available OEB guidance that results from the generic review.*

### **3.0 STUDY APPROACH**

The objective of the study was to assess whether the service fees charged by Hydro One recover the underlying costs for the services provided over and above the distributor's standard level of service due to a customer's request or as a result of customer's action or inaction. The costs must be covered by those customers to alleviate the current cross-subsidization by Hydro One's full customer base in rates. The underlying costs for each of these services may include direct labour hours and rates (including admin overheads), burden rate, fleet rates and material costs. Data was collected for these costs for each specific service.

### 3.1 Study Objectives

The objectives of this study as directed by the OEB are:

- To determine Hydro One's underlying costs for each miscellaneous service performed over and above the standard level of service in accordance with the Distribution System Code; and
- To propose changes to fees charged for the performance of miscellaneous services to allow recovery of the underlying costs of providing each service.

### 3.2 Key Study Steps

The key steps for performing the study are summarized below and described in the following subsections:

1. Establish a study working group
2. Identify scope of service charges to be included in the study
3. Identify the data required
4. Develop work forms and collect data
5. Guidance and review of study approach and methodology
6. Data compilation and initial data analysis
7. Preparation and review of preliminary draft and results
8. Preparation of evidence and schedules

### 3.3 Establishing a Study Working Group

The Study required commitment and participation by a number of organizations within the company such as Provincial Lines, Customer Care, Asset Management and Regulatory Affairs. A working group was established at the onset of the Study. The working group members represented their organizations in terms of reviewing and approving the methodology for the study and supporting and facilitating the data collection and reporting process. The collection of data required a significant level of effort for the affected lines of business and a commitment to both the methodology and data collection was a critical prerequisite to begin the study.

### **3.4 Identify Scope of Service Charges to be Included in the Study**

The first substantive step in the study process was to determine and finalize the scope by reviewing the service charges found in the 2006 Electricity Distribution Rate Handbook, specific services Hydro One included in the Miscellaneous Charges exhibit (Exhibit G2, Tab 5, Schedule 1) submitted in the last distribution rate application (EB-2013-0416) and any other miscellaneous services Hydro One currently provides. In cases where Hydro One provides the service, but does not currently charge for that service, the service became part of the study to determine the charge required for Hydro One to recover the costs of that service.

### **3.5 Identify the Data Required**

In order to determine Hydro One's underlying costs of performing miscellaneous services over and above the standard level of service, all factors contributing to these costs must be documented. These cost factors included:

- Discipline(s) involved in performing each service (e.g. position, quantity);
- Tasks performed by each discipline in delivering the service;
- Travel time;
- Hours required to perform the task;
- Pass-through charges incurred;
- Materials required to perform the service;
- Vehicle use required to perform the service (small versus large vehicle); and
- Financial rates (e.g. labour rates and burdens, fleet rates, etc.).

### **3.6 Develop Work Forms and Collect Data**

Data was captured and documented by those performing the service which involved multiple disciplines and individuals in different locations across the province. To facilitate the gathering of the study data in a consistent manner, work forms were provided to the disciplines to document their involvement, time and other related costs. The work form included the data requirements identified in Section 3.0 and any other pertinent factors that became apparent throughout the duration of the data collection segment of this study. Activities in this phase of the study included:

- Creating the necessary simple and easy to use tool that is “discipline” appropriate work sheets to collect all data attributes (e.g. discipline, materials, time);
- Creating the necessary guidelines for staff for collecting the data (i.e., collect labour data in 10 minute increments, collect vehicle use in 10 minute increments, collect materials data)
- Briefing the appropriate management and staff on the use and importance of the data and providing any necessary instructions (e.g. separation of vehicle time from labour time);
- Submitting data to single point of contact regularly (to identify any unforeseen issues early, ensure data is being accurately captured, and ensure instructions are being followed); and
- Keeping a master database of all labour (by discipline), vehicle use, and materials.

The work forms for the data collection during the time study can be found in Appendix A.

The study and work sheets were rolled out to Provincial Lines staff and Customer Care across the province at departmental meetings. Hydro One started the time study December 1, 2015 for all services performed excepting the Connection Impact Assessments (“CIA”s). The time study for the CIAs started February 2016.

Work sheets were returned from the Provincial Lines office and field staff to their supervisors to review and forward to a central repository for compilation in a common database. Customer Care data was collected at the Customer Call Centre (“CCC”). In some cases the computer programs used at the CCC were used to track the time allotted to specific services. As portions of these studies are performed by office staff and field staff, careful tracking and identification was required to ensure the full labour hours were calculated for each specific service.

### 3.7 Guidance and Review of Study Approach and Methodology

In the Hydro One Distribution Rate Decision (EB-2013-0416), the OEB states:

*The OEB has indicated that it will initiate a review of service charges in the distribution sector. However, as Hydro One has unique service characteristics, the OEB directs Hydro One to file, as part of its next rates application, a study assessing whether its service charges reflect Hydro One's underlying costs and to propose changes accordingly. Hydro One's study is to be informed by any available OEB guidance that results from the generic review.*

Hydro One used the approaches found in the OEB's 2006 Electricity Distribution Rate Handbook, Chapter 11 to define the level of the charge to bill the customer for each specific service.

Hydro One also sought guidance from Elenchus Research Associates Inc. ("Elenchus") for guidance and review of Hydro One's approach and methodology to ensure it would meet the study objectives and would be defensible in an OEB proceeding. Hydro One leveraged an existing Procurement Outline Agreement to secure the services of Elenchus as an external third party reviewer.

Elenchus reviewed the proposed study methodology and approach and met with Hydro One to offer guidance on November 4, 2015. Elenchus confirmed the validity of methodology and approach. Advice offered and considered in included:

- Even if Hydro One does not currently charge for the service, include it as part of the study;
- Use more precise inclusion of all costs underlying the specific service;
- Document the calculations used to determine the charges Hydro One is going to recommend;
- Treatment of pass-through charges; and
- Review the processes for the specific services and look for efficiencies to investigate moving forward.

### 3.8 Data Compilation and Initial Data Analysis

A master database was populated so that filtering of specific data was used to:

- Identify those services that are delivered with a high degree of predictability;
- Identify those services with varying costs; and
- Identify the key driver(s) of the variability.

An interim review and analysis was done during the collection process to identify any issues, ensure data was being accurately captured, confirm instructions were being followed and identify causal factors for larger variances. The review identified adjustments or refinements to the data collection and reporting process.

### 3.9 Preparation and Review of Preliminary Draft and Results

A preliminary report of study findings for each miscellaneous service was prepared using the Derivation of Standard Rates and Model for Deriving Distributor Specific Rate table found in the OEB's 2006 Electricity Distribution Rate Handbook, Chapter 11 summarized below.

#### 3.9.1 Standard Amount

The 2006 Electricity Distribution Rate Handbook provides a set of standard amount charges for specific services to ensure consistency in the amount charged to customers by all distributors.

#### 3.9.2 Standard Formula

The standard formula for calculating specific charges, considers labour, materials, and fleet vehicle used in performing the miscellaneous service. Hydro One adopted the same formula to determine the rate for other services provided over and above the standard level of service that do not appear in the 2006 Rate Handbook. Figure 1 is the cost calculations table used in this study. It is substantially the same as the table found as schedule 11-2, Specific Service Charges: Standard Formula and Amounts found on page 115 in the OEB 2006 Electricity Distribution Rate Handbook.

**Figure 1 - Standard Formula Calculations Table**

Underlying Cost Description For:					
X      Specific Charge Name					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time				
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)				
Total Labour Cost					
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					
Hydro One Underlying Cost and Proposed Charge					\$ -
Hydro One Current Charge					\$ -

For services that include a wide variety of different tasks depending on the circumstances such as Service Call for Customer-Owned Equipment, there is a large variation costs, therefore Hydro One proposes that actual costs based on time, equipment and material should be charged to the customer in addition to the cost of the service call.

### 3.10 Preparation of Evidence and Schedules

The study report addresses requirements as outlined in the OEB 2006 Rate Handbook and as directed in the OEB Decision in the last Hydro One distribution rate application issued March 12, 2015. This included:

- costing of the steps required to perform each service to better illustrate the underlying costs;
- at least 40 hours per week where service is available at the standard price and specification of what these hours are;
- documentation of higher charges for services done outside of these regular hours when the customer requests “after regular hours” service. Emergencies related to safety or reliability will not be billed at the higher after regular hours rates;

- declaration that there is no cross-subsidy from ratepayers; and
- a proposal of changes and recommendations.

### **3.11 Study Assumptions**

The following assumptions were used to formulate the recommendations made by Hydro One regarding the appropriate charge to be levied for the provision of a specific service.

#### **3.11.1 Hours**

All services that are accomplished between the hours of 8:00 a.m. and 4:00 p.m., Monday to Friday inclusive, are considered to be completed during “regular hours”. Services considered to be performed “after regular hours” occur between the hours of 4:00 p.m. to 8:00 a.m. Emergencies related to safety or reliability will not be billed at the higher “after regular hours” rates regardless of when they occur. The underlying costs for specific services performed “after regular hours” must adhere to collective agreement overtime items that stipulate a minimum two hour call out for staff. Customers are advised of the additional costs of performing services after hours. If the customer still elects to have the service performed after hours, they are charged the higher fee to cover the costs.

#### **3.11.2 Underlying Costs**

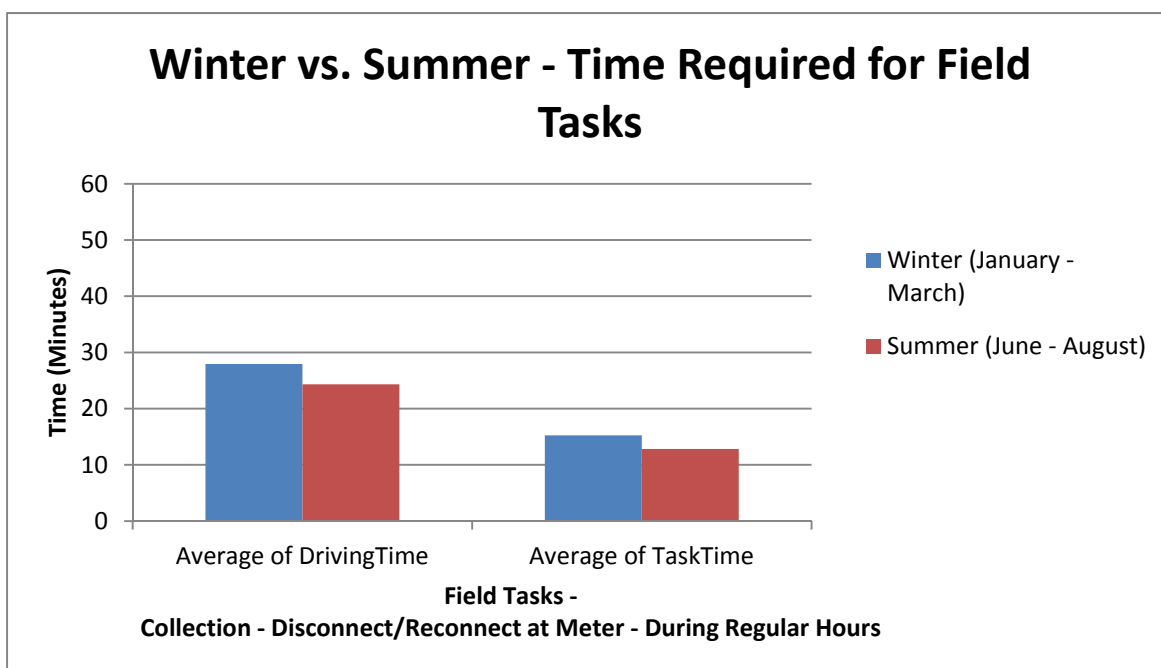

The tables illustrating the underlying costs for each service show the derivation of the specific service charge in accordance with the methodology found in the OEB’s 2006 Electricity Distribution Rate Handbook, Chapter 11, Schedule 11-2, issued May 11, 2005. The derivation of the underlying costs supports the specific service charge recommended by Hydro One. Hydro One has not rounded the cost values for each service.

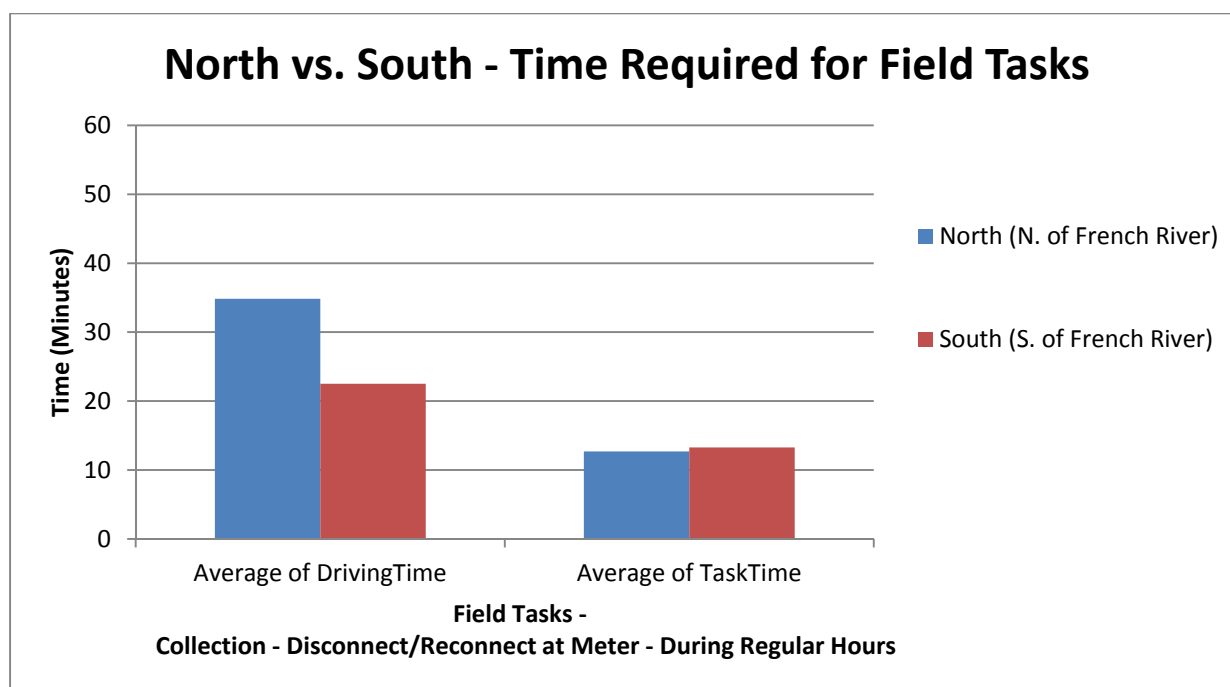

### 3.12 Study Observations

The Study showed that effort and costs associated with the delivery of some services was fairly consistent in some types of services such as statements of account, returned cheque and duplicate invoices. In other cases, there could be variability in delivering the service caused by factors such as work variability, differences in vehicle use, of customer density (rural vs. urban locations), or time of year the work was performed (summer vs. winter). It was therefore important that sample characteristics took this variability into account to ensure underlying costs were fully captured.

Hydro One did not identify any material variability due to causal factors such as seasonality as shown in Figure 1 or travel time according to geographical location in Figure 2. However it must be noted that the winter months in which this study was run were abnormally warm and calm winter months.

**Figure 1: Winter versus Summer**

**Figure 2: North versus South**

The underlying costs of services performed after regular hours are subject to the minimum call out requirements of the union collective agreements and additional driving time. When a service is performed after regular hours, an employee must drive from the headquartered station to site of the work and back to the station. For services performed during regular hours, driving time will be less as the scheduling of the tasks will leverage the bucketing of work throughout the day.

