I would like to express my concern about the increase that Hydro One's current application for distribution increases. The first thing that comes to mind is this is another attack on the rural residence and businesses in Ontario.

Then there is the fact that the increase would really affect the seniors with a fixed income and what is it going to do to the small businesses they are getting hit with a 32% increase to wages and our hydro rates have doubled it is putting many of small businesses out of business, it is also driving our larger businesses out of the country. Ontario hydro is the most expensive hydro in Canada and we received a promise from our government that there would be a rate cut this summer but instead they are up to their old tricks and trying to get more money from this application. Very discouraged Ontario rate payer.