## 4.0 HYDRO ONE RECOMMENDATIONS

All recommendations for changes in the fees for specific services from Hydro One are based on the recovery of the underlying costs to provide that specific service. It should be noted that the OEB initiated their own Review of Miscellaneous Rates and Charges (EB-2015-0304) in November 2015.

In analyzing the data collected from the time study, Hydro One has identified specific service charges that will require a substantial increase in order to recover the underlying costs (e.g.

Meter Dispute Charge propose increase of 816%). In association with recommended fee changes, Hydro One recommends the following:

1. Hydro One acknowledges some recommendations are for a material service charge increase but does not recommend a phase in period. These fees are not relevant in the context of a typical customers' total bill and therefore a mitigation or phase in concept should not apply.
2. To be consistent with the OEB's incentive regulation regime, Hydro One recommends increases to the miscellaneous service charges be escalated on an annual basis using the time elements found in this study and applying the appropriate payroll burden and fleet burden rates.
3. Hydro One also recommends that a study to determine the underlying costs for miscellaneous services be performed every five years to ensure there is no over collection from customers nor cross subsidization to recover the costs of performing these services. In the rebasing of the fees every five years, a distributor will have an opportunity to implement efficiency initiatives to reduce underlying costs and pass these savings on to customers.

## **5.0 MISCELLANEOUS SERVICE CHARGES**

The following sections include a brief overview of each specific service, a schedule showing the Derivation of Standard Rates and Modeling for Deriving Distributor Specific Rates and a recommendation regarding each service in the Study. Summary tables of the data collected during the Study to support the proposed changes in the fees for each specific service can be found in Appendix B.

### **5.1 Arrears Certificate – OEB Rate Code #1**

Prior to 2005 and market restructuring, Ontario Hydro had the capacity to recover account defaults (unpaid final bill arrears) by property owners through the Municipal property tax roll under the Public Utilities Act. Market restructuring brought about the corporatization of the distribution sector and removed this tool to recover payment defaults. The former practice was to provide an "arrears certificate" to the purchaser's solicitor to advise of any registered hydro liens and a final bill estimate for a hold back of funds if required. This service is no longer offered.

Reference: Standard Supply Service Code and Distribution System Code.

### **5.2 Statement of Account – OEB Rate Code #2**

Statements of account are used to satisfy customer requests for support documentation for income tax purposes and to satisfy requests for other billing information. Customer requests for statement of account information can be received via multiple communication channels (e.g. email via INET, fax, white mail, phone call). The process to satisfy customer requests for the following services is the same and therefore the volume of each type of request was not tracked individually:

- Statements of account – OEB Rate Code #2;
- Other billing information – OEB Code #5 and;
- Account History #9.

According to the Conditions of Service, billing information can be requested two times per year at no charge.

### 5.2.1 Process Steps

The high-level process steps to perform this service include:

1. Customer makes request through telephone, e-mail, fax.
2. Customer Service Representative (“CSR”) finds customer in system.
3. CSR runs query on selected date range.
4. CSR prints results of query.
5. CSR creates appropriate cover letter through system.
6. Letter and statement are sent.

### 5.2.2 Underlying Costs

Table 2 shows the derivation of the underlying costs of this specific service.

**Table 2: Derivation of the Underlying Costs for Statements of Account**

Underlying Cost Description For:					
2 Statement of account					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.11		\$ 8.10
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 4.81
Total Labour Cost					\$ 12.91
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material (Postage)	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.80
Hydro One Underlying Cost and Proposed Charge					\$ 13.71
Hydro One Current Charge					\$ 15.00

### 5.2.3 Recommendation

Customers are advised that this service can be completed through Hydro One’s self-serve on-line system at no cost. Hydro One recommends the charge for this service should be \$13.71 to allow

recovery of underlying costs if the customer opts for the customer care agent to perform the service on their behalf.

### **5.3 Pulling Post-Dated Cheques – OEB Rate Code #3**

Hydro One tracks the details of post-dated cheques in the Billing / Payments Interaction Record. The Cashiering Department at Hydro One is not able to retrieve / pull post-dated cheques from the system. Therefore Hydro One does not perform this service. Instead, customers must issue a stop payment on the cheque(s).

### **5.4 Duplicate Invoices for Previous Billing – OEB Rate Code #4**

A customer will request a duplicate invoice to replace a lost or misplaced invoice or to satisfy the request for other billing information. Customer requests duplicate invoices for previous billing can be received via multiple communication channels (i.e. email via INET, fax, white mail, phone call). The process to satisfy customer requests for the following services is the same and therefore the volume of each type of request is not tracked individually:

- Duplicate invoices for previous billing – OEB Rate Code #4 and;
- Income tax letters – OEB Rate Code #7

According to the Conditions of Service, billing information can be requested two times per year at no charge.

#### **5.4.1 Process Steps**

The high-level steps to perform this service include:

1. Customer makes request through telephone, e-mail, fax.
2. CSR finds customer in system.
3. CSR runs query on selected date range.
4. CSR prints results of query.
5. CSR creates appropriate cover letter through system.
6. Letter and statement are sent.

### 5.4.2 Underlying Costs

Table 3 shows the derivation of the underlying costs of this specific service.

**Table 3: Derivation of the Underlying Costs for Duplicate Invoices**

Underlying Cost Description For:					
4 Duplicate invoices for previous billing					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.10		\$ 7.48
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 4.44
Total Labour Cost					\$ 11.92
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material (Postage)	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.80
Hydro One Underlying Cost and Proposed Charge					\$ 12.72
Hydro One Current Charge					\$ 15

### 5.4.3 Recommendation

Customers are advised that this service can be completed through Hydro One's self-serve on-line system at no cost. Hydro One recommends the charge for this service should be \$12.72 to allow recovery of underlying costs if the customer opts for the customer care agent to perform the service on their behalf.

## 5.5 Request for Other Billing Information – OEB Rate Code #5

A customer may request other billing information for a variety of reasons. Customer requests can be received via multiple communication channels (i.e. email via INET, fax, white mail, phone call). The process to satisfy customer requests for the following services is the same and therefore the volume of each type of request is not tracked individually:

- Statements of account – OEB Rate Code #2;
- Other billing information – OEB Code #5 and;
- Account History #9.

According to the Conditions of Service, billing information can be requested two times per year at no charge.

### 5.5.1 Process Steps

The high-level steps involved to perform this service include:

1. Customer makes request through telephone, e-mail, fax.
2. CSR finds customer in system.
3. CSR runs query.
4. CSR prints results of query.
5. CSR creates appropriate cover letter through system.
6. Letter and statement are sent.

### 5.5.2 Underlying Costs

Table 4 shows the derivation of the underlying costs of this specific service.

**Table 4: Derivation of the Underlying Costs for Requests for Other Billing Information**

Underlying Cost Description For:					
5	Request for other billing information				
9	Account History				
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.11		\$ 8.10
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 4.81
	Total Labour Cost				\$ 12.91
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material (Postage)	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
	Total Other Cost				\$ 0.80
Hydro One Underlying Cost and Proposed Charge					\$ 13.71
Hydro One Current Charge					\$ 15

### 5.5.3 Recommendation

Hydro One recommends the charge for this service should be \$13.71 to allow recovery of underlying costs of performing this service.

## 5.6 Easement Letters – OEB Rate Code #6

An easement or right-of-way is an agreement that confers on an individual, company or municipality the right to use a landowner's property in some way. While these agreements grant rights, they also have the effect of partially restricting an owner's use of the affected portions of land. The holder (beneficiary or grantee) of an easement or right-of-way holds certain rights regarding usage of the property described in the agreement. The holder's rights of use are described and restricted by the agreement. The landowner continues to own the land and has only given up defined rights on the portion of land used for the right-of-way or easement. The Hydro One Easement / Real Estate department deals with payments and issues related to new easement and unregistered easements only. Search for unregistered easements can be conducted on-line by a customer for a current fee of \$25 or by sending a letter of request to Hydro One with a legal description of the property in question.

### 5.6.1 Process Steps

The high-level steps to perform this service include:

1. Receive request via regular mail or courier and identify key information from letter received from customer (e.g. lot, concession, plan, etc.).
2. Follow up with Law division for incomplete or incorrect searches (90% of volume).
3. Search database for rights information.
4. Enter all information for letter of response to email to the requesting Law firm
5. If not enough information provided by the customer, call or e-mail customer for required information.
6. Manage payment received.

### 5.6.2 Underlying Costs

Table 5 shows the derivation of the underlying costs of performing this specific service.

**Table 5: Derivation of the Underlying Costs for Easement Letters**

Underlying Cost Description For:					
6 Easement letter					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.70		\$ 52.43
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 31.09
Total Labour Cost					\$ 83.52
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.80
Hydro One Underlying Cost and Proposed Charge					\$ 84.32
Hydro One Current Charge					\$ 15

### 5.6.3 Recommendation

Hydro One recommends the charge for the provision of an easement letter should be raised to \$84.32 to recover the underlying costs of performing this service.

## 5.7 Income Tax Letter – OEB Rate Code #7

An income tax letter is usually used to satisfy customer requests for support documentation for income tax purposes. Customer requests for income tax letters can be received via multiple communication channels (i.e. email via INET, fax, white mail, phone call). The process to satisfy customer requests for the following services is the same and therefore the volume of each type of request is not tracked individually:

- Duplicate invoices for previous billing – OEB Rate Code #4 and;
- Income tax letters – OEB Rate Code #7

### 5.7.1 Process Steps

The high-level steps to perform this service include:

1. Customer requests an income tax letter through telephone, e-mail, fax
2. CSR finds customer in system
3. CSR runs query on selected date range

4. CSR prints results of query
5. CSR creates appropriate cover letter through system
6. Letter and statement is sent

### 5.7.2 Underlying Costs

Table 6 shows the derivation of the underlying costs of this specific service.

**Table 6: Derivation of the Underlying Costs for Income Tax Letters**

Underlying Cost Description For:					
7 Income tax letter					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.10		\$ 7.48
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 4.44
Total Labour Cost					\$ 11.92
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.80
Hydro One Underlying Cost and Proposed Charge					\$ 12.72
Hydro One Current Charge					\$ 15

### 5.7.3 Recommendation

Hydro One recommends the charge for this service should be \$12.72 to allow recovery of underlying costs of performing this service.

## 5.8 Notification Charge – OEB Rate Code #8

Hydro One has no record of the meaning of this service and therefore has never charged for it.

## 5.9 Account History – OEB Rate Code #9

Customer requests for account history only occur when there has been a change in the Hydro One billing system. Account history for customers billed through the Retail Customer Information System until mid-1998 has been archived to Microfiche. Account history for

customers billed using the Customer Service System post mid-1998, is archived in the Heritage Data Library. Over time, the volume of requests for account history will decline.

The process to satisfy customer requests for the following services is the same and therefore the volume of each type of request is not tracked individually:

- Statements of account – OEB Rate Code #2;
- Other billing information – OEB Code #5 and;
- Account History #9.

### 5.9.1 Process Steps

The high-level steps to perform this service include:

1. Customer requests account history through telephone, e-mail, fax
2. CSR finds customer in system
3. CSR runs query on selected date range
4. CSR prints results of query
5. CSR creates cover letter
6. Letter and account history is sent

### 5.9.2 Underlying Costs

Table 7 shows the derivation of the underlying costs of performing this service.

**Table 7: Derivation of Underlying Costs for Account History**

Underlying Cost Description For:					
5	Request for other billing information				
9	Account History				
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.11		\$ 8.10
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 4.81
Total Labour Cost					\$ 12.91
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material (Postage)	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.80
Hydro One Underlying Cost and Proposed Charge					\$ 13.71
Hydro One Current Charge					\$ 15

### 5.9.3 Recommendation

Hydro One recommends the charge for this service should be \$13.71 to allow recovery of underlying costs of performing this service.

## 5.10 Credit Reference / Credit Check (plus credit agency costs) – OEB Rate Code #10

The fee for performing this specific service is charged when a customer requests a credit reference letter from Hydro One, to be used to show other utilities that they are a satisfactory credit risk. This may determine whether the customer's security deposit can be waived or not.

### 5.10.1 Process Steps

The high-level steps to perform this service include:

1. Receive request via e-mail, letter, or fax
2. Investigate request
3. Create credit reference letter
4. Submit either to printer (letter or fax) or INet Team (email)
5. Record that the credit letter has been sent

### 5.10.2 Underlying Costs

Table 8 shows the derivation of the underlying costs of this specific service.

**Table 8: Derivation of the Underlying Costs for Credit Reference or Credit Checks**

Underlying Cost Description For:					
10 Credit reference/credit check (plus credit agency costs)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.16		\$ 11.83
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 7.01
Total Labour Cost					\$ 18.84
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ -
Hydro One Underlying Cost and Proposed Charge					\$ 18.84
Hydro One Current Charge					\$ 15

### **5.10.3 Recommendation**

Hydro One recommends the charge be raised to \$18.84 plus credit agency costs, to recover the underlying costs of performing this service. Credit agency costs can vary according the specific agency therefore this is proposed to be a pass-through charge.

## **5.11 Returned Cheque Charge (plus Bank charges) – OEB Rate Code #11**

Through an outsourcing agreement, Hydro One uses a service provider to perform payment processing services such as cheque processing from receipt, to proof, to image capture and posting of standard cheques and payment instruments. All cheques returned by a financial institution, are sent to Hydro One on a daily basis.

### **5.11.1 Process Steps**

The high-level steps in performing this service include:

1. Sort bundle of returned cheques.
2. Reconcile the debit list and the Return File Sheet with the bank statement.
3. Investigate “unprocessable items” (returned from the bank)
4. Record manual entries as required.

### **5.11.2 Underlying Costs**

Note: Any bank fees incurred for returned cheques are billed directly to the customer by the bank. Table 9 shows the derivation of the underlying costs of this specific service.

**Table 9: Derivation of the Underlying Costs for Returned Cheques**

<b>Underlying Cost Description For:</b>					
<b>11 Returned cheque charge</b>					
		<b>Rate/Amount</b>	<b>Hours/Units</b>	<b>O/T Factor</b>	<b>Calculated Cost</b>
<b>L</b>	Direct Labour (inside staff) Straight Time	74.70	0.06		\$ 4.36
<b>A</b>	Direct Labour (inside staff) Overtime				
<b>B</b>	Direct Labour (field staff) Straight Time				
<b>O</b>	Direct Labour (field staff) Overtime				
<b>U</b>	Other Labour (Specify)				
<b>R</b>	Payroll Burden (%)	59.30%			\$ 2.58
Total Labour Cost					\$ 6.94
<b>O</b>	Small Vehicle Time				
<b>T</b>	Large Vehicle Time				
<b>H</b>	Other: Material				
<b>E</b>	Other: Contract				
<b>R</b>	Other: Other (Feed Through Bank Fees)	-	0.00		\$ -
Total Other Cost					\$ -
<b>Hydro One Underlying Cost and Proposed Charge</b>					<b>\$ 6.94</b>
<b>Hydro One Current Charge</b>					<b>\$ 15</b>

### 5.11.3 Recommendation

Hydro One recommends the charge for “Returned Cheques” be decreased to \$6.94.

## 5.12 Charge to Certify Cheque – OEB Rate Code #12

Hydro One does not perform this service. No historical process documentation or reporting was found.

## 5.13 Legal Letter Charge – OEB Rate Code #13

Legal letters are processed for many reasons and may include the requirement for Law to do research into the matter. Hydro One proposes that actual costs, based on time, equipment and materials, be charged for the performance of this service. This service was not included in this study.

## 5.14 Account Set Up Charge / Change of Occupancy – OEB Rate Code #14

This process is triggered by a Customer / Landlord request for a Start / Transfer Contract via phone, fax or e-mail. This occurs when a customer is opening a new electricity account or moving from one Hydro One property to another. Hydro One’s work instruction regarding the

start and or transfer of a contract, identifies multiple scenarios for conducting these tasks such as transferring a contract, changing a contract and starting a new contract for vacant premise. Customer requests can be received from multiple communication channels (i.e. email via INET, fax, white mail, phone call, or web self-serve). Customers are encouraged to contact the collection agencies directly to settle any outstanding final billed arrears. If a customer decides to pay their final billed arrears directly to Hydro One, the payment does get reported to the collection agency.

### 5.14.1 Process Steps

In general, the following steps are followed:

1. Set up customer information in the Customer Information System (“CIS”) such as name, address, phone number.
2. Setting appropriate special designations such as aggressive dog, vital service, meter location.
3. Populate other information such as start and end date, billing class, payment method, preauthorized payment, equal billing.

### 5.14.2 Underlying Costs

Table 10 shows the derivation of the underlying costs of this specific service.

**Table 10: Derivation of the Underlying Costs for Account Set Up Charges**

Underlying Cost Description For:					
14 Account set up charge/change of occupancy charge (plus credit agency costs if applicable)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.30		\$ 22.10
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 13.10
Total Labour Cost					\$ 35.20
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ -
Hydro One Underlying Cost and Proposed Charge					\$ 35.20
Hydro One Current Charge					\$ 30

### 5.14.3 Recommendation

Hydro One recommends increasing this charge to \$35.20 plus credit agency costs, to recover the underlying costs of performing this service. Credit agency costs can vary according the specific agency therefore this is proposed to be a pass-through charge.

## 5.15 Special Meter Reads – OEB Rate Code #15

This charge is applied when a Retailer requests an enrollment / drop prior to the next scheduled read. Sections 10.5.1 and 10.5.3 to 10.5.5 of the Retail Settlements Code state:

*a service transfer from one retailer to another, including a transfer from or to a Standard Supply Service provider, shall only take effect on the date of an actual meter read. Despite the requested service transfer set out in an Service Transaction Request (STR), a distributor may specify in its Service Agreement with a competitive retailer a number of days prior to any next scheduled meter read where, if a distributor receives an STR requesting a change in service provider less than the number of days specified in the Service Agreement before the next scheduled meter read, the distributor is not obligated to change service provider until the scheduled meter read following the next scheduled meter read.*

### 5.15.1 Underlying Costs

Table 11 shows the derivation of the underlying costs of this specific service.

**Table 11: Derivation of the Underlying Costs for Special Meter Reads**

Underlying Cost Description For:					
15 Special Meter Reads (retailer requested off-cycle read)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.11		\$ 8.03
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	57.12	0.75		\$ 42.99
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 30.26
Total Labour Cost					\$ 81.28
O	Small Vehicle Time	10.00	0.75		\$ 7.53
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 7.53
Hydro One Underlying Cost and Proposed Charge					\$ 88.80
Hydro One Current Charge					\$ 30

### 5.15.2 Recommendation

Hydro One recommends the charge for special meter reads should be increased to \$88.80 to recover the costs of performing this service.

## 5.16 Collection of Account Charge – No Disconnect during regular hours – OEB Rate Code #16

This service covers the field collection activities due to customer non-payment of bill. The work is initiated by a notification / order. If on arrival at the customer's site, the customer pays the outstanding balance, no disconnect will occur, however this charge will still apply.

### 5.16.1 Underlying Costs

Table 12 shows the derivation of the underlying costs of this specific service.

**Table 12: Derivation of the Underlying Costs for Collection of Account Charge – No Disconnect during regular hours**

Underlying Cost Description For:					
16 Collection of account charge - no disconnection during regular hours					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.25		\$ 18.34
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	57.12	0.66		\$ 37.58
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 33.16
Total Labour Cost					\$ 89.07
O	Small Vehicle Time	10.00	0.66		\$ 6.58
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 6.58
Hydro One Underlying Cost and Proposed Charge					\$ 95.65
Hydro One Current Charge					\$ 30

### 5.16.2 Recommendation

Hydro One recommends the charge for the collection of an account with no disconnection should be increased to \$95.65 to recover the underlying costs.

### **5.17 Collection of Account Charge – No Disconnect after regular hours – OEB Rate Code #17**

Hydro One does not perform collection tasks after regular hours. The cost of overtime to perform this service after regular hours would add to the underlying costs and may add further hardship to a customer.

### **5.18 Collection - Disconnect / Reconnect at Meter –OEB Rate Code #18 and Install / Remove Load Control Device – OEB Rate Codes #19 – during Regular Hours**

When a customer has not paid their electricity bill for an extensive period of time, an Electricity Disconnection Notice is issued. If payment is still not received a disconnection or the installation of a load limiter is performed. These activities are performed in accordance with Subsection 31(1) of the *Electricity Act, 1998* which provides that:

*A distributor may shut off the distribution of electricity to a property if any amount payable by a person for the distribution or retail of electricity to the property pursuant to Section 29 is overdue.*

During the time study to determine the underlying costs of the collection activities resulting in a disconnection / reconnection at the meter or the installation / removal of a load control device, it was identified that the tasks associated with these two services are very similar and are provided by the same staffing positions. Rate code #18 and #19 services are performed during regular hours.

#### **5.18.1 Underlying Costs**

The following tables illustrate the underlying costs of these services.

#### Collection – Disconnect / Reconnect at the Meter during Regular Hours – OEB Code #18

Table 13 shows the derivation of the underlying costs of a collection activity resulting in a disconnection / reconnection at the meter during regular business hours.

**Table 13: Derivation of the Underlying Costs for Disconnect / Reconnect at a Meter during Regular Hours**

Underlying Cost Description For:					
<b>18 Collection - Disconnect/Reconnect at meter - during regular hours</b>					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	57.12	0.62		\$ 35.45
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 40.03
Total Labour Cost					\$ 107.53
O	Small Vehicle Time	10.00	0.62		\$ 6.21
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 7.01
Hydro One Underlying Cost and Proposed Charge					\$ 114.54
Hydro One Current Charge					\$ 65

Collection - Install / Remove Load Control Device during Regular Hours – OEB Code #19

Table 14 shows the derivation of the underlying costs of a collection activity resulting in the installation and removal of a load control device during regular hours.

**Table 14: Derivation of the Underlying Costs for the Installation / Removal of a Load Control Device during Regular Hours**

Underlying Cost Description For:					
<b>19 Collection - Install/Remove load control device - during regular hours</b>					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	57.12	0.66		\$ 37.96
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 41.52
Total Labour Cost					\$ 111.53
O	Small Vehicle Time	10.00	0.66		\$ 6.65
T	Large Vehicle Time				
H	Other: Material	0.84	1.00		\$ 0.84
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 7.48
Hydro One Underlying Cost and Proposed Charge					\$ 119.02
Hydro One Current Charge					\$ 65

Combined Costs of Collection - Disconnect / Reconnect at the Meter or Installation / Removal of a Load Control Device during Regular Hours

Due to the similarities of these two services, Hydro One proposes that these two services when performed during regular hours be combined under one rate code. Table 15 combines the underlying time and costs associated with these services.

**Table 15: Derivation of the Underlying Costs for the Combined Collection Activities of Disconnect / Reconnect at the Meter or Installation / Removal of a Load Control Device during Regular Hours**

Underlying Cost Description For:					
18	Collection - Disconnect/Reconnect at meter - during regular hours				
19	Collection - Install/Remove load control device - during regular hours				
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	57.12	0.62		\$ 35.51
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 40.07
Total Labour Cost					\$ 107.63
O	Small Vehicle Time	10.00	0.62		\$ 6.22
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 7.02
Hydro One Underlying Cost and Proposed Charge					\$ 114.65
Hydro One Current Charge					\$ 65

### 5.18.2 Recommendation

Hydro One recommends the charge for collection activities resulting in a disconnection / reconnection at the meter or an installation or removal of a load control device during regular hours be combined into one rate code and should be increased to \$114.65 to recover the underlying costs of providing this service.

### **5.19 Collection - Disconnect / Reconnect at Meter –OEB Rate Code #20 and Install / Remove Load Control Device – OEB Rate Codes #21 – after Regular Hours**

When a customer has not paid their electricity bill for more than 45 days, an Electricity Disconnection Notice is issued. If payment is still not received a disconnection or the installation of a load limiter is performed. These activities are performed in accordance with Subsection 31(1) of the *Electricity Act, 1998* which provides that:

*A distributor may shut off the distribution of electricity to a property if any amount payable by a person for the distribution or retail of electricity to the property pursuant to Section 29 is overdue.*

During the time study to determine the underlying costs of the collection activities resulting in a disconnection / reconnection at the meter or the installation / removal of a load control device, it was identified that the tasks associated with these two services are very similar and are provided by the same staffing positions. Rate code #20 and #21 services are performed after regular hours at the request of the customer.

#### **5.19.1 Underlying Costs**

The following tables illustrate the underlying costs of these services.

##### Collection - Disconnect / Reconnect at the Meter after Regular Hours – OEB Code #20

Table 16 shows the derivation of the underlying costs of collection activities that result in disconnection / reconnection at the meter after regular hours.

**Table 16: Derivation of the Underlying Costs for a Disconnection / Reconnection at the Meter after Regular Hours**

Underlying Cost Description For:					
20 Collection - Disconnect/Reconnect at meter - after regular hours					
Collective agreement stipulates a minimum 2.0 hour call out for Overtime					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	2.05	1.40	\$ 212.62
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 145.09
Total Labour Cost					\$ 389.76
O	Small Vehicle Time	10.00	2.05		\$ 20.50
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 21.31
Hydro One Underlying Cost and Proposed Charge					\$ 411.07
Hydro One Current Charge					\$ 185

Collection - Install / Remove Load Control Device after Regular Hours – OEB Code #21

Table 17 shows the derivation of the underlying costs of an installation / removal of a load control device after regular hours.

**Table 17: Derivation of the Underlying Costs for the Installation / Removal of a Load Control Device after Regular Hours**

Underlying Cost Description For:					
21 Collection - Install/Remove load control device - after regular hours					
Collective agreement stipulates a minimum 2.0 hour call out for Overtime					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	2.00	1.40	\$ 207.40
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 141.99
Total Labour Cost					\$ 381.44
O	Small Vehicle Time	10.00	1.42		\$ 14.17
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 14.97
Hydro One Underlying Cost and Proposed Charge					\$ 396.41
Hydro One Current Charge					\$ 185

### Combined Costs of Collection - Disconnect / Reconnect at the Meter or Installation / Removal of a Load Control Device after Regular Hours

Due to the similarities of these two services, Hydro One proposes that these two services when performed after regular hours be combined under one rate code. Table 18 combines the underlying time and costs associated with these services.

**Table 18: Derivation of the Combined Underlying Costs for the Disconnect / Reconnect at the Meter or Installation / Removal of a Load Control Device after Regular Hours**

Underlying Cost Description For:					
20	Collection - Disconnect/Reconnect at meter - after regular hours				
21	Collection - Install/Remove load control device - after regular hours				
	After hours requires more travel time, whereas during regular hours, tech would bucket work				
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	2.02	1.40	\$ 209.88
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 143.47
	Total Labour Cost				\$ 385.40
O	Small Vehicle Time	10.00	2.02		\$ 20.24
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
	Total Other Cost				\$ 21.04
Hydro One Underlying Cost and Proposed Charge					\$ 406.45
Hydro One Current Charge					\$ 185

### 5.19.2 Recommendation

Hydro One recommends the charge for collection activities resulting in a disconnection / reconnection at the meter or an installation or removal of a load control device after regular hours be combined into one rate code and should be increased to \$406.45 to recover the underlying costs.

### 5.20 Collection - Disconnect / Reconnect at Pole –Rate Codes #22 and #23

When a customer has not paid their electricity bill for more than 45 days, an Electricity Disconnection Notice is issued. If payment is still not received a disconnection is performed. At times, a disconnection cannot be performed at the meter due to type of the meter or the meter is not accessible (e.g. located inside a locked building), therefore disconnection must be performed

at the pole. These activities are performed in accordance with Subsection 31(1) of the *Electricity Act, 1998* which provides that:

*A distributor may shut off the distribution of electricity to a property if any amount payable by a person for the distribution or retail of electricity to the property pursuant to Section 29 is overdue.*

### 5.20.1 Underlying Costs

Table 19 shows the derivation of the underlying costs of this specific service during regular hours.

**Table 19: Derivation of the Underlying Costs for the Collection including a Disconnection / Reconnection at the Pole during Regular Hours**

Underlying Cost Description For:					
22 Collection - Disconnect/Reconnect at pole - during regular hours					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	74.07	1.72		\$ 127.06
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 94.35
Total Labour Cost					\$ 253.47
O	Small Vehicle Time				
T	Large Vehicle Time	57.00	0.86		\$ 48.89
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 48.89
Hydro One Underlying Cost and Proposed Charge					\$ 302.35
Hydro One Current Charge					\$ 185

Table 20 shows the derivation of the underlying costs of this specific service when performed after regular hours.

**Table 20: Derivation of the Underlying Costs for the Collection including a Disconnection / Reconnection at the Pole after Regular Hours**

Underlying Cost Description For:					
23 Collection - Disconnect/Reconnect at pole - after regular hours					
Collective agreement stipulates a minimum 2.0 hour call out for Overtime					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.43		\$ 32.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	4.00	1.40	\$ 414.79
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 264.98
Total Labour Cost					\$ 711.82
O	Small Vehicle Time				
T	Large Vehicle Time	57.00	1.56		\$ 89.15
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 89.15
Hydro One Underlying Cost and Proposed Charge					\$ 800.97
Hydro One Current Charge					\$ 415

### 5.20.2 Recommendation

Hydro One recommends the charge for performing a collection with a disconnection or reconnection at the pole during regular hours should be increased to \$302.35 and after regular hours be increased to \$800.97 to recover the underlying costs of providing these services.

## 5.21 Meter Dispute Charge (plus Measurement Canada fees if meter found correct)

A meter dispute check is initiated by a customer when there is a concern regarding the accuracy of their meter. It is performed in cooperation with Measurement Canada.

### 5.21.1 Underlying Costs

Table 21 shows the derivation of the underlying costs of performing a meter dispute check.

**Table 21: Derivation of the Underlying Costs for Meter Dispute Charge involving Measurement Canada**

Underlying Cost Description For: 24 Meter Dispute Charge - Measurement Canada					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.68		\$ 51.16
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	1.42		\$ 112.50
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 97.05
Total Labour Cost					\$ 260.70
O	Small Vehicle Time	10.00	1.42		\$ 14.22
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 14.22
Hydro One Underlying Cost and Proposed Charge					\$ 274.92
Hydro One Current Charge					\$ 30

**5.21.2 Recommendation**

Hydro One recommends the charge to settle a meter dispute in cooperation with Measurement Canada, should be increased to \$274.92 to recover the underlying costs of providing this service. This fee will only be charged when the test is performed and the meter is found to be operating correctly.

**5.22 Service Call – Customer-owned equipment– OEB Rate Codes #25 and #26**

When a Hydro One crew is dispatched due to a customer complaint of a power issue and upon arrival at site, it is identified that the cause of the issue is related to the customer-owned equipment, if capable or practical, Hydro One crews will perform the service at the request and for the benefit of the customer. The proposed fees for these rate codes cover the service call portion which includes the administration and travel costs only. The fees do not cover any work associated with work on the customer-owned equipment.

**5.22.1 Underlying Costs**

The following tables illustrate the underlying costs of performing these services.

Service Call during Regular Hours

Table 22 shows the derivation of the underlying costs of a service call for customer-owned equipment during regular hours.

**Table 22: Derivation of the Underlying Costs for a Service Call for Customer-Owned Equipment during Regular Hours**

Underlying Cost Description For:					
25 Service call - customer owned equipment - during regular hours					
*Specific Service Charge Value does not include the cost associated with the actual task time, for Field Staff; HONI will bill actual cost to customer					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.08		\$ 6.23
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	74.07	1.31		\$ 96.69
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 61.03
Total Labour Cost					\$ 163.95
O	Small Vehicle Time				
T	Large Vehicle Time	57.00	0.65		\$ 37.20
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 37.20
Hydro One Underlying Cost and Proposed Charge					\$ 201.15
Hydro One Current Charge					\$ 30

Service Call after Regular Hours

Table 23 shows the derivation of the underlying costs of a service call for customer-owned equipment after regular hours.

**Table 23: Derivation of the Underlying Costs for a Service Call for Customer-Owned Equipment after Regular Hours**

Underlying Cost Description For:					
26 Service call - customer owned equipment - after regular hours					
*Specific Service Charge Value does not include the cost associated with the actual task time, for Field Staff; HONI will bill actual cost to customer					
Collective agreement stipulates a minimum 2.0 hour call out for Overtime					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.08		\$ 6.23
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	4.00	1.40	\$ 414.79
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 249.66
Total Labour Cost					\$ 670.68
O	Small Vehicle Time				
T	Large Vehicle Time	57.00	1.31		\$ 74.49
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 74.49
Hydro One Underlying Cost and Proposed Charge					\$ 745.17
Hydro One Current Charge					\$ 165

### **5.22.2 Recommendation**

Hydro One recommends the charge for a service call on customer-owned equipment during regular hours should be \$201.15 and the charge for a service call on customer-owned equipment after regular hours at the customer's request should be \$745.17. Customers are advised of the additional charge for work performed after hours when they make the request. The service call charge recovers the cost of the office tasks and travel time. This charge is applied whether Hydro One crews work on the customer-owned equipment or not. The customer will be additionally charged for actual costs for performing any work on their equipment.

## **5.23 Temporary Service Install and Remove –OEB Rate Codes #27, #28 and #29**

Customer requests for the installation and removal of a temporary service can greatly vary in the amount of work required and each job will have its own unique working conditions. At the customer's request, a temporary service is connected. When the Customer is ready to a) cancel the temporary service or b) transfer to the conductor and meter to the new permanent service, Hydro One will return to perform the relocation.

### **5.23.1 Recommendation**

To avoid cross-subsidization or over collection, Hydro One proposes that the fee for these specific services be derived on the actual costs of each individual job.

## **5.24 Specific Charge for Access to the Power Poles – Telecom Only – OEB Rate Code #30**

New proposed rates were not part of this time study. New rates will be calculated using the approved OEB methodology found in the Decision and Rate Order for the *Motion to Review and Vary Decision EB-2013-01416/EB-2014-0247 approving Distribution Rates and Charges for Hydro One Networks Inc. for 2015-2017*, proceeding EB-2015-0141, dated August 4, 2016.

## 5.25 Vacant Premise Reconnect at Meter and at Pole – Hydro One Codes #31a and #31b

A Vacant Premise occurs when an existing customer cancels their account with Hydro One and the meter is left active when the existing customer's contract ends. When this occurs, if the new home owner, or landlord, does not call Hydro One to have the account for that premise moved into their name, Hydro One attempts to contact the premise owner by mail or letter delivered to the premise. If the owner of the premise does not contact Hydro One after the notices are given, Hydro One disconnects the service at the meter or pole, as the service is no longer associated with a customer.

When the new premise address owner or landlord, contacts Hydro One to have an account set up in their name for the now disconnected service, Hydro One goes to the premise to perform a reconnect at the meter or pole. The reconnect service fee is recovered from the new premise address owner.

### 5.25.1 Underlying Costs

Tables 24 and 25 show the derivation of the underlying costs of these specific services.

**Table 24: Derivation of the Underlying Costs for a Vacant Premise Notice – Move in with Reconnect of Electrical Service at Meter during Regular Hours**

Underlying Cost Description For:					
31a Vacant Premise - Move in with Reconnect of Electrical Service at Meter					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.29		\$ 21.84
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	57.12	0.57		\$ 32.52
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 32.24
Total Labour Cost					\$ 86.60
O	Small Vehicle Time	10.00	0.57		\$ 5.69
T	Large Vehicle Time				
H	Other: Material	0.80	1.00		\$ 0.80
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 6.50
Hydro One Underlying Cost and Proposed Charge					\$ 93.09
Hydro One Current Charge					N/A

**Table 25: Derivation of the Underlying Costs for a Vacant Premise Notice – Move in with Reconnect of Electrical Service at Pole during Regular Hours**

Underlying Cost Description For:					
31b Vacant Premise - Move in with Reconnect of Electrical Service at Pole					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.29		\$ 21.84
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	74.07	1.72		\$ 127.06
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 88.30
Total Labour Cost					\$ 237.20
O	Small Vehicle Time				
T	Large Vehicle Time	57.00	0.86		\$ 48.89
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 48.89
Hydro One Underlying Cost and Proposed Charge					\$ 286.09
Hydro One Current Charge					N/A

### 5.25.2 Recommendation

Hydro One recommends the charge for a reconnect at the meter be \$93.09 and the charge for a reconnect at the pole be \$286.09 to recover the underlying costs of performing these services.

## 5.26 Reconnect completed after regular hours (customer / contract driven) - at the meter or at the pole – Hydro One Codes #32 and #33

All customers are responsible for maintaining their own equipment; therefore, Hydro One provides one yearly (calendar year January to December) Service Disconnection and Re-Connection (isolation and restoration) during regular business hours for customer maintenance purposes. There is a charge for a reconnection at the meter or pole performed after hours when the service is not ready to reconnect during regular hours due to the customer or contractor. The charge is only the difference between the charge for the service performed during regular hours and the charge for the service performed after regular hours.

### 5.26.1 Underlying Costs

Tables 26 and 27 illustrate the underlying costs of performing these services.

**Table 26: Derivation of the Underlying Costs for a Reconnect completed after hours (customer/contract driven) - at the meter**

Underlying Cost Description For:					
32 Reconnect completed after hours (customer/contract driven) - at meter					
*Credit to the customer equal to the value of a regular hours cut-in (Code 18) - 1 free disconnect per year					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.58		\$ 43.25
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	1.83	1.20	\$ 162.66
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 122.10
Total Labour Cost					\$ 328.01
O	Small Vehicle Time	10.00	1.83		\$ 18.30
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other, Credit Code 18 & 19 (blended)				\$ (114.65)
Total Other Cost					\$ (96.35)
Hydro One Underlying Cost and Proposed Charge					\$ 231.66
Hydro One Current Charge					N/A

**Table 27: Derivation of the Underlying Costs for a Reconnect completed after hours (customer/contract driven) - at the pole**

Underlying Cost Description For:					
33 Reconnect completed after hours (customer/contract driven) - at pole					
*Credit to the customer equal to the value of a regular hours cut-in (Code 22) - 1 free disconnect per year					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.58		\$ 43.25
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time				
O	Direct Labour (field staff) Overtime	74.07	4.04	1.20	\$ 359.09
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 238.59
Total Labour Cost					\$ 640.93
O	Small Vehicle Time				
T	Large Vehicle Time	57.00	2.02		\$ 115.14
H	Other: Material				
E	Other: Contract				
R	Other: Other, Credit Code 22*				\$ (302.35)
Total Other Cost					\$ (187.21)
Hydro One Underlying Cost and Proposed Charge					\$ 453.72
Hydro One Current Charge					N/A

### 5.26.2 Recommendations

Hydro One recommends the charge for a customer or contractor-driven reconnection at the meter after regular hours should be set at \$231.66 to recover the underlying costs of providing this service.

Hydro One recommends the charge for a customer or contractor-driven reconnection at the pole after regular hours should be set at \$453.72 to recover the underlying costs of providing this service.

These recommended charges include the refund as shown in the tables under “Other: Other, Credit Code\*22”.

### **5.27 Additional Service Layout Fee - Basic (more than one hour) – Hydro One Codes #34 and #35**

When a customer determines that their distribution service requirement has changed, Hydro One will determine the work required to modify the existing service layout to meet the customer’s new needs. A basic service layout in the past has involved a new single phase service. A complex additional service layout was for a three phase service. An additional service layout is a flat fee charged for services provided in excess of one hour.

During the time study to determine the underlying costs of the additional service layout, it was identified that the tasks associated with these two services, basic and complex, are very similar and are provided by the same staffing positions.

#### **5.27.1 Underlying Costs**

The following tables illustrate the underlying costs of performing these services.

##### Additional Service Layout - Basic

Table 28 shows the derivation of the underlying costs of a basic additional service layout.

**Table 28: Derivation of the Underlying Costs for an Additional Basic Service Layout**

Underlying Cost Description For:					
34 Additional Service Layout Fee - Basic (more than one hour)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.64		\$ 47.59
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	3.58		\$ 282.92
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 195.99
Total Labour Cost					\$ 526.51
O	Small Vehicle Time	10.00	1.83		\$ 18.31
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 18.31
Hydro One Underlying Cost and Proposed Charge					\$ 544.82
Hydro One Current Charge					\$ 635

Additional Service Layout - Complex

Table 29 shows the derivation of the underlying costs of a complex additional service layout.

**Table 29: Derivation of the Underlying Costs for an Additional Complex Service Layout**

Underlying Cost Description For:					
35 Additional Service Layout Fee - Complex (more than one hour)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.64		\$ 47.59
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	3.68		\$ 291.13
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 200.86
Total Labour Cost					\$ 539.59
O	Small Vehicle Time	10.00	1.35		\$ 13.47
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 13.47
Hydro One Underlying Cost and Proposed Charge					\$ 553.06
Hydro One Current Charge					\$ 845

Due to the similarities of these two services, Hydro One proposes that basic and complex additional service layouts be combined under one rate code. Table 30 combines the underlying time and costs associated with these services.

**Table 30: Derivation of the Underlying Costs for an Additional Service Layout – Basic and Complex Combined**

Underlying Cost Description For:					
34	Additional Service Layout Fee - Basic (more than one hour)				
35	Additional Service Layout Fee - Complex (more than one hour)				
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.64		\$ 47.59
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	3.62		\$ 286.06
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 197.86
Total Labour Cost					\$ 531.52
O	Small Vehicle Time	10.00	1.73		\$ 17.30
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 17.30
Hydro One Underlying Cost and Proposed Charge					\$ 548.81
Hydro One Current Charge					N/A

### 5.27.2 Recommendation

Hydro One recommends the fees for additional service layouts; basic and complex, be charged under one rate code at \$548.81 (in excess of one hour) to recover the underlying costs of providing this service.

## 5.28 Pipeline Crossings – Hydro One #36

Permission is required from the pipeline company before installing new wires (overhead or underground), crossing pipeline Right of Way (“ROW”), or installing poles, anchors, or other equipment on a pipeline ROW. To generate the drawings, a great deal of information such as pipe depth, diameter, ROW width, and position of the line within their ROW must be collected at the site with a pipeline representative. The pipeline representative will provide what steps are required to be taken, as well as suggestions for the best possible design. The fee Hydro One charges to the customer includes creation of the drawing, signing of the agreement, review of standards, obligations and conditions.

### 5.28.1 Underlying Costs

Table 31 shows the derivation of the underlying costs of this specific service.

**Table 31: Derivation of the Underlying Costs for Pipeline Crossings**

Underlying Cost Description For:					
36 Pipeline Crossings					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	1.00		\$ 74.70
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	16.00		\$ 1,265.60
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 794.80
Total Labour Cost					\$ 2,135.10
O	Small Vehicle Time	10.00	16.00		\$ 160.00
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 160.00
Hydro One Underlying Cost and Proposed Charge					\$ 2,295.10
Hydro One Current Charge					\$ 2,540

### 5.28.2 Recommendation

Hydro One proposes a reduction in the charge for pipeline crossings to \$2,295.10 to avoid over recovery of the performance of this service.

## 5.29 Water Crossings – Hydro One Code #37

Water Crossing fees are only charged when approval is being requested to cross the Rideau Canal, Trent Severn Waterway or Transport Canada. Under emergency conditions, work may proceed but due diligence is required to prevent damage to fish habitat resulting in fines. Under normal circumstances, Hydro One staff will perform a self-assessment for Transport Canada (“TC”) and the Department of Fisheries and Oceans (“DFO”). The results of the self-assessment will dictate further interactions between Hydro One and the DFO and TC in regards to new applications, special permits, guidance to prevent damage to fish habitat and will outline any concerns with the proposed work and if any timing restrictions apply (e.g. fish spawning season).

### 5.29.1 Underlying Costs

Table 32 shows the derivation of the underlying costs of this specific service.

**Table 32: Derivation of the Underlying Costs for Water Crossings**

Underlying Cost Description For:					
37 Water Crossings					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	1.55		\$ 115.79
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	22.75		\$ 1,799.53
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 1,135.78
Total Labour Cost					\$ 3,051.09
O	Small Vehicle Time	10.00	22.75		\$ 227.50
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other, Utility Boat	25.00	5.87		\$ 146.83
Total Other Cost					\$ 374.33
Hydro One Underlying Cost and Proposed Charge					\$ 3,425.42
Hydro One Current Charge					\$ 3,225

### 5.29.2 Recommendation

Hydro One recommends the charge for this specific service should be increased to \$3,425.42 to allow recovery of the underlying costs of performing this service.

## 5.30 Railway Crossings – Hydro One Code #38

A new agreement is required from a railway authority before installing new wire across railway tracks / ROW or reconfiguring or modifying existing crossings of railway tracks / ROW. There are also additional fees incurred from the railway authority application plus the actual railway agreement and flagging fees which must be collected from the customer. Examples of pass-through charges are found in Table 33.

**Table 33: Examples of Pass-Through Charges from Railway Companies**

**Feed through Charges for Railway Crossings**

<b>CPR - Non-Parallel Fees</b>				
	<b>Application Review Fee</b>	<b>One-Time Permit / Agreement Fee</b>	<b>Express Fees</b>	<b>Total Fee</b>
Utility Crossing Permits - Over / Under RR tracks - Within Municipal RD Allowance	\$400.00	\$575.00		\$975.00 + HST
Utility Crossing Agreement - Over / Under Tracks Within CP owned Right of Way	\$400.00	\$1,700.00		\$2,100.00 + HST
Express Application - Utility Crossing Permit	\$400.00	\$575.00	\$1,200.00	\$2,175.00 +HST
Express Application - Utility Crossing Agreement	\$400.00	\$1,700.00	\$1,200.00	\$3,300.00 + HST
Fast Track Application - Utility Crossing Permit	\$400.00	\$575.00	\$2,000.00	2975 + HST
Fast Track Application - Utility Crossing Agreement	\$400.00	\$1,700.00	\$2,000.00	\$4,100.00 + HST
Railroad / title / property search	\$400.00			\$400.00 + HST
Utility Searches and / or copies of agreement / permits	\$200.00 / each			\$200.00 + HST
Revised permit / agreement Drawings	\$400.00			\$400.00 + HST
Additional Review Fees	\$400.00			\$400.00 + HST
Geotechnical Review - in addition to above fees	\$550.00			\$550.00 + HST
CP Flagman	\$1,500 / Day			Actual cost
<b>Trillium Railway Company</b>				
Xing Fees	\$840.00	\$350.00		\$1,190.00 + HST
Additional Review Fees - for each review after the initial	\$105.00 + HST			
Flagging Fees - Minimum 8 hours	\$800.00 / Day			\$250.00 + HST
Cable Locate Fees	\$250.00			Actual

<b>Canadian National</b>		
Application Review Fee	\$950.00 + HST	
Additional Review Fees - for each review after the initial	\$159.00 + HST	
Flagging Fees - Minimum 8 hours	\$187.00 / hour	
Cable Locate Fees – Minimum 6 hours	\$187.00 / hour	

### 5.30.1 Underlying Costs

Table 34 shows the derivation of the underlying costs of this specific service.

**Table 34: Derivation of the Underlying Costs for Railway Crossings**

Underlying Cost Description For:					
38 Railway Crossings					
*Applicable fees to be Feed-Through Charges					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	1.55		\$ 115.79
A	Direct Labour (inside staff) Straight Time	97.93	4.00		\$ 391.72
B	Direct Labour (field staff) Straight Time	79.10	15.77		\$ 1,247.41
O	Direct Labour (inside staff) Straight Time	83.49	12.00		\$ 1,001.88
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 1,634.78
Total Labour Cost					\$ 4,391.57
O	Small Vehicle Time	10.00	15.77		\$ 157.70
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 157.70
Hydro One Underlying Cost and Proposed Charge					\$ 4,549.27
Hydro One Current Charge					\$ 6,095

### 5.30.2 Recommendation

Hydro One recommends the charge for this specific service should be decreased to \$4,549.27 plus any pass-through charges incurred by Hydro One from the railway company in the performance of this service.

### 5.31 Line Staking per Meter – Hydro One Codes #39a, 39b and 39c

For Hydro One to bring electrical service to a customer's property, an expansion from the existing distribution line to the customer's property may have to be designed and built. Hydro One will perform the staking of the line route according to the type of line to be built: overhead, underground or submarine cable. Based on the 2006 Rate Handbook, all line staking was charged at a common fee. The results of the study have identified that the underlying cost varies according to the type of line to be built. Hydro One therefore proposes that the line staking per meter service be divided into three categories. Each of the three categories: overhead line, underground line and submarine cable.

#### 5.31.1 Underlying Costs of Overhead Line Staking per Meter

Table 35 shows the derivation of the underlying costs of this specific service.

**Table 35: Derivation of the Underlying Costs for Overhead Line Staking (per meter)**

Underlying Cost Description For:					
39a Overhead Line Staking per Meter					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.0010		\$ 0.07
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	0.0301		\$ 2.38
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 1.46
Total Labour Cost					\$ 3.91
O	Small Vehicle Time	10.00	0.0108		\$ 0.11
T	Large Vehicle Time				
H	Other: Material	0.03	1.0000		\$ 0.03
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.13
Hydro One Underlying Cost and Proposed Charge					\$ 4.04
Hydro One Current Charge					\$ 4.95

#### 5.31.1.1 Recommendation

Hydro One recommends the charge for this specific service should be decreased to \$4.04 per meter to avoid over collection of the underlying costs of performing this service.

### 5.31.2 Underlying Costs Underground Line Staking per Meter

Table 36 shows the derivation of the underlying costs of this specific service.

**Table 36: Derivation of the Underlying Costs for Under Ground Staking (per meter)**

Underlying Cost Description For:					
39b Underground Line Staking per Meter					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.0012		\$ 0.09
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	0.0212		\$ 1.68
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 1.05
Total Labour Cost					\$ 2.82
O	Small Vehicle Time	10.00	0.0100		\$ 0.10
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.10
Hydro One Underlying Cost and Proposed Charge					\$ 2.92
Hydro One Current Charge					\$ 4.95

#### 5.31.2.1 Recommendation

Hydro One recommends the charge for this specific service should be decreased to \$2.92 per meter to avoid over collection of the underlying costs of performing this service.

### 5.31.3 Underlying Costs for Submarine Cable Line Staking per Meter

Table 37 shows the derivation of the underlying costs of this specific service.

**Table 37: Derivation of the Underlying Costs for Submarine Cable Line Staking (per meter)**

Underlying Cost Description For:					
39c Submarine Cable Line Staking per Meter					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.0007		\$ 0.05
A	Direct Labour (inside staff) Overtime				
B	Direct Labour (field staff) Straight Time	79.10	0.0192		\$ 1.52
O	Direct Labour (field staff) Overtime				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 0.93
Total Labour Cost					\$ 2.51
O	Small Vehicle Time	10.00	0.0042		\$ 0.04
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 0.04
Hydro One Underlying Cost and Proposed Charge					\$ 2.55
Hydro One Current Charge					\$ 4.95

**5.31.3.1 Recommendation**

Hydro One recommends the charge for this specific service should be decreased to \$2.55 per meter to avoid over collection of the underlying costs of performing this service.

**5.32 Central Metering - New Service <45kW – Hydro One Code #40**

When a new customer opts for central metering (“CM”) to avoid having to pay for a large and expensive service located in one building to supply several separate buildings on one property, or to reduce having a meter on each building, a CM service may be installed on a customer-owned pole. A maximum of four service connections can be connected at the Central Metered location. When the load supplied by the central metering service is less than 45 kW, the load does not justify the higher metering costs resulting from the use of instrument transformers, therefore the customer must pay to cover the instrument transformer costs.

**5.32.1 Recommendation**

Hydro One proposes the cost for this service remain at \$100.00 to recover the cost of the instrument transformer. There are no other charges associated with this service.

### 5.33 Conversion to Central Metering <45kW (Lines & MDET only) – Hydro One Code #41

Customers who request a conversion of conventional metering to CM require a new service layout, a change in their account, the removal of existing meters and equipment and installation of new equipment. This involves site visits for the layout, equipment modifications, and administrative work. If the installation is to supply a load of less than 45 kW, the customer is charged for the associated labour plus the incremental cost of the instrument transformers.

#### 5.33.1 Underlying Costs

Table 38 shows the derivation of the underlying costs of this specific service.

**Table 38: Derivation of the Underlying Costs for Conversion to Central Metering <45kW**

Underlying Cost Description For:					
41 Conversion to Central Metering <45kW (Lines & MDET only)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.26		\$ 19.73
A	Direct Labour (inside staff) Straight Time	74.07	6.06		\$ 448.67
B	Direct Labour (field staff) Straight Time	79.10	3.50		\$ 276.85
O	Direct Labour (field staff) Straight Time				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 441.93
Total Labour Cost					\$ 1,187.17
O	Small Vehicle Time	10.00	3.50		\$ 35.00
T	Large Vehicle Time	57.00	3.03		\$ 172.63
H	Other: Material	100.00	1.00		\$ 100.00
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 307.63
Hydro One Underlying Cost and Proposed Charge					\$ 1,495
Hydro One Current Charge					\$ 1,035

#### 5.33.2 Recommendation

Hydro One recommends the charge for this specific service should be increased to \$1,495.00 to recover the underlying costs of performing this service.

### 5.34 Conversion to Central Metering >45kW (Lines & MDET only) – Hydro One Code #42

Customers who request a conversion of conventional metering to CM require a new service layout, a change in their account, the removal of existing meters and equipment and installation of new equipment. This involves site visits for the layout, equipment modifications, and administrative work. Loads in excess of 45 kW, justify the costs for the required instrument transformer therefore, only the labour costs associated with performing this service are charged to the customer.

#### 5.34.1 Underlying Costs

Table 39 shows the derivation of the underlying costs of this specific service.

**Table 39: Derivation of the Underlying Costs for Conversion to Central Metering >45kW**

Underlying Cost Description For:					
42 Conversion to Central Metering >45kW (Lines & MDET only)					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.27		\$ 20.13
A	Direct Labour (inside staff) Straight Time	74.07	6.06		\$ 448.67
B	Direct Labour (field staff) Straight Time	79.10	3.50		\$ 276.85
O	Direct Labour (field staff) Straight Time				
U	Other Labour (Specify)				
R	Payroll Burden (%)	59.30%			\$ 442.17
Total Labour Cost					\$ 1,187.82
O	Small Vehicle Time	10.00	3.50		\$ 35.00
T	Large Vehicle Time	57.00	3.03		\$ 172.63
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 207.63
Hydro One Underlying Cost and Proposed Charge					\$ 1,395
Hydro One Current Charge					\$ 915

#### 5.34.2 Recommendation

Hydro One recommends the charge for this specific service should be increased to \$1,395.00 to recover the underlying costs of performing this service.

### **5.35 Tingle / Stray Voltage Investigation - excess of 4 hours (per hour-average 2 additional hours)**

From the normal delivery and use of electricity, a small voltage may exist between two conductive surfaces that can be simultaneously contacted by an animal. Examples of the conductive surfaces include concrete floors, metal stabling, milk pipelines, and water bowls. This voltage, commonly referred to as, "animal contact voltage", "stray voltage", or "tingle voltage". This voltage usually presents no harm. However, if the voltage level is high enough, it may affect livestock behavior and health. Since 2009, the Distribution System Code (Section 4.7 & Appendix H) requires all Ontario Distribution Utilities to complete Stray Voltage Investigations on livestock farms customers by a competent person.

#### **5.35.1 Recommendation**

Hydro One staff responds to Farm Stray Voltage requests and completes these tests following the procedures as set out in the Distribution System Code (Section 4.7 & Appendix H). In the procedure, Hydro One works in partnership with the customer to mitigate any harmful farm stray voltage at animal contact locations. Hydro One will also work with the customer if the stray voltage measurement of the distribution system is below the thresholds, and the customer elects to install an Isolator on the service. Hydro One considers this service as part of the standard level of service in accordance with the DSC. Therefore, it is recommended that the current approved charge for Tingle/Stray Voltage Investigation be removed from the list of Hydro One miscellaneous service charges.

### **5.36 Stand-by Administration Charge – Hydro One Code #44**

Hydro One has no records that this charge has ever been applied to Hydro One customers. A stand-by administration charge only covers the administration-related costs and not the cost of having distribution facilities in place to deliver stand-by power. Therefore, this charge was not part of this Study.

### **5.37 Connection Impact Assessments - Hydro One Codes #45a, 45b, 45c, 45d, 45e and 45f**

Renewable generation development and the subsequent connection process involve a number of stages, including technical assessments. Hydro One assesses the technical impact of the renewable generation connection to its distribution system through a Connection Impact Assessment (“CIA”). A CIA is a more detailed assessment of a project's impact to the distribution system. The results include a technical report outlining project feasibility, technical specifications needed for the project and the impacts the project would have on the distribution grid and any of its customers, in accordance with Section 6.2.14 of the DSC.

The CIA ensures the safety, reliability, and efficiency of the Hydro One’s distribution system. In accordance with Section 6.2.11 of the DSC, Hydro One requires the proponent who applies for the connection of a generation facility to its distribution system to, upon making the application, pay their impact assessment costs.

#### **5.37.1 Process Steps**

CIA's can have many steps and will use various resources depending on the characteristics of the project. Different work sheets were created to capture the labour resources and time for each task required.

Form D1a was used to track task time by the Hydro One customer-facing group who receives the initial request for a connection impact assessment from the customer. A package is assembled to include all the pertinent forms required. The information is uploaded into the CIA project tracking system and a unique project identification number is assigned. This identification number is used to track the progress of the CIA throughout the process.

Form D2 was used by the Hydro One technical group that perform a preliminary review of the request to determine project location details, station loading, capacity checks, equipment information, etc. This review determines if all the required information has been received and if system capacity is available to allow the connection of the distributed generation project.

Forms D3A, D3B and D3C were used to track task time associated with the modeling and evaluation of the distributed generation project. Modeling of the project includes validation of the feeder conditions (e.g. loading, feeder length, conductor size, impedance) to simulate the actual distribution system conditions. The technical evaluation includes but is not limited to steady state and short circuit analysis, voltage impact and regulation, power factor tolerance, generator and feeder protection systems, thermal limits and requirements for compliance with standards. After finalizing the project simulation results, a CIA report, evaluation form, planning specifications and a class-C estimate are prepared. A review of the completed forms is done to confirm it is appropriate for the project to connect to the distribution system.

A special study may then be required to calculate the source impedance values by modeling all upstream sources connected to the transmission system. A simulation under a short circuit study will determine the impact of the Distributed Generation (“DG”) project on three phase line to line and line to ground faults.

Form D4 was used to track time associated with a site assessment. The site assessment is conducted to determine the requirements for the customer’s tapped line for connection to the Hydro One distribution system. This information is included in the class C estimate.

Form D1b is used by the customer facing group to compile and update the project information in the customer relationship management system and communicates the findings to the customer requesting the CIA.

In analyzing the data collected to perform CIAs, Hydro One has identified six different categories of CIAs. These six categories have unique underlying costs determined by the parameters of the project.

#### **5.37.2 Underlying Costs of Connection Impact Assessments – Net Metering – Hydro Code #45a**

A net metering generator, as defined in section 7(1) of the Net Metering Regulation (O. Reg. 541 / 05), generates electricity primarily for its own use from a renewable generation facility. Net

metering involves the measurement of the quantity of electricity a generator uses against the quantity of electricity it generates resulting in a net total. Net metering projects include those which have a capacity greater than 10 kW but is less than or equal to 500 kW that wishes to connect to Hydro One's distribution system.

Table 40 shows the derivation of the underlying costs of connection impact assessments for net metering.

**Table 40: Derivation of the Underlying Costs for Connection Impact Assessments  
Net Metering**

Underlying Cost Description For: 45a Connection Impact Assessments - Net Metering					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.87		\$ 64.81
A	Direct Labour (inside staff) Straight Time	109.85	1.83		\$ 201.39
B	Direct Labour (inside staff) Straight Time	83.49	14.25		\$ 1,189.73
O	Direct Labour (field staff) Straight Time	79.10	4.08		\$ 322.35
U	Other Labour (inside staff) Straight Time	97.93	0.16		\$ 16.09
	Other Labour (inside staff) Straight Time	109.85	1.00		\$ 109.85
R	Payroll Burden (%)	59.30%			\$ 1,129.20
Total Labour Cost					\$ 3,033.43
O	Small Vehicle Time	10.00	1.81		\$ 18.05
T	Large Vehicle Time				\$ -
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 18.05
Hydro One Underlying Cost and Proposed Charge					\$ 3,051.48
Hydro One Current Charge					\$ 5,620

### 5.37.2.1 Recommendation

Hydro One recommends the fee for CIAs for net metering be decreased to \$3,051.00 to avoid over collection of the associated underlying costs.

### 5.37.3 Connection Impact Assessments - Embedded LDC Generators - Hydro One Code #45b

This category covers CIAs for Capacity Allocation Exempt ("CAE") sized DG projects including load displacement and energy storage facilities proposed for connection to the distribution system of an embedded LDC. This type of CIA is completed by Hydro One at the request of downstream LDC for the connection of a CAE-sized project to a Hydro One shared feeder.

As per the DSC, a “CAE small embedded generation facility” is an embedded generation facility that has a name-plate rated capacity of 250 kW or less in the case of a facility connected to a less than 15 kV line and 500 kW or less in the case of a facility connected to a 15 kV or greater line and is not a micro-embedded generation facility.

Table 41 shows the derivation of the underlying costs for connection impact assessments for embedded LDC generators.

**Table 41: Derivation of the Underlying Costs for Connection Impact Assessments – Embedded LDC Generators**

Underlying Cost Description For:					
45b Connection Impact Assessments - Embedded LDC Generators					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.87		\$ 64.81
A	Direct Labour (inside staff) Straight Time	97.93	10.66		\$ 1,044.35
B	Direct Labour (inside staff) Straight Time	83.49	1.58		\$ 132.19
O	Direct Labour (field staff) Straight Time	79.10	2.50		\$ 197.90
U	Other Labour (inside staff) Straight Time	109.85	1.25		\$ 137.31
	Other Labour field staff) Straight Time	79.10	1.57		\$ 124.45
R	Payroll Burden (%)	59.30%			\$ 1,008.70
Total Labour Cost					\$ 2,709.72
O	Small Vehicle Time	10.00	1.81		\$ 18.05
T	Large Vehicle Time				\$ -
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 18.05
Hydro One Underlying Cost and Proposed Charge					\$ 2,727.78
Hydro One Current Charge					\$ 5,620

### 5.37.3.1 Recommendation

Hydro One recommends the fee for connection impacts assessments for embedded LDC generators be decreased to \$2,727.78 to avoid over collection of the associated underlying costs.

### 5.37.4 Connection Impact Assessments - Small Projects < 500 kW – Hydro One Code #45c

This category covers CIAs completed for CAE-sized DG projects including load displacement and energy storage facilities proposed for connection to Hydro One distribution system. This type of CIA is completed by Hydro One at the request of an applicant when no LDC is involved.

Table 42 shows the derivation of the underlying costs for connection impact assessments for small projects less than 500 kW.

**Table 42: Derivation of the Underlying Costs for Connection Impact Assessments – Small Projects <500kW**

Underlying Cost Description For:					
45c Connection Impact Assessments - Small Projects < 500 kW					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.87		\$ 64.81
A	Direct Labour (inside staff) Straight Time	97.93	2.81		\$ 275.54
B	Direct Labour (inside staff) Straight Time	83.49	10.85		\$ 905.67
O	Direct Labour (field staff) Straight Time	79.10	4.08		\$ 322.35
U	Other Labour (inside staff) Straight Time	109.85	3.42		\$ 375.95
	Other Labour field staff) Straight Time				
R	Payroll Burden (%)	59.30%			\$ 1,152.99
Total Labour Cost					\$ 3,097.32
O	Small Vehicle Time	10.00	1.81		\$ 18.05
T	Large Vehicle Time				\$ -
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 18.05
Hydro One Underlying Cost and Proposed Charge					\$ 3,115.38
Hydro One Current Charge					\$ 5,620

#### 5.37.4.1 Recommendation

Hydro One recommends the fee for connection impacts assessments for small projects less than 500 kW be decreased to \$3,115.38 to avoid over collection of the associated underlying costs.

### 5.37.5 Connection Impact Assessments - Small Projects < 500 kW, Simplified – Hydro One Code #45d

The following CAE-sized, 3-phase projects are eligible for a simplified CIA based on size of the generator and its connecting voltage:

- 10 kW < DG project ≤ 30 kW if connecting to < 15 kV
- 10 kW < DG project ≤ 100 kW if connecting to ≥ 15 kV

The size of the 3-phase project under each category is small enough that the impact on the system is not significant. Hence, the DG applicant receives a simplified CIA along with the class-C estimate. Single phase projects are not eligible for the simplified CIA.

Table 43 shows the derivation of the underlying costs for connection impact assessments for small projects less than 500 kW, simplified.

**Table 43: Derivation of the Underlying Costs for Connection Impact Assessments – Small Projects <500kW Simplified**

Underlying Cost Description For:					
45d Connection Impact Assessments - Small Projects ≤ 500 kW, Simplified					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.87		\$ 64.81
A	Direct Labour (inside staff) Straight Time	97.93	0.91		\$ 89.53
B	Direct Labour (inside staff) Straight Time	83.49	3.63		\$ 302.65
O	Direct Labour (field staff) Straight Time	79.10	4.08		\$ 322.35
U	Other Labour (inside staff) Straight Time	109.85	3.54		\$ 389.05
	Other Labour field staff) Straight Time				
R	Payroll Burden (%)	59.30%			\$ 692.86
Total Labour Cost					\$ 1,861.26
O	Small Vehicle Time	10.00	1.81		\$ 18.05
T	Large Vehicle Time				\$ -
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					\$ 18.05
Hydro One Underlying Cost and Proposed Charge					\$ 1,879.32
Hydro One Current Charge					\$ 5,620

### 5.37.5.1 Recommendation

Hydro One recommends the fee for connection impacts assessments for small projects less than 500 kW, simplified, be decreased to \$1,879.32 to avoid over collection of the associated underlying costs.

### 5.37.6 Connection Impact Assessments – Greater than Capacity Allocation Exempt Projects – Capacity Allocation Required Projects – Hydro One Code #45e

The category covers the Capacity Allocation Required (“CAR”) CIAs for all DG projects including net metering, load displacement and energy storage facilities which are greater than CAE size; the projects greater than 250 kW if connecting to less than 15 kV and greater than 500 kW if connecting to greater or equal to 15 kV.

Table 44 shows the derivation of the underlying costs for this type of connection impact assessment.

**Table 44: Derivation of the Underlying Costs for Connection Impact Assessments – Greater than Capacity Allocation Exempt Projects – Capacity Allocation Required Projects**

Used For:					
45e Connection Impact Assessments - Greater than Capacity Allocation Exempt Projects - Capacity Allocation Required Projects					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.62		\$ 46.14
A	Direct Labour (inside staff) Straight Time	97.93	11.10		\$ 1,087.02
B	Direct Labour (inside staff) Straight Time	63.40	28.71		\$ 1,820.11
O	Direct Labour (field staff) Straight Time	109.85	20.37		\$ 2,237.28
U	Other Labour (inside staff) Straight Time				
R	Payroll Burden (%)	59.30%			\$ 3,077.99
Total Labour Cost					\$ 8,268.54
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					
Hydro One Underlying Cost and Proposed Charge					\$ 8,268.54
Hydro One Current Charge					\$ 12,055

#### 5.37.6.1 Recommendation

Hydro One recommends the fee for connection impacts assessments for Greater than Capacity Allocation Exempt Projects – Capacity Allocation Required Projects be decreased to \$8,268.54 to avoid over collection of the associated underlying costs.

### 5.37.7 Connection Impact Assessments – Capacity Allocation Exempt Projects - TS Review for Embedded LDC Allocation Required Projects – Hydro One Code #45f

The Transformer Station (“TS”) review CIAs are completed for all DG projects greater than 500 kW including load displacement and energy storage facilities connecting to LDC dedicated feeders. The TS review CIAs are performed to determine if any upgrades are required at an upstream TS in order to facilitate connection of the DG projects to distribution system. Changes in the feeder protection schemes such as transfer trip, low set block signal, and distributed generator end open signal are evaluated to ensure adequate protection of the equipment in the event of a contingency on the system.

Table 45 shows the derivation of the underlying costs for this category of connection impact assessments.

**Table 45: Derivation of the Underlying Costs for Connection Impact Assessments – Transformer Station Review for Embedded LDC Generators, Capacity Allocation Requests**

Underlying Cost Description For:					
45f Connection Impact Assessments - Greater than Capacity Allocation Exempt Projects - TS Review for LDC Capacity Allocation Required Projects					
		Rate/Amount	Hours/Units	O/T Factor	Calculated Cost
L	Direct Labour (inside staff) Straight Time	74.70	0.62		\$ 46.14
A	Direct Labour (inside staff) Straight Time	97.93	14.90		\$ 1,458.95
B	Direct Labour (inside staff) Straight Time	63.40	10.44		\$ 661.74
O	Direct Labour (field staff) Straight Time	109.85	11.45		\$ 1,257.78
U	Other Labour (inside staff) Straight Time				
R	Payroll Burden (%)	59.30%			\$ 2,030.79
Total Labour Cost					\$ 5,455.40
O	Small Vehicle Time				
T	Large Vehicle Time				
H	Other: Material				
E	Other: Contract				
R	Other: Other				
Total Other Cost					
Hydro One Underlying Cost and Proposed Charge					\$ 5,455.40
Hydro One Current Charge					\$ 12,055

#### **5.37.7.1 Recommendation**

Hydro One recommends the fee for connection impacts assessments for Greater than Capacity Allocation Exempt Projects – TS Review for LDC Capacity Allocation Required Projects be decreased to \$5,455.40 to avoid over collection of the associated underlying costs.

## Connection Impact Assessment Project Work Sheets

Connection Impact Assessments (“CIAs”) use different resources depending on the characteristics of the project. For this reason, different work sheets were created to capture the labour resources and time for each task required. All forms were collected and input into a common spreadsheet and matched according to the project identification number.

Oded Hubert  
Vice President, Regulatory Affairs  
Hydro One Networks Inc.  
7th Floor, South Tower 483 Bay Street  
Toronto, Ontario  
M5G 2P5

Dear Mr. Hubert:

**Re: Hydro One Miscellaneous Service Charges Study**

This letter documents my role as an external independent expert for Hydro One's Miscellaneous Service Charges Study ("Study"). This role was undertaken in accordance with the work plan for the Study which included as an early step:

**Independent Third Party**

*Hydro One also sought guidance from an external expert for guidance and review of Hydro One's approach and methodology to ensure it will meet the study objectives and is defensible in an OEB proceeding. To perform this role, Hydro One leveraged its existing Supply Chain Outline Agreement under which Elenchus was deemed qualified to perform this role.*

My engagement in the process was as follows.

- In October 2015, upon being retained, Maxine Cooper sent me a draft version of the detailed description of the plan for conducting the Study. I reviewed the draft and provided detailed suggestions for enhancing the Study in a meeting on November 4, 2015. I consider the approach that was implemented was appropriate and effective for the intended purpose, as set out in the project plan.
- Prior to completion of the project, I reviewed a preliminary draft of the Study report that was dated November 15, 2016. I provided a memo dated November 25 that included several suggestions for enhancing the analysis, conclusions and presentation contained in the report. I presented my observations during a meeting held on December 1, 2016.
- A revised draft dated December 9, 2016 was sent to me for further review. This draft reflected the comments previously provided and I provided suggestions for further minor revisions.

I have now reviewed the final version of the Study report dated December 29, 2016 and can confirm that the Study was conducted using a thorough and appropriate methodology. I have not conducted an independent audit of the results, but I can confirm that in my view the final methodology and the results of the study provide confidence that the results are reasonable and supported by a detailed assessment of the costs associated with providing the services included in the Study to Hydro One customers.

Sincerely,

A handwritten signature in black ink, appearing to read "John D. Todd".

John D. Todd

## FORM A

Proceeding: EB-2017-0049

### ACKNOWLEDGMENT OF EXPERT'S DUTY

1. My name is John Douglas Todd. I live at Toronto, in the province of Ontario .
2. I have been engaged by or on behalf of Hydro One Networks Inc. to provide evidence in relation to the above-noted proceeding before the Ontario Energy Board.
3. I acknowledge that it is my duty to provide evidence in relation to this proceeding as follows:
  - (a) to provide opinion evidence that is fair, objective and non-partisan;
  - (b) to provide opinion evidence that is related only to matters that are within my area of expertise; and
  - (c) to provide such additional assistance as the Board may reasonably require, to determine a matter in issue.
4. I acknowledge that the duty referred to above prevails over any obligation which I may owe to any party by whom or on whose behalf I am engaged.

Date: February 9, 2017

---

Signature

## **PRESIDENT**

John Todd has specialized in government regulation for over 35 years, addressing issues related to price regulation and deregulation, market restructuring to facilitate effective competition, and regulatory methodology. Sectors of primary interest in recent years have included electricity, natural gas and the telecommunications industry. John has assisted counsel in over 250 proceedings and provided expert evidence in over 100 hearings. His clients include regulated companies, producers and generators, competitors, customer groups, regulators and government.

---

## **PROFESSIONAL OVERVIEW**

### **Founder of Elenchus Research Associates Inc. (Elenchus) 2003**

- ERAI was spun off from ECS (see below) as an independent consulting firm in 2003. There are presently twenty-five ERAI Consultants and Associates. Web address: [www.elenchus.ca](http://www.elenchus.ca)

### **Founded the Canadian Energy Regulation Information Service (CERISE) 2002**

- CERISE is a web-based service providing a decision database, regulatory monitoring and analysis of current issues on a subscription basis. Staff are Rachel Chua and rotating co-op students. Web address: [www.cerise.info](http://www.cerise.info)

### **Founded Econalysis Consulting Services, Inc. (ECS) 1980**

- ECS was divested as a separate company in 2003
- There are presently four ECS consultants: Bill Harper, Mark Garner, Shelley Grice, and James Wightman. Web address: [www.econalysis.ca](http://www.econalysis.ca)

## **EDUCATION**

1975 Masters in Business Administration in Economics and Management Service, University of Toronto

1972 Bachelors of Science in Electrical Engineering, University of Toronto

## **PRIOR EMPLOYMENT**

**Ontario Economic Council, Research Officer (Government Regulation) 1978 - 1980**

**Research Assistant, Univ. of Toronto, Faculty of Management Studies 1973 - 1978**

**Bell Canada, Western Area Engineering 1972 – 1973**

## **REGULATORY/LEGAL PROCEEDINGS**

*Provided expert evidence and/or assistance to the applicant or another participant:*

### **Before the Ontario Energy Board**

John Todd has provided expert assistance in a total of 62 proceedings before the Ontario Energy Board from 1991 to 2016. He has presented evidence in 25 of these cases. The most recent case he participated in was the *Independent Electricity System Operator, 2016 Usage Fee*. Evidence: Cost Allocation and Rate Design for the 2016 IESO Usage Fee.

### **Before the Public Utilities Board of Manitoba**

John has provided expert assistance in a total of 46 proceedings before the Public Utilities Board of Manitoba from 1990 to 2015. He has presented evidence in 23 of these cases. The most recent case he participated in was the *City of Winnipeg: Manitoba Hydro 2015/16 GRA and Manitoba Hydro COSS Review*.

### **Before the British Columbia Utilities Commission**

John has provided expert assistance in a total of 33 proceedings before the British Columbia Utilities Commission from 1993 to 2006. He has presented evidence in eight of these cases. The most recent case he participated in was the *British Columbia Transmission Corporation, 2006 Transmission Revenue Requirement*.

### **Before the Régie de l'énergie**

John has provided expert assistance in a total of ten proceedings before the Régie de l'énergie from 1998 to 2014. He has presented evidence in nine of these cases. The most recent case he participated in was the *Report for the Régie de l'énergie, Performance Based Regulation: A Review of Design Options as Background for the Review of PBR for Hydro Quebec Distribution and Transmission Divisions*.

### **Before the Alberta Energy and Utilities Board**

John has provided expert assistance in of two proceedings before the Alberta Energy and Utilities Board in 2001. He has presented evidence in one case. The second case of 2001 was in regards to the case of *Generic, Gas Rate Unbundling (2001-093)*. Evidence: Canadian Experience and Approaches.

### **Before the Newfoundland & Labrador Board of Commissioners of Public Utilities**

John has provided expert assistance in a total of nine proceedings from 2005 to 2015. He has presented evidence in three cases. The most recent proceeding he participated in was the *Newfoundland Power, 2016 Deferred Cost Recovery Application* case.

### **Before the New Brunswick Energy and Utilities Board**

John has provided expert assistance in a total of nine proceedings before the New Brunswick Energy and Utilities Board from 2007 to 2016. He has presented evidence in three cases. The most recent proceeding he participated in was the *2015 New Brunswick Power Customer Cost Allocation Student Review*. Evidence: Cost Allocation Study Review.

### **Before the Nova Scotia Utility and Review Board**

John has provided expert assistance in a total of nine proceedings before the Nova Scotia Utility and Review Board from 2008 to 2016. He has presented evidence in four cases. The most recent proceeding he participated in was *Efficiency One, Updated Cost Allocation Methodology*.

### **Before the National Energy Board (NEB)**

John has provided expert assistance in one proceeding before the NEB, during 1999. The proceeding was in regards to *BC Gas, Southern Crossing Project*.

### **Before the Canadian Radio-television and Telecommunications Commission (CRTC)**

John has provided expert assistance in 47 proceedings before the Canadian Radio-television and Telecommunications Commission from 1990 to 2016. He has presented evidence in 13 of these cases. The most recent proceeding he participated in was a *Review of Basic Telecommunications Services, Consultation CRTC 2015-134*.

### **Before the Ontario Telephone Services Commission (OTSC)**

John has provided expert assistance in one proceeding before the Ontario Telephone Services Commission in 1992. The case was in regards to a *Review of Rate-of-Return Regulation for Public Utility Telephone Companies*. Evidence used: The need for OTSC regulation of municipal utility telcos.

### **Before the Ontario Securities Commission**

John has provided expert assistance in four proceedings before the Ontario Securities Commission from 1981 to 1985. He presented evidence in each case. The most recent proceeding he participated in was a *Securities Industry Review*. Evidence: Industry structure and the form of regulation.

### **Before the Ontario Municipal Board**

John has provided expert evidence and assistance in two proceedings before the Ontario Municipal Board in 1992 and 1995. In 1995, he assisted in a case regarding an *Appeal of Boundary Expansion by Lincoln Hydro and Electric Commission*, with an affidavit prepared on the tests for boundary expansions.

### **Before the Supreme Court of Ontario**

John has presented evidence in one proceeding before the Supreme Court of Ontario, in 1990. The case related to the *Challenge of the Residential Rent Regulation Act (1986) under the Canadian Charter of Rights and Freedoms*. Evidence: The impact of rent regulation on Ontario's rental housing market.

### **Before the Saskatchewan Court of Queen's Bench**

John has presented evidence in one proceeding before the Saskatchewan Court of Queen's Bench, in 1993. The evidence was regarding market dynamics and competition policy.

### **Non-Hearing Processes**

John has provided expert assistance in 17 non-hearing processes since 1997 to the following Ontario Energy Board, British Columbia Gas, the British Columbia Utilities Commission, the New Brunswick Department of Energy, SaskPower, the Government of Vietnam, and more.

## **Commercial Arbitrations and Lawsuits**

John has provided expert assistance in 6 commercial arbitrations and lawsuits between 2004 and 2015.

## **Facilitation Activities**

- 5 Strategic Planning sessions with Executive and/or Board of Directors of regulated companies between 2000 and 2015
- 6 stakeholder processes for regulators and utilities from 2000 through 2016

## **Other Regulatory Issues Researched**

- Over 20 studies completed for regulators, utilities and others outside of hearing processes

## **SELECTED PRESENTATIONS**

- Productivity Benchmarking Panel at Canadian Electrical Association RITG CAMPUT Workshop (May 2016)
- Utility Cost Recovery in an Era of Ageing Infrastructure, Technological Change and Increasing Customer Service Expectation, CEA Legal Committee and Regulatory Innovations Task Group (June 2016)
- MEARIE Training Program, Regulatory Essentials for LDC Executives (2016)
- Issue in Regulatory Framework for Tenaga Nasional Berhad, Indonesia (with Cynthia Chaplin & London Economics) (2015)
- Witness Training for electric utilities 2014 - 2016
- "Innovations in Rate Design", CAMPUT Training Session, Annually 2010-2013
- "Cost of Service Filing Requirements" (2010) 2nd Annual Applications Training for Electricity Distributors, Society of Ontario Adjudicators and Regulators in cooperation with the Ontario Energy Board
- "Green Energy Act" (2010) 2nd Annual Applications Training for Electricity Distributors, Society of Ontario Adjudicators and Regulators in cooperation with Ontario Energy Board
- "Rate Design", CAMPUT Training Session, Annually 2009- 2013
- "How to Build Transmission and Distribution to Enable FiT: The Role of Distributors", EUCI Conference on Feed in Tariffs, Toronto, Sept. 2009
- "Distributor Mergers and Acquisitions: Potential Savings", 2007 Electricity Distributors Assoc.
- "Beyond Borders" Regulating the Transition to Competition in Energy Markets (with Fred Hassan), EnerCom Conference March 2006.

## **SELECTED OTHER ACTIVITIES**

- Organizing Committee for the Concert for Inclusion in support of ParaSport Ontario
- Chairman of the Board of Directors of the Ontario Energy Marketers Association (formerly the Direct Purchase Industry Committee) and Executive Director of the Association.
- Invited participant in the Ontario Energy Board's External Advisory Committee.
- Panelist for "Administrative Tribunals and ADR", Osgoode Hall Law School, Professional Development Program, Continuing Legal Education, April 1997.
- Former Member of the Board of Directors of East Toronto Community Legal Services.
- Numerous appearances on CBC radio and television commenting on energy industry issues, competition, regulation and mergers in the Canadian economy.

## **CLIENTS**

**Over 70 private sector companies, including utilities**

**15 industry and other associations**

**Over 30 consumers' associations and legal clinics**

### **Government**

- 5 Regulatory Tribunals
- 6 Federal departments
- 14 Provincial departments, commissions and agencies
- 13 municipal and other departments/entities

**For John Todd's complete curriculum vitae, please visit: [www.elenchus.ca](http://www.elenchus.ca)**

## **RATE RIDERS**

### **1.0 REGULATORY ASSET RATE RIDERS**

This Exhibit describes the methodology used to allocate the Regulatory Asset balances, as identified in Exhibit F1, Tab 1, Schedule 1, among customer classes.

The methodology proposed to allocate the Regulatory Asset balances to customer classes follows the approach approved in previous Hydro One applications for similar regulatory assets, or aligns with the cost allocators used in the Board's IRM model.

Hydro One proposes that Regulatory Assets associated with overall revenue requirement, such as pension and Smart Grid balances, be disposed of using riders with both a fixed and volumetric component. Regulatory Assets associated with customer-based charges, such as Smart Metering Entity charge balances, will be disposed of via a fixed rider. RSVA balances will be disposed of via a volumetric rider.

It is proposed that all Regulatory Assets be disposed of uniformly over the five-year Custom IR period to smooth customer impacts.

Table 1 shows the regulatory accounts and balances proposed for disposition. The table also lists the allocators used to distribute these costs among customer classes, whether the balance will be collected via fixed and/or variable charges, and the rationale for using these allocators.

**Table 1: Regulatory Asset Account Balances and Allocators Proposed for Disposition**

Variance Account	Account balance (\$)	Proposed Allocator	Charge Type	Rationale
RSVA-Wholesale Market Service Charge*	-90,289,414	Forecast kWh excluding wholesale market participants	Variable	Previously approved by the Board in EB-2013-0416 and per IRM methodology
RSVA-Wholesale Market Service Charge Class B	4,300,000	Forecast kWh excluding wholesale market participants, and non-wholesale market participant Class A	Variable	per IRM methodology
RSVA-Retail Transmission Network Charge	13,349,009	Forecast kWh for all customers	Variable	Previously approved by the Board in EB-2013-0416 and per IRM methodology
RSVA-Retail Transmission Connection Charge	68,949,736	Forecast kWh for all customers	Variable	Previously approved by the Board in EB-2013-0416 and per IRM methodology
RSVA-Low Voltage Variance	7,140,582	Forecast kWh for all customers	Variable	Previously approved by the Board in EB-2013-0416 and per IRM methodology
RSVA-Power	27,237,019	Forecast kWh excluding wholesale market participants	Variable	Previously approved by the Board in EB-2013-0416 and per IRM methodology
RCVA	658,254	Forecast number of customers	Fixed	Previously approved by the Board in EB-2013-0416 and per IRM methodology
Pension Cost Differential	7,936,783	Revenue Requirement share	Fixed & Variable	Previously approved by the Board in EB-2013-0416 Treated same as other contributors to Revenue Requirement
MicroFIT Connection Charge Variance	-807,805	OM&A from CAM	Fixed & Variable	Previously approved by the Board in EB-2013-0416 and same allocator used in the CAM for Miscellaneous Revenue
Tax Rate Changes	-4,413,744	Net Fixed Assets from CAM	Fixed & Variable	Previously approved by the Board in EB-2013-0416
Green Energy (DG) - Other Costs	595,217	Revenue Requirement share	Fixed & Variable	Previously approved by the Board in EB-2013-0416
Green Energy (DG) - Express Feeders	-1,503	Revenue Requirement share	Fixed & Variable	Same rationale as in Green Energy (DG) - Other Costs
Smart Grid	-12,189,769	Revenue Requirement share	Fixed & Variable	Previously approved by the Board in EB-2013-0416
OEB Cost Differential	-1,274,068	OM&A from CAM	Fixed & Variable	Previously approved by the Board in EB-2013-0416
DSC Exemption	9,712,850	Revenue Requirement share	Fixed & Variable	Previously approved by the Board in EB-2013-0416
Smart Meter Entity Charge	-101,550	Number of residential and general service energy billed customers	Fixed	Previously approved by the Board in EB-2013-0416
Rate Mitigation	2,367,588	Revenue Requirement share	Fixed & Variable	Associated with over/under collection of Revenue Requirement
Revenue Offset Difference Account - Pole Attachment Charge	-2,271,425	Revenue Requirement share	Fixed & Variable	Revenue Difference associated with Specific Charge for Cable and Telecom Companies Access to the Power Poles

\* Excludes amounts for Sub-account CBR Class A and Class B. Class A balance is \$0.

Witness: Henry Andre

The 2018 test year's forecast of the number of customers, annual energy and peak demand by rate class are used as charge determinants to derive the annual rate rider amounts. Table 2 provides a summary of the proposed Regulatory Asset Riders by rate class for all accounts. Details of the derivation of the rider amounts for all rate classes for each year of the Custom IR period are provided in Exhibit H1, Tab 3, Schedule 2.

**Table 2 - 2018 to 2022 Regulatory Assets Rate Rider by Rate Class**

Witness: Henry Andre

**1.1 Disposal of RSVA-Wholesale Market Service Charge – Sub-Accounts CBR Class B and Class A**

In accordance with Section 3 of the OEB's Accounting Guidance on Capacity Based Recovery (CBR), issued on July 25, 2016, Hydro One has identified the RSVA-WMSC CBR amounts associated with class B and class A customers. As shown in Table 4 of Exhibit F1, Tab 1, Schedule 1, the forecast balance at December 31, 2017 of RSVA – Wholesale Market Service Charge Sub-Account CBR Class B and Class A are \$4.3 million and \$0, respectively.

In accordance with the Board's Accounting Guidance on CBR, Hydro One proposes to dispose of \$4.3 million through a CBR Class B variable rider among all non-WMP class B customers for the entire Custom IR period. The forecast balance of the CBR Class A account is \$0 and as such, no disposition is required.

**1.2 Disposition Period**

Hydro One is proposing to dispose of its deferral and variance account balances over a five year period in order to smooth rate changes and mitigate bill impacts for customers. Due to the proposed disposition period material rate riders are not produced for all rate classes, as defined in the Board's Filing Requirements<sup>1</sup>. Hydro One submits that if the rider calculations were based on a one-year disposition period, the resulting riders would have been above the Board's defined thresholds. For the purpose of this application,

---

<sup>1</sup> Section 2.8 and 2.9.5, Chapter 2 of the Board's Filing Requirements for Electricity Distribution Rate Applications

- 1 Hydro One proposes to seek disposition of the balances using fixed riders rounded to 2
- 2 decimal places and variable riders rounded to 5 decimal places.

**DETERMINATION OF RATE RIDERS**

1

2

3 This exhibit has been filed separately in MS Excel.

## **BILL IMPACT AND MITIGATION**

### **1. DISTRIBUTION AND TOTAL BILL IMPACTS**

Hydro One is committed to aligning customer preferences, compliance and condition needs of the system, and rate impacts in this current rate Application. This Exhibit shows in detail the impact that Hydro One's plan will have on a customer's bill. Tables 1 and 2 provide a summary of the distribution and total bill impacts by rate class for a range of customer consumption levels.

A detailed calculation of the impacts by bill component for each rate class, as per the Board's Filing Requirements for Electricity Distribution Rate Applications (revised on July 14, 2016), Chapter 2, section 2.8.11, is provided in Attachments 1 to 5. As per the Board's Filing Requirements, the bill impacts include the impact of all changes to delivery related items (i.e. base fixed and volumetric distribution rates, riders, RTSR, losses) while holding constant the commodity, regulatory charges (i.e., wholesale market service rate, rural rate protection charge) and other government specified items on the bill (i.e., Debt Retirement Charge, and the Ontario Rebate for Electricity Consumers (OREC) program's 8% Provincial Rebate).

Average consumption level = Total Rate Class Consumption / Total Number of customers in Rate Class/12

Witness: Henry Andre

1     **2.     RURAL OR REMOTE RATE PROTECTION (“RRRP”)**

2  
3     In November 2016, the Ontario Government amended O. Reg. 442/01 to increase the amount  
4     of RRRP rate protection for eligible rural Hydro One customers from \$127 million to \$243.4  
5     million. This increase became effective January 1, 2017. This additional funding increased  
6     the monthly RRRP fixed charge credit for R2 customers from \$31.50 to \$60.50. As  
7     required by the amendment to O.Reg. 442/01, the level of RRRP funding is to be adjusted  
8     each year. In this Application, Hydro One has estimated a 2018 RRRP funding amount  
9     of \$250.6 million by applying an annual RRRP adjustment factor of 2.96%<sup>1</sup> to the 2017  
10    RRRP amount of \$243.4 million. The resulting estimated monthly RRRP credit for R2  
11    customers is \$63.59<sup>2</sup>.

12  
13   The 2018 RRRP rate protection amount will be updated when Hydro One prepares the  
14   2018 Draft Rate Order and after the Board issues the final 2018 adjustment factor. A  
15   similar process will take place in subsequent years over the Custom IR period as part of  
16   the annual process for approving future rates. The estimated RRRP credit is used for  
17   illustrative purposes when calculating the bill impacts presented in the Application  
18   throughout the Custom IR period.

19  
20   **3.     RATE IMPACT MITIGATION**

21  
22   The total bill impacts across most rate classes resulting from the revenue requirement,  
23   regulatory asset disposition and rate harmonization requested in this Application are

---

<sup>1</sup> The annual RRRP adjustment factor of 2.96% is based on the Board’s Decision on Algoma Power Inc.’s 2017 distribution rate application (EB-2016-0055), which used the same approach for determining the adjustment factor as is proposed in O.Reg 442/01 for calculating the adjustment to the RRRP subsidy amount.

<sup>2</sup> Estimated 2018 RRRP amount = \$250.6 million, Forecast number of R2 customers in 2018 = 328,410, Estimated monthly credit = \$250.6M/328,410/12 = \$63.59

Witness: Henry Andre

1 below the 10% value established by the Board in the *2006 Electricity Distribution Rate*  
2 *Handbook* for customers with typical consumption. As a result, no bill impact mitigation  
3 is required.

4  
5 As discussed below, the classes for which some form of mitigation is required are: i)  
6 DGen customers in 2018-2019; ii) AUGe, AUGd, AGSe and AGSd customers in 2021-  
7 2022; and iii) Street Light, Sentinel Light and USL customers from the Acquired  
8 Utilities.

9  
10 **DGen Customers:**

11 As discussed in Exhibit H1, Tab 1, Schedule 1, Section 2.2, Hydro One proposes to phase  
12 in the R/C ratio of the DGen class from 0.61 in 2017 to within the Board approved range  
13 in 2020 while limiting the total bill impact for a typical DGen customer to no more than  
14 10% per year. No further mitigation beyond phasing-in of the Revenue to Cost ratios  
15 (“R/C ratios”) is required for the DGen rate class.

16  
17 **AUGe, AUGd, AGSe and AGSd Customers:**

18 As discussed in Exhibit H1, Tab 1, Schedule 1, Section 2.2, Hydro One proposes to move  
19 the R/C ratios for the new acquired AUGe, AUGd, AGSe and AGSd classes to within the  
20 Board’s approved range in a manner that limits either the total distribution impacts or  
21 total bill impacts to a level that is consistent with Hydro One customers in similar rate  
22 classes. This approach will result in total bill impacts well below the 10% total bill  
23 impact threshold specified in the Board’s Filing Requirements, and as such, no further  
24 rate mitigation is required for these classes.

1 **Street lights, Sentinel lights and USL Customers from acquired utilities**

2 As discussed in Exhibit G1, Tab 2, Schedule 1, Street light, Sentinel light and USL  
3 customers from the Acquired Utilities will be integrated into the corresponding existing  
4 Hydro One rate classes in 2021.

5  
6 Some of Woodstock Hydro's Street Light and USL customers, Norfolk Power's Street  
7 Light, Sentinel Light and USL customers, and Haldimand County Hydro's Street Light  
8 and USL customers would experience total bill impacts in excess of 10% in 2021 due to  
9 being integrated into the Hydro One rate classes. Hydro One proposes a rate mitigation  
10 plan to limit total bill impacts to 10%, as follows:

- 11
- 12 • The bills will be calculated normally but a bill credit will be applied to each affected  
13 customer to limit the total bill impact to 10%.
  - 14 • For each affected customer, the bill credit will be calculated before January 1, 2021,  
15 based on the average monthly consumption level during the previous twelve months.  
16 The same monthly credit will be applied to all bills for the year.
  - 17 • The bill credit calculation will be an annual exercise (before January 1 of each year,  
18 commencing in 2021), until the total bill impact is less than 10% per year.
- 19

20 An illustrative calculation of the monthly mitigation credit for an average customer in  
21 each of the affected classes is provided in Table 3 below.

**Table 3: Illustrative Monthly Mitigation Credit for Acquired Street Light, Sentinel Light and Unmetered customers in 2021 and 2022**

			2021					2022		
Rate Class	Monthly Consumption (kWh)	2020 Total Bill (\$)	2021 Total Bill without Mitigation Credit (\$)	Change in Total Bill (\$)	Change in Total Bill (%)	Mitigation Credit to Cap Total Bill Impact @ 10% (\$)	2021 Total Bill including Mitigation Credit (\$)	2022 Total Bill without Mitigation Credit (\$)	Mitigation Credit to Cap Total Bill Impact @ 10% (\$)	2022 Total Bill including Mitigation Credit (\$)
		a	b			c = b - (a * 1.1)	d = b - c	e	f = e - (d * 1.1)	g = e - f

The costs of this mitigation and related implementation will be tracked in a Bill Impact Mitigation variance account, as described in Exhibit F1, Tab 3, Schedule 1. The required mitigation will apply in 2021 and 2022 and will likely extend beyond the custom IR period in 2023 and 2024 for some customers. The total mitigation credit for these acquired customers is estimated at approximately \$3 million for the period 2021 to 2022, and \$0.5 million for the period 2023 to 2024.

Witness: Henry Andre

## **LOSS FACTORS**

### **1. INTRODUCTION**

The Total Loss Factors (“TLF”) are used to uplift, or adjust, the customers’ Commodity, Retail Transmission Service Rate, Wholesale Market Service, and Rural Rate Protection charges to the wholesale level at which Hydro One settles these charges with the IESO. Debt Retirement and Distribution charges are not subject to loss adjustments.

For energy-billed customers, Board guidelines dictate that loss adjustments be applied to metered or estimated energy billing quantities. For demand-billed customers, loss adjustments are applied to the corresponding demand-billed tariffs and the billed quantities used are the metered quantities.

Hydro One proposes to continue to use the TLFs approved by the Board in EB-2013-0416 for all existing Hydro One rate classes for the 2018 to 2022 Custom IR period. For the six new acquired rate classes, Hydro One proposes new TLFs post harmonization in 2021 and 2022. All proposed and current TLFs are listed in Table 1 and Table 2 below.

### **2. TOTAL LOSS FACTORS FOR THE NEW ACQUIRED RATE CLASSES**

Hydro One proposes new TLFs for the six new acquired rate classes. Table 1 shows the proposed TLFs by rate class for the period 2021 to 2022.

The Acquired Utilities (Woodstock Hydro, Norfolk Power and Haldimand County Hydro) were integrated into the Hydro One distribution system in 2015 and 2016 and they now share the same bulk (sub-transmission or ST) assets that deliver electricity to all customers in other existing Hydro One rate classes. As such, Hydro One proposes that

Witness: Henry Andre

1 these six acquired rate classes share the same “bulk loss” as other existing Hydro One  
2 rate classes starting 2021. The current “bulk” loss factor for Hydro One existing customer  
3 classes is 3.4%.

4  
5 After “bulk” assets, “local” distribution assets are used to deliver electricity to customers  
6 from these acquired utilities. Hydro One proposes no change to the existing loss factors  
7 for these “local” assets because: (i) most of these assets will continue to deliver electricity  
8 solely to the acquired customers; and (ii) there has not been any significant change with  
9 these local assets.

10  
11 Urban Acquired Classes (AUR, AUGe, AUGd)

12 The proposed new TLFs were derived by replacing the existing Woodstock Hydro  
13 estimated “bulk loss” by the Hydro One “bulk loss”. Other components of the TLFs are  
14 unchanged from the current Board-approved Woodstock Hydro TLFs.

15  
16 Mixed Density Acquired Classes (AR, AGSe, AGSd)

17 These new rate classes are comprised of customers from former Norfolk Power and  
18 Haldimand County Hydro, which each had different existing Board-approved TLFs. As  
19 such, Hydro One proposes to use a “kWh weighted average” approach to estimate an  
20 average TLF for these new classes.

21  
22 Each individual utility’s TLFs were revised by replacing the existing utility’s estimated  
23 “bulk loss” with the Hydro One “bulk loss”. The final TLF for the new classes was then  
24 determined by applying the “weighted average” approach to the revised TLFs for each  
25 individual distributor.

### 3. TOTAL LOSS FACTORS FOR THE EXISTING HYDRO ONE RATE CLASSES

Hydro One proposes to continue to use the TLFs approved by the Board (as per EB-2013-0416) for all existing Hydro One rate classes for the 2018 to 2022 Custom IR period. Hydro One's existing TLFs are based on the results of a line loss study that was submitted in EB-2013-0416. Given the short period of time that has elapsed since the completion of that study and also given the consistent average historical Hydro One total loss factor, as discussed in Section 6 of this Exhibit, Hydro One did not expect a material change to the existing loss factors and, as such, did not seek an updated study in preparation for the filing of this Application.

As discussed in Exhibit G1, Tab 2, Schedule 1, Hydro One proposes that customers from the Acquired Utilities in the Unmetered Scattered Load Service Class, Street Lighting Service Class, Sentinel Lighting Service Class, General Service Class and, those that meet the Hydro One Sub-Transmission Class requirements be merged into the corresponding Hydro One rate classes in 2021. The number of customers and load of these new additions are small as compared to the number of customers and load of the existing Hydro One rate classes. As such, it is expected that these acquired customers will not materially impact the existing TLFs and therefore no change is proposed.

**Table 1: Loss Factors**

Customer Class	DLF %	TLF%	DLF %	TLF%
	Proposed (2018 to 2022, same as current Board Approved)		Current Board Approved	
R1	7.0	7.6	7.0	7.6
R2	9.9	10.5	9.9	10.5
UR	5.1	5.7	5.1	5.7
Seasonal	9.8	10.4	9.8	10.4
GSe	9.0	9.6	9.0	9.6
GSd	5.5	6.1	5.5	6.1
UGe	6.1	6.7	6.1	6.7
UGd	4.4	5.0	4.4	5.0
ST	0* or 2.8	0.6* or 3.4	0* or 2.8	0.6* or 3.4
Street Lights	8.6	9.2	8.6	9.2
Sentinel Lights	8.6	9.2	8.6	9.2
USL	8.6	9.2	8.6	9.2
DGen	5.5	6.1	5.5	6.1
	Proposed (2021 to 2022)		Current Board Approved	
AUR	5.1	5.7	N/A	N/A
AUGe	5.1	5.7	N/A	N/A
AUGd	4.1	4.7	N/A	N/A
AR	6.1	6.7	N/A	N/A
AGSe	6.1	6.7	N/A	N/A
AGSd	5.0	5.6	N/A	N/A

\*Express feeder

Supply Facility Loss Factor ("SFLF") = 0.6%

Distribution Loss Factor ("DLF") + SFLF = Total Loss Factor ("TLF")

NOTE: Starting 2021, the proposed treatment for the different loss factors listed for primary metered and secondary metered customers in the acquired utilities' currently approved tariff schedules is reflected in the application of transformer loss allowance, which is discussed in Section 5.

Witness: Henry Andre

**Table 2: Acquired Utilities' Current Board-Approved Loss Factors**

Norfolk Power	DLF %	TLF%
Res	5.0	5.6
GS < 50 kW	5.0	5.6
GS > 50 kW	5.0	5.6
Street Lights	5.0	5.6
Sentinel Lights	5.0	5.6
USL	5.0	5.6
Haldimand County Hydro	DLF %	TLF%
Res	6.0	6.6
GS < 50 kW	6.0	6.6
GS > 50 kW	6.0	6.6
Street Lights	6.0	6.6
Sentinel Lights	6.0	6.6
USL	6.0	6.6
Woodstock Hydro	DLF %	TLF%
Res	3.7	4.3
GS < 50 kW	3.7	4.3
GS 50 to 999 kW	3.7	4.3
GS > 1,000 kW	3.7	4.3
Street Lights	3.7	4.3
USL	3.7	4.3

Supply Facility Loss Factor ("SFLF") = 0.6%

Distribution Loss Factor ("DLF") + SFLF = Total Loss Factor ("TLF")

NOTE: TLFs are shown for Secondary Metered Customers < 5,000 kW. For details regarding applicable losses for Primary Metered Customers and Secondary Metered Customers > 5,000 kWh, please see the current tariff schedules approved by the OEB in EB-2016-0082.

#### **4. SUPPLY FACILITY LOSS FACTOR**

As approved under Hydro One's previous rate applications (EB-2013-0416 and EB-2009-0096), Hydro One proposes that in situations in which a customer's metering is at the supplying Transmission Station ("TS") or High-Voltage Distribution Station ("HVDS"), either inside the fence or immediately outside the fence, that only the losses associated with the transformation at the station be applied (i.e. the approved Supply Facility Loss

Witness: Henry Andre

Factor). For situations in which a feeder delivers to solely one supply point (i.e. express feeders<sup>1</sup>), and the metering is located away from the supplying station, applicable losses should be calculated based on engineering studies provided by the customer. Hydro One will add non-technical losses to the calculated technical losses, consistent with the non-technical losses inherent in the existing Distribution Loss Factors.

There are situations in which there is no metering at the customer supply point, and quantities are calculated by taking the differences between other metering (for example, feeder total minus the only other customer on the feeder). As previously approved under EB-2013-0416 and EB-2009-0096, in such situations losses are applied to the meter quantities separately, prior to calculating the differences, in order to avoid the potential double-counting of feeder losses that could occur if the Distribution Loss Factors was applied to the difference in metering quantities.

## **5. TRANSFORMER LOSS ALLOWANCE**

A transformer loss allowance is applicable to non-ST customers that are metered on the primary side of a transformer. The following uniform values shall be applied to reduce measured demand and energy to adjust for transformer losses for voltages up to and including 50 kV (as metered on the primary side):

- a) 1.5% for transformer installations up to an individual bank capacity of 400 kVA; and
- b) 1.0% for bank capacities over 400 kVA.

---

<sup>1</sup> Feeder used by only one customer

1 A transformer loss allowance is applicable to ST customers that are metered on the  
2 secondary side of a transformer. The following uniform value shall be applied to  
3 increase measured demand and energy (as metered on the secondary side) to adjust for  
4 transformer losses:

5  
6 a) 1.0%

7  
8 Alternatively, transformer losses may be determined from transformer test data, and  
9 measured demand and energy adjusted accordingly.

10  
11 **6. HISTORICAL LOSS FACTORS**

12  
13 As required by Appendix 2-R of the Filing Requirements, Appendix 1 to this Exhibit  
14 provides Hydro One's overall historical loss data for 2012 to 2016. The calculated 5-year  
15 average historical loss factor of 8.3% is consistent with the average loss factor across all  
16 Hydro One rate classes based on the currently approved loss factors for each rate class.

1

## Appendix 1

### Appendix 2-R Loss Factors

		Historical Years					5-Year Average
		2012	2013	2014	2015	2016	
	Losses Within Distributor's System						
A(1)	"Wholesale" kWh delivered to distributor (higher value)	22,890,429,091	22,806,492,445	21,974,163,833	20,400,925,934	18,305,442,849	21,275,490,830
A(2)	"Wholesale" kWh delivered to distributor (lower value)	25,051,498,409	25,729,629,909	25,786,233,670	25,387,400,976	25,016,328,881	25,394,218,369
B	Portion of "Wholesale" kWh delivered to distributor for its Large Use Customer(s)	5,227,127,893	4,994,576,266	5,222,354,008	5,112,496,184	5,212,527,082	5,153,816,286
C	Net "Wholesale" kWh delivered to distributor = A(2) - B	19,824,370,516	20,735,053,643	20,563,879,663	20,274,904,792	19,803,801,799	20,240,402,083
D	"Retail" kWh delivered by distributor	23,897,414,445	23,642,334,049	23,801,736,455	23,746,974,037	23,400,160,662	23,697,723,930
E	Portion of "Retail" kWh delivered by distributor to its Large Use Customer(s)	5,077,998,035	4,852,081,101	5,073,360,349	4,966,636,767	5,063,813,785	5,006,778,007
F	Net "Retail" kWh delivered by distributor = D - E	18,819,416,410	18,790,252,948	18,728,376,106	18,780,337,270	18,336,346,876	18,690,945,922
G	Loss Factor in Distributor's system = C / F	1.0534	1.1035	1.0980	1.0796	1.0800	1.0829
Losses Upstream of Distributor's System							
H	Supply Facilities Loss Factor	1.0250	1.0250	1.0250	1.0250	1.0250	1.0250
Total Losses							
I	Total Loss Factor = G x H	1.0797	1.1311	1.1255	1.1066	1.1070	1.1100

#### Notes:

- A(1)** If directly connected to the IESO-controlled grid, kWh pertains to the virtual meter on the primary or high voltage side of the transformer at the interface with the transmission grid. This corresponds to the "With Losses" kWh value provided by the IESO's MV-WEB. It is the higher of the two values provided by MV-WEB.
- If fully embedded within a host distributor, kWh pertains to the virtual meter on the primary or high voltage side of the transformer, at the interface between the host distributor and the transmission grid. For example, if the host distributor is Hydro One Networks Inc., kWh from the Hydro One Networks' invoice corresponding to "Total kWh w Losses" should be reported. This corresponds to the higher of the two kWh values provided in Hydro One Networks' invoice.
- If partially embedded, kWh pertains to the sum of the above.
- A(2)** If directly connected to the IESO-controlled grid, kWh pertains to a metering installation on the secondary or low voltage side of the transformer at the interface with the transmission grid. This corresponds to the "Without Losses" kWh value provided by the IESO's MV-WEB. It is the lower of the two kWh values provided by MV-WEB.
- If fully embedded with the host distributor, kWh pertains to a metering installation on the secondary or low voltage side of the transformer at the interface between the embedded distributor and the host distributor. For example, if the host distributor is Hydro One Networks Inc., kWh from the Hydro One Networks' invoice corresponding to "Total kWh" should be reported. This corresponds to the lower of the two kWh values provided in Hydro One Networks' invoice.
- If partially embedded, kWh pertains to the sum of the above.
- Additionally, kWh pertaining to distributed generation directly connected to the distributor's own distribution network should be included in **A(2)**.
- B** If a Large Use Customer is metered on the secondary or low voltage side of the transformer, the default loss is 1% (i.e.,  $B = 1.01 \times E$ ).
- D** kWh corresponding to D should equal metered or estimated kWh at the customer's delivery point.
- G and I** These loss factors pertain to secondary-metered customers with demand less than 5,000 kW.
- H** If directly connected to the IESO-controlled grid, SFLF = 1.0045.
- If fully embedded within a host distributor, SFLF = loss factor re losses in transformer at grid interface X loss factor re losses in host distributor's system. If the host distributor is Hydro One Networks Inc., SFLF =  $1.0060 \times 1.0278 = 1.0340$ . If partially embedded, SFLF should be calculated as the weighted average of above.
- Distributors that wish to propose a different SFLF should provide appropriate justification for any such proposal including supporting calculations and any other relevant material.
